119

PREFACE.

By the Constitution of the Commonwealth of Australia, the Commonwealth is empowered "to make laws for the peace, order, and good government of the Commonwealth, with respect to," *inter alia*, "Census and Statistics." In the exercise of the power so conferred, a "Census and Statistics Act" was passed in 1905, and in the year following the "Commonwealth Bureau of Census and Statistics" was created. The first Official Year Book was published early in 1908. The publication here presented is the fourteenth Official Year Book issued under the authority of the Commonwealth Government.

The inclusion of the total available information in the more important branches of statistics enables this publication to be used wherever it is desired to make a comparative survey of the evolution of this portion of the British Empire. Not only are the results given for the Commonwealth as a whole, but also for each State therein.

The general arrangement of the work, which has received wide approval, corresponds with that of previous issues, and is shewn in the synopsis on pp. xi. to xxvii. immediately following.

In addition, however, to what may be called purely statistical matter, each issue contains special articles dealing at length with some particular subject or subjects of more or less permanent interest. These cannot of course be repeated year after year, but in some instances a brief condensation is given in subsequent issues. Though many articles in Year Books Nos. 1 to 13 have been reduced to synopses or deleted, sufficient indication is given to enable the subject to be traced in previous issues.

The present issue contains a specially-contributed article dealing with "Evidences of Past Volcanic Action in Australia," and it may be read in conjunction with articles dealing with the geology and physical features of the continent, which appeared in previous issues.

Amongst new matter incorporated in the various Sections, mention may be made (i) of the conspectus of Income Tax, Land Tax, and Succession Duty Acts of the Commonwealth and States, which appears at the end of Section XX., State Finance, and (ii) of the conspectus of State Acts relating to Diseases in Stock and Plants, and to Noxious Animals and Weeds, appearing at the end of Section XXXIV., Miscellaneous. In addition, a chapter is devoted to the mandated territory of New Guinea (Section XXIX.—New Guinea) with a map of Papua, the territory of New Guinea, and adjacent islands included in the Mandate. Section IV., Population, has been printed in this issue after "Miscellaneous," in order to permit of the incorporation of the latest available information relating to the Census of 1921. A synopsis of the activities of the Agricultural and Stock Departments of the States appears in the Appendix.

The subject matter throughout is dealt with, as far as possible, from the following points of view, viz. :—

(i) The development of the individual States. (ii) The progress of Australia as a whole from the earliest times. (iii) The statistical comparison of Australia with other leading countries of the world.

The full text of the Commonwealth Constitution Act and Amendments appears on pages 8 to 26.

The development of Australia has been in many instances very remarkable, and this could be shewn only by tables and graphs dating back to its beginning in 1788. In most cases accurate data are not available for years much before 1860. In such cases, therefore, it would appear sufficient at present to give continuous results from that year onwards.

The great mass of material embodied in each Year Book is always carefully examined, but it would be idle to hope that all error has been avoided. The Commonwealth Statistician desires to express appreciation of the opportunity afforded him of perfecting the matter of the Year Book, by those who have been kind enough to point out defects or make suggestions.

The corresponding years indicated in various sections of this book do not always necessarily refer to the same period, the year ending in some cases on 31st December, 30th June, 31st March, etc. The precise period for which returns are given is indicated where necessary.

Recent information or returns which have come to hand since the various Sections were sent to press may be found in the Appendix, p. 1179.

It is desired to express cordial thanks to the State Statisticians, to the responsible officers of the various Commonwealth and State Departments, and to others, who have kindly, and often at considerable trouble, supplied all desired information.

Mr. G. H. Knibbs, having been appointed Director of the Institute of Science and Industry of the Commonwealth, and having assumed the duties of that position during the currency of the present year, the Year Book has been continued on the lines laid down by him in the previous issues.

JOHN STONHAM,

Editor of the Commonwealth Official Year Book.

COMMONWEALTH BUREAU OF CENSUS AND STATISTICS,

Melbourne, 30th November, 1921.

INDEX TO SPECIAL ARTICLES, ETC., APPEARING IN PREVIOUS ISSUES.

These articles have appeared in former issues of the Commonwealth Year Book, but, owing to exigencies of space, they are not included in this publication.

NOTE.—The Roman figures indicate the number of the Year Book to which reference is made.

§ 2. Horses—		2. Greasy and Scoured Wool	228
1. Suitability of Australia for Horse-breeding	215	3. Total Production	228
2. Distribution throughout the C'wealth ..	215	4. Wool Locally Used	229
3. Proportion in the several States	216	5. Bounties on Combed Wool or Tops Exported	229
4. Oversea Export Trade in Horses	216	6. Exports of Wool	230
5. Comparison with other Countries	218	7. Care needed in Comparing Clips	231
6. Relation to Population	219	8. Wool-producing Countries in Southern Hemisphere	231
§ 3. Cattle—		9. United Kingdom Importation of Wool	232
1. Purposes for which Raised	219	10. The Wool Market	232
2. Distribution throughout C'wealth	219	§ 6. Hides and Sheepskins—	
3. Proportion in each State	220	1. Extent of Trade	240
4. Imports and Exports of Cattle	221	2. Sheepskins with Wool	240
5. Cattle Slaughtered	221	3. Sheepskins without Wool	243
6. Export of Beef preserved by Cold Process	222	4. Hides	244
7. Comparison with other Countries	223	§ 7. Graphical Representation of Pastoral Production—	
8. Relation to Population	223	1. General	245
§ 4. Sheep—		2. Horses	245
1. The Founding of the Commonwealth Pastoral Industry	223	3. Cattle	245
2. Distribution throughout C'wealth	224	4. Sheep	245
3. Proportion in the several States and Territories	224	5. Figs	246

SECTION VIII.—AGRICULTURAL PRODUCTION.

§ 1. Introductory—		§ 2. Progress of Agriculture—<i>continued.</i>	
1. Early Attempts at Agriculture	247	4. Relation to Total Area	249
2. The First Sowing	247	5. Artificially-sown Grasses	249
3. Discovery of Suitable Agricul. Land ..	247	§ 3. Relative Importance of Crops—	
§ 2. Progress of Agriculture—		1. Distribution of Crops	250
1. Early Records	247	2. Relative Areas of Crops in States and Territories	250
2. Progress of Cultivation since 1860 ..	248	3. Relative Positions of States and Territories in regard to Crops ..	251
3. Relation to Population	248	4. Acreage of Principal Crops, Cwlt. 252	

SECTION VIII.—AGRICULTURAL PRODUCTION—*continued.*

	PAGE		PAGE
§ 4. Wheat—		§ 13. Sugar Cane—	
1. Progress of Wheat-growing ..	252	1. Area ..	282
2. Australian & Foreign Wheat Yields ..	254	2. Productive and Unproductive Cane ..	283
3. Wheat Crops of the World ..	255	3. Yield of Cane and Sugar ..	284
4. Prices of Wheat ..	256	4. Average Yields of Cane and Sugar per Acre ..	284
5. Imports & Exports of Wheat & Flour ..	256	5. Quality of Cane ..	284
6. Value of the Wheat Crop ..	259	6. Relation to Population ..	285
7. The Australian Wheat Marketing Scheme ..	259	7. Sugar Bounties ..	285
§ 5. Oats—		8. Sugar Purchase by Commonwealth Government ..	285
1. Progress of Cultivation ..	262	9. Beet Sugar ..	286
2. Total Yield ..	262	10. Acreage and Yield of Sugar Beet ..	286
3. Average Yield ..	263	11. Imports and Exports of Sugar ..	286
4. Relation to Population ..	263	§ 14. Vineyards—	
5. Value of Oat Crop ..	263	1. Nature and Extent ..	287
6. Imports and Exports ..	264	2. Wine Production ..	287
7. Oatmeal, etc. ..	264	3. Relation to Population ..	288
8. Comparisons with other Countries ..	264	4. Imports and Exports ..	288
9. Comparison of Yields ..	265	5. Other Viticultural Products ..	289
10. Price of Oats ..	265	6. Imports and Exports ..	290
§ 6. Maize—		§ 15. Orchards and Fruit Gardens—	
1. States Growing Maize ..	265	1. Nature and Extent ..	290
2. Area under Maize ..	265	2. Relation to Population ..	291
3. Total Yield ..	266	3. Commonwealth Imports & Exports ..	292
4. Average Yield ..	266	4. Jams and Jellies ..	293
5. Value of Maize Crop ..	267	5. Preserved Fruit ..	293
6. Relation to Population ..	267	§ 16. Minor Crops—	
7. Australian and Foreign Maize Production ..	267	1. Nature and Extent ..	293
8. Comparison of Yields ..	267	2. Market Gardens ..	293
9. Oversea Imports and Exports ..	268	3. Grass Seed ..	294
10. Prepared Maize ..	268	4. Tobacco ..	294
11. Price of Maize ..	268	5. Pumpkins and Melons ..	294
§ 7. Barley—		6. Hops ..	294
1. Area under Barley ..	269	7. Flax ..	295
2. Total Yield ..	269	8. Millet ..	295
3. Malting and other Barley ..	270	9. Nurseries ..	295
4. Total Acreage and Yield ..	270	10. Cotton ..	296
5. Value of Barley Crop ..	271	11. Coffee ..	296
6. Relation to Population ..	271	12. Other Crops ..	296
7. Commonwealth Imports & Exports ..	271	§ 17. Bounties on Agricultural Products—	
8. C'wealth Imports & Exports of Malt ..	272	1. General ..	296
9. Comparison with other Countries ..	272	2. Bounties Paid ..	297
10. Average Yield of Barley per acre in various Countries ..	273	§ 18. Fertilizers—	
11. Average Yield ..	273	1. General ..	297
12. Price of Barley ..	273	2. Fertilizers Acts ..	297
§ 8. Other Grain and Pulse Crops ..	274	3. Imports ..	297
§ 9. Potatoes—		4. Exports ..	298
1. Area ..	274	5. Statistics of Use of Fertilizers ..	298
2. Total Yield ..	277	6. Local Production of Fertilizers ..	300
3. Average Yield per Acre ..	277	7. Benefits Derived from the Use of Fertilizers ..	300
4. Value of Potato Crop ..	277	§ 19. Ensilage—	
5. Relation to Population ..	278	1. Value to Stockowners ..	300
6. Commonwealth Imports & Exports ..	278	2. Government Assistance in the Production of Ensilage ..	301
§ 10. Other Root and Tuber Crops—		3. Quantity made ..	301
1. Nature and Extent ..	278	§ 20. Agricultural Colleges and Experimental Farms—	
2. Commonwealth Imports & Exports ..	278	1. Introduction ..	302
§ 11. Hay—		2. Particulars of Agricultural Colleges and Experimental Farms ..	302
1. Nature and Extent ..	279	§ 21. Government Loans to Farmers—	
2. Kinds of Hay ..	279	1. Introduction ..	302
3. Total Yield ..	280	2. Aggregate of Transactions in each State, 1917 to 1920 ..	303
4. Value of Hay Crop ..	281	3. Legislation in each State ..	303
5. Average Yield per Acre ..	281	4. Particulars Respecting Agricultural and Stock Departments ..	303
6. Relation to Population ..	281	§ 22. Graphical Representation of Crops—	
7. Oversea Imports and Exports ..	281	1. Areas of Principal Crops ..	303
8. Hay Production in other Countries ..	282	2. Production ..	303
§ 12. Green Forage—			
1. Nature and Extent ..	282		
2. Value of Green Forage Crops ..	282		
3. Relation to Population ..	282		

SECTION IX.—FARMYARD AND DAIRY PRODUCTION.

	PAGE		PAGE
§ 1. Introductory—		§ 5. Bee Farming—	
1. General	304	1. The Bee Farming Industry ..	312
2. Official Supervision of Industry ..	304	2. Production of Honey and Beeswax ..	313
3. Mixed Farming	304	3. Oversea Trade in Bee Products ..	314
4. Factory System	304		
5. Butter and Cheese Factories ..	305	§ 6. Summary of Australian Farmyard and Dairy Products	314
§ 2. Milk, Butter, and Cheese—		§ 7. Summary of Australian Farmyard and Dairy Products Exported, 1915-16 to 1919-20	315
1. Dairy Herds	305		
2. Milk	305	§ 8. British Imports of Dairy Products—	
3. Butter and Cheese	306	1. Value of Britain's Imports of Dairy Products	316
4. Concentrated Milk	307	2. Butter	316
5. Oversea Trade in Milk, Butter, and Cheese	307	3. Cheese	316
6. Local Consumption of Butter and Cheese	308	4. Bacon and Ham	316
§ 3. Pigs, Bacon, etc.—		5. Pork	316
1. Pigs	308	6. Other Products	316
2. Bacon and Ham	308		
3. Oversea Trade in Pig Products ..	309	§ 9. Graphical Representation of Dairy Production	316
4. Local Consumption of Bacon and Ham	310		
5. Total Dairy Production	310		
§ 4. Poultry Farming—			
1. Development of the Industry ..	311		
2. Poultry Products	311		
3. Oversea Trade in Poultry Products ..	312		

SECTION X.—FORESTS, FORESTRY, AND FORESTAL PRODUCTS.

§ 1. The Forests of Australia—		§ 3. Commercial Uses of Principal Australian Timbers—	
1. Extent of Forests	317	1. General	320
2. Distribution of Timber	318	2. Uniformity in Nomenclature ..	320
§ 2. Forestry—		§ 4. Forestal Industries and Production—	
1. Objects	318	1. Timber	321
2. Forestry Departments	318	2. Other Forest Produce	321
3. Silvicultural Nurseries and Plantations	319	§ 5. Oversea Trade—	
4. Revenue and Expenditure	319	1. Imports	321
5. Instruction in Scientific Forestry ..	320	2. Exports	322
6. Forest Congresses	320		

SECTION XI.—FISHERIES AND PISCICULTURE.

§ 1. Commercial Fisheries—		§ 5. The Commonwealth Department of Fisheries—	
1. Fish Stocks	327	1. The Federal Council of Australasia ..	333
2. Economic Fisheries	327	2. Commonwealth Investigations ..	333
3. Distribution of Supplies	327	3. Scope of the Inquiry	333
4. Oyster Fisheries	327	4. The F.I.S. <i>Endeavour</i>	333
5. Pearl-shelling, etc.	327	5. Trawling Grounds discovered by the <i>Endeavour</i>	333
§ 2. Fisheries Statistics—		6. The Continental Shelf	333
1. Estimates for the Commonwealth ..	328	7. Publications of the Commonwealth Fisheries Department ..	334
§ 3. Oversea Trade in Fish	331	§ 6. The State Trawling Industry.—New South Wales	335
§ 4. Development of the Fishing Industry—		§ 7. Fish Preserving	335
1. Transport and Marketing	332		
2. Experiment and Culture	332		
3. Consumption of Fish	332		

SECTION XII.—MINES AND MINING.

	PAGE		PAGE
§ 1. The Mineral Wealth of Australia—		(B) NON-METALLIC MINERALS.	
1. Place of Mining in Australian Development ..	336	§ 10. Coal—	
2. Extent of Mineral Wealth ..	336	1. Production in each State ..	363
3. Quantity and Value of Production during 1919 ..	336	2. Distribution and Quantity of Coal in each State ..	364
4. Total Production to end of 1919 ..	338	3. Production of Coal in various Countries ..	368
(A) METALLIC MINERALS.		4. Export of Coal ..	368
§ 2. Gold—		5. Consumption of Coal in Australia ..	370
1. Discovery of Gold in various States ..	339	6. Price of Coal ..	370
2. Production of Gold at various Periods ..	339	7. Price of Coal in the United Kingdom ..	371
3. Changes in Relative Positions of States as Gold Producers ..	341	8. Employment and Accidents in Coal Mining ..	371
4. Methods of Gold Mining adopted in each State ..	341	§ 11. Coke—	
5. Remarkable Masses of Gold ..	345	1. Production of Coke ..	372
6. Modes of Occurrence of Gold in Aust. ..	345	§ 12. Oil Shale and Mineral Oils—	
7. Place of Commonwealth in the World's Gold Production ..	345	1. Production of Shale ..	375
8. Employment in Gold Mining ..	346	2. Export of Shale ..	376
§ 3. Platinum and the Platinoid Metals—		3. Shale Oils Bounties ..	376
1. Platinum ..	347	§ 13. Other Non-metallic Minerals—	
2. Osmium, Iridium, etc. ..	347	1. Alunite ..	379
§ 4. Silver—		2. Asbestos ..	376
1. Occurrence in each State ..	348	3. Barytes ..	377
2. Development of Silver Mining ..	348	4. Clays and Pigments ..	377
3. Chief Centres of Silver Production ..	349	5. Coorongite ..	377
4. World's Production of Silver ..	350	6. Fuller's Earth ..	377
5. Prices of Silver ..	350	7. Graphite ..	377
6. Employment in Silver Mining ..	351	8. Gypsum ..	378
§ 5. Copper—		9. Magnesite ..	378
1. Production of Copper ..	351	10. Tripolite or Diatomaceous Earth ..	378
2. Sources of Production ..	352	11. Salt ..	378
3. Prices of Copper ..	353	12. Natural Manures ..	379
4. World's Production of Copper ..	353	§ 14. Gems and Gemstones—	
5. Employment in Copper Mining ..	353	1. Diamonds ..	379
§ 6. Tin—		2. Sapphires ..	379
1. Production of Tin ..	354	3. Precious Opal ..	380
2. Sources of Production ..	354	4. Other Gems ..	380
3. World's Production of Tin ..	355	(C) GENERAL.	
4. Prices of Tin ..	356	§ 15. Numbers Engaged, Wages Paid, and Accidents in Mining—	
5. Employment in Tin Mining ..	356	1. Total Employment in Mining ..	381
§ 7. Zinc—		2. Wages Paid in Mining ..	381
1. Production of Zinc ..	356	3. Accidents in Mining, 1919 ..	382
2. Prices of Zinc ..	357	§ 16. State Aid to Mining—	
§ 8. Iron—		1. Introduction ..	382
1. General ..	357	2. New South Wales ..	382
2. Production of Iron ..	358	3. Victoria ..	382
§ 9. Other Metallic Minerals—		4. Queensland ..	382
1. Antimony ..	360	5. South Australia ..	383
2. Arsenic ..	360	6. Western Australia ..	383
3. Bismuth ..	360	7. Tasmania ..	383
4. Chromium ..	361	8. Northern Territory ..	383
5. Cobalt ..	361	§ 17. Commonwealth Government Control of Industrial Metals ..	388
6. Lead ..	361	§ 18. Estimated Metallic Contents of Ores, etc., Produced in Australia—	
7. Manganese ..	361	1. Local Production ..	384
8. Mercury ..	361	2. Metallic Contents of Ores, Concentrates, etc., Exported ..	384
9. Molybdenum ..	362		
10. Radium ..	362		
11. Tungsten ..	362		
12. Tantalum ..	363		
13. Uranium ..	363		

SECTION XIII.—MANUFACTURING INDUSTRIES.

§ 1. General—		§ 4. Factories Using Mechanical Power—	
1. Industrial Progress ..	385	1. Use of Mechanical Power ..	392
2. Defects in Industrial Statistics ..	386	§ 5. Numbers Employed in Australian Factories—	
3. Classification of Manufacturing Industries ..	387	1. Total Number Employed ..	395
§ 2. Number of Factories—		2. Classification of Numbers Employed in Factories in Commonwealth ..	396
1. General ..	388	3. Classification of Numbers Employed in each State, according to Class of Industry ..	397
§ 3. Factories Classified by Number of Employers—		4. Classification of Numbers Employed according to Nature of Employment ..	398
1. General ..	390	5. Outworkers ..	399

SECTION XIII.—MANUFACTURING INDUSTRIES—*continued.*

§ 6. Sex Distribution in Factories—	PAGE	§ 10. Individual Industries—	PAGE
1. Employment of Females in Factories ..	399	1. General ..	427
2. Distribution of Employees according to Sex ..	399	2. Tanning Industry ..	428
3. Rate of Variation for each Sex ..	401	3. Fellmongering and Wool-scouring ..	429
4. Ratio of Female Employment in Factories ..	402	4. Soap and Candle Factories ..	430
5. Employment of Females in Particular Industries ..	402	5. Saw Mills, etc. ..	432
§ 17. Child Labour in Factories—		6. Agricultural Implement Factories ..	433
1. Conditions of Child Labour ..	404	7. Engineering Works, Ironworks, and Foundries ..	434
2. Average Number of Children Employed in Factories ..	404	8. Railway and Tramway Workshops ..	435
3. Percentage of Children on Total Persons Employed ..	405	9. Smelting Works, etc. ..	436
4. Industries Employing Child Labour ..	405	10. Bacon-curing Factories ..	437
5. Apprenticeship ..	407	11. Butter, Cheese, and Condensed Milk Factories ..	439
§ 8. Amount of Wages Paid and Value of Production—		12. Meat and Fish Preserving, Ice and Refrigerating Works ..	441
1. Introduction ..	407	13. Biscuit Factories ..	442
2. Amount of Salaries and Wages Paid ..	407	14. Jam and Fruit Preserving, Pickles, Sauces, and Vinegar ..	442
3. Value of Fuel and Light used in Factories ..	414	15. Confectionery ..	444
4. Value of Raw Materials used in Factories ..	415	16. Flour Mills ..	445
5. Total Value of Output of Manufacturing Industries ..	417	17. Sugar Mills ..	446
6. Value of Production of Manufacturing Industries ..	419	18. Sugar Refineries ..	448
§ 9. Land, Buildings, Plant and Machinery—		19. Breweries ..	448
1. General ..	422	20. Distilleries ..	450
2. Value of Land and Buildings ..	423	21. Tobacco, Cigars, and Cigarettes ..	451
3. Value of Plant and Machinery ..	425	22. Woollen, Cotton, and Tweed Mills ..	452

SECTION XIV.—WATER CONSERVATION AND IRRIGATION.

§ 1. Artesian Water—	§ 2. Irrigation Schemes—
1. General ..	1. General ..
2. New South Wales ..	2. New South Wales ..
3. Victoria ..	3. Victoria ..
4. Queensland ..	4. Queensland ..
5. South Australia ..	5. South Australia ..
6. Western Australia ..	6. Western Australia ..
7. Northern Territory ..	7. Murray Waters ..

SECTION XV.—COMMERCE.

§ 1. Introductory—	§ 2. Commonwealth Legislation Affecting Foreign Trade— <i>continued.</i>
1. Constitutional Powers of Commonwealth in regard to Commerce ..	27. Tariff Board Bill ..
§ 2. Commonwealth Legislation Affecting Foreign Trade—	28. Customs Tariff (Industries Preservation) Bill ..
1. Customs Act 1901 ..	§ 3. Commonwealth Trade Commissioners ..
2. Customs Tariff Act 1902 ..	§ 4. Regulation of Trade during the War ..
3. Sea Carriage of Goods Act 1904 ..	§ 5. Method of Recording Imports and Exports—
4. Secret Commission Act 1905 ..	1. Value of Imports ..
5. Commerce (Trade Descriptions) Act 1905 ..	2. Value of Exports ..
6. Australian Industries Preservation Act 1906 ..	3. Records of Past Years ..
7. Customs Tariff 1906 ..	4. Ships' Stores ..
8. Customs Tariff (South African Preference) 1906 ..	§ 6. Oversea Trade—
9. Australian Industries Preservation Act 1907 ..	1. Total Oversea Trade ..
10. Customs Tariff 1908 ..	2. Alteration of Trade Year ..
11. Customs Tariff Amendment Act 1908 ..	3. Ratio between Exports and Imports ..
12. Australian Industries Preservation Act 1909 ..	§ 7. Direction of Trade—
13. Customs (Interstate Accounts) Act 1910 ..	1. Country of Shipment and Country of Origin ..
14. Australian Industries Preservation Act 1910 ..	2. Direct Imports according to Country of Shipment ..
15. Customs Act 1910 ..	3. Imports from the United Kingdom ..
16. Customs Tariff 1910 ..	4. Imports Shipped from British Possessions ..
17. Customs Tariff 1911 ..	5. Principal Imports, the Produce of British Possessions ..
18. Interstate Commission Act 1912 ..	6. Imports Shipped from Foreign Countries ..
19. Trading with the Enemy Act 1914 ..	7. Principal Imports, the Produce of Foreign Countries ..
20. Customs Act 1914 ..	8. Direction of Exports ..
21. Income Tax Assessment Act 1915, and Amendment thereto ..	9. Exports to the United Kingdom ..
22. Customs Tariff Validation Act 1917 ..	10. Principal Exports to British Possessions ..
23. Apple Bounty Act 1918 ..	11. Principal Exports to Foreign Countries ..
24. Customs Tariff Validation Act 1919 ..	
25. Customs Tariff of 1920 ..	
26. Customs Act of 1920 ..	

SECTION XV.—COMMERCE—*continued*.

	PAGE		PAGE
§ 8. Development of Export Trade to Eastern Countries—		§ 12. External Trade of Australia and other Countries—	
1. Trade with Eastern Countries ..	511	1. Essentials of Comparisons ..	523
§ 9. Trade of Commonwealth since Federation—		2. "Special Trade" of various Countries ..	524
1. Classified Summary of Australian Trade ..	517	3. External Trade as a Measure of Prosperity ..	524
§ 10. Movement of Specie and Bullion—		§ 13. Trade of the United Kingdom with Australia, compared with Competing Countries—	
1. Specie and Bullion ..	520	1. Proportion of Trade from United Kingdom and competing Countries ..	525
§ 11. Effects of Prices on the Values of Exports—		2. Preferential Tariff ..	531
1. Significance of Price in Totals ..	521	3. Preferential Tariffs of the British Empire ..	532
2. Effect of Prices ..	522	§ 14. Rates of Duty in Australia and other Countries ..	533

SECTION XVI.—SHIPPING.

§ 1. General—		§ 4. Vessels Built and Registered—	
1. Record of Shipping before Federation ..	535	1. Vessels Registered ..	543
2. Shipping since Federation ..	535	2. Vessels Built ..	544
3. Difficulties of Comparisons of Total Shipping ..	535	§ 5. Interstate Shipping—	
4. Present System of Record ..	535	1. Total Vessels and Tonnage ..	545
§ 2. Oversea Shipping—		2. Vessels engaged solely in Interstate Trade ..	547
1. Total Oversea Shipping ..	536	3. Total Interstate Movement of Shipping ..	548
2. Comparison with other Countries ..	537	4. Interstate and Coastal Services ..	549
3. Shipping Communication with various Countries ..	537	§ 6. Shipwrecks ..	550
4. General Trend of Shipping ..	537	§ 7. Commonwealth Government Shipping Activities—	
5. Nationality of Oversea Shipping ..	539	1. Local Building Programme ..	550
6. Tonnage in Ballast ..	542	2. Vessels Built and Building in Great Britain ..	551
§ 3. Shipping of Ports—		3. Commonwealth Government Line of Steamers ..	551
1. Shipping of Ports ..	543		

SECTION XVII.—ROADS AND RAILWAYS.

§ 1. Roads and Bridges—		§ 2. Railways— <i>continued</i> .	
1. Introduction ..	552	(B) FEDERAL RAILWAYS—	
2. Expenditure on Roads and Bridges ..	552	1. General ..	568
3. New South Wales ..	553	2. Trans-Australian Railway ..	568
4. Victoria ..	554	3. Oodnadatta Line ..	568
5. Queensland ..	556	4. Federal Territory Railway ..	568
6. South Australia ..	556	5. Northern Territory Railway ..	569
7. Western Australia ..	558	6. Summary of Federal Railways ..	569
8. Tasmania ..	559	7. Mileage Open for Traffic, etc. ..	569
§ 2. Railways—		8. Cost of Construction and Equipment ..	570
(A) GENERAL—		9. Gross Revenue ..	570
1. Introduction ..	560	10. Working Expenses ..	576
2. Railway Statistics ..	560	11. Passenger Journeys and Tonnage of Goods and Live Stock ..	577
3. Railway Communication in the Commonwealth ..	560	12. Number and Description of Rolling Stock ..	578
4. Standard Times in Australia ..	562	13. Number of Railway Employees ..	578
5. Non-conformity of Gauge ..	562	14. Accidents, Number of Killed and Injured ..	578
6. Interstate Communication ..	562	15. Passenger Fares, Goods Rates and Parcels Rates ..	579
7. Unification of Gauge ..	563		
8. Rolling Stock Gauges ..	564	(C) STATE RAILWAYS—	
9. Mileage open for Traffic ..	565	1. Mileage Open, 1916 to 1920 ..	580
10. Comparative Mileage of Government and Private Lines ..	566	2. Average Mileage Worked, Train-miles Run, Number of Passenger Journeys, and Tonnage of Goods and Live Stock carried on State Government Railways ..	581
11. Comparative Railway Facilities in Different States and Territories ..	566		
12. Classification of Lines according to Gauge ..	566		

SECTION XVII.—ROADS AND RAILWAYS—*continued.*

	PAGE
§ 2. Railways—<i>continued.</i>	
(C) STATE RAILWAYS— <i>continued.</i>	
3. Length and Gauge of Railway Systems in each State ..	582
4. Administration and Control of State Railways ..	582
5. Lines under Construction and Lines Authorised ..	582
6. Cost of Construction and Equipment of State Railways ..	584
7. Gross Revenue: Total, per Average Mile Worked, & per Train-mile run ..	587
8. Coaching, Goods, and Miscellaneous Receipts ..	588
9. Coaching Traffic Receipts per Average Mile Worked, and per Passenger Train-mile ..	589
10. Goods and Live-stock Traffic Receipts per Mile Worked, per Goods Train-mile and per Ton carried ..	590
11. Working Expenses ..	591
12. Distribution of Working Expenses ..	593
13. Net Revenue ..	593
14. Traffic Conditions ..	594
15. Passenger-Mileage and Ton-Mileage ..	596
16. Interest Returned on Capital Expenditure ..	600
17. Passenger Fares and Goods Rates ..	601
18. Numbers and Description of Rolling-stock ..	604
19. Number of Railway Employees ..	604
20. Accidents—Number of Killed and Injured ..	605
(D) GRAPHICAL REPRESENTATION OF RAILWAY DEVELOPMENT—

(a) Australian produce, except gold, which includes re-exports.

(b) Decrease due to prohibition of re-issue.

CHRONOLOGICAL TABLE.

CHRONOLOGICAL TABLE OF CHIEF EVENTS SINCE THE ESTABLISHMENT OF SETTLEMENT IN AUSTRALIA.

NOTE.—The Government was centralised in Sydney, New South Wales, up to 1825, when Tasmania (Van Diemen's Land) was made a separate colony. In the Table, the names now borne by the States serve to indicate the localities.

Year.

- 1788 N.S.W.—Arrival of "First Fleet" at Botany Bay. Land in vicinity being found unsuitable for settlement, the expedition moved to Sydney Cove (now Port Jackson). Formal possession of Port Jackson taken by Captain Phillip on 26th January. Formal proclamation of colony on 7th February. Population, 1,024. Branch settlement established at Norfolk Island. French navigator Lapérouse visited Botany Bay. First cultivation of wheat and barley. First grape vines planted.
- 1789 N.S.W.—First wheat harvest at Parramatta, near Sydney. Discovery of Hawkesbury River. Outbreak of small-pox amongst aborigines.
- 1790 N.S.W.—"Second Fleet" reached Port Jackson. Landing of the New South Wales Corps. Severe suffering through lack of provisions. First circumnavigation of Australia by Lieut. Ball.
- 1791 N.S.W.—First Exploration Map of Australia published. Arrival of "Third Fleet." Territorial seal brought by Governor King.
- 1792 N.S.W.—Visit of *Philadelphia*, first foreign trading vessel. Population, 4,203.
- 1793 N.S.W.—First free immigrants arrived in the *Bellona*. First Australian church opened at Sydney. Tas.—D'Entrecasteaux discovered the Derwent River.
- 1794 N.S.W.—Establishment of settlement at Hawkesbury River.
- 1795 N.S.W.—Erection of the first printing press at Sydney. Descendants of strayed cattle discovered at Cowpastures, Nepean River.
- 1796 N.S.W.—First Australian theatre opened at Sydney. Coal discovered by fishermen at Newcastle.
- 1797 N.S.W.—Introduction of merino sheep from Cape of Good Hope.
- 1798 Tas.—Tasmania proved an island by voyage of Bass and Flinders.
- 1800 N.S.W.—First export of coal. First Custom House in Australia established at Sydney. Flinders' charts published. First issue of copper coin. Population, 5,995.
- 1801 N.S.W.—First colonial manufacture of blankets and linen.
- 1802 Vic.—Discovery of Port Phillip by Lieut. Murray. S.A.—Discovery of Spencer's and St. Vincent Gulfs by Flinders. Q'land.—Discovery of Port Curtis and Port Bowen by Flinders.
- 1803 N.S.W.—First Australian wool taken to England by Capt. Macarthur. Issue of "The Sydney Gazette," first Australian newspaper. Vic.—Attempted colonisation of Port Phillip by Collins. Discovery of Yarra by Grimes. Tas.—First settlement formed at Risdon by Lieut. Bowen.
- 1804 N.S.W.—Insurrection of convicts at Castle Hill. Vic.—Abandonment of settlement at Port Phillip. Tas.—Foundation of settlement at Hobart by Collins, and at Yorktown by Colonel Paterson.
- 1805 N.S.W.—First extensive sheep farm established at Camden by Capt. Macarthur. Portion of convicts from Norfolk Island transferred to Tasmania.
- 1806 N.S.W.—Shortage of provisions. Floods. Tas.—Settlement at Launceston.
- 1807 N.S.W.—Final shipment of convicts from Norfolk Island. First shipment of merchantable wool (245 lbs.) to England.
- 1808 N.S.W.—Deposition of Governor Bligh.
- 1810 N.S.W.—First post-office established at Sydney. First race meeting in Australia at Hyde Park, Sydney. Population, 11,590. Tas.—First Tasmanian news paper printed.
- 1813 N.S.W.—Passage across Blue Mountains discovered by Wentworth, Lawson, and Blaxland. Macquarie River discovered by Evans.

Year.

- 1814 N.S.W.—Australia, previously known as “New Holland,” received present name on recommendation of Flinders. Creation of Civil Courts.
- 1815 N.S.W.—Town of Bathurst founded by Governor Macquarie. First steam engine in Australia erected at Sydney. Lachlan River discovered by Evans. Tas.—Arrival of first immigrant ship with free settlers. First export of wheat to Sydney. Port Davey and Macquarie Harbour discovered by Capt. Kelly.
- 1816 N.S.W.—Botanic Garden formed at Sydney.
- 1817 N.S.W.—Oxley's first exploration inland. Discovery of Lakes George and Bathurst and the Goulburn Plains by Meehan and Hume. First bank in Australia opened at Sydney. Tas.—Great prosperity in wool and whaling industries.
- 1818 N.S.W.—Cessation of free immigration. Liverpool Plains, and the Peel, Hastings, and Manning Rivers discovered by Oxley, and Port Essington by Captain King.
- 1819 N.S.W.—First Australian Savings Bank at Sydney opened.
- 1820 N.S.W.—Foundation of Campbelltown. Clyde River discovered by Lieut. Johnson. Tas.—First importation of pure merino sheep.
- 1821 N.S.W.—Foundation of Philosophical (now Royal) Society. Population, 35,610. Tas.—Establishment of penal settlement at Macquarie Harbour. First Circuit Court held at Hobart.
- 1822 N.S.W.—Formation of Agricultural Society of N.S.W.
- 1823 N.S.W.—First Australian Constitution. Discovery of gold at Fish River by Assistant-Surveyor McBrien. Arrival in Sydney of Dr. John Dunmore Lang. Qld.—Brisbane River discovered by Oxley.
- 1824 N.S.W.—Became a Crown Colony. Executive Council formed. Establishment of Supreme Court at Sydney, and introduction of trial by jury. First Australian Enactment (Currency Bill) passed by the Parliament at Sydney. Proclamation of freedom of the press. First land regulations. First manufacture of sugar. OFFICIAL YEAR BOOK

OF THE

COMMONWEALTH OF AUSTRALIA, 1920,

AND EARLIER YEARS.

SECTION I.

STATISTICAL ORGANISATION AND SOURCES OF INFORMATION.

§ 1. Introduction.

1. *Development of Australian Statistics.*—In the first issue of the Commonwealth Official Year Book (No. 1, 1901–1907), an account was given of the origin and development of Australian Statistics; *vide* pp. 1 to 16 therein. Owing to considerations of space, however, this matter was considerably curtailed in succeeding Year Books, and appears in No. 4 on pp. 1 to 4. In the following issues, a still further curtailment has been made in order to make room for new matter.

Briefly, it may be stated that to the “Blue Books” compiled in Australia for the Imperial authorities, there succeeded, under Responsible Government, the statistics which each of the departments prepared for itself. State statistical departments were organised later, principally as collecting agencies of official and general information.

Owing to absence of co-ordination in collection and compilation due to the organisation independently of the various States bureaux, there were difficulties in so combining State statistics as to get a satisfactory statistic for Australia as a whole, and various conferences of State Statisticians did not completely rectify the divergencies that had arisen.

(i) *Creation of the Commonwealth Bureau of Census and Statistics.* Constitutionally, matters relating to “Census and Statistics” belong to the Commonwealth, and in 1906, under the authority of the Census and Statistics Act of 1905, providing for the taking of the Census and the collecting of general statistics, the Commonwealth Bureau of Census and Statistics was created. A conference of statistical representatives of Australian States and New Zealand, under the presidency of the Commonwealth Statistician, met in November and December, 1906. For a more or less complete presentation of the affairs of the Commonwealth and of its constituent parts, various desiderata were recognised, and a series of resolutions adopted by the conference. Identity of categories, simultaneity and identity in methods of collection, and uniformity in compilation, were the main features desired. A résumé of the resolutions of this conference is given in Year Book No. 1, pp. 12–16. Mr. G. H. Knibbs, C.M.G., F.S.S. (now Honorary Fellow), etc., was appointed the first Commonwealth Statistician on the 18th June, 1906, and continued in that capacity until the 18th March, 1921, when he was appointed Director of the Institute of Science and Industry. At the request, however, of the Hon. A. Poynton, Minister for Home and Territories, and with the approval of the Hon. W. Massy Greene, Minister for Trade and Customs, Mr. Knibbs has continued to exercise some supervision over the Bureau of Census and Statistics pending the appointment of his successor.

(ii) *Organisation of the Commonwealth Bureau of Census and Statistics.* In the organisation of the Bureau, while all classes of work may at any time be relegated to any officer, certain fields of activity are attended to mainly by the officers mentioned

hereunder, who, subject to the general direction of the Statistician, supervise the work of the different branches :—

- JOHN STONHAM, M.A. (Sydney), Chief Compiler; general administration, and Assistant Editorship of Official Year Book.
 CHARLES HENRY WICKENS, F.I.A. Supervisor of Census, Population, Transport and Communication, and Production Statistics.
 EDWARD TANNOCH MCPHEE. Shipping and Trade Statistics.
 GERALD LIGHTFOOT, M.A. (Cambridge), Barrister at Law. Industrial and Social Statistics.^(a)
 FREDERICK DALGLISH ROSSITER, M.A. (Melbourne), Defence; general control of Library, etc.
 FREDERICK WILLIAM BARFORD, M.A. (Oxford), A.I.A. Finance.
 HAROLD JAMES EXLEY. Vital Statistics.

^(a) Since 1916, on loan to Commonwealth Institute of Science and Industry. The branch is now supervised by J. T. SUTCLIFFE and H. PETRIE.

2. Sources of Information.—Statistical information is furnished (i) by the State Statistical Bureaux, either as a result of direct demand, or through the police and special collectors; (ii) by Commonwealth and State Departments (see lists of publications in § 2 *infra*); (iii) in respect of returns of Trade, Customs and Excise, by the Trade and Customs Department; (iv) by scientific and technical experts, specially requisitioned to write on particular subjects; (v) by State Statisticians, as officers duly constituted under the Commonwealth Census and Statistics Act; and (vi) by information supplied compulsorily, on the Commonwealth Statistician's demand.

3. Maintenance of Secrecy.—Under no circumstances can information supplied to a statistical office be used against the individual supplying it. All statistical enquiries are strictly impersonal, and the affairs of individuals or individual businesses are never disclosed. No other Government Department can make use of the Statistical Departments in order to acquire detailed information otherwise unavailable.

4. Accuracy Essential.—The importance of accurate statistical information is emphasised. The making of untrue statements is heavily penalised.

§ 2. Statistical Publications of Australia.

1. Introductory.—The official statistical publications of Australia may be divided bibliographically into two main divisions, viz. :—(1) Commonwealth publications dealing both individually and collectively with the several States of the Commonwealth, and (2) State publications dealing with individual States only. Besides these there are many other reports, etc., issued regularly, which though not wholly statistical, necessarily contain a considerable amount of statistical information. The more important of these published to September, 1921, are indicated below.

2. Commonwealth Publications.—Commonwealth publications may be grouped under two heads, viz. :—(i) Publications issued by the Commonwealth Statistician, and (ii) Parliamentary and Departmental Reports and Papers.

(i) *Publications issued by the Commonwealth Statistician.* The following is a list of the principal statistical publications issued from the Commonwealth Bureau of Census and Statistics since its inauguration up to September, 1921. The Demography, Finance, Production, and Transport and Communication Bulletins cover statistics from 1901. The Year Book contains figures from earlier years. A full list from 1906 to 1920 is given in Official Year Book No. 13, pp. 2 *et seq.*

Australian Life Tables, 1901–1910. Australian Joint Life Tables, 1901–1910. Census (1911) Bulletins.

Census (1911) Results.—Vols. I., II., and III., with Appendix “Mathematical Theory of Population.”

Finance—Bulletins, 1907 to 1915–16 annually; 1916–17, 1917–18 and 1918–19 (one vol.); future issues biennially.

Labour and Industrial Statistics—Memoranda and Reports, various, to 1913.

Annual Reports—Prices, Purchasing Power of Money, Wages, Trade Unions, Unemployment, and General Industrial Conditions, 1913 to 1920.

Local Government in Australia—July, 1919.

Official Year Book of the Commonwealth of Australia—Annually, 1907 to present issue (1921).

Pocket Compendium of Australian Statistics (formerly *Statistical Digest*), 1913, 1914, 1916, 1918, 1919, 1920, and 1921.

Population and Vital Statistics Bulletins—Reports, various. Commonwealth Demography, 1911 to 1920.

Production—Bulletins, annually, 1906 to 1919–20.

Professional Papers—Various. A full list will be found in *Official Year Book* No. 13, p. 3.

Quarterly Summary of Australian Statistics—first issue, No. 70, December, 1917, replacing *Monthly Summary of Australian Statistics* (Bulletins 1 to 69), and incorporating data from earlier publications relating to Labour, Shipping, Trade, Vital Statistics, Oversea Migration, etc.

Social Insurance—Report to the Hon. the Minister of Trade and Customs, 1910.

Social Statistics—Bulletins, 1907 to 1918 annually; future issues biennially.

Superannuation for the Commonwealth Public Service—Report to the Hon. the Minister of Home Affairs, 1910.

Trade and Customs—Trade, and Customs and Excise Revenue, annually, 1906 to 1919–20.

Transport and Communication—Bulletins, 1906 to 1916 annually; 1917 and 1918 (one vol.); 1919; future issues biennially.

Wealth—The Private Wealth of Australia and its Growth, as ascertained by various methods, together with a Report of the War Census in 1915.

(ii) *Commonwealth Parliamentary and Departmental Reports and Papers*. The principal official reports and papers containing statistical matter issued from the inauguration of the Commonwealth, to 1920, are given in *Official Year Book* No. 13, pp. 4 *et seq.* They relate chiefly to Administration, Arbitration, Audit, Banks, Bounties, Business Undertakings, Commerce, Commissions (Customs, Defence, Elections, Economics, Industries, Trade), Debts, Defence (Army and Navy), Elections and Franchise, Federal Capital, Fisheries, Forestry, High Commissioner, History, Immigration, Industries and Manufactures, Inter-State Commission, Labour and Unionism, Laws, Lighthouses, Medicine, Meteorology, Murray Waters, Naturalization, New Guinea, Norfolk Island, Northern Territory, Papua, Patents, Pensions, Posts, Prices, Public Service, Public Works, Railways, Science and Industry, Shipping, Social Insurance, Sugar, Tariff, Taxation, Telegraphs, Telephones, Trade and Customs, Trade Marks, Treasury, Wool, etc.

3. State Publications.—(i) The chief publications of each State are:—Publications by the various State Statisticians, the principal of which are set out below. Annual and other Reports of Departments, Officials, Boards, etc., as given in *Official Year Book* No. 13, pp. 7 *et seq.* Reports and Statements of Local Governing Bodies, also shewn in *Official Year Book* No. 13, pp. 7 *et seq.*

(ii) *Principal Publications by Government Statisticians of the Various States* :—

- (a) New South Wales—Statistical Register (annual); *Official Year Book of New South Wales* (annual); *Statesman's Year Book* (annual); *Vital Statistics* (monthly and annual); *Statistical Bulletin* (monthly to December, 1919), thereafter quarterly.
- (b) Victoria—Statistical Register (annual to 1916); *Victorian Year Book* (annual); *Vital Statistics* (annual and quarterly); *Statistical Abstracts* (quarterly to 1917).
- (c) Queensland—Statistical Register (annual); *Official Year Book*, 1901; *A.B.C. of Queensland Statistics* (annual); *Vital Statistics* (annual and monthly).
- (d) South Australia—Statistical Register (annual); *Official Year Book*, 1912 and 1913; *Blue Book* (annual); *Statesman's Pocket Year Book* (annual); *Returns of Births and Deaths* (monthly).
- (e) Western Australia—Statistical Register (annual); *Year Book*, 1900–03, 1902–4, 1905 (part); *Blue Book* (annual); *Statistical Abstracts* (quarterly, previously issued monthly to July, 1917); *Population and Vital Statistics* (annual and quarterly); *Statistical View of Progress* (annual).
- (f) Tasmania—Statistical Register (annual); *Statesman's Pocket Year Book*, annual, from 1915; *Statistical Summaries* (annual); *Vital Statistics and Migration* (annual and monthly).

§ 3. Bibliography of Recent Works on Australia.

1. **General.**—In Official Year Book No. 13, a list of the principal general works dealing with Australia and Australian affairs, published from 1901 to 1920, will be found. Of the publications of the first sixteen years of the Commonwealth the more important are now repeated, with a fuller list of works published within the last five years.

2. Works on Special Subjects.—In addition to the works set out above, dealing generally with the historical, industrial and personal aspects of the Australian people, there have been a number of recent works upon special subjects, the more important of which will be found in Official Year Book No. 13, pp. 11-12. The following list of more recent works of note may be of interest:—

- BAKER, RICHARD T., AND SMITH, H. G. A Research on the Eucalypts. Sydney, 1902. A Research on the Pines of Australia. Sydney, 1910.
- BAKER, RICHARD T. Cabinet Timbers of Australia. Sydney, 1913. Australian Flora in Applied Art. Sydney, 1915.

- LUCAS, A. H. S., AND LE SOUEF, W. H. D. Animals of Australia. Melbourne, 1909. The Birds of Australia. Melbourne, 1911.
- MAIDEN, J. H. Critical Revision of the Genus Eucalyptus. 5 vols. and 3 parts of 6th vol. Sydney, 1903-21. Forest Flora of New South Wales. 6 vols. and 3 parts of 7th vol. Sydney, 1904-21.
- SCHULER, P. F. E. Australia in Arms. London, 1916.
- TAYLOR, Dr. T. G. Australian Meteorology. Oxford, 1920.

SECTION II.

DISCOVERY, COLONISATION, AND FEDERATION OF AUSTRALIA.

§ 1. Early Knowledge of Australia.

A brief, though fairly comprehensive, account of the discovery and early knowledge of Australia was given in Year Book No. 1 (pp. 44 to 51). This account appeared in a condensed form in Year Books Nos. 2, 3, and 4. Bibliographical references to the subject were also given in Year Book No. 1 (p. 49). Exigencies of space prevent the inclusion of any further reference to this subject in the present issue.

§ 2. The Taking Possession of Australia.

Reference was made to the more important facts relating to the taking possession and annexation of Australia in each of the first four issues of this book: see preferably Year Book No. 4 (pp. 15 and 16). In so far as the annexation of the eastern parts is concerned, a full historical account of the period may be found in the "Historical Records of New South Wales," Vol. I, parts 1 and 2. For an account of the annexation of Western Australia, reference may be made to the West Australian Year Book, 1905, Part I.

§ 3. The Creation of the Several Colonies.

1. **Introduction.**—A historical summary of the facts relating to the creation of the several colonies and the changes in the boundaries of certain of the colonies has appeared in previous issues of this book: see Year Book No. 4 (pp. 16 to 23). The main facts in this connection may be traced by reference to the maps in preceding issues (see Year Book, No. 4, pp. 17 and 18). The dates of annexation, etc., are given in Official Year Book No. 13, p. 12.

The immense area generally known as Australasia had, by 1863, been divided into seven distinct colonies, the areas of which are shewn below. The areas of the Northern Territory and the Federal Capital Territory, which are now under the exclusive jurisdiction of the Commonwealth, are given separately.

On the 1st January, 1901, the colonies mentioned above, with the exception of New Zealand, were federated under the name of the "Commonwealth of Australia," the designation of "Colonies" being at the same time changed into that of "States." The total area of the Commonwealth is, therefore, 2,974,581 square miles. The dates of creation and the areas of the separate colonies and territories, as determined on the final adjustment of their boundaries, are shewn in the following table:—

DATES OF CREATION AND AREAS OF THE SEVERAL COLONIES AND TERRITORIES.

Colony.	Year of Formation into Separate Colony.	Present Area in Square Miles.	Colony.	Year of Formation into Separate Colony.	Present Area in Square Miles.
New South Wales	1786	309,432(a)	New Zealand ..	1841	104,751
Tasmania ..	1825	26,215	Victoria ..	1851	87,884
Western Australia	1829	975,920	Queensland ..	1859	670,500
South Australia	1834	380,070	Northern Territory	1863	523,620
(proper)			Federal Capital Territory ..	1911	940(b)
Commonwealth	2,974,581 square miles.		
Australasia	3,079,332 square miles.		

(a) Exclusive of Federal Capital Territory (Canberra and Jervis Bay).

(b) Prior to 1911 included with New South Wales.

2. **New Guinea or Papua.**—Under the administration of the Commonwealth, but not included in it, is British New Guinea or Papua, finally annexed by the British Government in 1884. This Territory was for a number of years administered by the Queensland Government, but was transferred to the Commonwealth by proclamation on the 1st September, 1906, under the authority of the Papua Act (Commonwealth) of 16th November, 1905. The area of Papua is about 90,540 square miles. More extended reference to this dependency of the Commonwealth will be found in Section XXIX., as also a reference to the late German territory on the island.

3. **Transfer of the Northern Territory to the Commonwealth.**—On the 7th December, 1907, the Commonwealth and the State of South Australia entered into an agreement for the surrender to and acceptance by the Commonwealth of the Northern Territory, subject to approval by the Parliaments of the Commonwealth and the State. This approval was given by the South Australian Parliament under the Northern Territory Surrender Act 1907 (assented to on the 14th May, 1908), and by the Commonwealth Parliament under the Northern Territory Acceptance Act 1910 (assented to on the 16th November, 1910). The Territory accordingly was transferred by proclamation to the Commonwealth on the 1st January, 1911. Further information may be found in Section XXXII. of this book on "The Northern Territory."

4. **Norfolk Island.**—Although administered for many years by the Government of New South Wales, this island was, until 1st July, 1914, a separate Crown colony. On that date it was taken over by the Federal Parliament as a territory of the Commonwealth. Further reference to the island will be found in the latter part of Section XXXIV.

§ 4. Transfer of the Federal Capital Territory to the Commonwealth.

On the 18th October, 1909, the Commonwealth and the State of New South Wales entered into an agreement for the surrender to and acceptance by the Commonwealth of an area of 912 square miles as the seat of Government of the Commonwealth. In December, 1909, Acts were passed by the Commonwealth and New South Wales Parliaments, approving the agreement, and on the 5th December, 1910, a proclamation was issued vesting the Territory in the Commonwealth on and from the 1st January, 1911. By the Jervis Bay Territory Acceptance Act 1915, an area of 28 square miles at Jervis Bay, surrendered by New South Wales according to an agreement made in 1913, was accepted by the Commonwealth. Further reference to this Territory will be found in Section XXXI. of this book.

§ 5. The Exploration of Australia.

A fairly complete, though brief, account of the Exploration of Australia was given in Year Book No. 2 (pp. 20 to 39). A brief summary of the more important facts relating to the subject was given in Year Books Nos. 3 and 4. Maps shewing the progress of Australian exploration may also be found in previous issues (see No. 8, p. 35).

§ 6. The Constitutions of the States.

A brief and condensed statement of the constitutional history of the several States, shewing how their present Constitutions have been built up, may be found in Section II. of the second, third, and fourth issues of the Year Book. (See No. 4, pp. 27 to 32.)

A conspectus of the Acts of Constitution of the Commonwealth and the several States is given in Section No. XXV. of Official Year Book No. 13. The full text of the Commonwealth Constitution Act and amendments thereto appears in §8 hereinafter.

§ 7. The Federal Movement in Australia.

A summary was given in Year Book No. 1 (pp. 17 to 21) of the "Federal Movement in Australia" from its inception to its consummation; a synopsis thereof was given in Year Books Nos. 2, 3, and 4. (See No. 4, pp. 32 to 37.)

§ 8. Creation of the Commonwealth.

1. **The Act.**—The Commonwealth of Australia Constitution Act, 63 and 64 Vic., Chapter 12, namely, an Act to constitute the Commonwealth of Australia, was shewn *in extenso* in Year Book No. 1. In the Year Books Nos. 2, 3, and 4, a summary of the Act was given. As two amending Acts, namely, the Constitution Alteration (Senate Elections) Act 1906, and the Constitution Alteration (State Debts) Act 1909 have been passed, it was thought desirable to insert the Act, as amended, in full in Year Book No. 5 and subsequent issues.

THE COMMONWEALTH OF AUSTRALIA CONSTITUTION ACT, 63 & 64 VICT., CHAPTER 12.

An Act to constitute the Commonwealth of Australia. [9th July, 1900.]

WHEREAS the people of New South Wales, Victoria, South Australia, Queensland, and Tasmania, humbly relying on the blessing of Almighty God, have agreed to unite in one indissoluble Federal Commonwealth under the Crown of the United Kingdom of Great Britain and Ireland, and under the Constitution hereby established:

And whereas it is expedient to provide for the admission into the Commonwealth of other Australasian Colonies and possessions of the Queen:

Be it therefore enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:—

1. This Act may be cited as the Commonwealth of Australia Constitution Act.
2. The provisions of this Act referring to the Queen shall extend to Her Majesty's heirs and successors in the sovereignty of the United Kingdom.
3. It shall be lawful for the Queen, with the advice of the Privy Council, to declare by proclamation that, on and after a day therein appointed, not being later than one year after the passing of this Act, the people of New South Wales, Victoria, South Australia, Queensland, and Tasmania, and also, if Her Majesty is satisfied that the people of Western Australia have agreed thereto, of Western Australia, shall be united in a Federal Commonwealth under the name of the Commonwealth of Australia. But the Queen may, at any time after the proclamation, appoint a Governor-General for the Commonwealth.
4. The Commonwealth shall be established, and the Constitution of the Commonwealth shall take effect, on and after the day so appointed. But the Parliaments of the several colonies may at any time after the passing of this Act make any such laws, to come into operation on the day so appointed, as they might have made if the Constitution had taken effect at the passing of this Act.
5. This Act, and all laws made by the Parliament of the Commonwealth under the Constitution, shall be binding on the courts, judges, and people of every State and of every part of the Commonwealth, notwithstanding anything in the laws of any State; and the laws of the Commonwealth shall be in force on all British ships, the Queen's ships of war excepted, whose first port of clearance and whose port of destination are in the Commonwealth.
6. "The Commonwealth" shall mean the Commonwealth of Australia as established under this Act.
- "The States" shall mean such of the colonies of New South Wales, New Zealand, Queensland, Tasmania, Victoria, Western Australia, and South Australia, including the northern territory of South Australia, as for the time being are parts of the Commonwealth, and such colonies or territories as may be admitted into or established by the Commonwealth as States: and each of such parts of the Commonwealth shall be called "a State."
- "Original States" shall mean such States as are parts of the Commonwealth at its establishment.

7. The Federal Council of Australasia Act, 1885, is hereby repealed, but so as not to affect any laws passed by the Federal Council of Australasia and in force at the establishment of the Commonwealth.

Any such law may be repealed as to any State by the Parliament of the Commonwealth, or as to any colony not being a State by the Parliament thereof.

8. After the passing of this Act the Colonial Boundaries Act, 1895, shall not apply to any colony which becomes a State of the Commonwealth; but the Commonwealth shall be taken to be a self-governing colony for the purposes of that Act.

9. The Constitution of the Commonwealth shall be as follows:—

THE CONSTITUTION.

This Constitution is divided as follows:—

Chapter I.—The Parliament:—

Part I.—General:

Part II.—The Senate:

Part III.—The House of Representatives:

Part IV.—Both Houses of the Parliament:

Part V.—Powers of the Parliament:

Chapter II.—The Executive Government:

Chapter III.—The Judicature:

Chapter IV.—Finance and Trade:

Chapter V.—The States:

Chapter VI.—New States:

Chapter VII.—Miscellaneous.

Chapter VIII.—Alteration of the Constitution.

The Schedule.

CHAPTER I.—THE PARLIAMENT.

PART I.—GENERAL.

1. The legislative power of the Commonwealth shall be vested in a Federal Parliament, which shall consist of the Queen, a Senate, and a House of Representatives, and which is hereinafter called “The Parliament,” or “The Parliament of the Commonwealth.”

2. A Governor-General appointed by the Queen shall be Her Majesty's representative in the Commonwealth, and shall have and may exercise in the Commonwealth during the Queen's pleasure, but subject to this Constitution, such powers and functions of the Queen as Her Majesty may be pleased to assign to him.

3. There shall be payable to the Queen out of the Consolidated Revenue Fund of the Commonwealth, for the salary of the Governor-General, an annual sum which, until the Parliament otherwise provides, shall be ten thousand pounds.

The salary of a Governor-General shall not be altered during his continuance in office.

4. The provisions of this Constitution relating to the Governor-General extend and apply to the Governor-General for the time being, or such person as the Queen may appoint to administer the Government of the Commonwealth; but no such person shall be entitled to receive any salary from the Commonwealth in respect of any other office during his administration of the Government of the Commonwealth.

5. The Governor-General may appoint such times for holding the sessions of the Parliament as he thinks fit, and may also from time to time, by Proclamation or otherwise, prorogue the Parliament, and may in like manner dissolve the House of Representatives.

After any general election the Parliament shall be summoned to meet not later than thirty days after the day appointed for the return of the writs.

The Parliament shall be summoned to meet not later than six months after the establishment of the Commonwealth.

6. There shall be a session of the Parliament once at least in every year, so that twelve months shall not intervene between the last sitting of the Parliament in one session and its first sitting in the next session.

PART II.—THE SENATE.

7. The Senate shall be composed of senators for each State, directly chosen by the people of the State, voting, until the Parliament otherwise provides, as one electorate.

But until the Parliament of the Commonwealth otherwise provides, the Parliament of the State of Queensland, if that State be an Original State, may make laws dividing the State into divisions and determining the number of senators to be chosen for each division, and in the absence of such provision the State shall be one electorate.

Until the Parliament otherwise provides there shall be six senators for each Original State. The Parliament may make laws increasing or diminishing the number of senators for each State, but so that equal representation of the several Original States shall be maintained and that no Original State shall have less than six senators.

The senators shall be chosen for a term of six years, and the names of the senator² chosen for each State shall be certified by the Governor to the Governor-General.

8. The qualification of electors of senators shall be in each State that which is prescribed by this Constitution, or by the Parliament, as the qualification for electors of members of the House of Representatives: but in the choosing of senators each elector shall vote only once.

9. The Parliament of the Commonwealth may make laws prescribing the method of choosing senators, but so that the method shall be uniform for all the States. Subject to any such law, the Parliament of each State may make laws prescribing the method of choosing the senators for that State.

The Parliament of a State may make laws for determining the times and places of elections of senators for the State.

10. Until the Parliament otherwise provides, but subject to this Constitution, the laws in force in each State, for the time being, relating to elections for the more numerous House of the Parliament of the State shall, as nearly as practicable, apply to elections of senators for the State.

11. The Senate may proceed to the despatch of business, notwithstanding the failure of any State to provide for its representation in the Senate.

12. The Governor of any State may cause writs to be issued for elections of senators for the State. In case of the dissolution of the Senate the writs shall be issued within ten days from the proclamation of such dissolution.

13. As soon as may be after the Senate first meets, and after each first meeting of the Senate following a dissolution thereof, the Senate shall divide the senators chosen for each State into two classes, as nearly equal in number as practicable; and the places of the senators of the first class shall become vacant at the expiration of [the third year] *three years*,¹ and the places of those of the second class at the expiration of [the sixth year] *six years*,¹ from the beginning of their term of service; and afterwards the places of senators shall become vacant at the expiration of six years from the beginning of their term of service.³

The election to fill vacant places shall be made [in the year at the expiration of which] *within one year before*¹ the places are to become vacant.

For the purpose of this section the term of service of a senator shall be taken to begin on the first day of [January] *July*¹ following the day of his election, except in the cases of the first election and of the election next after any dissolution of the Senate, when it shall be taken to begin on the first day of [January] *July*¹ preceding the day of his election.²⁻⁴

14. Whenever the number of senators for a State is increased or diminished, the Parliament of the Commonwealth may make such provision for the vacating of the places of senators for the State as it deems necessary to maintain regularity in the rotation.

15. If the place of a senator becomes vacant before the expiration of his term of service, the Houses of Parliament of the State for which he was chosen shall, sitting and voting together, choose a person to hold the place until the expiration of the term, or until the election of a successor as hereinafter provided, whichever first happens. But if the Houses of Parliament of the State are not in session at the time when the vacancy is notified, the Governor of the State, with the advice of the Executive Council thereof, may appoint a person to hold the place until the expiration of fourteen days after the beginning of the next session of the Parliament of the State, or until the election of a successor, whichever first happens.

At the next general election of members of the House of Representatives, or at the next election of senators for the State, whichever first happens, a successor shall, if the term has not then expired, be chosen to hold the place from the date of his election until the expiration of the term.

The name of any senator so chosen or appointed shall be certified by the Governor of the State to the Governor-General.

16. The qualifications of a senator shall be the same as those of a member of the House of Representatives.

17. The Senate shall, before proceeding to the despatch of any other business, choose a senator to be the President of the Senate; and as often as the office of President becomes vacant the Senate shall again choose a senator to be the President.

The President shall cease to hold his office if he ceases to be a senator. He may be removed from office by a vote of the Senate, or he may resign his office or his seat by writing addressed to the Governor-General.

18. Before or during any absence of the President, the Senate may choose a senator to perform his duties in his absence.

19. A senator may, by writing addressed to the President, or to the Governor-General if there is no President or if the President is absent from the Commonwealth, resign his place, which thereupon shall become vacant.

20. The place of a senator shall become vacant if for two consecutive months of any session of the Parliament he, without the permission of the Senate, fails to attend the Senate.

1. As amended by section 2 of the Constitution Alteration (Senate Elections) 1906. The words in square brackets have been repealed; amendments are shown in italics.

2. Under sections 3 and 4 of the Constitution Alteration (Senate Elections) 1906, it was also provided that—

(a) The terms of service of the senators whose places would, but for this Act, become vacant at the expiration of the year One thousand nine hundred and nine are extended until the thirtieth day of June One thousand nine hundred and ten.

(b) The terms of service of the senators whose places would, but for this Act, become vacant at the expiration of the year One thousand nine hundred and twelve are extended until the thirtieth day of June One thousand nine hundred and thirteen.

(c) This Act shall not be taken to alter the time of beginning of the term of service of any senator elected in the year One thousand nine hundred and six.

3. A bill was passed by the Commonwealth Parliament on the 2nd September, 1915, for the submission to the electors of a proposed law to alter section 13 by inserting after *three years* the words *and two months*, and after *six years* where mentioned the words *and four months*.

4. It was also proposed by the bill alluded to above to alter the foregoing paragraph so as to read thus:—For the purposes of this section the term of service of the senators elected in the year One thousand nine hundred and fourteen shall be taken to have begun on the first day of October. One thousand nine hundred and fourteen, and the term of service of a senator elected to fill a vacancy thereafter occurring in rotation shall be taken to begin on the day on which the place he is to fill becomes vacant, and the term of service of senators elected at an election next after a dissolution of the Senate shall be taken to begin on the day of the first meeting of the House of Representatives after dissolution. A writ was issued for a referendum (to be taken on the 11th December, 1915, at the same time as referendums for the alteration of the legislative powers of the Commonwealth), but the writs were withdrawn under authority of Act 51 of 1915. See also note to section 51.

21. Whenever a vacancy happens in the Senate, the President, or if there is no President or if the President is absent from the Commonwealth the Governor-General, shall notify the same to the Governor of the State in the representation of which the vacancy has happened.

22. Until the Parliament otherwise provides, the presence of at least one-third of the whole number of the senators shall be necessary to constitute a meeting of the Senate for the exercise of its powers.

23. Questions arising in the Senate shall be determined by a majority of votes, and each senator shall have one vote. The President shall in all cases be entitled to a vote; and when the votes are equal the question shall pass in the negative.

PART III.—THE HOUSE OF REPRESENTATIVES.

24. The House of Representatives shall be composed of members directly chosen by the people of the Commonwealth, and the number of such members shall be, as nearly as practicable, twice the number of the senators.

The number of members chosen in the several States shall be in proportion to the respective numbers of their people, and shall, until the Parliament otherwise provides, be determined, whenever necessary, in the following manner :—

- (i) A quota shall be ascertained by dividing the number of the people of the Commonwealth, as shewn by the latest statistics of the Commonwealth, by twice the number of the senators :
- (ii) The number of members to be chosen in each State shall be determined by dividing the number of the people of the State, as shewn by the latest statistics of the Commonwealth, by the quota; and if on such division there is a remainder greater than one-half of the quota, one more member shall be chosen in the State.

But notwithstanding anything in this section, five members at least shall be chosen in each Original State.

25. For the purposes of the last section, if by the law of any State all persons of any race are disqualified from voting at elections for the more numerous House of the Parliament of the State, then, in reckoning the number of the people of the State or of the Commonwealth, persons of that race resident in that State shall not be counted.

26. Notwithstanding anything in section twenty-four, the number of members to be chosen in each State at the first election shall be as follows :—

New South Wales	..	23	South Australia	..	6
Victoria	..	20	Tasmania	..	5
Queensland	..	8			

Provided that if Western Australia is an Original State, the numbers shall be as follows :—

New South Wales	..	26	South Australia	..	7
Victoria	..	23	Western Australia	..	5
Queensland	..	9	Tasmania	..	5

27. Subject to this Constitution, the Parliament may make laws for increasing or diminishing the number of the members of the House of Representatives.

28. Every House of Representatives shall continue for three years from the first meeting of the House, and no longer, but may be sooner dissolved by the Governor-General.

29. Until the Parliament of the Commonwealth otherwise provides, the Parliament of any State may make laws for determining the divisions in each State for which members of the House of Representatives may be chosen, and the number of members to be chosen for each division. A division shall not be formed out of parts of different States.

In the absence of other provision, each State shall be one electorate.

30. Until the Parliament otherwise provides, the qualification of electors of members of the House of Representatives shall be in each State that which is prescribed by the law of the State as the qualification of electors of the more numerous House of Parliament of the State; but in the choosing of members each elector shall vote only once.¹

1. The franchise qualification was determined by the Commonwealth Franchise Act 1902.

31. Until the Parliament otherwise provides, but subject to this Constitution, the laws in force in each State for the time being relating to elections for the more numerous House of the Parliament of the State shall, as nearly as practicable, apply to elections in the State of members of the House of Representatives.

32. The Governor-General in Council may cause writs to be issued for general elections of members of the House of Representatives.

After the first general election, the writs shall be issued within ten days from the expiry of a House of Representatives or from the proclamation of a dissolution thereof.

33. Whenever a vacancy happens in the House of Representatives, the Speaker shall issue his writ for the election of a new member, or if there is no Speaker or if he is absent from the Commonwealth the Governor-General in Council may issue the writ.

34. Until the Parliament otherwise provides, the qualifications of a member of the House of Representatives shall be as follows :—

- (i) He must be of the full age of twenty-one years, and must be an elector entitled to vote at the election of members of the House of Representatives, or a person qualified to become such elector, and must have been for three years at the least a resident within the limits of the Commonwealth as existing at the time when he is chosen :
- (ii) He must be a subject of the Queen, either natural-born or for at least five years naturalized under a law of the United Kingdom, or of a Colony which has become or becomes a State, or of the Commonwealth, or of a State.

35. The House of Representatives shall, before proceeding to the despatch of any other business, choose a member to be the Speaker of the House, and as often as the office of Speaker becomes vacant the House shall again choose a member to be the Speaker.

The Speaker shall cease to hold his office if he ceases to be a member. He may be removed from office by a vote of the House, or he may resign his office or his seat by writing addressed to the Governor-General.

36. Before or during any absence of the Speaker, the House of Representatives may choose a member to perform his duties in his absence.

37. A member may by writing addressed to the Speaker, or to the Governor-General if there is no Speaker or if the Speaker is absent from the Commonwealth, resign his place, which thereupon shall become vacant.

38. The place of a member shall become vacant if for two consecutive months of any session of the Parliament he, without the permission of the House, fails to attend the House.

39. Until the Parliament otherwise provides, the presence of at least one-third of the whole number of the members of the House of Representatives shall be necessary to constitute a meeting of the House for the exercise of its powers.

40. Questions arising in the House of Representatives shall be determined by a majority of votes other than that of the Speaker. The Speaker shall not vote unless the numbers are equal, and then he shall have a casting vote.

PART IV.—BOTH HOUSES OF THE PARLIAMENT.

41. No adult person who has or acquires a right to vote at elections for the more numerous House of the Parliament of a State shall, while the right continues, be prevented by any law of the Commonwealth from voting at elections for either House of the Parliament of the Commonwealth.

42. Every senator and every member of the House of Representatives shall before taking his seat make and subscribe before the Governor-General, or some person authorized by him, an oath or affirmation of allegiance in the form set forth in the schedule to this Constitution.

43. A member of either House of the Parliament shall be incapable of being chosen or of sitting as a member of the other House.

44. Any person who—

- (i) Is under any acknowledgment of allegiance, obedience, or adherence to a foreign power, or is a subject or a citizen or entitled to the rights or privileges of a subject or a citizen of a foreign power : or
- (ii) Is attainted of treason, or has been convicted and is under sentence, or subject to be sentenced, for any offence punishable under the law of the Commonwealth or of the State by imprisonment for one year or longer : or
- iii) Is an undischarged bankrupt or insolvent : or
- (iv) Holds any office of profit under the Crown, or any pension payable during the pleasure of the Crown out of any of the revenues of the Commonwealth : or
- (v) Has any direct or indirect pecuniary interest in any agreement with the Public Service of the Commonwealth otherwise than as a member and in common with the other members of an incorporated company consisting of more than twenty-five persons :

shall be incapable of being chosen or of sitting as a senator or a member of the House of Representatives.

But sub-section iv. does not apply to the office of any of the Queen's Ministers of State for the Commonwealth, or of any of the Queen's Ministers for a State, or to the receipt of pay, half-pay, or a pension by any person as an officer or member of the Queen's navy or army, or to the receipt of pay as an officer or member of the naval or military forces of the Commonwealth by any person whose services are not wholly employed by the Commonwealth.

45. If a senator or member of the House of Representatives—

- (i) Becomes subject to any of the disabilities mentioned in the last preceding section : or
- (ii) Takes the benefit, whether by assignment, composition, or otherwise, of any law relating to bankrupt or insolvent debtors : or
- (iii) Directly or indirectly takes or agrees to take any fee or honorarium for services rendered to the Commonwealth, or for services rendered in the Parliament to any person or State :

his place shall thereupon become vacant.

46. Until the Parliament otherwise provides, any person declared by this Constitution to be incapable of sitting as a senator or as a member of the House of Representatives shall, for every day on which he so sits, be liable to pay the sum of one hundred pounds to any person who sues for it in any court of competent jurisdiction.

47. Until the Parliament otherwise provides, any question respecting the qualification of a senator or of a member of the House of Representatives, or respecting a vacancy in either House of the Parliament, and any question of a disputed election to either House, shall be determined by the House in which the question arises.

48. Until the Parliament otherwise provides, each senator and each member of the House of Representatives shall receive an allowance of four hundred pounds a year, to be reckoned from the day on which he takes his seat.¹

49. The powers, privileges, and immunities of the Senate and of the House of Representatives, and of the members and the committees of each House, shall be such as are declared by the Parliament, and until declared shall be those of the Commons House of Parliament of the United Kingdom, and of its members and committees, at the establishment of the Commonwealth.

50. Each House of the Parliament may make rules and orders with respect to—

- (i) The mode in which its powers, privileges, and immunities may be exercised and upheld ;
- (ii) The order and conduct of its business and proceedings either separately or jointly with the other House.

1. By the Parliamentary Allowances Act 1907, the amount of the allowance was increased to £600 a year; and by the Parliamentary Allowances Act 1920 to £1,000 a year. (The latter Act also apportioned special allowances to the President of the Senate; the Speaker of the House of Representatives; the Chairmen of Committees in both Houses; and the Opposition Leaders in both Houses.)

PART V.—POWERS OF THE PARLIAMENT.^{1 2 3}

51. The Parliament shall, subject to this Constitution, have power to make laws for the peace, order, and good government of the Commonwealth with respect to—

- (i) Trade and commerce with other countries, and among the States :^{1 2}
- (ii) Taxation ; but so as not to discriminate between States or parts of States :
- (iii) Bounties on the production or export of goods, but so that such bounties shall be uniform throughout the Commonwealth :
- (iv) Borrowing money on the public credit of the Commonwealth :
- (v) Postal, telegraphic, telephonic, and other like services :
- (vi) The naval and military defence of the Commonwealth and of the several States, and the control of the forces to execute and maintain the laws of the Commonwealth :
- (vii) Lighthouses, lightships, beacons and buoys :
- (viii) Astronomical and meteorological observations :
- (ix) Quarantine :
- (x) Fisheries in Australian waters beyond territorial limits :
- (xi) Census and statistics :
- (xii) Currency, coinage, and legal tender :
- (xiii) Banking, other than State banking ; also State banking extending beyond the limits of the State concerned, the incorporation of banks, and the issue of paper money :

1. Two proposed laws for the alteration of the Constitution were submitted to the people for acceptance or rejection on the 26th April, 1911. They were (A) The Constitution Alteration (Legislative Powers) 1910, and (B) the Constitution Alteration (Monopolies) 1910.

(A) *Constitution Alteration (Legislative Powers) 1910*. The object of this proposed law was to extend the powers of the Commonwealth Government (under section 51 of the Constitution) in four directions, viz.—(a) Trade and Commerce, (b) Corporations, (c) Industrial matters, and (d) Trusts and monopolies.

(a) *Trade and Commerce*. In Section 51, para. (i.) of the Constitution, it was proposed to omit the words "with other countries, and among the States," so as to give the Commonwealth Parliament power to legislate with respect to trade and commerce, without limitation.

(b) *Corporations*. It was proposed to omit the words (para. xx.) "Foreign corporations, and trading or financial corporations formed within the limits of the Commonwealth," and to insert in lieu thereof the words—"Corporations including (a) the creation, dissolution, regulation, and control of corporations ; (b) corporations formed under the law of a State (except any corporation formed solely for religious, charitable, scientific or artistic purposes, and not for the acquisition of gain by the corporation or its members), including their dissolution, regulation and control ; and (c) foreign corporations, including their regulation and control."

(c) *Industrial Matters*. In para. xxxv. it was proposed to omit the words "Conciliation and arbitration for the prevention and settlement of industrial disputes extending beyond the limits of any one State," and to insert in lieu thereof the words "labour and employment, including (a) the wages and conditions of labour and employment in any trade, industry, or calling ; and (b) the prevention and settlement of industrial disputes, including disputes in relation to employment on or about railways, the property of any State."

(d) *Trusts and Monopolies*. It was proposed to amend Section 51 of the Constitution by adding at the end thereof the following paragraph :—" (xl.) Combinations and monopolies in relation to the production, manufacture, or supply of goods or services."

(B) *Constitution Alteration (Monopolies) 1910*. The object of this proposed law was to alter the Constitution by inserting, after Section 51 thereof, the following section :—" 51A. When each House of Parliament, in the same session, has by resolution declared that the industry or business of producing, manufacturing, or supplying goods, or of supplying any specified services, is the subject of any monopoly the Parliament shall have power to make laws for carrying on the industry or business by or under the control of the Commonwealth, and acquiring for that purpose on just terms any property used in connection with the industry or business."

Neither of the proposed laws was approved by the people.

On the 31st May, 1913, the date of the Parliamentary elections, the same proposed alterations were again submitted to the people as five distinct laws, with an additional one whereby the conditions of employment and the settlement of disputes relating thereto in the several State railway services might be brought within the jurisdiction of the Commonwealth. All six proposed laws were negatived by the people.—See section XXV. §2.

2. On the 15th July, 1915, the Commonwealth Parliament passed a bill for the submission to the electors of proposed laws to amend the Constitution in regard to the legislative powers of the Commonwealth Parliament. The proposed amendments differed somewhat from those submitted to the electors in years 1911 and 1913. Thus in regard to (A) (b) *Corporations* (see 1 above) it was proposed to specifically exclude municipal and governmental corporations. (A) (c) was modified to read thus after "to insert in lieu (in their stead) the words"—Including (a) Labour, (b) Employment and unemployment, (c) The terms and conditions of labour and employment in any trade, industry, occupation, or calling, (d) The rights and obligations of employers and employees, (e) Strikes and lockouts, (f) The maintenance of industrial peace, (g) The settlement of industrial disputes. With regard to railway disputes it was proposed to insert after (A) (d) the following paragraph :—" (xxv. A.) Conciliation and arbitration for the prevention and settlement of industrial disputes in relation to employment in the railway service of a State. (A) (d) was modified to read (xl.) Trusts, combinations, monopolies, and arrangements in relation to (a) the production, manufacture, or supply of goods, or the supply of services. (b) (see 1 above) was the means of production, manufacture, or supply of goods, or supply of services. (c) (see 1 above) was not modified as follows :—"After "has by resolution" the words "passed by an absolute majority of its members" were added, and an additional subsection was inserted to the effect that the section was not to apply to any industry or business conducted or carried on by the Government of a State, or any public authority constituted under a State. Writs were issued for referendums to be held on the 11th December, 1915, but they were withdrawn under Act 51 of 1915.

3. On 28th October, 1910, a further submission of proposals to alter the Constitution was decreed by Parliament. These also related to the extension of the legislative powers of the Commonwealth in regard to industrial disputes, and to the nationalization of monopolies. Neither of the proposals was approved by the people.

- (xiv) Insurance, other than State insurance ; also State insurance extending beyond the limits of the State concerned :
- (xv) Weights and measures :
- (xvi) Bills of exchange and promissory notes :
- (xvii) Bankruptcy and insolvency :
- (xviii) Copyrights, patents of inventions and designs, and trade marks :
- (xix) Naturalization and aliens :
- (xx) Foreign corporations, and trading or financial corporations formed within the limits of the Commonwealth :¹
- (xxi) Marriage :
- (xxii) Divorce and matrimonial causes ; and in relation thereto, parental rights, and the custody and guardianship of infants :
- (xxiii) Invalid and old-age pensions :
- (xxiv) The service and execution throughout the Commonwealth of the civil and criminal process and the judgments of the Courts of the States :
- (xxv) The recognition throughout the Commonwealth of the laws, the public Acts and records, and the judicial proceedings of the States :
- (xxvi) The people of any race, other than the aboriginal race in any State, for whom it is deemed necessary to make special laws :
- (xxvii) Immigration and emigration :
- (xxviii) The influx of criminals ;
- (xxix) External affairs :
- (xxx) The relations of the Commonwealth with the islands of the Pacific :
- (xxxi) The acquisition of property on just terms from any State or person for any purpose in respect of which the Parliament has power to make laws :
- (xxxii) The control of railways with respect to transport for the naval and military purposes of the Commonwealth :
- (xxxiii) The acquisition, with the consent of a State, of any railways of the State on terms arranged between the Commonwealth and the State :
- (xxxiv) Railway construction and extension in any State with the consent of that State :
- (xxxv) Conciliation and arbitration for the prevention and settlement of industrial disputes extending beyond the limits of any one State :¹
- (xxxvi) Matters in respect of which this Constitution makes provision until the Parliament otherwise provides :
- (xxxvii) Matters referred to the Parliament of the Commonwealth by the Parliament or Parliaments of any State or States, but so that the law shall extend only to States by whose Parliaments the matter is referred, or which afterwards adopt the law :
- (xxxviii) The exercise within the Commonwealth, at the request or with the concurrence of the Parliaments of all the States directly concerned, of any power which can at the establishment of this Constitution be exercised only by the Parliament of the United Kingdom or by the Federal Council of Australasia :
- (xxxix) Matters incidental to the execution of any power vested by this Constitution in the Parliament or in either House thereof, or in the Government of the Commonwealth, or in the Federal Judicature, or in any department or officer of the Commonwealth.

52. The Parliament shall, subject to this Constitution, have exclusive power to make laws for the peace, order, and good government of the Commonwealth, with respect to—

- (i) The seat of Government of the Commonwealth, and all places acquired by the Commonwealth for public purposes :
- (ii) Matters relating to any department of the public service the control of which is by this Constitution transferred to the Executive Government of the Commonwealth :
- (iii) Other matters declared by this Constitution to be within the exclusive power of the Parliament.

1. See footnotes 1, 2, and 3 on previous page.

53. Proposed laws appropriating revenue or moneys, or imposing taxation, shall not originate in the Senate. But a proposed law shall not be taken to appropriate revenue or moneys, or to impose taxation, by reason only of its containing provisions for the imposition or appropriation of fines or other pecuniary penalties, or for the demand or payment or appropriation of fees for licenses, or fees for services under the proposed law.

The Senate may not amend proposed laws imposing taxation, or proposed laws appropriating revenue or moneys for the ordinary annual services of the Government.

The Senate may not amend any proposed laws so as to increase any proposed charge or burden on the people.

The Senate may at any stage return to the House of Representatives any proposed law which the Senate may not amend, requesting, by message, the omission or amendment of any items or provisions therein. And the House of Representatives may, if it thinks fit, make any of such omissions or amendments, with or without modifications.

Except as provided in this section, the Senate shall have equal power with the House of Representatives in respect of all proposed laws.

54. The proposed law which appropriates revenue or moneys for the ordinary annual services of the Government shall deal only with such appropriation.

55. Laws imposing taxation shall deal only with the imposition of taxation, and any provisions therein dealing with any other matter shall be of no effect.

Laws imposing taxation, except laws imposing duties of customs or of excise, shall deal with one subject of taxation only; but laws imposing duties of customs shall deal with duties of customs only, and laws imposing duties of excise shall deal with duties of excise only.

56. A vote, resolution, or proposed law for the appropriation of revenue or moneys shall not be passed unless the purpose of the appropriation has in the same session been recommended by message of the Governor-General to the House in which the proposal originated.

57. If the House of Representatives passes any proposed law, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, and if after an interval of three months the House of Representatives, in the same or the next session, again passes the proposed law with or without any amendments which have been made, suggested, or agreed to by the Senate, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, the Governor-General may dissolve the Senate and the House of Representatives simultaneously. But such dissolution shall not take place within six months before the date of the expiry of the House of Representatives by effluxion of time.

If after such dissolution the House of Representatives again passes the proposed law, with or without any amendments which have been made, suggested, or agreed to by the Senate, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, the Governor-General may convene a joint sitting of the members of the Senate and of the House of Representatives.

The members present at the joint sitting may deliberate and shall vote together upon the proposed law as last proposed by the House of Representatives, and upon amendments, if any, which have been made therein by one House and not agreed to by the other, and any such amendments which are affirmed by an absolute majority of the total number of the members of the Senate and House of Representatives shall be taken to have been carried, and if the proposed law, with the amendments, if any, so carried is affirmed by an absolute majority of the total number of members of the Senate and House of Representatives, it shall be taken to have been duly passed by both Houses of the Parliament, and shall be presented to the Governor-General for the Queen's assent.

58. When a proposed law passed by both Houses of the Parliament is presented to the Governor-General for the Queen's assent, he shall declare, according to his discretion, but subject to this Constitution, that he assents in the Queen's name, or that he withholds assent, or that he reserves the law for the Queen's pleasure.

The Governor-General may return to the House in which it originated any proposed law so presented to him, and may transmit therewith any amendments which he may recommend, and the Houses may deal with the recommendation.

59. The Queen may disallow any law within one year from the Governor-General's assent, and such disallowance on being made known by the Governor-General by speech or message to each of the Houses of the Parliament, or by Proclamation, shall annul the law from the day when the disallowance is so made known.

60. A proposed law reserved for the Queen's pleasure shall not have any force unless and until within two years from the day on which it was presented to the Governor-General for the Queen's assent the Governor-General makes known, by speech or message to each of the Houses of Parliament, or by Proclamation, that it has received the Queen's assent.

CHAPTER II.—THE EXECUTIVE GOVERNMENT.

61. The executive power of the Commonwealth is vested in the Queen and is exercisable by the Governor-General as the Queen's representative, and extends to the execution and maintenance of this Constitution, and of the laws of the Commonwealth.

62. There shall be a Federal Executive Council to advise the Governor-General in the government of the Commonwealth, and the members of the Council shall be chosen and summoned by the Governor-General and sworn as Executive Councillors, and shall hold office during his pleasure.

63. The provisions of this Constitution referring to the Governor-General in Council shall be construed as referring to the Governor-General acting with the advice of the Federal Executive Council.

64. The Governor-General may appoint officers to administer such departments of State of the Commonwealth as the Governor-General in Council may establish.

Such officers shall hold office during the pleasure of the Governor-General. They shall be members of the Federal Executive Council, and shall be the Queen's Ministers of State for the Commonwealth.

After the first general election no Minister of State shall hold office for a longer period than three months unless he is or becomes a senator or a member of the House of Representatives.

65. Until the Parliament otherwise provides, the Ministers of State shall not exceed seven in number, and shall hold such offices as the Parliament prescribes, or, in the absence of provision, as the Governor-General directs.¹

66. There shall be payable to the Queen, out of the Consolidated Revenue Fund of the Commonwealth, for the salaries of the Ministers of State, an annual sum which, until the Parliament otherwise provides, shall not exceed twelve thousand pounds a year.¹

67. Until the Parliament otherwise provides, the appointment and removal of all other officers of the Executive Government of the Commonwealth shall be vested in the Governor-General in Council, unless the appointment is delegated by the Governor-General in Council or by a law of the Commonwealth to some other authority.

68. The command in chief of the naval and military forces of the Commonwealth is vested in the Governor-General as the Queen's representative.

69. On a date or dates to be proclaimed by the Governor-General after the establishment of the Commonwealth the following departments of the public service in each State shall be transferred to the Commonwealth :—²

Posts, telegraphs, and telephones :	Lighthouses, lightships, beacons, and buoys : Quarantine.
Naval and military defence :	

But the departments of customs and of excise in each State shall become transferred to the Commonwealth on its establishment.

70. In respect of matters which, under this Constitution, pass to the Executive Government of the Commonwealth, all powers and functions which at the establishment of the Commonwealth are vested in the Governor of a Colony, or in the Governor of a Colony with the advice of his Executive Council, or in any authority of a Colony, shall vest in the Governor-General, or in the Governor-General in Council, or in the authority exercising similar powers under the Commonwealth, as the case requires.

1. By the Ministers of State Acts 1915 and 1917, the Ministers of State may exceed seven, but shall not exceed nine. £15,300 annually was allotted by these Acts for their salaries; and £800 per annum each was added by the Parliamentary Allowances Act 1920.

2. As to departments and dates of transfer see Section XIX.—COMMONWEALTH FINANCE, § 1 hereinafter.

CHAPTER III.—THE JUDICATURE.

71. The judicial power of the Commonwealth shall be vested in a Federal Supreme Court, to be called the High Court of Australia, and in such other federal courts as the Parliament creates, and in such other courts as it invests with federal jurisdiction. The High Court shall consist of a Chief Justice, and so many other Justices, not less than two, as the Parliament prescribes.

72. The Justices of the High Court and of the other courts created by the Parliament—

- (i) Shall be appointed by the Governor-General in Council :
- (ii) Shall not be removed except by the Governor-General in Council, on an address from both Houses of the Parliament in the same session, praying for such removal on the ground of proved misbehaviour or incapacity :
- (iii) Shall receive such remuneration as the Parliament may fix : but the remuneration shall not be diminished during their continuance in office.

73. The High Court shall have jurisdiction, with such exceptions and subject to such regulations as the Parliament prescribes, to hear and determine appeals from all judgments, decrees, orders, and sentences—

- (i) Of any Justice or Justices exercising the original jurisdiction of the High Court :
- (ii) Of any other federal court, or court exercising federal jurisdiction ; or of the Supreme Court of any State, or of any other court of any State from which at the establishment of the Commonwealth an appeal lies to the Queen in Council :
- (iii) Of the Inter-State Commission, but as to questions of law only :

and the judgment of the High Court in all such cases shall be final and conclusive.

But no exception or regulation prescribed by the Parliament shall prevent the High Court from hearing and determining any appeal from the Supreme Court of a State in any matter in which at the establishment of the Commonwealth an appeal lies from such Supreme Court to the Queen in Council.

Until the Parliament otherwise provides, the conditions of and restrictions on appeals to the Queen in Council from the Supreme Courts of the several States shall be applicable to appeals from them to the High Court.

74. No appeal shall be permitted to the Queen in Council from a decision of the High Court upon any question, howsoever arising, as to the limits *inter se* of the Constitutional powers of the Commonwealth and those of any State or States, or as to the limits *inter se* of the Constitutional powers of any two or more States, unless the High Court shall certify that the question is one which ought to be determined by Her Majesty in Council.

The High Court may so certify if satisfied that for any special reason the certificate should be granted, and thereupon an appeal shall lie to Her Majesty in Council on the question without further leave.

Except as provided in this section, this Constitution shall not impair any right which the Queen may be pleased to exercise by virtue of Her Royal prerogative to grant special leave of appeal from the High Court to Her Majesty in Council. The Parliament may make laws limiting the matters in which such leave may be asked, but proposed laws containing any such limitation shall be reserved by the Governor-General for Her Majesty's pleasure.

75. In all matters—

- (i) Arising under any treaty :
- (ii) Affecting consuls or other representatives of other countries :
- (iii) In which the Commonwealth, or a person suing or being sued on behalf of the Commonwealth, is a party :
- (iv) Between States, or between residents of different States, or between a State and a resident of another State :
- (v) In which a writ of Mandamus or prohibition or an injunction is sought against an officer of the Commonwealth :

the High Court shall have original jurisdiction.

76. The Parliament may make laws conferring original jurisdiction on the High Court in any matter—

- (i) Arising under this Constitution, or involving its interpretation :
- (ii) Arising under any laws made by the Parliament :
- (iii) Of Admiralty and maritime jurisdiction :
- (iv) Relating to the same subject-matter claimed under the laws of different States.

77. With respect to any of the matters mentioned in the last two sections the Parliament may make laws—

- (i) Defining the jurisdiction of any federal court other than the High Court :
- (ii) Defining the extent to which the jurisdiction of any federal court shall be exclusive of that which belongs to or is invested in the courts of the States :
- (iii) Investing any court of a State with federal jurisdiction.

78. The Parliament may make laws conferring rights to proceed against the Commonwealth or a State in respect of matters within the limits of the judicial power.

79. The federal jurisdiction of any court may be exercised by such number of judges as the Parliament prescribes.

80. The trial on indictment of any offence against any law of the Commonwealth shall be by jury, and every such trial shall be held in the State where the offence was committed, and if the offence was not committed within any State the trial shall be held at such place or places as the Parliament prescribes.

CHAPTER IV.—FINANCE AND TRADE.

81. All revenues or moneys raised or received by the Executive Government of the Commonwealth shall form one Consolidated Revenue Fund, to be appropriated for the purposes of the Commonwealth in the manner and subject to the charges and liabilities imposed by this Constitution.

82. The costs, charges, and expenses incident to the collection, management, and receipt of the Consolidated Revenue Fund shall form the first charge thereon ; and the revenue of the Commonwealth shall in the first instance be applied to the payment of the expenditure of the Commonwealth.

83. No money shall be drawn from the Treasury of the Commonwealth except under appropriation made by law.

But until the expiration of one month after the first meeting of the Parliament the Governor-General in Council may draw from the Treasury and expend such moneys as may be necessary for the maintenance of any department transferred to the Commonwealth and for the holding of the first elections for the Parliament.

84. When any department of the public service of a State becomes transferred to the Commonwealth, all officers of the department shall become subject to the control of the Executive Government of the Commonwealth.

Any such officer who is not retained in the service of the Commonwealth shall, unless he is appointed to some other office of equal emolument in the public service of the State, be entitled to receive from the State any pension, gratuity, or other compensation, payable under the law of the State on the abolition of his office.

Any such officer who is retained in the service of the Commonwealth shall preserve all his existing and accruing rights, and shall be entitled to retire from office at the time, and on the pension or retiring allowance, which would be permitted by the law of the State if his service with the Commonwealth were a continuation of his service with the State. Such pension or retiring allowance shall be paid to him by the Commonwealth ; but the State shall pay to the Commonwealth a part thereof, to be calculated on the proportion which his term of service with the State bears to his whole term of service, and for the purpose of the calculation his salary shall be taken to be that paid to him by the State at the time of transfer.

Any officer who is, at the establishment of the Commonwealth, in the public service of a State, and who is, by consent of the Governor of the State with the advice of the Executive Council thereof, transferred to the public service of the Commonwealth, shall have the same rights as if he had been an officer of a department transferred to the Commonwealth and were retained in the service of the Commonwealth.

85. When any department of the public service of a State is transferred to the Commonwealth—

- (i) All property of the State of any kind, used exclusively in connexion with the department, shall become vested in the Commonwealth; but, in the case of the departments controlling customs and excise and bounties, for such time only as the Governor-General in Council may declare to be necessary:
- (ii) The Commonwealth may acquire any property of the State, of any kind used, but not exclusively used in connexion with the department; the value thereof shall, if no agreement can be made, be ascertained in, as nearly as may be, the manner in which the value of land, or of an interest in land, taken by the State for public purposes is ascertained under the law of the State in force at the establishment of the Commonwealth:
- (iii) The Commonwealth shall compensate the State for the value of any property passing to the Commonwealth under this section: if no agreement can be made as to the mode of compensation, it shall be determined under laws to be made by the Parliament:
- (iv) The Commonwealth shall, at the date of the transfer, assume the current obligations of the State in respect of the department transferred.

86. On the establishment of the Commonwealth, the collection and control of duties of customs and of excise, and the control of the payment of bounties, shall pass to the Executive Government of the Commonwealth.

87. During a period of ten years after the establishment of the Commonwealth and thereafter until the Parliament otherwise provides, of the net revenue of the Commonwealth from duties of customs and of excise not more than one-fourth shall be applied annually by the Commonwealth towards its expenditure.

The balance shall, in accordance with this Constitution, be paid to the several States, or applied to the payment of interest on debts of the several States taken over by the Commonwealth.¹

88. Uniform duties of customs shall be imposed within two years after the establishment of the Commonwealth.²

89. Until the imposition of uniform duties of customs—

- (i) The Commonwealth shall credit to each State the revenues collected therein by the Commonwealth.
- (ii) The Commonwealth shall debit to each State—
 - (a) The expenditure therein of the Commonwealth incurred solely for the maintenance or continuance, as at the time of transfer, of any department transferred from the State to the Commonwealth;
 - (b) The proportion of the State, according to the number of its people, in the other expenditure of the Commonwealth.
- (iii) The Commonwealth shall pay to each State month by month the balance (if any) in favour of the State.

90. On the imposition of uniform duties of customs the power of the Parliament to impose duties of customs and of excise, and to grant bounties on the production or export of goods, shall become exclusive.

On the imposition of uniform duties of customs all laws of the several States imposing duties of customs or of excise, or offering bounties on the production or export of goods, shall cease to have effect, but any grant of or agreement for any such bounty lawfully made by or under the authority of the Government of any State shall be taken to be good if made before the thirtieth day of June, one thousand eight hundred and ninety-eight, and not otherwise.

91. Nothing in this Constitution prohibits a State from granting any aid to or bounty on mining for gold, silver, or other metals, nor from granting, with the consent of both Houses of the Parliament of the Commonwealth expressed by resolution, any aid to or bounty on the production or export of goods.

1. This has been known as the Braddon clause. The Surplus Revenue Act 1910 provides for the termination of this clause as from the 31st December, 1910, and for the payment to the States of twenty-five shillings per head of population until the 30th June, 1920, or thereafter, until Parliament otherwise provides, subject to certain adjustments for the year ended 30th June, 1911. For further information see Section XIX. hereinafter.

2. Uniform customs duties were imposed by the Customs Tariff 1902, as from 8th October, 1901.

92. On the imposition of uniform duties of customs, trade, commerce, and intercourse among the States, whether by means of internal carriage or ocean navigation, shall be absolutely free.

But notwithstanding anything in this Constitution, goods imported before the imposition of uniform duties of customs into any State, or into any Colony which, whilst the goods remain therein, becomes a State, shall, on thence passing into another State within two years after the imposition of such duties, be liable to any duty chargeable on the importation of such goods into the Commonwealth, less any duty paid in respect of the goods on their importation.

93. During the first five years after the imposition of uniform duties of customs and thereafter until the Parliament otherwise provides—

(i) The duties of customs chargeable on goods imported into a State and afterwards passing into another State for consumption, and the duties of excise paid on goods produced or manufactured in a State and afterwards passing into another State for consumption, shall be taken to have been collected not in the former but in the latter State :

(ii) Subject to the last sub-section, the Commonwealth shall credit revenue, debit expenditure, and pay balances to the several States as prescribed by the period preceding the imposition of uniform duties of customs.¹

94. After five years from the imposition of uniform duties of customs, the Parliament may provide, on such basis as it deems fair, for the monthly payment to the several States of all surplus revenue of the Commonwealth.

95. Notwithstanding anything in this Constitution, the Parliament of the State of Western Australia, if that State be an original State, may, during the first five years after the imposition of uniform duties of customs, impose duties of customs on goods passing into that State and not originally imported from beyond the limits of the Commonwealth ; and such duties shall be collected by the Commonwealth.

But any duty so imposed on any goods shall not exceed during the first of such years the duty chargeable on the goods under the law of Western Australia in force at the imposition of uniform duties, and shall not exceed during the second, third, fourth, and fifth of such years respectively, four-fifths, three-fifths, two-fifths, and one-fifth of such latter duty, and all duties imposed under this section shall cease at the expiration of the fifth year after the imposition of uniform duties.

If at any time during the five years the duty on any goods under this section is higher than the duty imposed by the Commonwealth on the importation of the like goods, then such higher duty shall be collected on the goods when imported into Western Australia from beyond the limits of the Commonwealth.

96. During a period of ten years after the establishment of the Commonwealth and thereafter until the Parliament otherwise provides, the Parliament may grant financial assistance to any State on such terms and conditions as the Parliament thinks fit.

97. Until the Parliament otherwise provides, the laws in force in any Colony which has become or becomes a State with respect to the receipt of revenue and the expenditure of money on account of the Government of the Colony, and the review and audit of such receipt and expenditure, shall apply to the receipt of revenue and the expenditure of money on account of the Commonwealth in the State in the same manner as if the Commonwealth, or the Government or an officer of the Commonwealth, were mentioned whenever the Colony, or the Government or an officer of the Colony, is mentioned.

98. The power of the Parliament to make laws with respect to trade and commerce extends to navigation and shipping, and to railways the property of any State.

99. The Commonwealth shall not, by any law or regulation of trade, commerce, or revenue, give preference to one State or any part thereof over another State or any part thereof.

100. The Commonwealth shall not, by any law or regulation of trade or commerce, abridge the right of a State or of the residents therein to the reasonable use of the waters of rivers for conservation or irrigation.

1. The Surplus Revenue Act 1903, which was amended by the Surplus Revenue Act 1910, states that the provisions of Section 93 of the Constitution shall expire on the date of the commencement of the Surplus Revenue Act 1903, that is, on 13th June, 1903, and also makes provisions in lieu of the expired provisions. The Surplus Revenue Act 1910 repeals the greater part of the provisions of the Act of 1903. See footnote to Section 87 of this Act.

101. There shall be an Inter-State Commission, with such powers of adjudication and administration as the Parliament deems necessary for the execution and maintenance, within the Commonwealth, of the provisions of this Constitution relating to trade and commerce, and of all laws made thereunder.¹

102. The Parliament may by any law with respect to trade or commerce forbid, as to railways, any preference or discrimination by any State, or by any authority constituted under a State, if such preference or discrimination is undue and unreasonable, or unjust to any State, due regard being had to the financial responsibilities incurred by any State in connexion with the construction and maintenance of its railways. But no preference or discrimination shall, within the meaning of this section, be taken to be undue and unreasonable, or unjust to any State, unless so adjudged by the Inter-State Commission.

103. The members of the Inter-State Commission—

(i) Shall be appointed by the Governor-General in Council :

(ii) Shall hold office for seven years, but may be removed within that time by the Governor-General in Council, on an address from both Houses of Parliament in the same session praying for such removal on the ground of proved misbehaviour or incapacity :

(iii) Shall receive such remuneration as the Parliament may fix ; but such remuneration shall not be diminished during their continuance in office.

104. Nothing in this Constitution shall render unlawful any rate for carriage of goods upon a railway, the property of a State, if the rate is deemed by the Inter-State Commission to be necessary for the development of the territory of the State, and if the rate applies equally to goods within the State and to goods passing into the State from other States.

105. The Parliament may take over from the States their public debts [as existing at the establishment of the Commonwealth],² or a proportion thereof according to the respective numbers of their people as shewn by the latest statistics of the Commonwealth, and may convert, renew, or consolidate such debts, or any part thereof ; and the State shall indemnify the Commonwealth in respect of the debts taken over, and thereafter the interest payable in respect of the debts shall be deducted and retained from the portions of the surplus revenue of the Commonwealth payable to the several States, or if such surplus is insufficient, or if there is no surplus, then the deficiency or the whole amount shall be paid by the several States.

CHAPTER V.—THE STATES.

106. The Constitution of each State of the Commonwealth shall, subject to this Constitution, continue as at the establishment of the Commonwealth, or as at the admission or establishment of the State, as the case may be, until altered in accordance with the Constitution of the State.

107. Every power of the Parliament of a Colony which has become or becomes a State, shall, unless it is by this Constitution exclusively vested in the Parliament of the Commonwealth or withdrawn from the Parliament of the State, continue as at the establishment of the Commonwealth, or as at the admission or establishment of the State, as the case may be.

108. Every law in force in a Colony which has become or becomes a State, and relating to any matter within the powers of the Parliament of the Commonwealth, shall, subject to this Constitution, continue in force in the State, and, until provision is made in that behalf by the Parliament of the Commonwealth, the Parliament of the State shall have such powers of alteration and of repeal in respect of any such law as the Parliament of the Colony had until the Colony became a State.

109. When a law of a State is inconsistent with a law of the Commonwealth, the latter shall prevail, and the former shall, to the extent of the inconsistency, be invalid.

110. The provisions of this Constitution relating to the Governor of a State extend and apply to the Governor for the time being of the State, or other chief executive officer or administrator of the government of the State.

1. The Commission was brought into existence in 1913, under Act No. 33 of 1912, by the appointment of Commissioners for seven years. This period has expired, but no fresh appointments have been made.
2. Under Section 2 of the Constitution Alteration (State Debts) 1909, the words in square brackets are omitted.

111. The Parliament of a State may surrender any part of the State to the Commonwealth; and upon such surrender, and the acceptance thereof by the Commonwealth, such part of the State shall become subject to the exclusive jurisdiction of the Commonwealth.

112. After uniform duties of customs have been imposed, a State may levy on imports or exports, or on goods passing into or out of the State, such charges as may be necessary for executing the inspection laws of the State; but the net produce of all charges so levied shall be for the use of the Commonwealth; and any such inspection laws may be annulled by the Parliament of the Commonwealth.

113. All fermented, distilled, or other intoxicating liquids passing into any State or remaining therein for use, consumption, sale, or storage, shall be subject to the laws of the State as if such liquids had been produced in the State.

114. A State shall not, without the consent of the Parliament of the Commonwealth, raise or maintain any naval or military force, or impose any tax on property of any kind belonging to the Commonwealth, nor shall the Commonwealth impose any tax on property of any kind belonging to a State.

115. A State shall not coin money, nor make anything but gold and silver coin a legal tender in payment of debts.

116. The Commonwealth shall not make any laws for establishing any religion, or for imposing any religious observance, or for prohibiting the free exercise of any religion, and no religious test shall be required as a qualification for any office or public trust under the Commonwealth.

117. A subject of the Queen, resident in any State, shall not be subject in any other State to any disability or discrimination which would not be equally applicable to him if he were a subject of the Queen resident in such other State.

118. Full faith and credit shall be given, throughout the Commonwealth, to the laws, the public Acts and records, and the judicial proceedings of every State.

119. The Commonwealth shall protect every State against invasion and, on the application of the Executive Government of the State, against domestic violence.

120. Every State shall make provision for the detention in its prisons of persons accused or convicted of offences against the laws of the Commonwealth, and for the punishment of persons convicted of such offences, and the Parliament of the Commonwealth may make laws to give effect to this provision.

CHAPTER VI.—NEW STATES.

121. The Parliament may admit to the Commonwealth or establish new States, and may upon such admission or establishment make or impose such terms and conditions, including the extent of representation in either House of the Parliament, as it thinks fit.

122. The Parliament may make laws for the government of any territory surrendered by any State to and accepted by the Commonwealth, or of any territory placed by the Queen under the authority of and accepted by the Commonwealth, or otherwise acquired by the Commonwealth, and may allow the representation of such territory in either House of the Parliament to the extent and on the terms which it thinks fit.

123. The Parliament of the Commonwealth may, with the consent of the Parliament of a State, and the approval of the majority of the electors of the State voting upon the question, increase, diminish, or otherwise alter the limits of the State, upon such terms and conditions as may be agreed on, and may, with the like consent, make provision respecting the effect and operation of any increase or diminution or alteration of territory in relation to any State affected.

124. A new State may be formed by separation of territory from a State, but only with consent of the Parliament thereof, and a new State may be formed by the union of two or more States or parts of States, but only with the consent of the Parliaments of the States affected.

CHAPTER VII.—MISCELLANEOUS.

125. The seat of Government of the Commonwealth shall be determined by the Parliament, and shall be within territory which shall have been granted to or acquired by the Commonwealth, and shall be vested in and belong to the Commonwealth, and shall be in the State of New South Wales, and be distant not less than one hundred miles from Sydney.

Such territory shall contain an area of not less than one hundred square miles, and such portion thereof as shall consist of Crown lands shall be granted to the Commonwealth without any payment therefor.

The Parliament shall sit at Melbourne until it meet at the seat of Government:

126. The Queen may authorise the Governor-General to appoint any person, or any persons jointly or severally, to be his deputy or deputies within any part of the Commonwealth, and in that capacity to exercise during the pleasure of the Governor-General such powers and functions of the Governor-General as he thinks fit to assign to such deputy or deputies, subject to any limitations expressed or directions given by the Queen: but the appointment of such deputy or deputies shall not affect the exercise by the Governor-General himself of any power or function.

127. In reckoning the numbers of the people of the Commonwealth, or of a State or other part of the Commonwealth, aboriginal natives shall not be counted.

CHAPTER VIII.—ALTERATION OF THE CONSTITUTION.¹

128. This Constitution shall not be altered except in the following manner:—

The proposed law for the alteration thereof must be passed by an absolute majority of each House of the Parliament, and not less than two nor more than six months after its passage through both Houses the proposed law shall be submitted in each State to the electors qualified to vote for the election of members of the House of Representatives.²

But if either House passes any such proposed law by an absolute majority, and the other House rejects or fails to pass it or passes it with any amendment to which the first-mentioned House will not agree, and if after an interval of three months the first-mentioned House in the same or the next session again passes the proposed law by an absolute majority with or without any amendment which has been made or agreed to by the other House, and such other House rejects or fails to pass it or passes it with any amendment to which the first-mentioned House will not agree, the Governor-General may submit the proposed law as last proposed by the first-mentioned House, and either with or without any amendments subsequently agreed to by both Houses, to the electors in each State qualified to vote for the election of the House of Representatives.

When a proposed law is submitted to the electors the vote shall be taken in such manner as the Parliament prescribes. But until the qualification of electors of members of the House of Representatives becomes uniform throughout the Commonwealth, only one-half the electors voting for and against the proposed law shall be counted in any State in which adult suffrage prevails.

And if in a majority of the States a majority of the electors voting approve the proposed law, and if a majority of all the electors voting also approve the proposed law, it shall be presented to the Governor-General for the Queen's assent.

No alteration diminishing the proportionate representation of any State in either House of the Parliament, or the minimum number of representatives of a State in the House of Representatives, or increasing, diminishing, or otherwise altering the limits of the State, or in any manner affecting the provisions of the Constitution in relation thereto, shall become law unless the majority of the electors voting in that State approve the proposed law.

1. The Constitution has been altered by the following Acts:—The Constitution Alteration (Senate Elections) 1906 (No. 1 of 1907); and the Constitution Alteration (State Debts) 1909 (No. 3 of 1910).

2. The Referendum (Constitution Alteration) Act 1906–1919, provides the necessary machinery for the submission to the electors of any proposed law for the alteration of the Constitution.

SCHEDULE.

OATH.

I, *A.B.*, do swear that I will be faithful and bear true allegiance to Her Majesty Queen Victoria, Her heirs and successors according to law. So HELP ME GOD!

AFFIRMATION.

I, *A.B.*, do solemnly and sincerely affirm and declare that I will be faithful and bear true allegiance to Her Majesty Queen Victoria, Her heirs and successors according to law.

(NOTE.—*The name of the King or Queen of the United Kingdom of Great Britain and Ireland for the time being is to be substituted from time to time.*)

2. **The Royal Proclamation.**—The preceding Act received the Royal assent on the 9th July, 1900. This made it lawful to declare that the people of Australia should be united in a Federal Commonwealth. This proclamation, made on the 17th September, 1900, constituted the Commonwealth as from the 1st January, 1901: it reads as follows:—

BY THE QUEEN.
A PROCLAMATION.

(Signed) VICTORIA R.

WHEREAS by an Act of Parliament passed in the Sixty-third and Sixty-fourth Years of Our Reign, intituled “An Act to constitute the Commonwealth of *Australia*,” it is enacted that it shall be lawful for the Queen, with the advice of the Privy Council, to declare by Proclamation, that, on and after a day therein appointed, not being later than One Year after the passing of this Act, the people of *New South Wales, Victoria, South Australia, Queensland, and Tasmania*, and also, if Her Majesty is satisfied that the people of *Western Australia* have agreed thereto, of *Western Australia*, shall be united in a Federal Commonwealth under the name of the Commonwealth of *Australia*.

And whereas We are satisfied that the people of *Western Australia* have agreed thereto accordingly.

We therefore, by and with the advice of Our Privy Council, have thought fit to issue this Our Royal Proclamation, and We do hereby declare that on and after the First day of *January* One thousand nine hundred and one, the people of *New South Wales, Victoria, South Australia, Queensland, Tasmania, and Western Australia* shall be united in a Federal Commonwealth under the name of the Commonwealth of *Australia*.

Given at Our Court at *Balmoral* this Seventeenth day of *September*, in the Year of Our Lord One thousand nine hundred, and in the Sixty-fourth Year of Our Reign.

GOD SAVE THE QUEEN.

§ 9. Commonwealth Legislation.

1. **The Commonwealth Parliaments.**—The first Parliament of the Commonwealth was convened by proclamation dated 29th April, 1901, by His Excellency the late Marquis of Linlithgow, then Earl of Hopetoun, Governor-General. It was opened on the 9th May following by H.R.H. the Duke of Cornwall and York, who had been sent to Australia for that purpose by His Majesty the King; the Rt. Hon. Sir Edmund Barton, P.C., G.C.M.G., K.C., being Prime Minister.

The following table gives the number and duration of Parliaments since Federation:—

COMMONWEALTH PARLIAMENTS, 1901 TO 1921.

		Date of Opening.	Date of Dissolution.
First Parliament	29th April, 1901	23rd November, 1903
Second	2nd March, 1904	12th October, 1906
Third	20th February, 1907	19th February, 1910
Fourth	1st July, 1910	23rd April, 1913
Fifth	9th July, 1913	30th July, 1914*
Sixth	8th October, 1914	26th March, 1917
Seventh	14th June, 1917	3rd November, 1919
Eighth	26th February, 1920	—

* On this occasion, the Governor-General, acting on the advice of the Ministry, and under section 57 of the Constitution, granted a dissolution of both the Senate and the House of Representatives, this being the first occasion since Federation on which a dissolution of both Houses had occurred.

The Debates of the first seven Parliaments will be found in Volumes I. to XC. of the Parliamentary Debates.

2. **The Several Administrations.**—The following tabular statements shew the names of the several Governors-General, and the constitution of the Ministries which have directed the administration of the affairs of the Commonwealth since its creation :—

(a) GOVERNORS-GENERAL.

Rt. Hon. EARL OF HOPETOUN (afterwards MARQUIS OF LINLITHGOW), P.C., K.T., G.C.M.G., G.C.V.O.	Sworn 1st January, 1901; recalled 9th May, 1902.
Rt. Hon. HALLAM BARON TENNYSON, G.C.M.G. (Act. Governor-General).	Sworn 17th July, 1902.
Rt. Hon. HALLAM BARON TENNYSON, G.C.M.G. (Governor-General).	Sworn 9th January, 1903; recalled 21st January, 1904.
Rt. Hon. HENRY STAFFORD BARON NORTHCOOTE, P.C., G.C.M.G., G.C.I.E., C.B.	Sworn 21st January, 1904; recalled 8th September, 1908.

‡ P.C., 1920.

A further list of the Ministers of State for the Commonwealth, arranged according to the respective offices occupied, is given in the section of this book dealing with the subject of General Government (see Section XXV.).

3. **The Course of Legislation.**—The actual legislation by the Commonwealth Parliament up to the end of the 1919 session is indicated in alphabetical order in "Vol. XVIII. of the Acts of the Parliament of the Commonwealth of Australia, passed in the session of 1920, with Tables, Appendix and Indexes." A "Chronological Table of Acts passed from 1901 to 1920, shewing how they are affected by subsequent legislation or lapse of time" is also given, and further "A Table of Commonwealth Legislation," for the same period, "in relation to the several provisions of the Constitution," is furnished. Reference may be made to these for complete information. The nature of Commonwealth legislation, up to December, 1920, and its relation to the several provisions of the Constitution, are set forth in the following tabular statement:—

**ANALYTIC TABLE OF COMMONWEALTH LEGISLATION
FROM 1901 to DECEMBER, 1920, IN RELATION TO THE SEVERAL PROVISIONS
OF THE CONSTITUTION.†**

Section of Constitution.	Short Title of Commonwealth Act.*
AMENDMENT OF THE CONSTITUTION.	
	Constitution Alteration (Senate Elections) 1906.
	Constitution Alteration (State Debts) 1909.
PARLIAMENTARY AND ELECTORAL LAW.	
8—30	PARLIAMENTARY FRANCHISE— <i>Commonwealth Franchise Act 1902.*</i> <i>Commonwealth Electoral (War-time) Act 1917-1919.*</i> <i>Commonwealth Electoral Act 1918-1919.</i>
9—34	ELECTIONS— <i>Commonwealth Electoral Act 1902-1911.‡</i> <i>Senate Elections Act 1903.</i> <i>Commonwealth Electoral (War-time) Act 1917-1919.*</i> <i>Commonwealth Electoral Act 1918-1919.</i>
24	DETERMINATION OF NUMBER OF MEMBERS OF HOUSE OF REPRESENTATIVES— <i>Representation Act 1905.</i> <i>Representation Act 1916.</i>
47	DISPUTED ELECTIONS AND QUALIFICATIONS— <i>Commonwealth Electoral Act 1902-1911, Part XVI.*†</i> <i>Disputed Elections and Qualifications Act 1907.*</i> <i>Commonwealth Electoral Act 1918-1919, ss. 183-201.</i>
48	ALLOWANCES TO MEMBERS— <i>Parliamentary Allowances Act 1902.*</i> <i>Parliamentary Allowances Act 1907.*</i> <i>Parliamentary Allowances Act 1920.</i>
49	PRIVILEGES OF PARLIAMENT— <i>Parliamentary Papers Act 1908.</i>
GENERAL LEGISLATION.	
51—(i)	TRADE AND COMMERCE—EXTERNAL AND INTERSTATE— <i>Sea Carriage of Goods Act 1904 [Bills of Lading].</i> <i>Secret Commissions Act 1905.</i> <i>Commerce (Trade Descriptions) Act 1905 [Merchandise Marks].</i> <i>Australian Industries Preservation Act 1906-1910 [Trusts and Dumping].</i> <i>Spirits Act 1906-1918.</i> <i>Seamen's Compensation Act 1909.*</i> <i>Customs (Inter-State Accounts) Act 1910.</i>

* Acts whose short titles are printed in italics with a * have been repealed or have expired.

† This table has been prepared by Sir Robert Garran, Solicitor-General to the Commonwealth.

‡ With the exception of s. 210 of the *Commonwealth Electoral Act 1902*, and s. 18 of the *Commonwealth Electoral Act 1905*, the *Commonwealth Electoral Act 1902-1911* has been repealed by the *Commonwealth Electoral Act 1918*. See *Gazette*, 25th November, 1918, p. 2257, *Gazette*, 21st March, 1919, p. 401, and *Gazette*, 14th December, 1920, p. 2277.

SECTION III.

PHYSIOGRAPHY.

§ 1. General Description of Australia.

1. **Geographical Position.**—The Australian Commonwealth, which includes the island continent of Australia proper and the island of Tasmania, is situated in the Southern Hemisphere, and comprises in all an area of about 2,974,581 square miles, the mainland alone containing about 2,948,366 square miles. Bounded on the west and east by the Indian and Pacific Oceans respectively, it lies between longitudes $113^{\circ} 9' \text{ E.}$ and $153^{\circ} 39' \text{ E.}$, while its northern and southern limits are the parallels of latitude $10^{\circ} 41' \text{ S.}$ and $39^{\circ} 8' \text{ S.}$, or, including Tasmania, $43^{\circ} 39' \text{ S.}$ On its north are the Timor and Arafura Seas and Torres Strait, on its south the Southern Ocean and Bass Strait (*a*).

Tropical and Temperate Regions. Of the total area of Australia the lesser portion lies within the tropics. Assuming, as is usual, that the latitude of the Tropic of Capricorn is $23^{\circ} 30' \text{ S.}$, (*b*) the areas within the tropical and temperate zones are approximately as follows:—

AREAS OF TROPICAL AND TEMPERATE REGIONS

OF STATES AND TERRITORY WITHIN TROPICS.

Areas.	Queensland.	Western Australia.	Northern Territory.	Total.
	Sq. miles.	Sq. miles.	Sq. miles.	Sq. miles.
Within Tropical Zone	359,000	364,000	426,320	1,149,320
Within Temperate Zone	311,500	611,920	97,300	1,020,720
Ratio of Tropical part to whole State ..	0.535	0.373	0.814	0.530
Ratio of Temperate part to whole State	0.465	0.627	0.186	0.470

Thus the tropical part is roughly about one-half (0.530) of the three territories mentioned above, or about five-thirteenths of the whole Commonwealth (0.386). See hereafter Meteorology—page 54.

2. **Area of Australia compared with that of other Countries.**—That the area of Australia is greater than that of the United States of America, that it is four-fifths of that of Canada, that it is nearly one-fourth of the area of the whole of the British Empire, that it is more than three-fourths of the whole area of Europe, that it is more than 25 times as large as any one of the following, viz., the United Kingdom, Hungary, Italy, the Transvaal, and Ecuador, are facts which are not always adequately realised. It is this great size, taken together with the fact of the limited population, that gives to the problems of Australian development their unique character, and its clear comprehension is essential in any attempt to understand those problems.

The relative magnitudes may be appreciated by a reference to the following table, which shows how large Australia is compared with the countries referred to, or *vice versa*. Thus, to take line 1, we see that Europe is about $1\frac{3}{10}$ times (1.29696) as large as Australia, or that Australia is about three-quarters (more accurately 0.77) of the area of Europe.

(*a*) The extreme points are "Steep Point" on the west, "Cape Byron" on the east, "Cape York" on the north, "Wilson's Promontory" on the south, or, if Tasmania be included, "South East Cape." The limits, according to the 1903-4 edition of "A Statistical Account of Australia and New Zealand," p. 2, and, according to Volume XXV. of the *Encyclopædia Britannica*, tenth edition, p. 787, are respectively $113^{\circ} 5' \text{ E.}$, $153^{\circ} 16' \text{ E.}$, $10^{\circ} 39' \text{ S.}$, and $39^{\circ} 11\frac{1}{2}' \text{ S.}$, but these figures are obviously defective. A similar inaccuracy appears in the XI. edition of the *Encyclopædia*.

(*b*) Its correct value for 1920 is $23^{\circ} 26' 53.89''$, and it decreases about $0.47''$ per annum.

It should be noted that in the above table the figures quoted for areas of the several countries of Europe refer to conditions prevailing prior to the outbreak of war, and modifications will in some instances be necessary after the final adjustment of boundaries has been effected.

3. *Relative Areas of Political Subdivisions.*—As already stated, Australia consists of six States and the Northern and Federal Territories. The areas of these, in relation to one another and to the total of Australia, are-shewn in the following table :—

RELATIVE AREAS OF STATES, TERRITORIES, AND COMMONWEALTH.

State or Territory.	Area.	Ratio which the Area of each State and Territory bears to that of other States, Territories, and Commonwealth.							
		N.S.W.	Vic.	Q'land.	S.A.	W.A.	Tas.	N. Ter.	C'wlth.
	Sq. miles.								
New South Wales	309,432	1.000	3.521	0.461	0.814	0.317	11.804	0.591	0.104
Victoria ..	87,884	0.284	1.000	0.131	0.231	0.090	3.352	0.168	0.030

South Australia	380,070	1.228	4.325	0.567	1.000	0.389	14.498	0.726	0.128
West. Australia	975,920	3.154	11.105	1.456	2.568	1.000	37.228	1.864	0.328
Tasmania ..	26,215	0.085	0.298	0.039	0.069	0.027	1.000	0.050	0.009
North. Territory	523,620	1.692	5.958	0.781	1.378	0.537	19.974	1.000	0.176
Federal Territory	940	0.003	0.011	0.001	0.002	0.001	0.036	0.002	0.000 ^a
Commonwealth	2,974,581	9.613	33.847	4.436	7.826	3.048	113.469	5.681	1.000

^a The correct decimal is 0.0003.

Thus, looking at the top line, New South Wales is seen to be over three-and-a-half times as large as Victoria (3.521) and less than one-half the size of Queensland (0.461); or again, looking at the bottom line, the Commonwealth is shewn to be more than nine-and-a-half times as large as New South Wales (9.613), and nearly thirty-four times as large as Victoria (33.847).

These relative magnitudes are shewn in the small diagram below. It may be added that Papua (or British New Guinea), with its area of 90,540 square miles, is 0.030 of the area of the Commonwealth. The comparatively small size of the Federal Territory prevents its being shewn in this diagram.

% on	N.S.W.	V.	Qld.	S.A.	N.T.	W.A.	Tas.
total ..	10	3	22	13	18	33	1

4. Coastal Configuration.—There are no striking features in the configuration of the coast; the most remarkable indentations are the Gulf of Carpentaria on the north and the Great Australian Bight on the south. The Cape York Peninsula on the extreme north is the only other remarkable feature in the outline. In Year Book No. 1, an enumeration of the features of the coast-line of Australia was given (see pp. 60 to 68).

(i) *Coast-line.* The lengths of coast-line, exclusive of minor indentations, both of each State and of the whole continent, are shewn in the following table :—

SQUARE MILES OF TERRITORY PER MILE OF COAST LINE.

STATES, TERRITORY, AND CONTINENT.

State.	Coast-line.	Area ÷ Coast-line.	State.	Coast-line.	Area ÷ Coast-line.
	Miles.	Sq. miles.		Miles.	Sq. miles.
New South Wales(a)	700	443	South Australia	1,540	247
Victoria ..	680	129	Western Australia	4,350	224
Queensland ..	3,000	223	Continent(b) ..	11,310	261
Northern Territory	1,040	503	Tasmania ..	900	29

(a) Including Federal Territory.

(b) Area 2,948,366 square miles.

For the entire Commonwealth this gives a coast-line of 12,210 miles, and an average of 244 square miles for one mile of coast-line. According to Strelbitski, Europe has only 75 square miles of area to each mile of coast-line, and, according to recent figures, England and Wales have only one-third of this, viz., 25 square miles.

(ii) *Historical Significance of Coastal Names.* It is interesting to trace the voyages of some of the early navigators by the names bestowed by them on various coastal features—thus Dutch names are found on various points of the Western Australian coast, in Nuyt's Archipelago, in the Northern Territory and in the Gulf of Carpentaria; Captain Cook can be followed along the coasts of New South Wales and Queensland; Flinders' track is easily recognised from Sydney southwards, as far as Cape Catastrophe, by the numerous Lincolnshire names bestowed by him; and the French navigators of the end of the eighteenth and the beginning of the nineteenth century have left their names all along the Western Australian, South Australian, and Tasmanian coasts.

5. Geographical Features of Australia.—In each of the earlier issues of this Year Book fairly complete information has been given concerning some special geographical element. Thus No. 1 Year Book, pp. 60–68, contains an enumeration of Coastal features; No. 2, pp. 66–67, deals with Hydrology; No. 3, pp. 59–72, with Orography; No. 4, pp. 59–82, with the Lakes of Australia; No. 5, pp. 51–80, with the Islands of Australia; No. 6, pp. 55–66, with the Mineral Springs of Australia; No. 7, pp. 56–58, with the Salient Features in the Geological History of Australia, with special reference to changes of climate. A special article dealing with the plains and peneplains of Australia appeared in No. 12 Year Book, pp. 82–88. This practically completes the description of the ordinary physical features.

§ 2. The Fauna of Australia.

An authoritative article describing in some detail the principal features of the Fauna of Australia was given in Year Books No. 1 (see pp. 103 to 109) and No. 2 (see pp. 111 to 117), while a synoptical statement appeared in No. 3 (see pp. 73 to 76). Considerations of space, however, preclude the inclusion in this issue of more than a passing reference to the subject.

§ 3. The Flora of Australia.

In Year Books No. 1 (see pp. 109 to 114) and No. 2 (see pp. 117 to 122) a fairly complete though brief account was given of the Flora of Australia, and in Year Book No. 3 similar information in a greatly condensed form will be found on pp. 76 to 78. Space in this issue will not permit of more than a mere reference to preceding volumes.

A special article dealing with Australian fodder plants, contributed by J. H. Maiden, Esq., F.L.S., Government Botanist of New South Wales, and Director of the Botanic Gardens, Sydney, appeared in Official Year Book No. 6, pp. 1190-6. A special article on the grasses and saltbushes of Australia, contributed by E. Breakwell, B.A., B.Sc., Agrostologist at the Botanic Gardens, Sydney, appeared in Year Book No. 9, pp. 84-90. Year Book No. 10 contained two special articles; one dealing with Australian eucalyptus timbers, contributed by R. T. Baker, F.L.S., appeared on pp. 85 to 92, and one by H. G. Smith, F.C.S., dealing with the chemical products of Australian eucalypts, appeared on pp. 92-98.

§ 4. Seismology in Australia.

A brief statement regarding the position of seismology and seismological record in Australia appeared in Year Book No. 4, pp. 82 and 83.

§ 5. The Geology of Australia.

1. **General.**—Independent and authoritative sketches of the geology of each State were given in Year Books No. 1 (see pp. 73 to 103) and No. 2 (see pp. 78 to 111). Want of space has precluded the insertion of these sketches in the present issue of the Year Book, and it has not been considered possible to give anything like a sufficient account of the geology of Australia by presenting here a mere condensation of these sketches. Reference must, therefore, be made to either Year Book No. 1 or No. 2, *ut supra*.

2. **The Building Stones of Australia.**—The map shewing the geographical distribution of the more important geological systems and formations, which appeared on page 51 of Year Book No. 12 and in preceding issues, has been discontinued pending the preparation of a new map embodying later information.

3. **The Plains and Peneplains of Australia.**—A special article dealing with this subject appears on pp. 82-88 of Year Book No. 12.

4. **The Building Stones of Australia.**—Independent and authoritative descriptions of the building stones of each State (with the exception of Queensland) will be found in Official Year Book No. 9, pp. 446-466.

A special article dealing with "The Building Stones of Queensland" will be found on pp. 89-95 of Year Book No. 12.

5. **Past Glacial Action in Australia.**—A special article on this subject will be found in Year Book No. 13, pp. 1133 *et seq.*

§ 6. Evidences of Past Volcanic Action in Australia.*

(A) Australia.

1. **Introduction.**—It will help to make clear the nature of the evidence of past volcanic action in Australia if we consider briefly the conditions under which such activity is developed on the earth at the present time, and the nature of present-day volcanic products.

* Contributed by Ernest W. Skeats, D.Sc., A.R.C.S., F.G.S., Professor of Geology and Mineralogy, University of Melbourne.

The geographical distribution of active volcanoes at present lies mainly along two lines, the one passing through the West Indies and the Mediterranean, the other girdling the Pacific, passing well to the east of the present coast-line of Australia, and stretching from the Kurile and Japanese Islands, through Java, New Guinea, New Hebrides, and New Zealand to the Antarctic at Mount Erebus. These lines lie near or along the margins of continents and ocean basins, and are regions of present crustal instability along which the forces of folding or faulting, with accompanying earthquakes, from time to time are renewed. Other lines of weakness are submarine, and at intervals along such lines volcanic islands such as Samoa and Hawaii have been built up. These lines may be pictured as lines along which the earth's crust is weak and fissured and the vertical rock pressure less than in adjoining areas. Such conditions are favourable for the rise of molten rock to the surface, along fissures, from the highly heated depths of the crust, and its passage to the surface may be facilitated by lateral crustal pressure or warping of adjoining areas, and by the expansion of highly heated gases present in the molten magmas as the result of diminished pressure above the fracture zones.

Among present-day types of volcanic activity are the wide lava floods poured out from fissures, as in the volcanic regions of Iceland and the centralized vents or volcanoes generally localized at intervals along fracture lines. Such a volcano commonly consists of a conical hill with a central crater and a vent or plug communicating with the interior. The crater may become enlarged by violent explosions or subsequent collapse, and may be broken across or breached by lava flows pouring over a low lip of the crater. Cones may consist entirely of lava, of scoria, of tuff, or of ash, or these may alternate and form a composite cone.

When the activity is effusive, lavas are poured out; when explosive, fragmental materials, such as scoria or tuff, accumulate round the vent. Dykes of volcanic rock frequently radiate from the necks of the volcanoes, and if these reach the surface may form parasitic cones. Volcanoes active on land may have their lavas and ashes interbedded with deposits of land or lake origin, while in submarine eruptions the products become intercalated between marine sediments, and may ultimately rise above the surface to form volcanic islands, so numerous in the Pacific Ocean.

The chemical composition of lavas may be highly siliceous, forming so-called acid lavas, such as rhyolite and obsidian; intermediate in character, giving rise to such rocks as trachytes and andesites; or basic, that is, with low silica percentage and rich in lime, magnesia and iron, in which case basalts and allied rocks are formed. Grouped in another way certain lavas may be described as calcic, in which lime and magnesia are present in greater quantities than potash and soda. Of this group, andesites and basalts are examples. Another group constitutes the alkalic rocks—rich in soda or potash—to which rhyolites, trachytes, and phonolites belong. A third group is recognised—the so-called spilitic series—consisting of basic lavas, rich in albite feldspar, usually submarine in origin, and associated with cherts.

Calcic and alkalic lavas, such as basalts and rhyolites or phonolites, may be poured out successively from the same or adjoining vents, indicating that some process of separation or differentiation has gone on in the reservoir of magma beneath the surface. While this is so, these three groups—the calcic, alkalic, and spilitic—are often associated with more or less distinct types of earth movement or earth structure, the calcic group with regions undergoing subsidence by folding or warping, though also associated with plateau movements, the alkalic closely associated with plateau movements of elevation or depression and often near fault lines, while the spilitic or albite rich basic series appears to be formed normally as submarine flows at some distance from a shore line and at moderate depth.

Examples illustrating all the above phases, physical and chemical, of volcanic action are to be found among rocks of various geological ages in Australia, and we may now proceed to review in a summarized way the distribution of volcanic rocks in Australia, both geographically and geologically. It will be understood that our knowledge of the geology of the more remote parts of the continent is vague and uncertain, and that in the older rocks of the geological record it is sometimes difficult or impossible to recognise the existence of volcanic products on account of the great chemical and structural changes which they have undergone. Commencing with the oldest rocks, and working up the geological column, it will be convenient to record the principal volcanic rocks in each State and in Papua in turn.

2. Pre-Cambrian Volcanic Rocks.—(i) *Western Australia.* In the Pilbara gold-field, the Warrawoona beds consist of basic lavas and sills, in places altered to greenstone schists. At Kalgoorlie ancient sediments rest on a group of basic rocks forming the Boulder auriferous belt. Quartz dolerite is the most important rock. The igneous series is probably mainly intrusive. In the Norseman field, in the southern part of the State, bedded amygdaloidal lavas are associated with the pre-Cambrian sediments. On the South Coast, from west to east of Mount Barren, occur sills of amphibolized quartz-dolerite.

In the Kimberley division occurs the Nullagine series which, while apparently younger than the Warrawoona series, may be pre-Cambrian, and appears to be not younger than older Palæozoic. Associated with the sediments of this series submarine basalts, dolerites, amygdaloidal andesites and submarine ashes occur in great profusion on the Leopold Plateau.

In the Murchison gold-field, tuffs occur at Meekatharra and in the Yalgoo field at Mount Singleton. In the West Pilbara field, augite-andesites and quartz-felsites or rhyolites occur near the base of the series.

(ii) *Northern Territory.* In the Woggaman province submarine lavas are recorded, but, with this exception, the references are all to highly metamorphosed rocks which on indefinite evidence are referred to as altered tuffs. These are recorded from such localities as the Katherine River above the telegraph station, Arnhem Land, Marranboy tin-field, Yenberrie wolfram-field, Pine Creek, Mount Diamond, Brilliant, Woolngie, the Woggaman province, and the Tanami district.

3. Cambrian Volcanic Rocks.—(i) *New South Wales.* The uralitic dolerite (amphibolite) dykes of Broken Hill may be of Cambrian age.

(ii) *Victoria.* In several localities in western, central, and eastern Victoria, notably at Mount Stavely near Geelong, Heathcote, Mount William near Lancefield, Mount Major near Dookie, the Howqua River, and Waratah Bay, a big series of ancient basic lavas, agglomerates, and tuffs, with interbedded cherts and associated shales in places, underlie conformably the Lower Ordovician sediments, and appear to be exposed along axial lines trending roughly north and south. At the Dolodrook River, near Mount Wellington, basic submarine tuffs are interbedded with Upper Cambrian fossiliferous limestones, and constitute the Heathcoteian series. The cherts and shales contain Upper Cambrian marine fossils. The volcanic rocks constitute submarine flows and ashes, and some of them are rich in primary or secondary albite, and therefore belong to the spilite series of rocks.

(iii) *South Australia.* Uralitic dolerite dykes at Blinman and Mount Remarkable are possibly of Cambrian age.

(iv) *Tasmania.* In the Dundas district, the central and western part of the Zeehan field, the Leven Gorge, Gunn's Plains, the North West Coast in Barkworth's Bay west of Goat Island, a mixed series of sediments and volcanic rocks occurs. They extend on an axial line parallel to the West Coast from Bass Strait to Birch's Inlet, in Macquarie Harbour. They are probably of Upper Cambrian age, and resemble the Heathcoteian series of Victoria. They include slates, porphyroids (crushed quartz and felspar porphyries), breccias and submarine tuffs, and vesicular lavas resembling the spilite or amygdaloidal diabase of German authors.

(v) *Northern Territory.* In the Edith River district and other areas southward from it are extensive developments of basalt, dacite, volcanic agglomerates with boulders up to 4 feet in diameter, and tuffs several hundreds of feet in thickness. At Maude Creek, amygdaloidal basalt occurs. South of Rendezvous Hill, near Roper Bar, sandstones of apparently Cambrian age overlie natrolite basalts. South of Red Lily a similar basalt is interbedded with quartzites, but may be an intrusive sill. From Hodgson Downs to McArthur River basalt covers a great area of timberland country. On Nutwood Downs station, 5 miles from Tamunburini, acid tuffs are interbedded with the quartzite series. In the Pine Creek district, near Blackfellows Creek, and Swamp Billabong on Daly-Road, dolerites are apparently interbedded in the Lower Cambrian series, and similar rocks occur in the Victoria River and Willaroo districts.

4. Ordovician.—(i) *New South Wales.* In the Orange-Cadia district andesitic lavas and tuffs are associated with Ordovician sediments, while andesites also occur in the Forbes-Parkes district. There is also a great development of contemporaneous basic tuffs in the Upper Ordovician rocks of the Lyndhurst gold-field.

(ii) *Victoria*. At Mount Easton, near Wood's Point, loose-textured nodular beds, with included lapilli of andesite, appear to be submarine tuffs and are interbedded with Upper Ordovician sediments.

(iii) *Western Australia*. In the Townsend Range, in latitude 26° S., close to the South Australian border, and near the base of the series, are vesicular basalts and dolerite lavas apparently interbedded with sediments, and presumably of submarine origin. They may be of Ordovician age.

5. *Silurian*.—(i) *New South Wales*. At the Jenolan Caves, rhyolites, some of which are intrusive, and tuffs are interstratified with Silurian sediments. In the Orange, Yass, the Federal Territory of Canberra, and Cobar districts, rhyolites, some of which also are intrusive, and tuffs occur. In the Forbes-Parkes district andesitic lavas and tuffs are associated with Silurian sediments.

(ii) *Victoria*. In the Thomson River district, near Walhalla, in an Upper Silurian limestone, flakes of biotite and chlorite, and bands of tuffaceous fragments suggest some submarine volcanic activity, but the fragments may be of detrital origin.

6. *Devonian*.—(i) *New South Wales*. (a) *Lower Devonian*. In the south-east of the State, at Taemas, 5,000 feet of acid lavas and tuffs occur, while the overlying Lower Devonian marine limestones are more or less tuffaceous throughout. At Tamworth spilite lavas and interbedded tuffs occur.

(b) *Upper Devonian*. In the Yalwal district, and also near Eden, rhyolites and basalt flows are prominent.

(ii) *Victoria*. (a) *Lower Devonian*. In north-east and east Victoria the Snowy River porphyries consist of a volcanic series stretching from the Murray River southwards to Nowa Nowa, and from Cobberas, on the west, through the Mitta Mitta district to Corryong, in the north-east of the State. They consist of lavas and ashes from volcanic foci developed along meridional fractures close to a sinking shore line, and include porphyroids, trachytic-andesites, quartz-porphyrates, quartz-ceratophyres, and stratified ash beds. They pass upwards near Buchan into andesitic lavas and dykes or, in other places, into calcareous tuffs, which merge upwards into mid-Devonian marine limestones. The rocks of Noyang, in Dargo, may be of the same age, and include alkali rocks allied to quartz-ceratophyre. Rocks allied to the dacites, containing quartz and garnet, occur in the King Valley, and from Mount Timbertop and the Howqua River, towards Buller Creek, underlie Lower Carboniferous sediments, and may be of Lower Devonian age.

The main dacite series of central Victoria appears to have been the product of subaerial Lower Devonian volcanoes, and forms thick masses, in places 2,000 to 3,000 feet in thickness, of biotite or hypersthene dacites. Near Lilydale, toscanites form the base of the series. The Dandenong Ranges, Healesville to Warburton Ranges, the Marysville district, Mount Macedon, and the northern part of the Strathbogie Ranges are largely composed of lavas, with occasional tuffs of this rock series.

(b) *Upper Devonian or Lower Carboniferous*. The Upper Palæozoic sediments stretching from Ben Cruachan past Mount Wellington to the Snowy Bluff and northwards to the Howqua district, in Victoria, contain intercalated volcanic rocks. The rocks are mainly rhyolites and rhyolite tuffs. At Mount Wellington the lava is 2,000 feet in thickness. Thin lava flows of amygdaloidal basalt occur at Mount Wellington, and at the Snowy Bluff eight thin flows occur separated by beds of sandstone and shale.

In western Victoria, quartz porphyries, possibly intrusive, may be correlated with the Upper Palæozoic acid volcanic rocks of eastern Victoria. They occur between Hamilton and Cavendish, and near the latter place appear to underlie the Grampian sandstones. In the latter rock in places there occur dykes, sills, and possibly lavas of an acid character. The intrusive members may be as young as Upper Carboniferous.

7. *Carboniferous Volcanic Rocks*.—(i) *New South Wales*. Lower carboniferous volcanic rocks occur in the Barraba-Tamworth district, as andesitic tuff in the mudstones of the Burindi series, and as lavas and tuffs of rhyolite trachyte and andesite in the overlying Rocky River series. Further south, in the Hilledale-Dungog area, tuffs are interstratified with mudstones in the Burindi series. At Currabubula, 130 miles N.N.W. of Newcastle, fine-grained acid tuffs occur at the top of the Burindi series. During this volcanic period small flows of basalt and local eruptions of soda rhyolite occurred, while pyroxene andesite was intruded into the Burindi series. The recently described

Kuttung series of Middle and Upper carboniferous age, especially at Paterson, Clarence town, Seaham, and Eelah, includes large areas of soda rhyolites, toscanites, dacites, hornblende andesites, hornblende mica andesites, pyroxene andesites, and pitchstones. Near Pokolbin, potash rhyolites, soda rhyolites, trachytes, albite trachytes, and andesites occur. In northern New England, in the Drake gold-field near Bolivia and Tenterfield, rhyolites and tuffs are represented. Near the top of the Kuttung series, come important volcanic rocks with extensive outpourings of basalt, tuffs, and agglomerate, succeeded by sills and dykes of normal, albite, and teschenitic dolerites, hornblende and pyroxene andesites, and, lastly, by trachytoid quartz ceratophyres.

8. Permo-Carboniferous Volcanic Rocks.—(i) *New South Wales.* In the Lower Marine series in the Maitland district, extensive flows of natrolite basalt occur, while in the Drake gold-field in northern New England, andesitic lavas and tuffs are represented, which have been referred to this period.

At the close of the Upper Marine series, at Illawarra on the South coast, submarine lavas and tuffs 1,000 feet thick, and ranging from basic to intermediate in composition, are represented. They include alkali rocks such as orthoclase-basalts (latites), and continue on a reduced scale to the period of the Upper Coal Measures. During this latter period small basaltic flows were poured out in the coal measure swamps. At Murrurundi, on the north-west margin of the coal basin, basalts were poured out to a thickness of several hundred feet. At Newcastle, the Nobbys chert near the top of the Permo-Carboniferous series consists of silicified rhyolite tuff.

(ii) *Queensland.* In the Bowen River district the lower series includes basalts and melaphyres exposed over wide areas. In the Mackay district coarse volcanic agglomerates, basalt, dolerites, and felspar porphyry are represented.

In the Upper Bowen series, in the type area, plains of basalt and porphyrite occur. In the Mackenzie River and at Bowen, basalts and copper-bearing tuffs are interbedded in the Upper Marine sediments, while andesites, possibly of this age, occur on the Dawson River, and at Mount Morgan. At Gympie, amygdaloidal basalts, andesites, and volcanic ash are interbedded with sediments. Eight miles from Warwick, on the Darling Downs, is an extensive development of rhyolites, which may be of Upper Carboniferous age or may belong to the Lower Marine series of Permo-Carboniferous age. The latter sediments in this district are largely tuffaceous.

(iii) *Northern Territory.* In the Pine Creek, Victoria River, and Tanami districts, basalts and other volcanic rocks of doubtful age are, by some observers, referred to this period.

9. Triassic Volcanic Rocks.—(i) *New South Wales.* The Narrabeen series, of Lower Triassic age, consists partly of shales composed of redistributed tuffaceous material.

(ii) *Queensland.* At the base of the Ipswich sedimentary series, at and near Brisbane, occurs a coarse rhyolite tuff of Triassic age.

10. Jurassic Volcanic Rocks.—(i) *Victoria.* The extensive lacustrine sandstones and mudstones developed in western Victoria, the Otway Ranges, near Geelong, and in South Gippsland are composed largely of plagioclase, chlorite, and quartz, and may represent tuffaceous or redistributed tuffaceous material.

(ii) *Tasmania.* Probably at the close of the Jurassic, or during the Cretaceous period, gigantic intrusions, chiefly sills up to 500 feet thick of diabase, occurred in Tasmania, forming the precipitous tiers of that island. They are probably associated with plateau movements of subsidence and faulting.

11. Kainozoic Volcanic Rocks.—(i) *New South Wales.* The Kainozoic volcanic rocks of this State, as in Queensland and Victoria, have a threefold development. The oldest consist of an Older Basalt series consisting of cappings on the residuals of an old peneplain, as on the Blue Mountains tableland and the Bald Hills near Bathurst, and they also form deep leads near Kiandra. The middle series consists mainly of alkali rocks, and occurs principally in groups of extinct cones of limited area. The Canoblas mountains, near Orange, the Warrumbungle mountains, near Coonabarabran, and the Nandewar mountains, near Narrabri, are the best known. The sequence at Canoblas, which is generally similar to the other areas, consists from below upwards of comendites and quartz trachytes, alkaline phonolitic trachytes, and andesites.

In the Mittagong-Bowral district occur residual volcanic plugs of alkaline syenite allied to bostonite. The Gib Rock and Mount Jellore consist of similar conical masses of alkaline trachytes. Alkaline trachytes occur also near Dubbo and various places in the Northern Rivers district. In the Kiama district sills of nepheline syenite and tinguaites occur, and monchiquite dykes, which may be post-Tertiary in age.

In the Sydney-Blue Mountains area occur dykes radiating from east of Botany Bay. They include basalt, monchiquite, nephelinite, and basanite, and are probably of Middle to Upper Kainozoic age. Essexite or analcite-dolerite forms a sill (?) at Prospect, near Parramatta. Many volcanic necks occur in this region, some filled wholly or partly with basalt, while others are only explosive steam vents filled wholly or partly with non-igneous breccia from the wall rock. Occurrences at Hornsby and the Basin in the Nepean River are of this character. A volcanic neck at Dundas, near Parramatta, consists of basalt, agglomerate, and xenoliths of basic and ultrabasic plutonic rocks.

Tinguaites occur at Kosciusko, Berrigan, and Mount Stormy. Leucite-basalts are found at Cudgellico, Byrock, El Capitan, and Harden, and nepheline-basalt at Capertee and Mount Royal.

The Newer Basalt series, the plateau-basalts, occur as extensive sheets resting on the younger tableland or peneplain. Their greatest development is in New England, where they cover some hundreds of square miles near Inverell, Glen Innes, Armidale, Walcha, and other localities. On the central tableland they are met with in the Orange, Blayney, and Oberon districts, and on the southern tableland between Cooma and Bombala. They appear to have developed mainly from fissure eruptions, as no cones are found, and tuffs are rare.

(ii) *Victoria.* The threefold development of Kainozoic volcanic rocks is more clearly shewn than in any State except, perhaps, Queensland, and the association in some localities with marine or lacustrine sediments enables their relative age to be approximately determined. The lowest series consists of the Older Basalts. They are developed in and around Melbourne at Royal Park, Essendon, Broadmeadows, and Keilor, where they underlie Lower Kainozoic marine sediments. They are represented also near Geelong, at French Island, and Phillip Island. At Cape Schanck, a bore penetrated them for over 800 feet, while at Flinders another bore passed through over 1,200 feet of older basalt. They are widespread in South-east Gippsland, as at Buln Buln, Leongatha, Neerim, Mirboo, etc., while in North Gippsland they cap the plateau sometimes at elevations of over 5,000 feet, as at Mount Feathertop and Dargo High Plains.

The Middle Kainozoic series consists of alkali rocks. In the Western district of Victoria anorthoclase aegirine trachytes occur at Carapook, Coleraine, Mount Koroit, Koolomert, and the "Giant Rock" at Wotong Vale. Near Casterton two small lava flows of phonolite occur. In central Victoria, at Mount Macedon, the sequence from below upwards appears to be lavas of anorthoclase aegirine trachyte, volcanic plugs or mamelons of solvabergite forming the Camel's Hump, the Hanging Rock, and Brook's Monument, anorthoclase basalt lavas and flows of macedonite and woodendite, followed by olivine bearing trachytes and limburgite. Near Macalister's Rock, north of Mount Macedon, a tuff contains well-developed but minute nepheline crystals. Nepheline basalts also occur near Greendale. Volcanic hills of trachyte and trachy-phonolite, such as Blue Mountain, occur between Blackwood and Daylesford. The monchiquite dykes of Bendigo and Castlemaine, and similar dykes near Daylesford and Melbourne, may be genetically related to the alkali rocks. In north-eastern Victoria eight volcanic plugs or dykes of tinguaites and phonolite occur in the highlands south of Harrietville, while a nepheline phonolite volcano forms Gallows Hill near Tolmie, about 14 miles north-east of Mansfield. At Frenchman's Hill, just north of Omeo, a volcanic hill, with central core of solvabergite, has on its flanks lavas of anorthoclase trachyte and a more or less radial system of dykes, including pegmatites, quartz veins, bostonites, diabase, trachyte, and seven or eight dykes of nepheline phonolite. In Benambra, at Mount Leinster, a volcanic hill consists of solvabergite, anorthoclase trachyte, and dyke rocks allied to variolite.

The Upper Kainozoic to recent volcanic rocks in Victoria form very extensive plains, stretching from Mount Gambier in South Australia, through the Western district of Victoria to Melbourne, and in several places, as in the Loddon Valley, fill old valleys and run for long distances north of the present Main Divide. They cover over 6,000 square miles of surface, and are diversified by hundreds of small volcanic cones or puy's in various stages of preservation or dissection, and probably the most recently active cone was the

compound one of Tower Hill, west of Warrnambool. Tuffs from Tower Hill overlie dune limestones containing still existing species of shells. Other well-preserved cones are Mount Noorat and Mount Franklin. Mount Bullenmerri, near Camperdown, consists of a caldera with crater enlarged probably by explosion, and now forming a lake. Breached cones occur as at Mount Leura, near Camperdown, and Mount Buninyong, near Ballarat. Broad depressions of the surface of the lava plains have formed extensive but shallow lakes, such as Lakes Colac and Colongulac. In places, the present streams have trenced deep and sometimes wide valleys through the lava plains. The Newer Basalt flows in and near Melbourne, as, for instance, at Clifton Hill, Burnley, and Footscray, have been extensively quarried for road metal and building stone. The rocks are mainly olivine basalts, but analcite has been recorded from a coarse olivine-augite dolerite or essexite occurring as boulders in the tuffs at the base of the volcanic series at Lake Bullenmerri. The eruptions probably proceeded mainly from fissures now concealed beneath the lava flows and connected with plateau movements of elevation and subsidence and faulting, which affected Victoria at intervals from Post-Pliocene to recent times. In some places the sequence is first tuffs, then lava flows, while the later volcanic cones consist mainly of scoria and tuffs. Well-preserved volcanic bombs are found on the flanks of many of the cones. Many of the tuffs are well bedded, and excellent sections are seen at places such as Tower Hill, Lake Bullenmerri, and Lake Burrumbeet. The flooding of such a large area of Victoria with basalt obliterated the old streams, and the sealing up of these old river valleys formed the deep leads which contained rich deposits of gold-bearing sands and gravels, as at Ballarat, Ararat, and the Loddon Valley.

(iii) *Queensland.* Volcanic rocks of three series and of different age are represented. The oldest consist of extensive basalt flows and basaltic tuffs and agglomerates in south-east Queensland between Ipswich and the New South Wales border, and were probably the products of fissure eruptions. Basalts of this series are widespread on the Darling Downs, as at Warwick and Toowoomba. The thickness of this series is usually less than 100 feet, but at Mount Lindsay it is over 1,500 feet. The middle member of the volcanic series consists of alkali rocks largely rhyolite and trachyte tuffs and agglomerates, rhyolite and pitchstone dykes, and extensive lavas of rhyolite and trachyte. Rhyolites especially occur in the southern part of south-east Queensland near the MacPherson Range, and trachytes in the south-west of the area along the line of the main range. Probably of the same age as this middle series are the volcanic plugs, flows, and associated tuffs of the Glasshouse Mountains, the Esk, the Yandina district, Mount Flinders, and Fassifern, Cainbabe Creek, and Woodhill areas, in which, while andesites and dacites occur, as in the Glasshouse Mountains and the Esk district respectively, the main development consists of alkali rocks, such as trachytes, soda trachytes, and soda rhyolites. To this period may also be referred the volcanic rocks of Spring-sure, in Central Queensland, which also have a threefold development, an older basalt series of agglomerates and lavas, followed by an alkali series of noseau trachytes or trachy-phonolites, in which precious opal has been found, and succeeded in turn by a newer series of basalts. Somewhat similar alkali rocks occur at Mount Larcombe, south of Rockhampton and in the hills near Yeppoon, to the north-east of Rockhampton.

Possibly the leucite basalts of the Normanby Reefs, in the Cooktown district in North Queensland, may belong to the middle alkali series of other areas in the State.

The upper series of Kainozoic volcanic rocks in Queensland consists of basalts and andesites in successive and numerous flows in the south-east part of the State. At the Lamington plateau, the maximum development of 2,000 feet of basalt occurs. Agglomerates and tuffs are not found in the southern part of south-east Queensland, but occur on the main range and at Toowoomba. Basaltic rocks of uncertain age, possibly Upper Kainozoic, occur in various localities, such as the Anakie, Clermont, and Herberton districts.

(iv) *South Australia.* Small basaltic vents or puy's of Upper Kainozoic to recent age occur in the south-east part of the State from Mount Schank, the best-preserved cone, to Mount Graham, a distance of 35 miles. Mount Gambier is the largest cone, and consists of ash, scoria, and lapilli. Small flows of basalt have issued from lateral fissures near the base of the cones. The crater is Brown's Lake; other lakes, such as Blue Lake and Leg of Mutton Lake, are not craters, but due to subsidence. On Kangaroo Island, lava possibly of somewhat greater age filled up a valley from Kingscote to Rettie's Bluff, 5 miles west of Kingscote.

(v) *Western Australia.* In the Kimberley district, basic lavas and ashes occur in the valleys of the Ord and the Bow rivers. On the Belen River, a dome or puy of basalt formed one of the foci from which lavas issued. In the southern part of the State, basalt flows occur near Bunbury, and other flows are located to the south, as at the Blackwood River and at Black Point on the South Coast, near Silver Mount. These may be of Middle or Upper Kainozoic age, and may belong to the same periods as those of South Australia and Victoria.

(vi) *Tasmania.* Basalt flows in many parts of the island overlie fluvial and lacustrine deposits, and form deep leads. In the north-east, basalt flows occur near Branxholme and Derby. In the north-west of the island, a basalt sheet caps the coastal plateau, as at Wynyard and Burnie. The above may belong to the Older Kainozoic series. In many other districts Kainozoic basalts occur, but it is difficult to place them stratigraphically. To such belong the basalts of Sheffield, Conara, Barham Plains, and Bothwell. The extensive basalt sheets probably developed from fissure eruptions. Numerous alkali volcanic rocks in Tasmania may belong to the middle part of the Kainozoic period, as is the case in many areas on the mainland. Alkali basalts or trachy-dolerites with analcite and nepheline occur at Table Cape and the Nut at Circular Head. Small volcanic cones cut through the diabase at Shannon Tier, and consist of melilite nepheline basalt, and a similar rock occurs as a lava flow at Sandy Bay, near Hobart. The alkali rocks of Port Cygnet, Woodbridge, and Kettering cut the diabase, and are probably of Mid-Kainozoic age. They include tinguaites and solvabergite porphyries, and appear to consist of minor intrusions.

(B) Papua.

1. *Upper Kainozoic to recent Volcanic Rocks.* The volcanic rocks are known to comprise hornblende andesites and basalts. In the island of Misima (St. Aigan) are thin flows of trachyte. The Papuan lavas appear to belong to two volcanic zones in which the Aird Hills, a series of small volcanic cones about 200 miles north-west from Port Moresby, belong to the southern zone, and the other zone is parallel and adjacent to the northern coast of British Papua. The great extinct crater, Dayman, 9,500 feet high, belongs to this latter belt, as does Mount Victory, 6,000 feet high. The latter cone is interesting, as it is, so far as is known, the only active lava-producing cone in the Commonwealth, while the small island of Dobu (Goulvain) in the D'Entrecasteaux group is a volcanic cone from which steam is emitted.

(C) Summary.

The foregoing remarks bring to a close a rapid survey of past volcanic action in Australia. It has been noted that few of the geological periods in the history of the development of Australia have been entirely free from some kind of volcanic activity. Specially prominent periods of volcanic energy were the Cambrian in the Northern Territory and Victoria, and the Upper Palæozoic, including the Upper Silurian, Devonian, and Carboniferous periods in eastern Australia, especially in New South Wales and Victoria. The Mesozoic was mainly a period of repose in Australia, but at its close the big sills of diabase invaded Tasmania. From the lower Kainozoic to the present day, eastern Australia, including Queensland, New South Wales, Victoria, Tasmania and part of South Australia, has been at intervals the scene of immense volcanic activity. In Victoria and South Australia, the latest eruptions not only flooded wide areas with basaltic lavas, but in the later stages of explosive activity formed many hundreds of small and frequently well-preserved scoria and tuff cones or puyes. Since then volcanic activity has become, for the time being, extinct on the mainland of the continent, and has shifted eastwards beyond the present continental borders, and now manifests itself at intervals along a line passing through Papua, the New Hebrides, and New Zealand.

NOTE.—Materials for this article have been taken from the publications of the Federal and State Geological Surveys, the Royal Societies of the various States, the Linnæan Society of New South Wales, the Australasian Association for the Advancement of Science, the Federal and State handbooks for the British Association meeting in Australia in 1914, the Mining Handbook of West Australia, 1919, and from unpublished communications from Professor H. C. Richards of the University of Queensland, Mr. W. R. Browne of the University of Sydney, Dr. W. G. Woolnough, and the writer.

§ 7. Climate and Meteorology of Australia.*

1. Introductory.—In preceding Year Books some account was given of the history of Australian meteorology, including reference to the development of magnetic observations and the equipment for the determination of various climatological records. (See Year Book No. 3, pp. 79, 80.) In Year Book No. 4, pp. 84 and 87, will be found a short sketch of the creation and organisation of the Commonwealth Bureau of Meteorology and a résumé of the subjects dealt with at the Meteorological Conference of 1907. Space will not permit of the inclusion of this matter in the present issue.

2. Meteorological Publications.—The following publications are issued daily from the Central Meteorological Bureau, viz. :—(i) Weather charts. (ii) Rainfall maps. (iii) Bulletins, Victorian and Interstate, shewing pressure, temperature, wind, rain, cloud extent, and weather. Similar publications are also issued from the divisional offices in each of the State Capitals.

The Bulletins of Climatology are as follow :—No. 1.—A general discussion of the climate and meteorology of Australia, illustrated by one map and diagrams. No. 2.—A discussion of the rainfall over Australia during the ten years 1897–1906 compared with the normal, illustrated by one map. No. 3.—Notes and statistics of the remarkable flood rains over south-eastern Australia during the winter of 1909, illustrated by five maps and diagrams. No. 4.—A discussion of the monthly and seasonal rainfall over Australia, illustrated by one map and diagram. No. 5.—An investigation into the possibility of forecasting the approximate winter rainfall for Northern Victoria, illustrated by two diagrams. No. 6.—The physiography of the Federal Territory at Canberra, illustrated by a relief map and 21 plates. No. 7.—On the climate of the Yass-Canberra district, illustrated by one map. No. 8.—Physiography of Eastern Australia, with 28 text illustrations. No. 9.—The climate of Australia, with charts and diagrams, prepared for the Federal Handbook of Australia. No. 10.—Relation between cirrus directions as observed in Melbourne and the approach of the various storm systems affecting Victoria, illustrated by a number of charts. No. 11.—The climatic control of Australian production, with 43 illustrations. No. 12.—A graphical method of shewing the daily weather, and especially cloud types, with two graphs. No. 13.—Initial investigations in the upper air of Australia, with 35 illustrations. No. 14.—The control of settlement by humidity and temperature, with 21 charts and diagrams. No. 15.—Tropical Control of Australian Rainfall, illustrated by maps and diagrams.

Commencing with January, 1910, the "Australian Monthly Weather Report," containing statistical records from representative selected stations, with rain maps and diagrams, &c., is being published. Complete rainfall and other climatological data are published in annual volumes of meteorological statistics for each State separately.

The first text book of Australian meteorology, "Climate and Weather of Australia," was published in 1913.

3. General Description of Australia.—In the general description of Australia, page 39, it is pointed out that a considerable portion (0.530) of three divisions of the Australian Commonwealth is north of the tropic of Capricorn, that is to say, within the States of Queensland and Western Australia, and the Northern Territory, no less than 1,149,320† square miles belong to the tropical zone, and 1,020,720 to the temperate zone. The whole area of the Commonwealth within the temperate zone, however, is 1,825,261‡ square miles, thus the tropical part is about 0.386, or about five-thirteenthths of the whole, or the "temperate" region is half as large again as the "tropical" (more accurately 1.591). By reason of its insular geographical position, and the absence of striking physical features, Australia is, on the whole, less subject to extremes of weather than are regions of similar area in other parts of the globe; and latitude for latitude Australia is, on the whole, more temperate.

The altitudes of the surface of Australia range up to a little over 7,300 feet, hence its climate embraces a great many features, from the characteristically tropical to what is essentially alpine, a fact indicated in some measure by the name Australian Alps given to the southern portion of the great Dividing Range.

* Prepared from data supplied by the Commonwealth Meteorologist, H. A. Hunt, Esquire, F.R. Met. Soc.

† In the article "Australia" in the *Encyclopædia Britannica*, Vol. II., p. 946 (XI. edition), this area is given as 1,145,000 square miles.

‡ Given as 1,801,700 square miles in the work above quoted, where, however, the statistics are said "to refer only to the continental States of the Federation, not to Tasmania."

While on the coast the rainfall is often abundant and the atmosphere moist, in some portions of the interior the rainfall is very limited, and the atmosphere dry. The distribution of forest, as might be expected, and its climatic influence, is consequently very variable. In the interior there are on the one hand fine belts of trees, on the other there are large areas which are treeless, and where the air is hot and parched in summer. Again, on the coast, even as far south as latitude 35°, the vegetation is tropical in its luxuriance, and also somewhat so in character. Climatologically, therefore, Australia may be said to present a great variety of features. The various climatological characteristics will be referred to in detail.

4. Meteorological Divisions.—The Commonwealth Meteorologist has divided Australia, for climatological and meteorological purposes, into five divisions. The boundaries between these may be thus defined:—(a) Between divisions I. and II., the boundary between South and Western Australia, viz., the 129th meridian of east longitude; (b) between divisions II. and III., starting at the Gulf of Carpentaria, along the Norman River to Normanton, thence a straight line to Wilcannia on the Darling River, New South Wales; (c) between divisions II. and IV., from Wilcannia along the Darling River to its junction with the Murray; (d) between divisions II. and V., from the junction of the Darling and Murray Rivers, along the latter to Encounter Bay; (e) between divisions III. and IV., starting at Wilcannia, along the Darling, Barwon, and Dumaresq Rivers to the Great Dividing Range, and along that range and along the watershed between the Clarence and Richmond Rivers to Evans Head on the east coast of Australia; (f) between divisions IV. and V., from the junction of the Darling and Murray Rivers along the latter to its junction with the Murrumbidgee, along the Murrumbidgee to the Tumut River, and along the Tumut River to Tumut, thence a straight line to Cape Howe; (g) division V. includes Tasmania.

The population included within these boundaries at the Census of the 3rd April, 1911, was approximately as follows:—

Division	I.	II.	III.	IV.	V.
Population	282,000	429,000	607,000	1,540,000	1,597,000

In these divisions the order in which the capitals occur is as follows:—(i) Perth, (ii) Adelaide, (iii) Brisbane, (iv) Sydney, (v) Melbourne and Hobart; and for that reason the climatological and meteorological statistics will be set forth in the indicated order in this publication.

Special Climatological Stations. The latitudes, longitudes, and altitudes of special stations, the climatological features of which are graphically represented hereinafter, are as follows:—

SPECIAL CLIMATOLOGICAL STATIONS.

Locality.	Height above Sea Level.	Latitude. S.	Longitude. E.	Locality.	Height above Sea Level.	Latitude. S.	Longitude. E.
	Feet.	deg. min.	deg. min.		Feet.	deg. min.	deg. min.
Perth ..	197	31 57	115 50	Darwin ..	97	12 28	130 51
Adelaide ..	140	34 56	138 35	Daly Waters ..	691	16 16	133 23

5. Temperatures.—In respect of Australian temperatures generally it may be pointed out that the isotherm for 70° Fahrenheit extends in South America and South Africa as far south as latitude 33°, while in Australia it reaches only as far south as latitude 30°, thus shewing that, on the whole, Australia has a more temperate climate when compared latitude for latitude with other places in the Southern Hemisphere.

The comparison is even more favourable when the Northern Hemisphere is included therein, for in the United States the 70° isotherm extends in several of the western States as far north as latitude 41°. In Europe the same isotherm reaches almost to the southern shores of Spain, passing, however, afterwards along the northern shores of Africa till it reaches the Red Sea, when it bends northward along the eastern shore of the Mediterranean till it reaches Syria. In Asia nearly the whole of the land area south of latitude 40° N. has a higher isothermal value than 70°.

The extreme range of shade temperatures in summer and winter in a very large part of Australia amounts to probably only 81°. In Siberia, in Asia, the similar range is no less than 171°, and in North America 153°, or approximately double the Australian range.

Along the northern shores of the Australian continent the temperatures are very equable. At Darwin, for example, the difference in the means for the hottest and coldest months is only 8.3°, and the extreme readings for the year, that is, the highest maximum in the hottest month and the lowest reading in the coldest month, shew a difference of under 50°.

Coming southward the extreme range of temperature increases gradually on the coast, and in a more pronounced way inland.

The detailed temperature results for the several capitals of the States of Australia are shewn in the Climatological Tables hereinafter.

(i) *Hottest and Coldest Parts.* A comparison of the temperatures recorded at coast and inland stations shews that, in Australia as in other continents, the range increases with increasing distance from the coast.

In the interior of Australia, and during exceptionally dry summers, the temperature occasionally reaches or exceeds 120° in the shade, and during the dry winters the major portion of the country to the south of the tropics is subject to ground frosts. An exact knowledge of temperature disposition cannot be determined until the interior becomes more settled, but from data procurable it would appear that the hottest area of the continent is situated in the northern part of Western Australia about the Marble Bar and Nullagine goldfields, where the maximum shade temperature during the summer sometimes exceeds 100° for days, and even weeks, continuously. The coldest part of the Commonwealth is the extreme south-east of New South Wales and extreme east of Victoria, namely, the region of the Australian Alps. Here the temperature seldom, if ever, reaches 100°, even in the hottest of seasons.

Tasmania, although occasionally hot winds may cross the Straits and cause the temperature to rise to 100° in the low-lying parts, as a whole enjoys a most moderate and equable range of temperature throughout the year.

(ii) *Monthly Maximum and Minimum Temperatures.* The mean monthly maximum and minimum temperatures can be best shewn by means of graphs, which exhibit the nature of the fluctuation of each for the entire year. In the diagram (on page 65) for nine representative places in Australia, the upper heavy curves shew the mean maximum, the lower heavy curves the mean minimum temperatures based upon daily observations. On the same diagram the thin curves shew the relative humidities (see next paragraph).

6. *Relative Humidity.*—Next after temperature the degree of humidity may be regarded as of great importance as an element of climate; and the characteristic differences of relative humidity between the various capitals of Australia call for special remark. For six representative places the variations of humidity are shewn on the graph on page 65, which gives results based upon daily observations of the dry and wet bulb thermometers. Hitherto difficulties have been experienced in many parts of Australia in obtaining satisfactory observations for a continuous period of any length. For this reason it has been thought expedient to refer to the record of humidity at first order stations only, where the results are thoroughly reliable. Throughout, the degree of humidity given will be what is known as *relative humidity*, that is, the percentage of aqueous vapour actually existing to the total possible if the atmosphere were saturated.

The detailed humidity results for the several State capitals are given in the Climatological Tables hereinafter. From these, it is seen that, in respect of relative humidity, Sydney and Hobart have the first place, while Brisbane, Melbourne, Perth, and

Adelaide follow in the order stated, Adelaide being the driest. The graphs on page 65 shew the annual variations in humidity. It will be observed that the *relative* humidity is ordinarily but not invariably great when the temperature is low.

7. *Evaporation*.—The rate and quantity of evaporation in any territory is influenced by the prevailing temperature, and by atmospheric humidity, pressure and movement. In Australia the question is of perhaps more than ordinary importance, since in its drier regions water has often to be conserved in "tanks" and dams. The magnitude of the economic loss by evaporation will be appreciated from the records on pages 67 and 76 to 81, which shew that the yearly amount varies from about 32 inches at Hobart to 95 inches at Alice Springs in the centre of the Continent.

(i) *Monthly Evaporation Curves*. The curves shewing the mean monthly evaporation in various parts of the Commonwealth will disclose how characteristically different are the amounts for the several months in different localities. The evaporation for characteristic places is shewn on the diagram shewing also rainfalls (see page 66).

(ii) *Loss by Evaporation*. In the interior of Australia the possible evaporation is greater than the actual rainfall. Since, therefore, the loss by evaporation depends largely on the exposed area, tanks and dams so designed that the surface shall be a minimum are advantageous. Similarly, the more protected from the direct rays of the sun and from winds, by means of suitable tree planting, the less will be the loss by evaporation: these matters are of more than ordinary concern in the drier districts of Australia.

8. *Rainfall*.—As even a casual reference to climatological maps, indicating the distribution of rainfall and prevailing direction of wind, would clearly shew, the rainfall of any region is determined mainly by the direction and route of the prevailing winds, by the varying temperatures of the earth's surface over which they blow, and by the physiographical features generally.

Australia lies within the zone of the south-east trade and prevailing westerly winds. The southern limit of the south-east trade strikes the eastern shores at about 30° south latitude, and with very few exceptions, the heaviest rains of the Australian continent are precipitated along the Pacific slopes to the north of that latitude, the varying quantities being more or less regulated by the differences in elevation of the shores and of the chain of mountains, upon which the rain-laden winds blow, from the New South Wales northern border to Thursday Island. The converse effect is exemplified on the north-west coast of Western Australia, where the prevailing winds, blowing from the interior of the continent instead of from the ocean, result in the lightest coastal rain in Australia.

The westerly winds, which skirt the southern shores, are responsible for the very reliable, although generally light to moderate, rains enjoyed by the south-western portion of Western Australia, by the south-eastern agricultural areas of South Australia, by a great part of Victoria, and by the whole of Tasmania.

(i) *Factors determining Distribution and Intensity of Rainfall*.

(ii) *Time of Rainfall*.

In Year Book No. 6 (see pp. 72 to 74) some notes were given of the various factors governing the distribution, intensity and period of Australian rainfall.

(iii) *Wettest and Driest Regions*. The wettest known part of Australia is on the north-east coast of Queensland, between Port Douglas and Cardwell, where three stations situated on, or adjacent to, the Johnstone and Russell Rivers have an average annual rainfall of between 148 and 166 inches. The maximum and minimum falls there are:—Goondi, 241.53 in 1894 and 67.88 inches in 1915, or a range of 173.65 inches; Innisfail, 211.24 in 1894 and 69.87 inches in 1902, or a range of 141.37 inches; Harvey's Creek, 238.45 in 1901 and 80.47 inches in 1902, or a range of 157.98 inches.

On four occasions more than 200 inches have been recorded at Goondi, the last of these being in 1910, when 204.82 inches were registered. The record at this station covers a period of 34 years.

Harvey's Creek in the shorter period of 21 years has twice exceeded 200 inches, the total for 1910 being 201.28 inches.

The driest known part of the continent is about the Lake Eyre district in South Australia (the only part of the continent below sea level), where the annual average is but 5 inches, and where the fall rarely exceeds 10 inches for the twelve months.

* In Australia artificial storage ponds or reservoirs are called "tanks."

The inland districts of Western Australia were at one time regarded as the driest part of Australia, but authentic observations in recent years over the settled districts in the east of that State shew that the annual average is from 10 to 12 inches.

(iv) *Quantities and Distribution of Rainfall generally.* The departure from the normal rainfall increases greatly and progressively from the southern to the northern shores of the continent, and similarly also at all parts of the continent subject to capricious monsoonal rains, as the comparisons hereunder will shew. The general distribution is best seen from the map on page 72, shewing the areas subject to average annual rainfalls lying between certain limits. The areas enjoying varying quantities of rainfall determined from the latest available information are shewn in the following table :—

DISTRIBUTION OF AVERAGE RAINFALL.

Average Annual Rainfall.	N.S.W. (a)	Victoria.	Queens- land.	South Australia.	Northern Territory	Western Australia.	Tas- mania. (b)	Common- wealth. (b)

(a) Including Federal Capital Territory. (b) Over an area of 3,030 square miles no records are available.

Referring first to the capital cities, the complete records of which are given on the following page, it is seen that Sydney with a normal rainfall of 48.34 inches occupies the chief place, Brisbane, Perth, Melbourne, Hobart and Adelaide following in that order, Adelaide with 21.03 inches being the driest. The extreme range from the wettest to the driest year is greatest at Brisbane (72.09 inches) and least at Adelaide (19.48 inches).

In order to shew how the rainfall is distributed throughout the year in various parts of the continent, the figures of representative towns have been selected. (See map on page 71.) Darwin, typical of the Northern Territory, shews that in that region nearly the whole of the rainfall occurs in the summer months, while little or none falls in the middle of the year. The figures for Perth, as representing the south-western part of the continent, are the reverse, for while the summer months are dry, the winter ones are very wet. In Melbourne and Hobart the rain is fairly well distributed throughout the twelve months, with a maximum in October in the former, and in November in the latter. The records at Alice Springs and Daly Waters indicate that in the central parts of Australia the wettest months are in the summer and autumn. In Queensland, as in the Northern Territory, the heaviest rains fall in the summer months, but good averages are also maintained during the other seasons.

On the coast of New South Wales, the first six months of the year are the wettest, with a maximum in the autumn; the averages during the last six months are fair and moderately uniform. In general it may be said that one-third of the area of the continent, principally in the eastern and northern parts, enjoys an annual average rainfall of from 20 to 50 or more inches, the remaining two-thirds receiving generally from about 10 to 20 inches.

(v) *Curves of Rainfall and Evaporation.* The relative amounts of rainfall and evaporation at different times through the year are best seen by referring to the graphs for a number of characteristic places. (See page 66.) It will be recognised at once how large is the evaporation when water is fully exposed to the direct rays of the sun, and to wind.

(vi) *Tables of Rainfall.* The table of rainfall for a long period of years for each of the various Australian capitals affords information as to the variability of the fall in successive years, and the list of the more remarkable falls furnishes information as to what may be expected on particular occasions.

GRAPHS SHEWING ANNUAL FLUCTUATIONS OF MEAN MAXIMUM AND MINIMUM TEMPERATURE AND HUMIDITY IN SEVERAL PARTS OF THE COMMONWEALTH OF AUSTRALIA.

EXPLANATION OF THE GRAPHS OF TEMPERATURE AND HUMIDITY.—In the above graphs in which the heavy lines denote "temperature" and the thin lines "humidity," the fluctuations of mean temperature and mean humidity are shown throughout the year. These curves are plotted from the data given in the Climatological Tables hereinafter. The temperatures are shown in degrees Fahrenheit, the inner columns giving the corresponding values in Centigrade degrees. Humidities have not been obtained for Darwin, Daly Waters, and Alice Springs.

For the thin lines the degree numbers represent relative humidities, or the percentages of actual saturation (absolute saturation = 100).

The upper temperature line represents the mean of the maximum, and the lower line the mean of the minimum results; thus the curves also show the progression of the range between maximum and minimum temperatures throughout the year. The humidity curves show the highest and lowest values of the mean monthly humidity at 9 a.m. recorded during a series of years.

INTERPRETATION OF THE GRAPHS.—The curves denote mean monthly values. Thus, taking for example, the temperature graphs for Perth, the mean readings of the maximum and minimum temperatures for a number of years on 1st January would give respectively about 83° Fahr. and 62° Fahr. Thus the mean range of temperature on that date is the difference, viz., 21°. Similarly, observations about 1st June would give respectively about 66° Fahr. and 51° Fahr., or a range of 15°.

In a similar manner it will be seen that the greatest mean humidity, say for March, is about 66° and the least mean humidity for the month 46°. In other words, at Perth the degree of saturation of the atmosphere by aqueous vapour for the month of March ranges between 66% and 46%.

GRAPHS SHEWING ANNUAL FLUCTUATIONS OF MEAN RAINFALL AND MEAN
EVAPORATION IN SEVERAL PARTS OF THE COMMONWEALTH OF AUSTRALIA.

EXPLANATION OF THE GRAPHS OF RAINFALL AND EVAPORATION.—On the preceding graphs thick lines denote rainfall and thin lines evaporation, and shew the fluctuation of the mean rate of fall *per month* throughout the year. The results, plotted from the Climatological Tables hereinafter, are shewn in inches (see the outer columns), and the corresponding metric scale (centimetres) is shewn in the two inner columns. The evaporation is not given for Darwin and Daly Waters.

At Perth, Adelaide, Brisbane, Melbourne, Hobart, Alice Springs, and Coolgardie the results have been obtained from jacketed tanks sunk in the ground. At Sydney and Dubbo sunken tanks without water jackets are used, whilst at Laverton (W.A.) the records are taken from a small portable jacketed evaporation dish of 8 inches in diameter.

INTERPRETATION OF THE GRAPHS.—The distance for any date from the zero line to the curve represents the average number of inches, reckoned as per month, of rainfall at that date. Thus, taking the curves for Adelaide, on the 1st January the rain falls on the average at the rate of about four-fifths of an inch per month, or, say, at the rate of about $9\frac{1}{2}$ inches per year. In the middle of June it falls at the rate of nearly 3 inches per month, or, say, at the rate of about 36 inches per year. At Dubbo the evaporation is at the rate of nearly $11\frac{1}{2}$ inches per month about the middle of January, and only about $1\frac{1}{2}$ inches at the middle of June.

TABLE SHEWING MEAN ANNUAL RAINFALL AND EVAPORATION IN INCHES AT THE PLACES SHEWN ON PRECEDING PAGE, AND REPRESENTED BY THE GRAPHS.

	Rainfall.	Evapora- tion.		Rainfall.	Evapora- tion.

GRAPHS SHEWING ANNUAL FLUCTUATIONS OF MEAN BAROMETRIC PRESSURE FOR THE CAPITALS OF THE SEVERAL STATES OF THE COMMONWEALTH OF AUSTRALIA.

EXPLANATION OF THE GRAPHS OF BAROMETRIC PRESSURE.—On the above graphs the lines representing the yearly fluctuation of barometric pressure at the State capital cities are means for long periods, and are plotted from the Climatological Tables given hereinafter. The pressures are shewn in inches on about $2\frac{1}{2}$ times the natural scale, and the corresponding pressures in centimetres are also shewn in the two inner columns, in which each division represents one millimetre.

INTERPRETATION OF THE BAROMETRIC GRAPHS.—Taking the Brisbane graph for purposes of illustration, it will be seen that the mean pressure on 1st January is about 29.87 inches, and there are maxima in the middle of May and August of about 30.09 inches.

Chart indicating the area affected and period of duration of the Longest Heat Waves when the Maximum Temperature for consecutive 24 hours reached or exceeded 90° Fah.

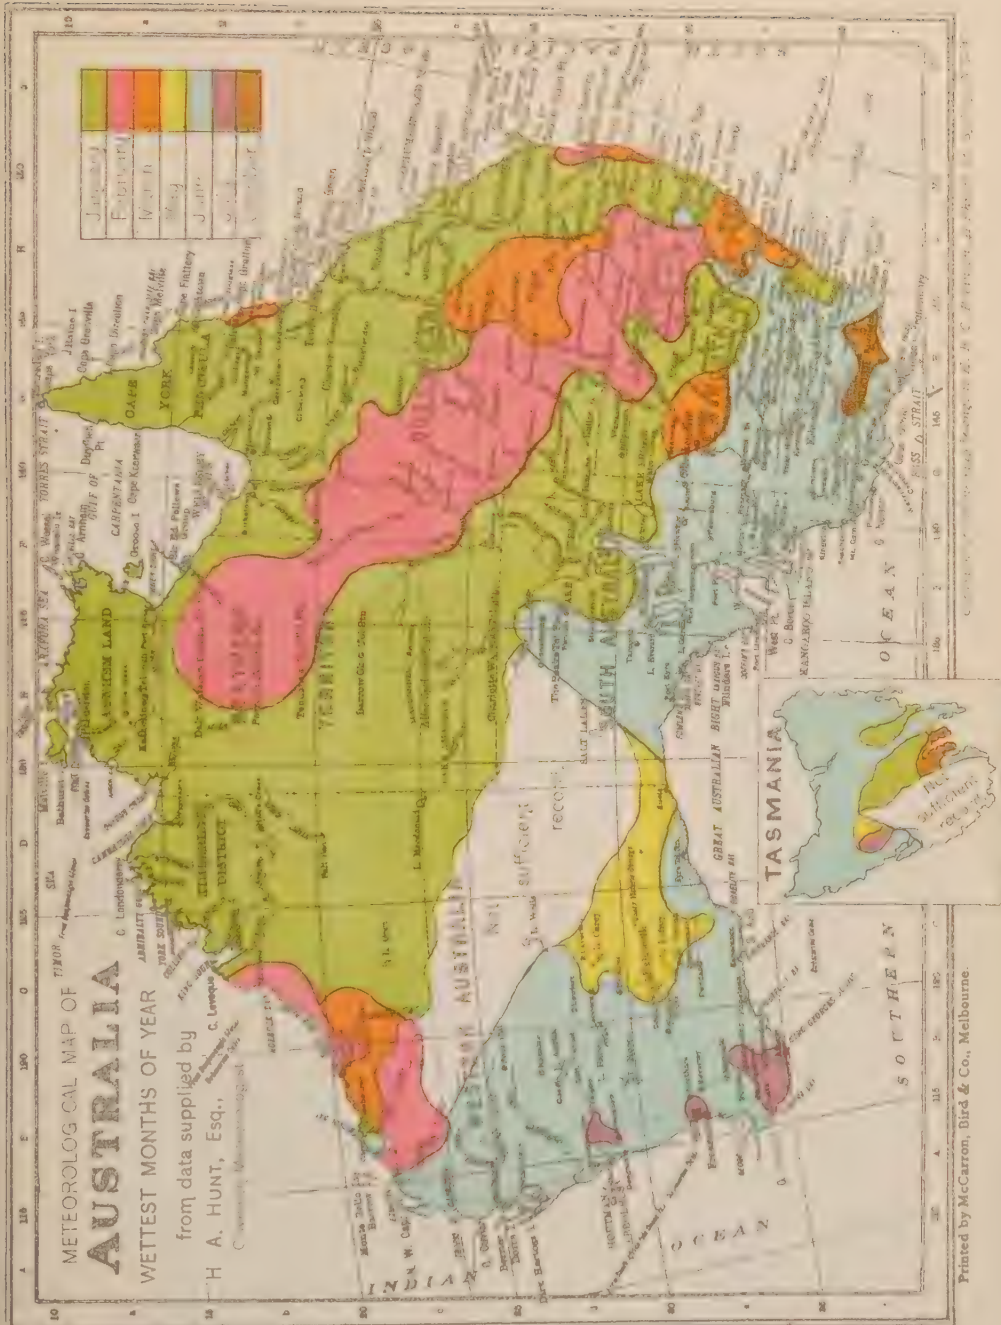

Diagram showing the greatest number of consecutive days on which the Temperature in the shade was over 100° and also over 90° at the places indicated.

GRAPHS SHEWING THE MEAN MONTHLY, AND MEAN ANNUAL TEMPERATURES OF THE
PRINCIPAL AUSTRALIAN CITIES FROM 1911 TO 1920.

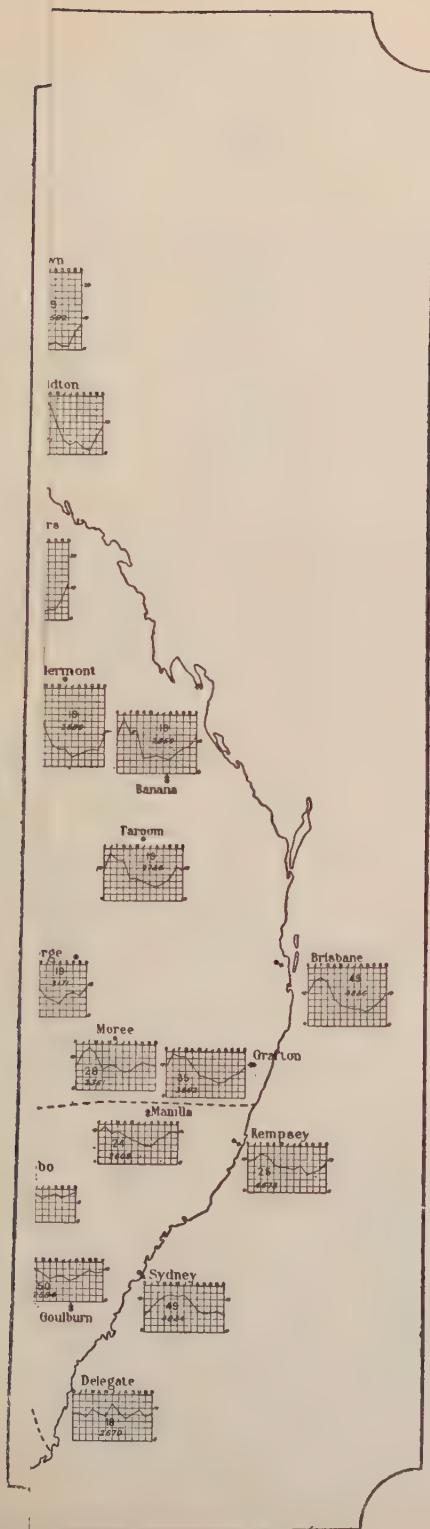

EXPLANATION OF GRAPHS.

The six light continuous curves shew the fluctuations of mean monthly temperatures of the Australian capitals from 1911 to 1920.

The six heavy curves similarly shew the fluctuations of the mean annual temperatures of the Australian capitals from 1911 to 1920.

The base of each small square denotes one month, and the vertical side 2° Centigrade or 3.6° Fahrenheit.

COMMONWEALTH METEOROLOGY

Revised Average Annual Rainfall Map,
Australia and Tasmania.

H. A. HUNT, Commonwealth Meteorologist.

10. Snowfall.—Light snow has been known to fall even as far north, occasionally, as latitude 31° S., and from the western to the eastern shores of the continent. During exceptional seasons it has fallen simultaneously over two-thirds of the State of New South Wales, and has extended at times along the whole of the Great Dividing Range, from its southern extremity in Victoria as far north as Toowoomba in Queensland. During the winter snow covers the ground to a great extent on the Australian Alps for several months, where also the temperature falls below zero Fahrenheit during the night, and in the ravines around Kosciusko and similar localities the snow never entirely disappears.

The antarctic "V"-shaped disturbances are always associated with our most pronounced and extensive snowfalls. The depressions on such occasions are very steep in the vertical area, and the apexes are unusually sharp-pointed and protrude into very low latitudes, sometimes even to the tropics.

11. Hail.—Hail falls throughout Australia most frequently along the southern shores of the continent in the winter, and over south-eastern Australia during the summer months. The size of the hailstones generally increases with distance from the coast, a fact which lends strong support to the theory that hail is brought about by ascending currents. Rarely does a summer pass without some station experiencing a fall of stones exceeding in size an ordinary hen-egg, and many riddled sheets of light-gauge galvanised iron bear evidence of the weight and penetrating power of the stones.

Hail storms occur most frequently in Australia when the barometric readings indicate a flat and unstable condition of pressure. They are almost invariably associated with tornadoes or tornadic tendencies, and on the east coast the clouds from which the stones fall are generally of a remarkable sepia-coloured tint.

12. Barometric Pressures.—The mean annual barometric pressure (corrected to sea-level and standard gravity) in Australia varies from 29.80 inches on the north coast to 29.92 inches over the central and 30.03 inches in the southern parts of the continent. In January the mean pressure ranges from 29.70 inches in the northern and central areas to 29.95 inches in the southern. The July mean pressure ranges from 29.90 inches at Darwin to 30.12 inches at Alice Springs. Barometer readings, corrected to mean sea level and standard gravity, have, under anticyclonic conditions in the interior of the continent, ranged as high as 30.77 inches (at Kalgoorlie on the 28th July, 1901) and have fallen as low as 27.55 inches. This lowest record was registered at Mackay during a tropical hurricane on the 21st January, 1918. An almost equally abnormal reading of 27.88 inches was recorded at Innisfail during a similar storm on the 10th March, 1918. The mean annual fluctuations of barometric pressure for the capitals of Australia are shewn on page 67.

13. Wind.—Notes on the distinctive wind currents in Australia were given in preceding Year Books (see No. 6, page 83) and are here omitted to save space.

14. Cyclones and Storms.—The "elements" in Australia are ordinarily peaceful, and although severe cyclones have visited various parts, more especially coastal areas, such visitations are rare, and may be properly described as erratic.

During the winter months the southern shores of the continent are subject to cyclonic storms, evolved from the V-shaped depressions of the southern low-pressure belt. They are felt most severely over the south-western parts of Western Australia, to the south-east of South Australia, in Bass Straits, including the coast line of Victoria, and on the west coast of Tasmania. Apparently the more violent wind pressures from these cyclones are experienced in their northern half, that is, in that part of them which has a north-westerly to a south-westerly circulation.

Occasionally the north-east coast of Queensland is visited by hurricanes from the north-east tropics. During the first four months of the year these hurricanes appear to have their origin in the neighbourhood of the South Pacific Islands, their path being a parabolic curve of south-westerly direction. Only a small percentage, however, reach Australia, the majority recurring in their path to the east of New Caledonia.

Very severe cyclones, locally known as "Willy Willies," are peculiar to the north-west coast of Western Australia from the months of November to April inclusive. They apparently originate in the ocean, in the vicinity of Cambridge Gulf, and travel in a south-westerly direction with continually increasing force, displaying their greatest energy near Cossack and Onslow, between latitudes 20° and 22° South. The winds in these storms, like those from the north-east tropics, are very violent and destructive,

causing great havoc amongst the pearl-fishers. The greatest velocities are usually to be found in the south-eastern quadrant of the cyclones, with north-east to east winds. After leaving the north-west coast, these storms either travel southwards, following the coast-line, or cross the continent to the Great Australian Bight. When they take the latter course their track is marked by torrential rains, as much as 29.41 inches, for example, being recorded in 24 hours at Whim Creek from one such occurrence. Falls of 10 inches and over have frequently been recorded in the northern interior of Western Australia from similar storms.

Some further notes on severe cyclones and on "Southerly Bursters," a characteristic feature of the eastern part of Australia, will be found in previous issues of the Year Book (see No. 6, pp. 84, 85, 86).

15. Influences affecting Australian Climate.—Australian history does not cover a sufficient period, nor is the country sufficiently occupied, to ascertain whether or not the advance of settlement has materially affected the climate as a whole. Local changes therein, however, have taken place, a fact which suggests that settlement and the treatment of the land have a distinct effect on local conditions. For example, the mean temperature of Sydney shews a rise of two-tenths of a degree during the last twenty years, a change probably brought about by the great growth of residential and manufacturing buildings within the city and in the surrounding suburbs during that period. Again, low-lying lands on the north coast of New South Wales, that originally were seldom subject to frosts, have, with the denudation of the surrounding hills from forests, experienced annual visitations, the probable explanation being that, through the absence of trees, the cold air of the high lands now flows, unchecked and untempered, down the sides of the hills to the valleys and lower lands.

(i) *Influences of Forests on Climate.* As already indicated, forests doubtless exercise a great influence on local climate, and hence, to the extent that forestal undertakings will allow, the weather can be controlled by human agency. The direct action of forests is an equalising one; thus, especially in equatorial regions and during the warmest portion of the year, they considerably reduce the mean temperature of the air. They also reduce the diurnal extremes of shade temperatures by altering the extent of radiating surface, by evaporation, and by checking the movement of air. While decreasing evaporation from the ground, they increase the relative humidity. Vegetation greatly diminishes the rate of flow-off of rain and the washing away of surface soil. Thus, when a region is protected by trees, a steadier water supply is ensured, and the rainfall is better conserved. In regions of snowfall the supply of water to rivers is similarly regulated, and without this and the sheltering influence of ravines and "gullies," watercourses supplied mainly by melting snow would be subject to alternate periods of flooding and dryness. This is borne out in the inland rivers. Thus, the River Murray, which has never been known to run dry, derives its steadiness of flow mainly through the causes above indicated.

(ii) *Direct Influences of Forests on Rainfall.* Whether forests have a direct influence on rainfall is a debatable question, some authorities alleging that precipitation is undoubtedly induced by forests, while others contend the opposite.

Sufficient evidence exists, however, to establish that, even if the rainfall has not increased, the beneficial effect of forest lands in tempering the effects of the climate is more than sufficient to disclose the importance of their protection and extension.

It is the rapid rate of evaporation, induced by both hot and cold winds, which injures crops and makes life uncomfortable on the plains. Whether the forest aids in increasing precipitation there may be doubt, but nobody can say that it does not check the winds and the rapid evaporation due to them.

Trees as wind-breaks have been successfully planted in central parts of the United States, and there is no reason why similar experiments should not be successful in many parts of our treeless interior. The belts should be planted at right angles to the direction of the prevailing parching winds, and if not more than half a mile apart will afford shelter to the enclosed areas.

In previous issues some notes on observations made in other countries were added (see Year Book No. 6, pp. 86 and 95).

16. Comparison of Rainfalls and Temperatures.—For the purpose of comparison the following lists of rainfalls and temperatures are given for various important cities throughout the world, for the site of the Federal capital, and for the capitals of the Australian States.

SECTION IV. POPULATION.

[In order to permit of the incorporation of the latest available details in regard to the Census of 1921, this Section has been transferred to the end of the present issue of the Official Year Book, and appears after Section XXXIV. It will, however, be placed in its usual order in succeeding issues.]

SECTION V. VITAL STATISTICS.

NOTE.—The rates quoted throughout this Section for the years 1914 to 1920 have been calculated in accordance with the corrected populations as determined by the results of the Census of 1911.

§ 1. Births.

1. Male and Female Births, 1914 to 1920.—The total number of male and female births registered in the Commonwealth during the years 1914 to 1920 is shewn in the two tables hereunder :—

TOTAL MALE BIRTHS, COMMONWEALTH, 1914 TO 1920.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	North. Terr.	Federal Territory.	Common- wealth.
1914 ..	27,452	18,545	10,120	6,668	4,663	3,094	31	31	70,604
1915 ..	27,085	17,820	10,444	6,076	4,578	2,991	33	22	69,049

1918 ..	24,707	15,425	9,456	5,570	3,491	2,563	46	23	61,281
1919 ..	23,608	15,394	8,953	5,284	3,460	2,592	51	17	59,359
1920 ..	26,251	17,566	9,719	5,850	3,893	2,832	32	7	66,150

2. Total Births, 1914 to 1920.—The total number of births for the Commonwealth in 1914 was the greatest number ever recorded, but the figures for the five years 1915 to 1919 shewed a falling off as compared with those for 1914. There was a recovery in 1920 when the total reached 136,406, which was the second greatest number of births registered in one year.

TOTAL BIRTHS, COMMONWEALTH, 1914 TO 1920.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	North. Terr.	Federal Terr.	C'wealth.
1914 ..	53,641	36,222	19,882	12,904	9,204	6,017	58	55	137,983
1915 ..	52,931	35,009	20,163	11,798	9,017	5,845	61	47	134,871
1916 ..	52,080	34,235	18,912	11,857	8,563	5,642	74	63	131,426
1917 ..	52,448	33,033	19,787	11,326	7,882	5,376	69	44	129,965
1918 ..	50,709	31,597	19,536	11,357	7,106	5,280	105	49	125,739
1919 ..	48,532	31,619	18,699	11,060	6,937	5,310	106	27	122,290
1920 ..	53,942	36,213	20,256	12,028	8,149	5,740	63	15	136,406

3. *Birth Rates, 1914 to 1920.*—(i) *Crude Birth Rate.* The most notable feature of the table shewing the crude birth rate is the continual fall from 1914 to 1919. This feature, which is doubtless due to the war, is exhibited in all the States. Though an increase took place in 1920, the birth rate is still very much below that of pre-war years. The rates in the Territories shew considerable fluctuation, but the numbers are too small to allow of any deductions therefrom.

CRUDE BIRTH RATE (a), COMMONWEALTH, 1914 TO 1920.

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W.Aust.	Tas.	North. Terr.	Federal Territory.	C'wlth.
1914	28.96	25.45	29.46	29.33	28.45	30.33	15.46	20.79	28.05
1915	28.33	24.55	29.35	26.84	27.97	29.32	13.85	19.05	27.25

1920	26.59	24.07	27.58	25.45	24.40	26.37	14.37	6.90	25.74
Density (b) (No. per square mile) ..	6.62	17.29	1.10	1.25	0.34	8.41	0.008	2.10	1.80

(a) Number of births per 1,000 of the mean annual population. (b) On 31st December, 1919.

The population density of each State and of the Commonwealth has been given for the purpose of considering the influence, if any, of concentration of population on birth rate, in connection with the disparities of the rate in different parts of Australia.

(ii) *Objections to Crude Birth Rate.* The figures just given represent the "crude birth rate," i.e., the number of births per thousand of mean annual population. The number of births per thousand of the female population of child-bearing ages, i.e., from 15 to 45, furnishes, however, a more significant rate. This calculation has been made for the four last Census periods, and covers in each case the Census year, together with the year immediately preceding and the year immediately following. The following results have been obtained for the four Census periods:—Total births per 1,000 women (married and unmarried) of ages 15 to 45:—Years 1880–82, 169.69; years 1890–92, 158.81; years 1900–02, 117.26; years 1910–12, 117.22. Nuptial births per 1,000 married women of ages 15 to 45:—Years 1880–82, 320.96; years 1890–92, 332.03; years 1900–02, 235.84; years 1910–12, 236.06.

4. **Birth Rates of Various Countries.**—A comparison with other countries shews that the Australian States occupy a rather low position, which is, however, fortunately counterbalanced by a still lower position in regard to their death rates, as will be seen from the table hereinafter in the section dealing with "Deaths." It will be noticed that, owing to the difficulty of procuring statistics in regard to the belligerent countries in the late war, many of the rates quoted for continental countries are for rather remote years. Consequently it is not suggested that the comparison instituted in the attached table is exact. This does not however affect the general proposition that Australia takes a low position amongst the countries of the world, both as regards crude birth rate and crude death rate.

CRUDE BIRTH RATE (a) OF VARIOUS COUNTRIES.

Tasmania ..	1920	26.4			

(a) Number of births per 1,000 of the mean population. (b) Figures for "provisional birth-registration area," which includes about 53 per cent. of the population.

The wide discrepancies among the crude birth rates of the various countries are, to some extent, due to differences in sex and age constitution and in conjugal condition. If the birth rates be calculated per 1,000 women of child-bearing ages, the comparison shews very different results. The report for 1908 of the Registrar-General for England and Wales contains a table shewing the nuptial births per 1,000 married women of ages 15 to 45 in a number of countries, and the information here given in regard to the period 1900-1902 is taken therefrom.

NUPTIAL BIRTHS PER 1,000 MARRIED WOMEN, AGED 15-45 YEARS, 1900-1902.

Country.	Rate.	Country.	Rate.
Netherlands ..	314.6	Switzerland ..	265.9

Germany ..	284.2	New Zealand ..	243.2
Austria ..	283.7	Australia ..	235.8
Scotland ..	271.8	England and Wales ..	235.5
Italy ..	269.4	France ..	157.5
Sweden ..	269.0		

5. **Masculinity at Birth.**—The masculinity of births, *i.e.*, the excess of males over females per 100 births, registered during the last seven years in the several States of the Commonwealth has, apart from the Northern Territory and the Federal Territory, the figures for which are useless for comparative purposes on account of the smallness of the returns on which they are based, varied from 0.25 in Western Australia in 1919 to 4.58 in South Australia in 1916. The following table, which gives the values for the States and Commonwealth for 1914 to 1920, shews that for the Commonwealth there was a steady increase of masculinity from 1914 to 1917, with a sharp fall in 1918, and a recovery in 1919 and 1920.

MASCULINITY (a) OF BIRTHS REGISTERED, COMMONWEALTH, 1914 TO 1920.

Year.	N.S.W.	Vict.	Q'land.	S. Aust.	W. Aust.	Tas.	Northern Territory.	Federal Territory.	C'wealth.
1914 ..	2.35	2.40	1.80	3.35	1.33	2.84	6.90	12.73	2.34
1915 ..	2.34	1.80	3.60	3.00	1.54	2.34	8.20	—6.38	2.39
1916 ..	2.21	2.95	2.29	4.58	3.68	1.84	18.92	20.63	2.73
1917 ..	2.97	4.26	1.66	1.75	2.97	1.19	21.74	—4.55	2.92
1918 ..	2.55	2.36	3.19	1.91	1.75	2.92	12.38	6.12	2.53
1919 ..	2.71	2.63	4.24	4.45	0.25	2.37	3.77	—25.93	2.92

(a) Excess of males over females per 100 total births.

There is ordinarily a very small difference between the masculinity of nuptial and ex-nuptial births. Thus, according to Bodio, whose figures are quoted in the following table, for the period about 1887–1891, the masculinity in various countries ranged from 3.98 to 1.77, and from 3.80 to 0.79 for total and ex-nuptial births respectively.

MASCULINITY OF BIRTHS IN VARIOUS COUNTRIES.

Country.	Masculinity of Births.(a)		Country.	Masculinity of Births.(a)	
	All Live Births.	Ex-nuptial Live Births.		All Live Births.	Ex-nuptial Live Births.
Spain	3.98	3.80	Germany	2.53	2.29
Rumania	3.71	1.67	Finland	2.44	2.53
Portugal	3.61	3.10	Hungary	2.44	1.43
Austria	2.82	2.68	Sweden	2.44	2.10

(a) Excess of males over females per 100 total births.

It is curious to note that while, so far as the total births are concerned, there has always been an excess of male births over female births in the period under review, this has not been the case in regard to ex-nuptial births, since in Tasmania, South Australia and Western Australia a large negative masculinity has been experienced. Little weight, however, can be attached to those results on account of the small totals on which they are based, and for the same reason the figures for the Northern Territory and Federal Territory are not taken into consideration.

6. Ex-nuptiality of Births.—The number of ex-nuptial births reached its maximum in 1913. From that year there was a sharp fall till 1916, with a subsequent slight recovery.

It is, of course, possible that the number of ex-nuptial births is somewhat understated, owing to diffidence in proclaiming the fact of ex-nuptiality, and it is not unlikely that the majority of unregistered births are ex-nuptial.

**TOTAL EX-NUPTIAL BIRTHS REGISTERED IN THE COMMONWEALTH,
1914 TO 1920.**

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Northern Territory.	Federal Territory.	C'wealth.

(i) *Rate of Ex-nuptiality, 1914 to 1920.* The rate of ex-nuptiality, i.e., the percentage on ex-nuptial to total births, has been fairly stationary during the last seven years on the whole, although 1916, 1917, and 1920 shewed a decline.

**PERCENTAGE OF EX-NUPTIAL ON TOTAL BIRTHS, COMMONWEALTH,
1914 TO 1920.**

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Northern Territory.	Federal Territory.	C'wealth.

1920 ..	4.79	5.25	5.10	3.74	3.89	5.28	23.81	..	4.84

A comparison of greater significance is obtained by calculating the number of ex-nuptial births per thousand of the single and widowed female population between the ages of 15 and 45. The calculation has been made for the last four Census periods, and covers in each case the Census year, together with the year immediately preceding and the year immediately following. The number of ex-nuptial births per 1,000 unmarried women of ages 15 to 45 has been found to be as follows :—Years 1880–82, 14.49; years 1890–92, 15.93; years 1900–02, 13.30; years 1910–12, 12.53. Corresponding figures for the countries the nuptial birth rates of which were shewn in a preceding paragraph are here given for the sake of comparison :—

**EX-NUPTIAL BIRTHS PER 1,000 UNMARRIED WOMEN AGED 15-45 YEARS,
1900 TO 1902.**

Country.	Rate.	Country.	Rate.
Austria	40.1	Spain	15.5
Germany	27.4	Scotland	13.4
Sweden	24.3	Australia	13.3
Denmark	24.2	Switzerland	9.8
Prussia	23.7	New Zealand	8.9
Italy	19.4	England and Wales	8.5
France	19.1	Netherlands	6.8
Belgium	17.8	Ireland	3.8
Norway	17.2		

(ii) *Comparison of Rates.* Since the rate of ex-nuptiality might appear to increase by the mere decrease in the general birth rate, the following table has been prepared, which shews that this is not the case :—

**CRUDE EX-NUPTIAL, NUPTIAL, AND TOTAL BIRTH RATES (a),
COMMONWEALTH, 1914 TO 1920.**

Rates.	1914.	1915.	1916.	1917.	1918.	1919.	1920.
Ex-nuptial ..	1.48	1.40	1.28	1.30	1.32	1.26	1.24
Nuptial ..	26.57	25.85	25.50	25.21	23.93	22.52	24.50
Total ..	28.05	27.25	26.78	26.51	25.25	23.78	25.74

(a) Number of births per 1,000 of mean population.

7. Multiple Births.—Among the total number of 136,406 births registered in the Commonwealth in 1920 there were 133,354 single births, 3,005 twins, and 47 triplets. The number of cases of twins was 1,505, there being 5 stillbirths, and the

number of cases of triplets 16. The total number of mothers was, therefore (1 still-birth), 134,875, the proportion of mothers of twins being one in every 90, and of mothers of triplets one in every 8,430 of total mothers. The proportion of multiple births is a fairly constant one. In 1914 they numbered 1,401, or one in 97; in 1915, 1,417, or one in 94; in 1916, 1,383, or one in 95; in 1917, 1,477, or one in 86; in 1918, 1,370, or one in 91; in 1919, 1,327, or one in 91; and in 1920, 1,521, or 1 in 89. The number of cases of triplets is so small that a slight alteration in the total will completely change the proportion. Thus, they were one in 12,415 in 1914; one in 13,444 in 1915; one in 10,952 in 1916; one in 7,558 in 1917; one in 15,545 in 1918; one in 8,064 in 1919; and one in 8,430 in 1920. A case of quadruplets occurred in 1917, and another in 1919.

8. Ages of Parents.—The relative ages of the parents of children registered in 1920 have been tabulated separately for male and female births, twins and triplets being distinguished from single births, and are shewn for single ages and for every State in "Bulletin of Population and Vital Statistics, No. 38; Commonwealth Demography, 1920 and previous years." In the present work the exigencies of space allow only the insertion of corresponding tables shewing the relative ages of parents in groups of five years. It will be seen from the tables that the largest number of single births occurred where the ages of both father and mother were between 25 and 29. The largest number of mothers was also found at ages 25 to 29.

No conclusions can, of course, be drawn from one year's figures as to variations in the masculinity of the births at different ages of the parents, but so far as the figures go they indicate a few conclusions which may be mentioned, viz. :—In cases where the father is older than the mother the masculinity has a tendency to be above the average, while in cases where both parents belong to the same age group, or where the father is younger than the mother, the masculinity is rather below the average. It is also below the average in cases where the father, or both father and mother, are under 25; and it is above the average where the mother alone is under 25.

9. Birthplaces of Parents.—The relative birthplaces of the parents of children whose births were registered during the year 1920 will be found tabulated in the Bulletin before-mentioned. A summary of the results of the tabulation is here given :—

11. *Mother's Age, Duration of Marriage, and Issue.*—A tabulation has been made shewing, in age-groups, the duration of marriage and issue of mothers. The total number of nuptial confinements in 1920 was 128,328, viz., 126,862 single births, 1,450 cases of twins, and 16 cases of triplets. Account has been taken in the number of births of only 2,895 twins and 47 triplets, 6 cases of stillbirths having been excluded. From this number 97 mothers must be deducted, in whose cases the necessary particulars either as to date of marriage or as to previous issue were not stated. The tables refer, therefore, to a total of 128,231 mothers. They exclude children by former marriages and still-born children, but include ex-nuptial children, previous issue by the same father. The tables cannot be given *in extenso*, but the following are their most salient features. The complete tabulations are shewn in "Commonwealth Bulletin of Population and Vital Statistics, No. 38; Commonwealth Demography, 1920, and previous years."

DURATION OF MARRIAGE AND ISSUE OF MOTHERS OF ALL AGES,

The tables shew a fairly regular increase in the number of children up to the period where the marriage has lasted twenty years, and it appears that the average interval between successive confinements up to that period was rather more than two years and eight months. The average number of children of all marriages was 3.11, the corresponding figures for 1919 having been 3.33; for 1918, 3.34; for 1917, 3.29; for 1916, 3.29; for 1915, 3.26; and for 1914, 3.22.

A similar table has been prepared shewing the previous issue of mothers of twins and triplets, from which it appears that 362 mothers had twins at their first confinement; 255 at their second; 225 at their third; 186 at their fourth; 141 at their fifth; 98 at

their sixth; 70 at their seventh; 35 at their eighth; 35 at their ninth; 16 at their tenth; 11 at their eleventh; 9 at their twelfth; 3 at their thirteenth; 2 at their fourteenth; and 2 at their fifteenth.

Of the 16 cases of triplets, 2 occurred at the first confinement; 3 at the second; 5 at the third; 2 at the fourth; 2 at the fifth; and 2 at the sixth.

12. *Interval between Marriage and First Birth.*—The following table shews the interval between marriage and first birth. Twins and triplets are included, the eldest born only being enumerated :—

INTERVAL BETWEEN MARRIAGE AND FIRST BIRTH, COMMONWEALTH, 1920.

Interval.			Number of First Children.	Interval.			Number of First Children.
Under 1 month	424	2 years	2 930
1 month	564	3 "	1,706

21 "	400	23 "	1
22 "	320	24 "	1
23 "	215	27 "	1
				Total	39,678

Of these 39,678 children, 20,398 were males and 19,280 were females; the masculinity of first births was therefore 2.82 as compared with 3.01 for total births.

The previous issue of mothers of ex-nuptial children is not recorded, but for the purposes of the following table all ex-nuptial births have been assumed to be first births. The table shows the ages of mothers of ex-nuptial births, of nuptial births occurring less than nine months after marriage, and of nuptial births occurring nine months or more after marriage. A comparison of the combined total of the first two columns with the total of nuptial children born nine months or more after marriage reveals the fact that for all ages the ratio of the two was about as 2 is to 3. At all ages up to and including 21, however, there was a great preponderance of ex-nuptial births and of births following on ante-nuptial conception. It must, of course, be understood that a certain number of premature births are necessarily included among the births which occurred less than nine months after marriage, but there is no means of arriving at the proportion of those births.

AGES OF MOTHERS AND INTERVAL BETWEEN MARRIAGE AND FIRST BIRTH, ETC., COMMONWEALTH, 1920.

Age of Mother at Birth of Child.		Ex-nuptial Births.	Nuptial Births less than nine months after Marriage.	Total of two preceding columns.	Nuptial Births nine months after Marriage and later.	Total Nuptial First Births.	Nuptial First Births and Ex-nuptial Births.

13. **Interval between Birth and Registration of Birth.**—Information was obtained during 1920 as to the period elapsing between birth and registration. The law relating to maternity allowances has tended to accelerate the registration of births; and during the year under review it was found that approximately 36 per cent. were registered in the first week.

38 " ..	631	29	660	Total Births	129,804	6,602	136,406

The weighted average interval between the dates of birth and registration has been found to be about 13 days both for nuptial and ex-nuptial children since the granting of the maternity allowance.

2. Marriages.

1. **Marriages, 1914 to 1920.**—The number of marriages registered in the Commonwealth in 1920 was 51,552, the highest number ever recorded. In 1914 the number of marriages and the marriage rate increased in all the States with the exception of South Australia and Tasmania, and in 1915 there were further increases

both in the actual number of marriages and in the marriage rate in all States, with the exception of South Australia and Western Australia. A considerable decrease, however, took place in 1916, and a still further fall in 1917 and 1918, the actual number of marriages in the latter years being about the same as in 1909. In 1919 and 1920 there was a substantial recovery. The number of marriages in each State since 1914 is shewn below :—

TOTAL MARRIAGES, COMMONWEALTH, 1914 TO 1920.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	North. Terr.	Federal Terr.	Common- wealth

2. **Marriage Rates, 1914 to 1920.**—The number of marriages registered per thousand of mean population is shewn in the following table for the same period :—

CRUDE MARRIAGE RATE (a), COMMONWEALTH, 1914 TO 1920.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	North. Terr.	Federal Terr.	Common- wealth.
1914 ..	9.37	8.31	8.73	9.11	8.22	7.78	4.53	0.38	8.80
1915 ..	9.68	9.00	8.93	9.01	8.01	8.03	2.73	1.62	9.14
1916 ..	8.74	8.05	7.69	8.32	7.51	7.23	3.92	1.53	8.21
1917 ..	7.09	6.76	7.16	7.52	5.25	5.72	6.86	0.80	6.87
1918 ..	6.90	6.46	6.99	7.25	5.18	5.55	7.81	1.65	6.65
1919 ..	8.04	7.98	7.62	8.46	6.78	7.16	5.20	3.89	7.88
1920 ..	9.93	9.90	9.08	10.33	8.78	9.18	3.88	1.84	9.73

(a) Number of marriages (not persons married) per 1,000 of mean annual population.

As in some international tabulations the marriage rates are calculated per 1,000 of the unmarried population of 15 years and over, the corresponding rates have been worked out for the Commonwealth for the four last Census periods. The figures comprise in each case the Census year with the year immediately preceding and the year immediately following, and are as follows :—Years, 1880–82, 43.98; years 1890–92, 45.74; years 1900–02, 42.14; years 1910–12, 50.10. These rates refer, of course, to persons married and not to marriages, as is the case in the preceding table.

3. **Marriage Rates in Various Countries.**—A comparison of the Australian marriage rate with that of European countries shews that until 1915 it was once or twice surpassed by the rate for Ontario, and equalled by the rate of some of the countries of the East of Europe, and that it was higher than the rate of the countries of Central and Western Europe, and especially than the rate of countries of the North of Europe. Although England and Wales experienced a marriage rate of 10.1 during 1920, the Commonwealth with a rate of 9.7 occupied a very favourable position in the list of countries for which recent information is available.

CRUDE MARRIAGE RATES, VARIOUS COUNTRIES.

Country.	Year.	Crude Marriage Rate.	Country.	Year.	Crude Marriage Rate.
Serbia	1911	10.3	Spain	1919	8.1

South Africa, Union of	1918	8.2			

4. Age at Marriage.—(a) The age at marriage of bridegrooms and brides will be found in the following table, the previous conjugal condition of the contracting parties being distinguished. It will be seen that no less than 1,818 males who were less than twenty-one years of age were married during 1920. The corresponding number of females was 9,040. At the other extreme there were 30 men of sixty-five years and upwards, who described themselves as bachelors, and 9 spinsters of corresponding age.

5. **Previous Conjugal Condition.**—In a previous table the total number of bachelors and spinsters, widowed and divorced persons, who were married during the year 1920, was shewn. In the following table the relative conjugal condition of the contracting parties is given :—

RELATIVE CONJUGAL CONDITION OF PERSONS MARRIED, COMMONWEALTH, 1920.

Conjugal Condition.			Total Bridegrooms.	Brides.		
				Spinsters.	Widows.	Divorced.
Bridegrooms	{ Bachelors	..	48,011	45,617	1,999	395
	{ Widowers	..	3,065	2,075	903	87
	{ Divorced	..	476	374	67	35
Total Brides			51,552	48,066	2,969	517

6. **Birthplaces of Persons Married.**—Information as to the birthplaces of persons who were married in 1920 was not obtained in the State of Western Australia: the following figures refer, therefore, only to New South Wales, Victoria, Queensland, South Australia, Tasmania, the Northern Territory and Federal Territory. As might

be expected, there were more brides than bridegrooms who were natives of the Commonwealth. In "Bulletin No. 38, Commonwealth Demography," the relative birth-places of bridegrooms and brides will be found tabulated.

BIRTHPLACES OF PERSONS MARRIED, COMMONWEALTH (a), 1920.

7. Occupations and Ages of Bridegrooms.—A tabulation has been made of the occupations and ages of all males married in the Commonwealth in the years 1914 to 1920. In "Bulletin No. 38" the 1920 tabulation is shewn for orders of occupations; here it is repeated for classes only, with a subdivision of the Industrial class and of the class of Primary Producers. The average ages of the persons falling under those twelve subdivisions were determined, and it appears that, apart from the Indefinite class, which consists chiefly of persons who have retired from business and who are living on their own means, and where a high average age may naturally be expected, the average age ranges from 28.33 in the Manufacturing class to 32.19 years in the Pastoral class. The results obtained are shewn in the following table:—

OCCUPATIONS AND AGES OF BRIDEGROOMS, COMMONWEALTH, 1920.

Ages at Marriage.	Professional.	Domestic.	Mercantile.	Transport and Communication.	Industrial.			Primary Producers.				
					Manufacturing.	Building and Construction.	Indefinite Industrial Workers.	Agricultural.	Pastoral.	Mines and Quarries.	Other Primary Producers.	Indefinite.

The age at marriage of brides has remained fairly stationary during the period at an average of about 26 years. The figures for the seven years are:—1914, 25.78 years; 1915, 25.75 years; 1916, 26.07 years; 1917, 26.22 years; 1918, 26.11 years; 1919, 25.77 years; and 26.11 years in 1920. For the five years 1907–11 the average age was 25.70 years, compared with 25.92 years for the five years 1912–16, and 26.11 years for 1920. As the average age of all bridegrooms during 1920 was 29.55 years, it follows that brides are generally speaking rather less than three years and one-half younger than bridegrooms.

8. **Fertility of Marriages.**—The quotient obtained by division of the nuptial births registered, say during the five years 1916 to 1920, by the number of marriages registered during the five years 1911 to 1915, i.e., the period antecedent by five years to the period of the births, has been called the "fertility of marriages." This works out at 3.05, or in other words, the number of children to be expected from every marriage in the Commonwealth is about three. This method, while not professing any claim to accuracy, generally furnishes results which agree fairly well with those found by more elaborate and careful investigation. For the period 1907–11 the result was 3.43; for the year 1914, 3.87; for the year 1915, 3.50; for the year 1916, 3.17; for the year 1917, 2.93; for the year 1918, 3.02; for the year 1919, 2.86; and for the year 1920, 3.05.

9. **Registration of Marriages.**—In all the States of the Commonwealth marriages may be celebrated either by ministers of religion whose names are registered for that purpose with the Registrar-General, or by certain civil officers—in most cases district registrars. The great majority of marriages in every State are celebrated by ministers of religion. The proportions so celebrated in 1920 were: New South Wales, 95.34 per cent.; Victoria, 96.99 per cent.; Queensland, 97.34 per cent.; South Australia, 95.90 per cent.; Western Australia, 87.04 per cent.; and Tasmania, 97.85 per cent., the percentage for the Commonwealth being 95.74. The registered ministers in 1920 belonged to more than forty different denominations, some of which, however, can hardly be regarded as having any valid existence. A number of these have been omitted from the tabulation, and are bracketed under the heading "Other Christians." The figures for 1920 are shewn in the following table:—

MARRIAGES IN EACH DENOMINATION, COMMONWEALTH, 1920.

10. *Mark Signatures.*—The marriage registers afford some clue, even if an imperfect one, to the illiteracy of the adult population, since a small and constantly diminishing percentage of bridegrooms and brides sign the registers with marks.

(i) *Males and Females, 1914 to 1920.* The percentage of mark signatures by males and females during the last seven years have been very even, with a slight preponderance in the case of males:—

PERCENTAGE OF MARK SIGNATURES AT MARRIAGE, COMMONWEALTH, 1914 TO 1920.

Year.	1914.	1915.	1916.	1917.	1918.	1919.	1920.
Male ..	0.41	0.27	0.37	0.37	0.33	0.27	0.18
Female ..	0.38	0.27	0.32	0.31	0.29	0.27	0.14

(ii) *Mark Signatures in Commonwealth States, 1914 to 1920.* The following table shows that there has been a marked decrease in every State over the whole period:—

PERCENTAGE OF MARK SIGNATURES AT MARRIAGE, COMMONWEALTH, 1914 TO 1920.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	North. Terr.	Federal Terr.	C'wealth.
1914 ..	0.36	0.19	0.59	0.45	0.53	1.00	1.47	..	0.39
1915 ..	0.25	0.11	0.26	0.32	0.43	1.47	0.27
1916 ..	0.41	0.18	0.32	0.35	0.32	0.98	10.53	..	0.35
1917 ..	0.41	0.16	0.32	0.25	0.49	1.14	7.35	..	0.34
1918 ..	0.37	0.13	0.12	0.34	0.43	1.41	5.13	..	0.31
1919 ..	0.29	0.18	0.17	0.25	0.32	0.89	16.00	..	0.27
1920 ..	0.17	0.09	0.04	0.11	0.31	0.90	5.88	..	0.16

A complete disappearance of mark signatures is hardly to be expected, for the available information tends to show that about two-thirds of those who sign with marks are natives of their respective States, who apparently have not made use of the advantages offered to them by the State schools.

GRAPHS SHEWING TOTAL ANNUAL BIRTHS IN THE COMMONWEALTH AND STATES OF AUSTRALIA, 1860-1920.

(See Table page 82.)

EXPLANATION OF GRAPHS.—The base of each small square represents an interval of one year for both Commonwealth and States, and the vertical height represents 2,000 persons for the Commonwealth and 1,000 for the States.

The scale on the left relates to the Commonwealth, and that on the right to the States.

The distances upward from the common zero lines of the States and Commonwealth, marked 0, denote the total annual number of births in the States and Commonwealth, the scale of the latter being reduced one-half.

The names of the States to which the graphs refer are written thereon, and the characters of the lines used are as follows:—Commonwealth, —————; New South Wales, ————; Victoria, ————; Queensland, ————; South Australia, ————; Western Australia, ————; Tasmania, ————.

GRAPHS SHEWING TOTAL ANNUAL MARRIAGES IN THE COMMONWEALTH AND STATES OF AUSTRALIA, 1860-1920.

GRAPHS SHEWING TOTAL ANNUAL DEATHS IN THE COMMONWEALTH AND STATES OF AUSTRALIA, 1860-1920.

(See table on page 114.)

EXPLANATION OF GRAPHS.—The base of each small square represents an interval of one year for both Commonwealth and States, and the vertical height represents 1,000 persons for the Commonwealth and 500 for the States.

The scale on the left relates to the Commonwealth, and that on the right relates to the States.

The distances upwards from the common zero line for States and Commonwealth, marked 0, denote the total annual number of deaths in the States and Commonwealth, the scale of the latter being reduced one-half.

The names of the States to which the curves refer are written thereon, and the lines used are similar to those for births on page 105.

GRAPHS SHEWING GENERAL BIRTH, NATURAL INCREASE, DEATH (MALE, GENERAL, AND FEMALE) AND MARRIAGE RATES IN THE COMMONWEALTH OF AUSTRALIA, 1860-1920.

(See pages 83, 98, and 114.)

EXPLANATION OF GRAPHS.—The base of each small square represents one year's interval, and the vertical height, according to the character of the curve, one half per thousand of the population—the basic line being five per thousand of the population.

BIRTH RATE GRAPHS. (See next page.)

EXPLANATION OF GRAPHS.—The base of each small square represents one year's interval, and the vertical height one birth per thousand of the population—the basic line for each State being twenty per thousand of the population.

DEATH RATE GRAPHS. (See next page.)

EXPLANATION OF GRAPHS.—The base of each small square represents one year's interval, and the vertical height one death per thousand of the population. The zero for each State is shown by a thickened line.

GRAPHS SHEWING BIRTH RATES IN THE STATES OF NEW SOUTH WALES, VICTORIA, QUEENSLAND, SOUTH AUSTRALIA, WESTERN AUSTRALIA, AND TASMANIA, 1860-1920.

§ 3. Deaths.

1. **Male and Female Deaths, 1914 to 1920.**—The total number of deaths registered in the Commonwealth from 1914 to 1920 inclusive, gives an annual average of 31,055 males and 23,116 females, the details being as follow :—

MALE DEATHS, COMMONWEALTH, 1914 TO 1920.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	North. Terr.	Federal Terr.	C'wealth.
1914 ..	10,984	9,017	4,132	2,621	1,942	1,063	69	7	29,835
1915 ..	11,439	8,860	4,695	2,587	1,887	1,083	89	14	30,654
1916 ..	11,500	8,901	4,653	2,721	1,981	1,148	108	6	31,018
1917 ..	10,445	7,952	4,027	2,398	1,802	926	52	7	27,609
1918 ..	10,914	8,079	4,359	2,430	1,774	959	66	4	28,585
1919 ..	15,256	10,508	5,337	2,927	2,340	1,175	82	7	37,632
1920 ..	12,088	9,059	4,824	2,814	2,161	1,055	48	4	32,053
Rate (a), 1920	11.81	12.15	12.58	12.40	12.12	9.34	14.47	3.33	11.89

(a) Number of deaths per 1,000 of mean population.

FEMALE DEATHS, COMMONWEALTH, 1914 TO 1920.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	North. Terr.	Federal Terr.	C'wealth.
1914 ..	7,736	7,486	2,599	2,092	1,101	855	12	4	21,885
1915 ..	8,146	6,963	2,864	2,107	1,105	932	8	3	22,128
1916 ..	8,346	7,588	2,861	2,356	1,104	908	14	2	23,179
1917 ..	7,496	6,603	2,528	1,967	967	842	11	6	20,420
1918 ..	7,902	7,098	2,792	1,960	1,059	843	8	2	21,664
1919 ..	11,088	8,862	3,519	2,548	1,250	1,017	3	11	28,298
1920 ..	8,846	7,773	3,123	2,269	1,227	981	15	2	24,236
Rate (a), 1920	8.80	10.24	8.90	9.23	7.88	9.37	14.08	2.01	9.24

(a) Number of deaths per 1,000 of mean population.

2. **Male and Female Death Rates, 1920.**—The crude male and female death rates for 1920 only are given in the last line of the preceding tables. Queensland has the highest rate for males, and Victoria for females, while Tasmania has the lowest male, and Western Australia the lowest female death rate. The rates for the two Territories are based on very small numbers, and comparisons with the States would be misleading.

Owing to differences in the age constitution of the six States, the crude rates are not, however, strictly comparable, but for the purpose of calculating the "Index of Mortality" (see page 125) a distribution into five age-groups has been made, and the death rates are shewn for males and females in each State in five-year age groups for the three years 1910-1912, that is, for the census year and for the year immediately preceding and following, on page 120.

3. **Death Rates of Various Countries.**—A comparison with foreign States is, for the same reason, apt to shew the Commonwealth in too favourable a light, but even if an allowance for the different age constitution were made, it would still be found occupying a very enviable position. The following table gives particulars of the crude death rates of various countries for the latest available years :—

DEATH RATES (a) OF VARIOUS COUNTRIES.

Country.	Year.	Crude Death Rate.	Country.	Year.	Crude Death Rate.
Tasmania	1920	9.4	South Africa, Union of		
New Zealand ..	1919	9.5	(Whites)	1918	17.2

1919 ..	13.40	13.21	12.42	12.01	11.10	10.37	17.68	7.79	12.82
1920 ..	10.32	11.19	10.82	10.76	10.14	9.35	14.37	2.76	10.62

(a) Number of deaths per 1,000 of mean population for year.

6. Male and Female Death Rates, 1914 to 1920.—The large death rate in 1919 was due, as already stated, to an exceptional cause. The rates in the period 1914–20, excluding 1919, were remarkably steady, averaging about 12 per 1,000 for males, and 9 per 1,000 for females.

MALE AND FEMALE DEATH RATES (a), COMMONWEALTH, 1914 TO 1920.

Year.	1914.	1915.	1916.	1917.	1918.	1919.	1920.
Male rate ..	11.67	12.08	12.65	11.47	11.70	14.66	11.98
Female rate ..	9.27	9.16	9.44	8.18	8.54	10.98	9.24
Crude total rate ..	10.51	10.66	11.04	9.80	10.09	12.82	10.62

(a) Number of deaths per 1,000 of mean population.

7. **Infantile Death Rate.**—(i) *Deaths and Death Rates of Male and Female Infants, 1914 to 1920.* Steady improvement in the infantile death rate was shewn during the period under review until 1919 and 1920, when the rate suddenly rose to a figure almost as great as in 1914. In the following table, which shews both the total number of deaths of children under one year and the rate per thousand births since 1914, males and females are distinguished. The universal experience that during the first few years of life the excess of male births tends to disappear as a consequence of the higher death rate of male infants, is confirmed by the fact that out of 471,686 male infants born from 1914 to 1920, 34,493 died during their first year of life, while of 446,994 female infants the number who died was only 26,243 :—

NUMBER OF INFANTILE DEATHS AND RATES OF INFANTILE MORTALITY, COMMONWEALTH, 1914 TO 1920.

Year.	Registered Deaths under one year.			Rate of Infantile Mortality (a).		
	Males.	Females.	Total.	Males.	Females.	Total.
1914	5,582	4,279	9,861	79.06	63.51	71.47
1915	5,127	3,980	9,107	74.25	60.47	67.52
1916	5,186	4,057	9,243	76.82	63.47	70.33
1917	4,232	3,034	7,266	63.27	48.10	55.91
1918	4,178	3,186	7,364	64.82	51.99	58.57
1919	4,802	3,662	8,464	76.31	61.69	69.21
1920	5,386	4,045	9,431	76.66	61.15	69.14

(a) Number of deaths under 1 year per 1,000 births registered.

(ii) *Infantile Mortality, 1914 to 1920.* Divided among the States and Territories the rates of infantile mortality during the last seven years were as follows :—

RATES (a) OF INFANTILE MORTALITY, COMMONWEALTH, 1914 TO 1920.

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	North. Terr.	Federal Territory.	Com'- wealth.
1914 ..	69.29	78.27	63.93	75.79	68.12	71.46	51.72	22.73	71.47
1915 ..	67.67	68.78	64.33	67.04	66.54	72.37	65.67	42.55	67.52
1916 ..	67.15	74.63	70.27	73.21	66.22	74.97	40.54	15.87	70.33
1917 ..	56.93	56.82	53.87	53.06	57.09	52.27	43.48	45.45	55.91
1918 ..	59.02	61.75	56.66	51.25	57.13	60.80	28.57	20.41	58.57
1919 ..	71.83	67.90	71.88	64.01	61.12	64.97	66.04	111.11	69.21
1920 ..	69.41	73.70	63.24	67.34	66.02	65.51	190.48	66.67	69.14

(a) Number of deaths under 1 year per 1,000 births registered.

The movement has been irregular. In 1917 a rate of 55.91 was recorded, but since that year it has not been so favourable. The rate for 1920 is only slightly less than that for 1914.

A considerable decrease is shown by every State during 1917, and the rates for that year are the lowest on record in every State and in the Commonwealth as a whole, whilst only a very slight increase was registered in 1918. In 1919 and 1920 increases occurred in every State, especially in New South Wales.

The total number of births, and of deaths of children under one year of age, and the average rate of infantile mortality for the seven years 1914 to 1920 are shown in the following table for each of the fifty-nine districts for which the vital statistics of the Commonwealth have been tabulated during that period. To afford a better idea of the geographical position of the districts, the name of a town situated in a fairly central part of each district has been added. The figures for the Federal Territory and for Lord Howe Island are included for the sake of completeness, but are too small to be used in comparison with others.

INFANTILE MORTALITY FOR THE SEVEN YEARS 1914 TO 1920.

States and Territories.	Districts.	Towns.	Total Births, 1914-20.	Total Deaths of Children under one year, 1914-20.	Average Infantile Mortality per 1,000 Births, 1914-20.

(iii) *Infantile Mortality in Various Countries and Cities.* Compared with European and American countries, the cities and States of the Commonwealth occupy a very favourable position. It may be pointed out also in connexion with the rates hereunder that a high birth rate is often, though not invariably, accompanied by a high infantile death rate. The figures in the subjoined tables relate to the latest years for which returns are available:—

RATE (a) OF INFANTILE MORTALITY IN VARIOUS COUNTRIES.

Country.	Year.	Rate of Infantile Mortality. (a)	Crude Birth Rate. (b)	Country.	Year.	Rate of Infantile Mortality. (a)	Crude Birth Rate. (b)

(a) Number of deaths under 1 year per 1,000 births registered.

8. Deaths in Age-Groups, 1914 to 1920.—A distribution into age-groups has been made of the 379,196 deaths which occurred in the Commonwealth from 1914 to 1920, and the results have been tabulated for each State. It is, however, sufficient here to shew the results for the Commonwealth as a whole, which are as follows:—

DEATHS IN AGE-GROUPS, COMMONWEALTH, 1914 TO 1920.

Ages.	Males.	Females.	Total.	Percentage of Total Males.	Percentage of Total Females.	Percentage of Total.
Under 1 year ..	34,493	26,243	60,736	15.87	16.22	16.02
1 year and under 5 ..	12,365	10,761	23,126	5.69	6.65	6.10
5 years and under 20 ..	11,241	9,314	20,555	5.17	5.76	5.42
20 years and under 40 ..	29,460	25,822	55,282	13.55	15.96	14.58
40 years and under 60 ..	48,492	29,379	77,871	22.31	18.15	20.53

65 years and over ..	65,260	51,213	116,473	30.02	31.65	30.72
Age not stated ..	384	67	451	0.17	0.04	0.12
Total ..	217,386	161,810	379,196	100.00	100.00	100.00

9. Deaths at Single Ages and in Age-Groups, 1920.—The 56,289 deaths which were registered in the Commonwealth in the year 1920 will be found tabulated under single years, and in groups of five years for each State and Territory, in "Bulletin No. 38, Commonwealth Demography, 1920." It has been thought advisable to tabulate the deaths during the first two years of life in greater detail. The first month has, therefore, been shewn in weeks, and the twenty-three months up to the end of the second year in months. This tabulation shews that a great number of children died during the first week, the number gradually diminishing towards the end of the second year. The particulars relating to the Commonwealth are given in the following table:—

DEATHS AT SINGLE AGES AND IN AGE-GROUPS, COMMONWEALTH, 1920.

The tables shew a high death rate for children under five years of age, which rapidly diminishes until, at ages 10 to 14, a rate of 1.66 per 1,000 is shewn, which is the lowest at any age. The rate then gradually rises with increasing age until, at the ages 90 and over, more than one-third die every year.

10. Deaths of Centenarians, 1920.—Particulars as to the thirty-three persons who died in 1920, aged 100 years and upwards, are given in the following table. It must, of course, be understood that while the Registrars-General of the various States take the greatest care to have statements as to abnormally high ages verified as far as possible, no absolute reliance can be placed on the accuracy of the ages shewn, owing to the well-known tendency of very old people to overstate their ages. No attempt has been made by the Commonwealth Bureau of Census and Statistics to verify the truth of the statements made. The fact must not be disregarded in connexion with this question, that while parish registers in the United Kingdom often date very far back, compulsory registration of births dates practically only from 1874, the Act passed in 1836 having left many loop-holes open for those unwilling to register the births of their children.

14. *Index of Mortality.*—The death rates, those for age-groups on page 120 excepted, so far shewn are crude rates, *i.e.*, they simply shew the number of deaths per thousand of mean population, without taking the age constitution of that population into consideration. It is, however, a well-known fact that the death rate and age constitution of a people are intimately related; thus, other conditions being equal, the death rate of a country will be lower if it contains a large percentage of young people (not infants). In order to have a comparison of the mortality of various countries on a uniform basis, so far as age constitution is concerned, the International Statistical Institute in its 1895 session recommended the universal adoption of the population of Sweden in five age-groups, as ascertained at the Census of 1890, as the standard population by which this “Index of Mortality,” as distinguished from the crude death rate,

should be ascertained. The calculation for 1920 is shewn below for each of the States and Territories and for the Commonwealth, the distribution of the mean population of 1920 into age-groups being in accordance with the distribution as found at the Census of 1911 :—

INDEX OF MORTALITY, STATES AND COMMONWEALTH, 1920.

Age-Group.	Mean Population, 1920, distributed according to Results of Census of 1911.	Number of Deaths, 1920.	No. of Deaths per 1,000 of Mean Population, 1920, in each Age-Group.	Age Distribution per 1,000 of Standard Population.	Index of Mortality.

NOTE.—The small number of persons whose ages were not ascertained at the 1911 Census have been proportionately distributed among the various age-groups, and the same plan has been followed in regard to the persons who died in 1920, and whose ages were not stated in the certificates of death.

It will be seen that among the States in 1920 Western Australia had the highest index and Victoria the highest crude rate, while Tasmania had the lowest index and crude rate. The range of the indexes was above that of the crude rates, the latter varying from 9.35 per thousand in Tasmania to 11.19 per thousand in Victoria, a range of 1.84 per thousand, while the index varied from 12.28 per thousand in Tasmania to 15.63 per thousand in Western Australia, a range of 3.35 per thousand.

For purposes of comparison with previous years the index of mortality is shewn in the following table for each of the seven years 1914–1920:—

INDEX OF MORTALITY, STATES AND TERRITORIES, 1914–1920.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Northern Territory.	Federal Territory.	C'wealth.
1914 ..	12.72	14.11	12.70	13.03	12.56	12.11	20.35	5.17	13.18
1915 ..	13.24	13.54	14.30	13.09	12.79	13.04	21.62	7.15	13.47
1916 ..	13.48	14.28	14.37	14.45	14.15	13.43	22.63	3.63	13.99
1917 ..	12.45	12.81	12.64	12.65	12.93	11.78	13.42	6.70	12.63
1918 ..	12.86	13.23	13.94	12.53	13.69	11.70	15.40	2.37	13.07
1919 ..	16.48	15.51	15.97	14.59	15.50	13.29	17.42	8.76	15.75
1920 ..	13.32	13.72	14.36	13.49	15.63	12.28	18.27	3.20	13.65

15. Monthly Variations in Death Rates.—(i) *General Death Rates.* The annual death rates, corresponding to the number of deaths registered in each equalised month, have been calculated for the six years 1907–1912, and a series of diagrams showing the results for each State and the Commonwealth as a whole appears on page 110 of this issue, distinguishing the rates for males, females, and persons. The curves shewing the male and female rates exhibit in each State a fairly parallel course, irregularities

being, however, more strongly marked in the case of the male curve. The minimum rates in New South Wales and Queensland fall within the autumn months, from March to May, while in Victoria, South Australia, Western Australia, and Tasmania they fall in the spring months, October and November. In no case is there, however, a very great difference between the rates in spring and in autumn, the figures for the Commonwealth being 10.19 per thousand in March, and 10.34 per thousand in October. The maximum rates in New South Wales, Victoria, and Tasmania are experienced in August, and in Queensland in September, with the rates for December and January as secondary maxima. In South Australia the maximum rate of 11.33 per thousand falls in January, the rate for August standing next with 10.80 per thousand. In Western Australia the maximum rate is found in May.

(ii) *Infantile Death Rate.* A similar series of diagrams, shewing the monthly variations in the infantile death rates, appears on page 111. With the exception of Western Australia, where the maximum occurs in May, the maxima are found in the summer months in every State. The rates gradually decrease from January to March, shewing in several States a slight increase in April, with a further diminution until July. In July and August the rates rise to some extent, to fall again until October or November. From that time a rapid rise takes place, until the maximum is reached in December or January. Tasmania, where the seasons are rather later than in the continental States, shews two distinct minima in May and November, with a summer maximum in February, and a fairly high rate in September. In Western Australia the rates are moderately high in December and January, and drop until March, to rise rapidly in April and May, when the maximum is reached. From May to September there is a gradual decrease, with a quick rise from the latter month until December.

16. *Causes of Death.*—(i) Information regarding the changes in the classification of causes of death will be found in previous editions of this Year Book (*e.g.*, Year Book No. 6, pages 222 and 223). The statement will suffice, therefore, that the classification adopted by the Commonwealth Bureau of Census and Statistics is that of the International Institute of Statistics, as amended by the Committee of Revision which met in 1909. The detailed classification groups causes of death under 189 different headings in fourteen categories, as follows:—

- | | |
|---|---|
| i. General Diseases. | viii. Diseases of the Skin and Cellular Tissue. |
| ii. Diseases of the Nervous System and Organs of Special Sense. | ix. Diseases of the Organs of Locomotion. |
| iii. Diseases of the Circulatory System. | x. Malformations. |
| iv. Diseases of the Respiratory System. | xi. Infancy. |
| v. Diseases of the Digestive System. | xii. Old Age. |
| vi. Diseases of the Genito-urinary System and Adnexa. | xiii. Violence. |
| vii. Puerperal Condition. | xiv. Ill-defined Diseases. |

(ii) *Compilation of Vital Statistics for 1907 and Subsequent Years in Commonwealth Bureau.* The vital statistics of the Commonwealth from the year 1907 onward have been tabulated according to this classification in the Commonwealth Bureau, and the system is being employed in all the State offices in the preparation of their monthly and quarterly bulletins of vital statistics.

(iii) *Classification of Causes of Death, 1914 to 1920, according to Abridged International Classification.* An abridged classification, which enumerates thirty-eight diseases and groups of diseases according to the revised classification, is in use in many European and American States, while the Commonwealth statistics have been compiled on the detailed classification of 189 headings. A table has been compiled showing the causes of death according to the abridged classification, so that the results may be compared with those of countries which use the abridged index.

The compilations for the years 1914 to 1920 will be found in full in "Bulletins Nos. 32 to 38 of Population and Vital Statistics"; here it will suffice to give the abridged classification under thirty-eight headings for the year 1920.

The classification for the years 1914 to 1920 is shewn for the Commonwealth in the following table, and for purposes of comparison the figures for the year 1920 have been repeated from the preceding table. Male and female deaths for 1914 are shewn on pages 188 and 189 of the ninth issue, for 1915 on pages 198 and 199 of the tenth issue, for 1917 on pages 204 and 205 of the eleventh issue, for 1918 on pages 197 and 198 of the twelfth issue, and for 1919 on pages 188 and 189 of the thirteenth issue of this book.

CAUSES OF DEATH, COMMONWEALTH, 1914 TO 1920.

MALES AND FEMALES.

Cause.	1914.	1915.	1916.	1917.	1918.	1919.	1920.

Total	51,720	52,782	54,197	48,029	50,249	65,930	56,289

17. Certification of Deaths.—Information was obtained in 1920 as to the persons by whom the 56,289 deaths which occurred in the Commonwealth were certified. The result of the enquiry shews that approximately 90.3 per cent. (in 1914, 88.8 per cent.; in 1915, 89.3 per cent.; in 1916, 89.5 per cent.; in 1917, 89.3 per cent.; in 1918, 89.9 per cent.; and in 1919, 91.5 per cent.) were certified by medical practitioners, and 9.4 per cent. (in 1914, 10.7 per cent.; in 1915, 10.2 per cent.; in 1916, 9.9 per cent.; in 1917, 10.3 per cent.; in 1918, 9.8 per cent.; and in 1919, 8.2 per cent.) by coroners after inquests or magisterial enquiries, while in 0.3 per cent. (in 1914, 0.5 per cent.; in 1915, 0.5 per cent.; in 1916, 0.6 per cent.; in 1917, 0.4 per cent.; in 1918, 0.3 per cent.; and in 1919, 0.3 per cent.) of the cases there was either no certificate given

or particulars were not forthcoming. The results are shewn in detail in Bulletin No. 38; a short summary will therefore suffice here:—

CERTIFICATION OF DEATHS, COMMONWEALTH, 1920.

Death Certified by—	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Nor. Ter.	Fed. Ter.	C'wlth.
Medical practitioner	18,912	14,863	7,537	4,557	3,037	1,882	33	5	50,826
Coroner ..	2,008	1,967	277	526	324	147	30	1	5,280
Not certified or not stated ..	14	2	133	..	27	7	183
Total Deaths	20,934	16,832	7,947	5,083	3,388	2,036	63	6	56,289

Of the cases certified by coroners, violent deaths numbered 2,540, senile decay 353, organic heart disease 463, ill-defined causes 358, congenital debility 157, cerebral hæmorrhage and apoplexy 102, pneumonia 92, Bright's disease 84, diarrhoea and enteritis 131, pulmonary tuberculosis 76, diseases of arteries, aneurisms, &c., 40, broncho-pneumonia 94, acute and chronic alcoholism 34, puerperal diseases 51, and infantile convulsions 24; a total of 4,599 out of 5,280.

Of uncertified causes of death, violent deaths numbered 31, congenital debility 16, senile debility 33, ill-defined causes 25, influenza 18, and heart disease 9; a total of 132 out of 183.

18. **Deaths from Special Causes.**—The table on p. 132 furnishes comparisons for the last seven years only, and comparisons will, therefore, generally be restricted to that period.

(i) *Typhoid Fever.* Of the 312 deaths recorded in 1920, 126 occurred in New South Wales, 53 in Victoria, 72 in Queensland, 17 in South Australia, 28 in Western Australia, and 16 in Tasmania. There has been a marked diminution since 1916.

(ii) *Typhus.* No deaths from typhus have been registered from 1914 to 1920.

(iii) *Malaria.* Deaths from malarial diseases are practically confined to the tropical districts of Northern Queensland and Western Australia, and to the Northern Territory, 12 out of 19 deaths registered in 1920 having occurred in Queensland and 3 in Western Australia.

(iv) *Small-pox.* The number of deaths from small-pox in Australia is very small, five deaths only resulting in the seven years under review.

(v) *Measles.* No serious epidemic of measles has occurred for several years; the deaths in 1914 totalling 155. The number increased to 439 in 1915 but in 1919 was only 51. In 1920, 482 deaths were ascribed to measles, of which 171 were in New South Wales, 212 in Victoria, and 54 in Queensland.

(vi) *Scarlet Fever.* The mortality from this source is very light, the average of deaths from 1914 to 1920 being less than 90 per annum.

(vii) *Whooping Cough.* In 1920 the number of deaths was 561, the highest number registered in the period 1914 to 1920. Of these deaths, 293 occurred in New South Wales, 174 in Victoria, 47 in Queensland, 39 in South Australia, 2 in Northern Territory, and 6 in Tasmania.

(viii) *Diphtheria and Croup.* Deaths from this cause reached a figure of 716 in 1914 and 703 in 1915, but increased to 893 in 1916, and fell to 581 in 1919. The number for 1920 was 829, of which 250 were registered in New South Wales, 281 in Victoria, 128 in Queensland, 87 in South Australia, 50 in Western Australia, and 33 in Tasmania. Diphtheria was the cause of death in 805 cases and croup in 24 cases.

(ix) *Influenza.* In 1914, 331 deaths were registered from this cause; in 1915, 389; in 1916, 278; and in 1917, 168. In 1918 there was rather a serious outbreak, the deaths rising to 848. In 1919 Australia experienced the full effect of the world wide epidemic, the number of deaths reaching the unprecedented figure of 11,552, of which almost exactly one-half occurred in New South Wales. The deaths in States were as follows:—Ordinary influenza—New South Wales, 568; Victoria, 345; Queensland, 247;

South Australia, 47; Western Australia, 42; Tasmania, 29; and Northern Territory, 11; total, 1,289. Pneumonic influenza—New South Wales, 5,215; Victoria, 3,110; Queensland, 799; South Australia, 471; Western Australia, 470; Tasmania, 196; Northern Territory, 1; and Federal Territory, 1; total, 10,263.

A special feature of the epidemic was that the deaths occurred principally at the younger and middle ages, and not at the older ages as in ordinary influenza. This is illustrated in the following table:—

DEATHS FROM INFLUENZA, COMMONWEALTH, 1919.

Age Groups.	Ordinary Influenza.		Pneumonic Influenza.	
	Number.	Percentage on Total Deaths.	Number.	Percentage on Total Deaths.
Deaths under 5 years	144	11.17	348	3.39
“ 5-19 “	102	7.91	665	6.48
“ 20-39 “	411	31.89	5,535	53.93
“ 40-59 “	350	27.15	2,889	28.15
“ 60 years and above	282	21.88	826	8.05
Total	1,289	100.00	10,263	100.00

During 1920, 230 deaths were due to ordinary influenza and 218 to pneumonic influenza.

(x) *Asiatic Cholera*. No cases of Asiatic cholera have ever occurred in the Commonwealth.

(xi) *Cholera Nostras*. Isolated cases only of choleric form diarrhoea occurred in each of the seven years. One death from this cause was registered during 1917, and 2 in 1918.

(xii) *Other Epidemic Diseases*. The number of deaths registered under this heading was 176 in 1914, 205 in 1915, 249 in 1916, 144 in 1917, 174 in 1918, 157 in 1919, and 124 in 1920. The list in 1920 includes the following diseases:—Dysentery 65, erysipelas 52, leprosy 3, other epidemic diseases 4. There have been no deaths from plague in the Commonwealth since 1912.

(xiii) *Tuberculosis of the Lungs and Acute Military Tuberculosis*. The deaths in 1920 numbered 3,098, viz., 1,873 males and 1,225 females. The figures for the years 1914 to 1919 were 3,111, 3,064, 3,198, 2,883, 3,035, and 3,365 respectively. Of the deaths in 1920, 1,095 occurred in New South Wales, 963 in Victoria, 343 in Queensland, 321 in South Australia, 256 in Western Australia, 106 in Tasmania, and 14 in the Northern Territory.

(xiiia) *Tuberculosis of the Respiratory System*. Of the various forms of tuberculosis prevalent in the Commonwealth, that which has attracted the most attention and has been the subject of the widest comment is phthisis, or tuberculosis of the lungs. The intimate relation, however, between tuberculosis of the lungs and that of other parts of the respiratory system renders it desirable that all forms of tuberculosis of the respiratory system should be brought under one head for various investigations concerning the age incidence and duration of this disease.

In the matter of the age incidence of death from tuberculosis of the respiratory system, diagrams were given in Year Books 2, 3, and 4, pp. 239, 217, and 206 respectively, shewing the frequency of deaths at successive ages in England and Wales during 1906 (Fig. 1) and in the Commonwealth during 1907 (Fig. 2). These were superseded by a fuller reference based on later results in Year Book No. 5, pp. 230, &c. The results given depended upon intercensal estimates of population, and these having been adjusted to agree with the Census of 3rd April, 1911, some slight amendments of the figures in previous issues were made in Year Book No. 5.

(xiv) *Tuberculosis of the Meninges*. The number of deaths ascribed to this cause has varied very slightly during the last seven years. The greatest number of deaths, viz., 215, occurred in 1916, and the least number, viz., 188, in 1919. In 1920, 214 deaths occurred.

(xv) *Other Forms of Tuberculosis.* The deaths in 1920 include the following forms of tuberculosis:—Abdominal tuberculosis, 127; Pott's disease, 47; white swellings, 26; tuberculosis of other organs, 53; and disseminated tuberculosis, 42.

(xva) *All Forms of Tuberculosis.* A complete tabulation of all the different tubercular diseases from which deaths occurred in 1920 will be found in Bulletin No. 38 of Population and Vital Statistics. Here it will suffice to shew a few of the features of the tabulation mentioned. The total number of deaths due to tubercular diseases was 3,607, viz., 2,159 males and 1,448 females. The following table shews the ages of these 3,607 persons:—

**AGES OF PERSONS WHO DIED FROM TUBERCULAR DISEASES,
COMMONWEALTH, 1920.**

Ages.	Male.	Female.	Total.	Ages.	Male.	Female.	Total.
Under 5 years ..	110	70	180	55 years and under 60	173	62	235
5 years and under 10	46	32	78	60 " " 65	133	49	182
10 " " 15	15	32	35	65 " " 70	53	24	77
15 " " 20	68	102	170	70 " " 75	21	15	36
20 " " 25	148	197	345	75 " " 80	16	4	20
25 " " 30	228	220	448	80 " over ..	10	1	11
30 " " 35	242	180	422	Unspecified ..	4	1	5
35 " " 40	234	160	394				
40 " " 45	221	128	349				
45 " " 50	224	92	316				
50 " " 55	196	76	272	Total Deaths ..	2,159	1,448	3,607

A tabulation has been made of the occupations of males dying from tubercular diseases during 1920. A summary is here given:—

**OCCUPATIONS OF MALES WHO DIED FROM TUBERCULAR DISEASES,
COMMONWEALTH, 1920.**

Occupation.	No. of Deaths.	Occupation.	No. of Deaths.
Professional class	136	Agricultural class	136
Domestic class	78	Pastoral class	38
Mercantile class	350	Working in mines and quarries ..	191
Engaged in transport and communication	182	Other primary producers	12
Manufacturing class	239	Independent means	8
Engaged in building and construction	100	Dependents	231
Other industrial workers	400	Occupation not stated	58
		Total Male Deaths	2,159

The length of residence in the Commonwealth of persons who died from tubercular diseases has been tabulated for the year 1920 for all the Commonwealth States, with the following results:—

**LENGTH OF RESIDENCE IN COMMONWEALTH OF PERSONS WHO DIED FROM
TUBERCULAR DISEASES, 1920.**

Length of Residence in Commonwealth.	Male.	Fem.	Total.	Length of Residence in Commonwealth.	Male.	Fem.	Total.
Born in Commonwealth ..	1,530	1,241	2,771	Resident 10 years & under 15	56	16	72
Resident under 1 year ..	16	10	26	" 15 " " 20	22	10	32
" 1 year	14	8	22	" 20 " over ..	289	84	373
" 2 years	6	3	9	Length of residence not stated	125	24	149
" 3 "	2	2	4				
" 4 "	6	5	11				
" 5 " and under 10	93	45	138	Total Deaths ..	2,159	1,448	3,607

From the preceding table and the table on page 122, it will be seen that, among persons who had lived less than 5 years in Australia, 482 deaths occurred, and of these 72, or 14.9 per cent., were due to tubercular diseases.

In order to shew the prevalence of tuberculosis in the several States, the death rates from tubercular diseases are given in the following table, together with the percentage which deaths from tuberculosis bear to the total number of deaths registered :—

DEATH RATES (a) FROM TUBERCULOSIS AND PERCENTAGE ON TOTAL DEATHS, COMMONWEALTH, 1920.

State.	Death Rates (a) from Tuberculosis.			Percentage on Total Deaths.		
	Males.	Females.	Total.	Males.	Females.	Total.
New South Wales	0.76	0.49	0.63	6.47	5.57	6.09
Victoria	0.87	0.67	0.77	7.12	6.59	6.87
Queensland	0.61	0.40	0.51	4.85	4.45	4.69
South Australia	0.89	0.70	0.79	7.14	7.53	7.34
Western Australia	1.17	0.46	0.84	9.67	5.79	8.26
Tasmania	0.66	0.57	0.62	7.11	6.12	6.63
Northern Territory	3.92	0.94	3.20	27.08	6.67	22.22
Federal Territory
Commonwealth	0.81	0.55	0.68	6.74	5.97	6.41

(a) Number of deaths from tuberculosis per 1,000 of mean population.

The following table, which gives for a number of countries the death rates from pulmonary and military tuberculosis per 1,000 persons living, shews that the Commonwealth occupies a very enviable position when compared with most European countries:—

PULMONARY AND MILIARY TUBERCULOSIS—DEATHS PER 1,000 PERSONS LIVING.

Country.	Year.	Death Rate.	Country.	Year.	Death Rate.
Rumania	1914	0.40	United States (Registration Area) ..	1915	1.28
Denmark	1914	0.44	Prussia	1913	1.37
South Africa, Union of (Whites)	1917	0.44	Spain	1919	1.43
New Zealand	1919	0.53	Switzerland	1918	1.46
Australia	1920	0.58	Jamaica	1915	1.47
Ontario (Canada) ..	1919	0.69	Japan	1916	1.56
Ceylon	1919	0.75	Norway	1917	1.64
Scotland	1919	0.88	Sweden	1915	1.66
Belgium	1912	0.93	France	1911	1.80
England and Wales ..	1919	0.97	Ireland	1919	1.92

(xvi) *Cancer and other Malignant Tumours.* The number of deaths from cancer has increased continuously to 4,511 in 1920. Of the deaths registered in 1920, 2,342 were those of males, viz., 891 in New South Wales, 678 in Victoria, 312 in Queensland, 223 in South Australia, 156 in Western Australia, 78 in Tasmania, 3 in the Northern Territory, and 1 in the Federal Territory; while 2,169 were those of females, viz., 795 in New South Wales, 690 in Victoria, 276 in Queensland,

217 in South Australia, 113 in Western Australia, 76 in Tasmania, and two in the Northern Territory. Bulletin No. 38 contains a complete tabulation of the various types of cancer and of the seat of the disease, of which the following is a summary:—

DEATHS FROM CANCER, COMMONWEALTH, 1920.

Seat of Disease.	Male.	Female.	Total.
Cancer, &c., of the buccal cavity	322	24	346
" " the stomach and liver	947	608	1,555
" " the peritoneum, the intestines, and the rectum ..	319	309	628
" " the female genital organs	448	448
" " the breast	310	310
" " the skin	94	72	166
" " other organs	660	398	1,058
Total Deaths	2,342	2,169	4,511

Of these deaths, 1,012 were described as cancer, 2,344 as carcinoma, 197 as epithelioma, 533 as "malignant disease," 32 as "malignant tumour," 34 as neoplasm, 58 as "rodent ulcer," 285 as sarcoma, and 16 as scirrhus.

The ages of the 4,511 persons who died from cancer in 1920 are shewn in the following table, from which it will be seen that while the ages below 35 are not by any means immune from the disease, the great majority of deaths occurred at ages from 35 upwards, the maximum being found in the age group 60 to 65:—

AGES OF PERSONS WHO DIED FROM CANCER, COMMONWEALTH, 1920.

Ages.	Male.	Female.	Total.	Ages.	Male.	Female.	Total.
Under 15 years ..	25	19	44	55 years and under 60	344	292	636
15 years and under 20	6	8	14	60 " " 65	425	295	720

50 " " 55	244	242	486	Total Deaths ..	2,342	2,169	4,511

A tabulation, of which the following is a summary, has been made of the occupations of males who died from cancer:—

OCCUPATIONS OF MALES WHO DIED FROM CANCER, COMMONWEALTH, 1920.

Occupation.	No. of Deaths.	Occupation.	No. of Deaths.
Professional class	116	Agricultural class	377
Domestic class	64	Pastoral class	101
Mercantile class	303	Working in mines and quarries	113
Engaged in transport and communication	182	Other primary producers	16
Manufacturing class	259	Independent means	45
Engaged in building and construction	133	Dependents	37
Other industrial workers	509	Occupation not stated	87
		Total Male Deaths	2,342

As the following tables shew, the total death rates from cancer are below those for tubercular diseases in Western Australia only. The male death rates from cancer were, in 1920, in excess of those from tuberculosis in all the States except Western Australia, while the female death rates were in excess in all the States. While the death rates from tuberculosis have a general tendency to decrease, the death rates from cancer have, on the contrary, shewn an increase in nearly every recent year. In 1914, while the death rate from tuberculosis decreased from 0.79 to 0.73 per thousand, the rate for cancer remained stationary, the result being that the rate for cancer exceeded that for tuberculosis by 0.02 per thousand. In 1915 the death rate from cancer was 0.03 per thousand; in 1916, 0.06 per thousand; in 1917, 0.13 per thousand; in 1918, 0.14 per thousand; in 1919, 0.09 per thousand, and in 1920, 0.17 per thousand in excess of that of tuberculosis.

**DEATH RATES^(a) FROM CANCER AND PERCENTAGE ON TOTAL DEATHS,
COMMONWEALTH, 1920.**

State.	Death Rates (a) from Cancer.			Percentage on Total Deaths.		
	Males.	Females.	Total.	Males.	Females.	Total.
New South Wales	0.87	0.79	0.83	7.37	8.99	8.05
Victoria	0.91	0.91	0.91	7.48	8.88	8.13

Commonwealth	0.88	0.83	0.85	7.31	8.95	8.01

(a) Number of deaths from Cancer per 1,000 of mean population.

The following table shows the death rate of the Commonwealth in comparison with other countries :—

CANCER—DEATH RATE IN VARIOUS COUNTRIES.

Country.	Year.	Rate.	Country.	Year.	Rate.
Ceylon	1919	0.11	France	1911	0.80
Rumania	1914	0.13	Austria	1912	0.81
Serbia	1911	0.14	Prussia	1913	0.83
Jamaica	1915	0.17	Australia	1920	0.85
Chile	1914	0.36	New Zealand	1919	0.91
Hungary	1912	0.47	Germany	1913	0.91
Quebec (Canada)	1917	0.52	United States (Regis- tration Area)	1915	0.91
South Africa Union (Whites)	1917	0.54	Norway	1917	0.96
Denmark	1914	0.58	England and Wales	1919	0.96
Spain	1919	0.60	Sweden	1915	1.06
Italy	1917	0.64	Netherlands	1915	1.09
Japan	1916	0.69	United Kingdom	1919	1.10
Belgium	1912	0.71	Scotland	1919	1.16
Ontario (Canada)	1919	0.77	Switzerland	1918	1.24
Ireland	1919	0.79			

The fifth issue of this Year Book contains, on pages 230, *et seq.*, a paper dealing, *inter alia*, with the incidence of cancer in the Commonwealth. The paper is not reprinted in the present issue.

(xvii) *Simple Meningitis.* Deaths from this cause increased seriously in 1915 and 1916, since when they have steadily declined. Sporadic cases of cerebro-spinal meningitis, which occurred to the end of 1914, are included in the figures, but from 1915 onward they were tabulated separately, the deaths during 1920 from cerebro-spinal meningitis being 84, and those from all other forms of meningitis, 512. Of the former, 29 occurred in New South Wales, 15 in Victoria, 30 in Queensland, 8 in South Australia, and 2 in Western Australia.

(xviii) *Apoplexy, Hæmorrhage and Softening of the Brain.* The deaths registered under this heading have been remarkably steady during the period under review. The figures for 1920 are made up as follows:—Cerebral hæmorrhage and apoplexy, 1,250 males and 1,164 females; softening of the brain, 48 males and 33 females.

(xix) *Organic Diseases of the Heart.* The number of deaths registered in 1920 was 5,370, viz., 3,077 males and 2,293 females. Of these deaths, New South Wales was responsible for 1,095 males and 777 females; Victoria for 890 males and 747 females; Queensland for 490 males and 306 females; South Australia for 290 males and 264 females; Western Australia for 184 males and 87 females; Tasmania for 124 males and 110 females; and the Northern Territory for 4 males and 2 females. To the figures for 1920 correspond the following death rates and percentages to total deaths:—

**DEATH RATES(a) FROM ORGANIC HEART DISEASE AND PERCENTAGE ON
TOTAL DEATHS, COMMONWEALTH, 1920.**

State.	Death Rates (a) from Organic Heart Disease.			Percentage on Total Deaths.		
	Males.	Females.	Total.	Males.	Females.	Total.
New South Wales	1.07	0.77	0.92	9.06	8.78	8.94
Victoria ..	1.19	0.98	1.09	9.82	9.61	9.72
Queensland ..	1.28	0.87	1.08	10.16	9.80	10.02
South Australia	1.28	1.07	1.17	10.31	11.64	10.90
Western Australia	1.03	0.56	0.81	8.51	7.09	7.97
Tasmania ..	1.10	1.05	1.08	11.75	11.21	11.49
Northern Territory	1.21	1.88	1.37	8.33	13.33	9.52
Federal Territory
Commonwealth	1.15	0.87	1.01	9.60	9.46	9.54

(a) Number of deaths from Organic Heart Disease per 1,000 of mean population.

(xx) *Acute Bronchitis.* The classification of causes of death requires deaths of persons under five years of age, which are merely ascribed to "bronchitis," to be classified under "acute bronchitis," and similarly certified deaths of older persons under "chronic bronchitis." This rule has been followed throughout in compiling the tables for 1914-1920, with the result that acute bronchitis is credited with 389 deaths in 1914, 489 in 1915, 512 in 1916, 321 in 1917, 399 in 1918, 420 in 1919, and 398 deaths in 1920, viz., 211 males and 187 females.

(xxi) *Chronic Bronchitis*. The adjustment mentioned in the preceding paragraph gives a total of 962 deaths in 1920.

(xxii) *Pneumonia*. The 1920 figures were 1,250 males and 849 females, a total of 2,099 deaths.

(xxiii) *Other Diseases of the Respiratory System*. This head was established in 1910, the figures previously being included in "Other Diseases" (paragraph xxxvii). Deaths in 1914, 1,866; in 1915, 2,212; in 1916, 2,243; in 1917, 1,941; in 1918, 2,199; in 1919, 2,413; and in 1920, 2,527. The total for 1920 is made up as follows, viz.:—Diseases of the nasal fossae, 2 deaths; diseases of the larynx, 101 deaths; diseases of the thyroid body, 38 deaths; broncho-pneumonia, 1,366 deaths; pleurisy, 176 deaths; pulmonary congestion and apoplexy, 253 deaths; gangrene of the lung, 28 deaths; asthma, 199 deaths; pulmonary emphysema, 26 deaths; fibroid phthisis (miners' complaint), 256 deaths; other diseases of the respiratory system (tuberculosis excepted), 87 deaths.

(xxiv) *Diseases of the Stomach (Cancer excepted)*. In 1920 this heading includes ulcer of the stomach, 70 males, 62 females; and other diseases of the stomach (cancer excepted), 161 males, 150 females; a total of 443 deaths for this class.

(xxv) *Diarrhoea and Enteritis (Children under two years only)*. The number of deaths due to these causes is always a large one, varying from 1,719 in 1917 to a maximum of 3,506 in 1914. The total for 1920 was 3,067, distributed amongst the six States as follows:—New South Wales, 689 males, 564 females, total 1,253; Victoria, 379 males, 307 females, total 686; Queensland, 300 males, 197 females, total 497; South Australia, 166 males, 128 females, total 294; Western Australia, 138 males, 112 females, total 250; and Tasmania, 48 males, 39 females, total 87.

The following are the death rates and percentages on total deaths due to infantile diarrhoea and enteritis in the States and Territories for the year 1920:—

DEATH RATES (a) FROM INFANTILE DIARRHŒA AND ENTERITIS, AND PERCENTAGE ON TOTAL DEATHS, COMMONWEALTH, 1920.

State.	Death Rates (a) from Infantile Diarrhoea and Enteritis.			Percentage on Total Deaths.		
	Males.	Females.	Total.	Males.	Females.	Total.
New South Wales	0.67	0.56	0.62	5.70	6.38	5.99
Victoria ..	0.51	0.40	0.46	4.18	3.95	4.08
Queensland ..	0.78	0.56	0.68	6.22	6.31	6.25
South Australia	0.73	0.52	0.62	5.90	5.64	5.78

Tasmania ..	0.42	0.37	0.40	4.55	3.98	4.27
Federal Territory
Commonwealth	0.64	0.51	0.58	5.37	5.56	5.45

(a) Number of deaths from these diseases per 1,000 of mean population.

As a large number of these deaths is directly due to improper feeding, it would be interesting to know the percentage of infants who were bottle-fed, but, unfortunately, no provision exists for the registration of this information. The number of deaths was larger than usual in 1908, particularly in Victoria, and to a lesser degree in South Australia and in Tasmania, owing to the phenomenal heat experienced in the early part of that year. In 1913 all the States, with the exception of New South Wales and South Australia, experienced lower rates than in 1912, and in 1914 the rate fell in New South Wales and Western Australia, while it rose in Victoria, South Australia and Tasmania, and remained stationary in Queensland. The rates for 1915 were considerably lower than those for 1914 in every State with the exception of Queensland and South Australia, while in 1916 Victoria, South Australia and Tasmania had higher rates than in 1915. In 1917, every State experienced a large fall, the rates in Victoria, South Australia and Tasmania being less than half those of 1916. In 1918 the deaths from this cause were hardly more numerous than those for 1917, but 1919 and 1920 shewed a large advance. The age distribution of children dying from diarrhoea and enteritis during their first year of life will be found on page 149.

(xxvi) *Appendicitis and Typhlitis*. Prior to 1910, deaths from these causes were included in *Other Diseases*, (paragraph xxxvii.). Deaths numbered 374 in 1914, 356 in 1915, 321 in 1916, 321 in 1917, 371 in 1918, 352 in 1919, and 382 in 1920, viz., 251 males and 131 females.

(xxvii) *Hernia, Intestinal Obstructions*. The number of deaths has not varied greatly from year to year, the number registered in 1920 being 541, viz., 311 males and 230 females.

(xxviii) *Cirrhosis of the Liver*. There is little variation in the number of deaths from 1914 to 1920. 340 deaths were registered in 1920, viz., 234 males and 106 females.

(xxix) *Nephritis and Bright's Disease*. The number of deaths attributable to these diseases from year to year is a very large one. In 1915, there were 2,274, 1,413 males and 861 females; in 1916, 2,329, 1,416 males and 913 females; in 1917, 2,203, 1,343 males and 860 females; in 1918, 2,144; in 1919, 2,221, and in 1920, 2,286, viz., 1,355 males and 931 females. Of the deaths registered in 1920, those of 89 males and 93 females were ascribed to acute nephritis, and those of 1,266 males and 838 females to Bright's Disease. New South Wales was responsible for 788 deaths; Victoria for 714; Queensland for 403; South Australia for 192; Western Australia for 116; and Tasmania for 73; making the total of 2,286.

(xxx) *Non-cancerous Tumours and other Diseases of the Female Genital Organs*. Deaths in 1914 numbered 138; in 1915, 139; in 1916, 153; in 1917, 148; in 1918, 159; in 1919, 133; and in 1920, 154. Included in the 154 deaths registered in 1920 were the following:—Non-puerperal uterine hæmorrhage, 2; non-cancerous uterine tumours, 36; other diseases of the uterus, 34; cysts and ovarian tumours, 28; salpingitis and other diseases of the female genital organs, 54.

(xxxi) *Puerperal Septicæmia (Puerperal Fever, Puerperal Peritonitis, Puerperal Phlebitis)*. The number of deaths is fairly constant, varying from a maximum of 282 in 1916 to a minimum of 166 in 1919. In 1920, there were 250 deaths.

(xxxii) *Other Puerperal Accidents of Pregnancy and Confinement.* The deaths in 1914 numbered 419; in 1915, 394; in 1916, 411; in 1917, 482; in 1918, 409; in 1919, 404; and in 1920, 433. Included in the 433 deaths registered in 1920 were the following:—Accidents of pregnancy, 100; puerperal hæmorrhage, 96; other accidents of childbirth, 64; puerperal albuminuria and convulsions, 117; puerperal phlegmasia alba dolens, embolus, sudden death, 49; and death following childbirth 7.

(xxxiii) *All Puerperal Causes.* The 683 deaths registered in 1920 under the two preceding headings will be found tabulated in "Bulletin No. 38; Commonwealth Demography," under various aspects. It will suffice to repeat here that the 683 mothers who died from puerperal causes included 624 married women and 59 single.

The ages of the mothers who died varied from 14 to 47 years, and are shewn in the following table:—

AGES OF MOTHERS WHO DIED FROM PUERPERAL CAUSES, COMMONWEALTH,
1920.

Age at Death.	Married Women.	Single Women.	Total.	Age at Death.	Married Women.	Single Women.	Total.

31 " ..	30	1	31				
32 " ..	45	3	48				
33 " ..	38	..	38	Total deaths	624	59	683

The total number of children left by the married mothers shewn in the above table was 1,782, an average of 2.9 children per mother.

Forty-two of the mothers who died had been married less than one year, 100 between one and two years, 38 between two and three years, the duration of marriage ranging up to 29 years, apart from 16 cases in which the date of marriage could not be stated. This tabulation will be found in detail, distinguishing the ages at marriage, in "Bulletin No. 38; Commonwealth Demography," as will a further tabulation shewing in combination the duration of marriage and previous issue.

(xxxiii) *Congenital Debility and Malformations.* The total deaths registered under these heads in 1920 were 4,046, of whom 3,938 were children under one year of age. The figures include :—Malformations, 349 males, 306 females, total 655; premature birth, 1,289 males, 887 females, total 2,176; and congenital debility, icterus, and sclerema of children under one year of age, 716 males and 499 females, total 1,215; or a grand total of 4,046. Of these deaths, 1,566 were registered in New South Wales, viz., 924 males and 642 females; 1,186 in Victoria, viz., 692 males and 494 females; 534 in Queensland, viz., 308 males and 226 females; 374 in South Australia, viz., 211 males and 163 females; 219 in Western Australia, viz., 137 males and 82 females; 160 in Tasmania, viz., 78 males and 82 females; 3 males and 3 females in the Northern Territory, and 1 male in Federal Territory.

(xxxiv) *Senile Debility.* The deaths ascribed to "old age" form a large group, and are in excess of those due to infantile debility. In 1920, 4,636 deaths were attributed to this cause, and were distributed among the States as follows: 1,668 occurred in New South Wales, viz., 963 males and 705 females; 1,522 in Victoria, viz., 715 males and 807 females; 528 in Queensland, viz., 333 males and 195 females; 470 in South Australia, viz., 226 males and 244 females; 263 in Western Australia, viz., 183 males and 80 females; 184 in Tasmania, viz., 84 males and 100 females; and 1 male in the Northern Territory.

Of the males whose deaths were described as due to senility, seven were aged between 55 and 59, and the deaths ranged up to twelve over the age of 100. Of the females, three were aged between 55 and 60, and 12 were of the age of 100 or over.

(xxxv) *Violence.* A very large number of deaths is due every year to external violence, and, as may be expected from the fact that their occupations expose them much more to accidents, males largely predominate. The figures quoted are exclusive of suicides, which have been treated as a separate group. Deaths ascribed to violence numbered in 1914, 3,121, viz., 2,458 males and 663 females; in 1915, 2,851, viz., 2,251 males and 600 females; in 1916, 2,712, viz., 2,134 males and 578 females; in 1917, 2,656, viz., 2,069 males and 587 females; in 1918, 2,641, viz., 2,039 males and 602 females; in 1919, 2,799, viz., 2,161 males and 638 females; and in 1920, 2,791, viz., 2,159 males and 632 females. Of the deaths registered in 1920, those of 787 males and 237 females occurred in New South Wales; those of 552 males and 164 females in Victoria; those of 378 males and 92 females in Queensland; those of 185 males and 64 females in South Australia; those of 186 males and 51 females in Western Australia; those of 63 males and 24 females in Tasmania; those of 7 males in the Northern Territory; and that of 1 male in the Federal Territory.

The following table shews the various kinds of violent deaths which occurred in 1920, distinguishing males and females :—

DEATHS FROM EXTERNAL VIOLENCE, COMMONWEALTH, 1920.

Cause of Death.	Males.	Females.	Total.
Poisoning by food	21	18	39
Venomous bites and stings	18	5	23
Other acute poisonings	34	17	51
Conflagration	3	3	6
Burns (conflagration excepted)	122	146	268
Absorption of deleterious gases (conflagration excepted)	39	19	58
Accidental drowning	418	82	500
Traumatism by firearms	120	15	135
Traumatism by cutting or piercing instruments	1	..	1
Traumatism by fall	267	54	321
Traumatism in mines or quarries	65	..	65

DEATHS FROM EXTERNAL VIOLENCE, COMMONWEALTH, 1920—*continued*.

Cause of Death.	Males.	Females.	Total.
Traumatism by machines	19	..	19
Traumatism by other crushing (vehicles, railways, &c.)	571	107	678
Injuries by animals	26	1	27
Starvation, thirst, fatigue	40	6	46
Effects of heat	48	34	82
Lightning	5	..	5
Electricity (lightning excepted)	12	2	14
Homicide by firearms	21	12	33
Homicide by cutting or piercing instruments	8	6	14
Homicide by other means	42	24	66
Fractures (cause not specified)	113	55	168
Other external violence	146	26	172
Total Deaths	2,159	632	2,791

In every kind of violent death there was, therefore, an excess of males, with the exception of burning accidents.

(xxxvi) *Suicide*. It may be said that suicides have remained fairly stationary during recent years, the number in 1914 having been 643, viz., 534 males and 109 females; in 1915, 658, viz., 536 males and 122 females; in 1916, 577, viz., 466 males and 111 females; in 1917, 502, viz., 408 males and 94 females; in 1918, 498, viz., 408 males and 90 females; in 1919, 546, viz., 440 males and 106 females; and in 1920, 636, viz., 516 males and 120 females. Of the suicides in 1920, those of 202 males and 53 females occurred in New South Wales; those of 116 males and 26 females in Victoria; those of 113 males and 25 females in Queensland; those of 25 males and 4 females in South Australia; those of 41 males and 6 females in Western Australia; those of 15 males and 5 females in Tasmania; and those of 4 males and 1 female in the Northern Territory.

The modes adopted by persons who committed suicide in the years 1914 to 1920 were as follows :—

MALE AND FEMALE SUICIDES (MODES ADOPTED), COMMONWEALTH, 1914 TO 1920.

Mode of Death	Males.		Females.		Total.	
	Total of 6 years 1914-19.	1920.	Total of 6 years 1914-19.	1920.	Total of 6 years 1914-19.	1920.
Poisoning	653	93	376	55	1,029	148
Asphyxia	11	4	9	..	20	4
Hanging or Strangulation	470	64	110	25	580	89

The following table shews the occupations of the 516 males who committed suicide :—

**OCCUPATIONS OF MALE PERSONS WHO COMMITTED SUICIDE,
COMMONWEALTH, 1920.**

Occupation.	Deaths.	Occupation.	Deaths.
Professional class	35	Pastoral class	30
Domestic class	22	Working in mines and quarries ..	14
Mercantile class	85	Other primary producers ..	7
Engaged in transport and communication	34	Independent means	5
Manufacturing class	51	Dependents	1
Engaged in building and construction	20	Occupation not stated	27
Indefinite industrial workers ..	131		
Agricultural class	54	Total Deaths	516

It has been said that suicide has become more frequent during recent years, but an examination of the figures from the year 1871 onwards shews that the assertion needs qualification. The absolute figures have certainly increased, but proportionately to the population the figures for 1906-10 were practically the same as those for 1886-90 and 1891-95. The figures for the five years 1911-15, shew, however, a regrettable increase, not only absolutely, but also in proportion to the population. The last five years shew lower figures and percentages than the average of 1911-15, and in 1918 particularly the figures in proportion to population decreased almost to the level of the period 1871-85. No particulars are available for Western Australia prior to 1886, and from 1886 to 1895 the sexes are not distinguished. The figures for the first five periods are, therefore, exclusive of Western Australia :—

SUICIDES, COMMONWEALTH, 1871-75 TO 1920.

Period.	Number of Suicides.			Suicides per One Million.			Suicides of Females to 100 Suicides of Males. Based on—	
	Males.	Females.	Total.	Males.	Females.	Total.	Absolute Figures.	Rates.

(a) 1705 inclusive of Western Australian figures. (b) 1984 inclusive of Western Australian figures. (c) 116.49 inclusive of Western Australian figures. (d) 119.11 inclusive of Western Australian figures.

In the fifth issue of this Year Book (pp. 240, *et seq.*), the result of a series of investigations into the periodicity of suicide was published. The paper was partly reprinted in the following year (pp. 241, *et seq.*), but is not repeated in the present issue.

(xxxvii.) *Other Diseases.* The number of causes included under this heading is a very large one, amounting to no less than 79 of the items shown in the detailed classification, and deaths were recorded under every one of these with the exception of the following:—Glanders, rabies, pellagra, occupational poisonings other than lead poisoning, intestinal parasites, and amputations. The total number of deaths under "other diseases" in 1914 was 8,670, viz., 5,081 males and 3,589 females; in 1915, 9,090, viz., 5,259 males and 3,831 females; in 1916, 9,433, viz., 5,489 males and 3,944 females; in 1917, 8,871, viz., 5,147 males and 3,724 females; in 1918, 9,226, viz., 5,290 males and 3,936 females; and in 1919, 9,390, viz., 5,316 males and 4,070 females; and in 1920, 10,048, viz., 5,740 males and 4,308 females. In accordance with the revised edition of the classification, the following changes were made in this heading during 1910: beri-beri is now included under this heading instead of under (xii), "Other Epidemic Diseases." Other diseases of the respiratory system are now shown under a new head (xxiii), and appendicitis and typhlitis under head (xxvi). Some of the diseases included here account for very considerable numbers of deaths. Particulars of the deaths included in 1920 are shewn in the following table:—

CAUSES OF DEATHS INCLUDED UNDER "OTHER DISEASES," COMMONWEALTH, 1920.

Causes.	M.	F.	Total.	Causes.	M.	F.	Total.
Purulent Infection and Septicæmia	72	70	142	Diseases of the Lymphatic System	14	10	24

Embolism and Thrombosis ..	161	202	363				
Diseases of the Veins (Varices, Varicose Ulcers, Hemorrhoids)	6	18	24				

(xxxviii) *Unspecified or Ill-defined Diseases.* The number of cases which has to be included here is a considerable one from year to year, comprising 644 in 1914, 717 in 1915, 633 in 1916, 667 in 1917, 664 in 1918, 707 in 1919, and 805 in 1920. The detailed classification distinguishes these ill-defined diseases under three headings:—Ill-defined organic diseases, including such definitions as dropsy, *anasarca*, ascites, general oedema, &c. sudden death, including syncope; and unspecified or ill-defined causes, of which the following are specimens:—*Asthenia*, coma, dention, exhaustion, heart failure, &c. In 1920 the number of cases of death which would have to be classed under the first of these categories was 27; those belonging to the second, 45; and those belonging to the third, 733. It is, of course, true that there must always occur some cases where the disease is not well characterised, or where sufficient information is not procurable to allow of a clear definition being given in the certificate of death, but in the majority of cases included under this heading a more complete diagnosis and consequently a more satisfactory certificate would no doubt have been possible.

In the fifth issue of this Year Book, pp. 234, *et seq.*, some observations were published dealing with the incidence of scarlet fever, measles, whooping cough, diphtheria and croup, typhoid, diarrhoea, enteritis, and dysentery.

19. Causes of Death in Classes.—The figures presented in the preceding paragraphs relate to certain definite causes of death. It is almost generally acknowledged that figures of this kind are of greater value in medical statistics than is a classification under general headings. The classification under fourteen general headings adopted by the compilers of The International Nomenclature is, however, shewn in the following table, together with the death rates and percentages on total deaths pertaining to those classes:—

DEATHS, DEATH RATES (*a*), AND PERCENTAGES ON TOTAL DEATHS IN CLASSES, COMMONWEALTH, 1920.

Class.	Total Deaths.			Death Rates. (<i>a</i>)			Percentage on Total Deaths.		
	M.	F.	Total.	M.	F.	Total.	M.	F.	Total.

Total	32,053	24,236	56,289	11.98	9.24	10.62	100.00	100.00	100.00

(*a*) Number of deaths per 1,000 of mean population.

20. Deaths of Children under one Year.—"Bulletin No. 38; Commonwealth Demography," contains tables shewing for twenty causes the age at death of children dying during the first year of life. In the Bulletin mentioned, the particulars

are published for males and females separately for the States, Territories and Commonwealth, but the totals for the Commonwealth only are here shewn for both sexes combined:—

DEATHS OF CHILDREN UNDER ONE YEAR, COMMONWEALTH, 1920.

Total under 1 year ..		423	198	2,304	108	547	2,176	1,215	674	15	762	9,431

It will be seen that the maximum number of deaths from convulsions, pneumonia, malformations, acute bronchitis, premature birth, congenital debility, icterus and sclerema, other diseases peculiar to early infancy, and lack of care, occurred during the first month of life, while broncho-pneumonia was most fatal during the second month. Diarrhoea

and enteritis carried off more children in the fourth and fifth months than in any other, the numbers gradually decreasing toward the end of the year. Whooping cough reached its maximum during the second and third months of life.

21. Ages at Death of Married Males and Females, and Issue.—“ Bulletin No. 38 : Commonwealth Demography ” contains a number of tables for the Commonwealth, shewing the age at marriage, age at death, duration of life after marriage, birthplaces, and occupations, in combination with the issue of married persons who died in 1920. A short summary of the tables mentioned is given hereunder. Deaths of married males in 1920 numbered 15,240, and of married females, 14,188. The tabulations mentioned in the sequel deal, however, with only 14,815 males and 13,886 females, the information in the remaining 727 cases being too incomplete to be utilised. The total number of children in the families of the 14,815 males was 75,119; and of the 13,886 females, 71,799. The average number of children is shewn for various age-groups in the following table :—

AGES AT DEATH OF MARRIED MALES AND FEMALES, AND AVERAGE ISSUE, COMMONWEALTH, 1920.

50 „ 54 „ ..	4.02	4.22	Age not stated ..	6.47	3.64
55 „ 59 „ ..	4.32	4.82			
60 „ 64 „ ..	5.11	5.60			
65 „ 69 „ ..	5.67	6.16	All ages ..	5.07	5.17

The figures shewn in the preceding table include the issue both living and dead; and the proportion between them, taking the issue of deceased males and females together, was about as 1,000 to 301. The totals are shewn in the following table :—

ISSUE OF MARRIED MALES AND FEMALES, COMMONWEALTH, 1920.

Issue of Married Males.	Males.	Females.	Total.	Issue of Married Females.	Males.	Females.	Total.
Living ..	29,655	29,492	59,147	Living ..	26,817	26,934	53,751
Dead ..	9,062	6,910	15,972	Dead ..	9,988	8,060	18,048
Total ..	38,717	36,402	75,119	Total ..	36,805	34,994	71,799

These figures shew a masculinity in the births of 2.81, which agrees fairly well with the experience of the birth statistics.

22. **Ages at Marriage of Males and Females, and Issue.**—While the table giving the average families of married males and females naturally shews an increase in the averages with advancing ages at death, the following table, which gives the average families of males and females according to the age at marriage of the deceased parents, shews a corresponding decrease in the averages as the age at marriage advances :—

**AGES AT MARRIAGE OF MALES AND FEMALES, AND AVERAGE ISSUE,
COMMONWEALTH, 1920.**

Age at Marriage.	Average Family of Males.	Average Family of Females.
Under 20 years	6.61	7.07
20 to 24 "	6.08	5.58
25 " 29 "	5.41	4.26
30 " 34 "	4.40	2.81
35 " 39 "	3.71	1.60
40 " 44 "	2.82	0.67
45 " 49 "	2.02	0.15
50 " 54 "	1.52	..
55 " 59 "	1.57	..
60 " 64 "	0.52	..
65 years and upwards	0.54	..
Age not stated	5.16	5.46
All ages	5.07	5.17

It will be seen that of women who were married at ages from 40 to 44 years, one in every three gave birth to a child.

23. **Duration of Life after Marriage of Males and Females.**—The duration of life after marriage has been tabulated for males and females both in combination with the age at marriage, and with the total and average issue. The tables shewing the result do not, however, lend themselves to condensation, and are, therefore, omitted here. They will be found in "Bulletin No. 38 of Commonwealth Demography," pages 214 to 219.

24. **Birthplaces of Married Males and Females, and Issue.**—The following table shews the birthplaces of married males and females whose deaths were registered in 1920, together with their average issue. No generalisations can, of course, be made in those cases where the number of deaths is small, and where the average family had to be worked out on small figures. But where the figures are comparatively large, as in the case of natives of the Commonwealth, differences occur between the averages of the individual States which appear inexplicable on any other ground than that of inefficient registration in some of the States. It will be noted that the differences occur both in the male and female averages. Although the figures apply to the Commonwealth as a whole, it must be borne in mind that the vast majority of deaths of natives of any one State are registered in that particular State.

BIRTHPLACES AT MARRIAGE OF MALES AND FEMALES, AND AVERAGE ISSUE, COMMONWEALTH, 1920.

25. Occupations of Married Males, and Issue.—A final tabulation shows the average issue in combination with the occupation of deceased males. When these figures are available for a number of years they will afford some clue to the much debated question as to the decrease in the birth rate among various classes of the population.

OCCUPATIONS OF MARRIED MALES, AND AVERAGE ISSUE, COMMONWEALTH, 1920.

In the fifth issue of this Year Book (pp. 227 to 229), a series of observations was published dealing with the Commonwealth Rates of Infantile Mortality. These observations are not reprinted in the present issue.

§ 4. Legislation relating to Registration of Births, Deaths, and Marriages, and Legitimation of Children.

A review of the legislation relative to the above subject appeared in the thirteenth issue of this Year Book, pages 212-255.

§ 5. Graphical Representation of Vital Statistics.

1. **General.**—The progressive fluctuations of the numbers representing the total births and marriages are important indexes of the economic conditions and social ideals of a community. For this reason graphs have been prepared (see pages 105 and 106), shewing these fluctuations from 1860 to 1920, both for the States and the Commonwealth. The facts are very significant from the national point of view, and call for serious consideration. To appreciate the situation properly, it should be remembered that, normally, the increase of births and also of marriages will be similar to the increase of population. Although the marriage curve shews a falling off in marriages after 1891 (see page 106), it shews a recovery in 1894, and, with the exception of a small fall for 1903, it continually advanced until 1915. In 1916, 1917, and 1918 a heavy falling off was recorded, unquestionably owing to the European War. There was a rapid recovery in 1919 and 1920, the figures for the latter year being the highest ever recorded. The same characteristic is not seen in the curve of births, which, from 1904 onwards, rose continually to 1914, when there was a decline to 1919.

ACTUAL BIRTHS, DEATHS, AND MARRIAGES

EXPERIENCED IN THE COMMONWEALTH DURING THE YEARS 1890 TO 1920, COMPARED WITH THE NUMBER THAT WOULD HAVE OCCURRED IF THE RATES OF 1890 HAD REMAINED IN OPERATION.

Year.	BIRTHS.		DEATHS.		MARRIAGES.	
	Actual.	Number of Births that would have been experienced if the 1890 birth rate had been in operation.	Actual.	Number of Deaths that would have been experienced if the 1890 death rate had been in operation.	Actual.	Number of Marriages that would have been experienced if the 1890 marriage rate had been in operation.
1890 ..	108,683		44,449		23,725	
1891 ..	110,187	111,802	47,430	45,737	23,862	24,419

1920 ..	136,406	185,337	56,289	75,820	51,552	40,480

The foregoing table shows the number of births, marriages, and deaths which would have been experienced had the rate for 1890 continued, and reveals the significance of the facts disclosed by the curves. It may be remarked that the death rate has greatly improved, and among other countries Australia stands in a very favourable position in this respect. At the same time the decline in the marriage rate, overtaken once more in 1907, and the still more serious decline in the birth rate, in a country but sparsely populated, have an obvious and most important bearing on the national future, and on the extent to which it is desirable to promote immigration.

2. Graphs of Annual Births, Commonwealth and States (page 105).—A striking feature of the graphs of births is the practically continuous increase in the number of births exhibited in the graph for the Commonwealth from 1860 to 1891, and the marked variations of subsequent years. As the curve clearly shews, a turning point in the number of births occurred in 1891, whilst, as regards the separate States, New South Wales and Tasmania date their decline in number from 1893, Victoria from 1891, and Queensland from 1890. In South Australia the corresponding decline took place as early as 1885, while in Western Australia the increase in number of births has been practically continuous to 1913.

It is of special interest to note the decline in births associated with the commercial crisis of 1891-3, also that occurring in 1903, an accompaniment of the severe drought of that period.

In the case of New South Wales the graph crosses that of Victoria in 1879, *i.e.*, the births for that year were sensibly identical in the two States. A fairly continuous increase was experienced in the former State from 1860 to 1893, the only marked fluctuation being a sudden decline in 1889 and an equally rapid recovery in 1890. From 1893 to 1898 a somewhat rapid decline again took place, succeeded by a rise, the continuity of which was broken only by a sharp decline in 1903 and recovery in 1904. From 1904 to 1914 there was a gradual rise, followed by a decline which lasted till 1919. The number of births registered in 1920 in New South Wales was the highest on record.

In the case of Victoria the graph shews the increase between 1860 and 1880 to have been comparatively slight, the curve being a gradual rise, with fluctuations more or less marked to 1873, and a subsequent decline. From 1880 to 1891 the increase in the number of births is seen to be very rapid and practically continuous, while from 1891 to 1898 an equally sharp and continuous decline was experienced. A further rise and fall took place between 1898 and 1903, succeeded by a continuous rise from the last-mentioned year to 1907, and a slight fall in 1908, followed by a recovery in 1909. A slight fall in 1910 was followed by a continuous rise to 1914, since which year a continuous decline till 1919 was experienced. There was a substantial increase in the number of registrations during 1920.

Starting in 1860 with a lower number of births than any State except Western Australia, the Queensland graph shews that the births increased somewhat rapidly until 1867. The equality in the number of births in Queensland and Tasmania in 1864 is shewn by the Queensland curve crossing the Tasmanian curve at the line for that year. From 1867 to 1882 a continuous though somewhat less rapid increase was experienced, followed by a very rapid rise to 1890, in which year Queensland's maximum number of births prior to 1909 was recorded. The South Australian graph is crossed by that of Queensland at the year 1885. From 1890 onwards to 1908 the number of births fluctuated somewhat, but, on the whole, retained a practically stationary position at a height rather less than that of 1890. The most serious variation was a sudden fall in 1903, the drought year, and rapid recovery in 1904, with a further fall in 1905, and a continuous rise from 1906 to 1915. In 1916 there was a sudden fall, followed by a rapid rise in 1917, with another fall during 1918 and 1919. The number registered during 1920 has not been exceeded.

The South Australian graph shews a slow but practically continuous rise from 1860 to 1885. This rise is followed by a slow but fluctuating decline to 1903, and a slight recovery to 1914. In 1915, 1917 and 1919 there were declines and in 1916, 1918 and 1920 there were upward movements.

The Western Australian curve indicates that an increase, which was practically continuous but very slow, took place from 1860 to 1884, and that a somewhat quicker rate of increase, experienced from 1884 to 1896, was succeeded by a still more rapid and very satisfactory rate of increase from 1896 to 1906. A slight fall was apparent to 1910, followed by a rapid rise to 1913. From 1913 to 1919 there was a continuous decline, but this was followed by a recovery in 1920.

The Tasmanian curve may be regarded as made up of five portions, of which the first, from 1860 to 1877, represents a period of very slight variation, with, on the whole, an increase; the second, from 1877 to 1884, a period of continuous and moderately rapid increase; the third, from 1884 to 1893, a period of rapid increase; the fourth, from 1893 to 1898, a period of continuous but slow decrease; and the fifth, from 1898 to 1914, a period of steady recovery. The years 1915 to 1918 were years of decline, but 1919 and 1920 were characterised by increase.

It will be seen that the years in which the highest points were reached by the several curves are as follows:—

State ..	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	C'wealth.
Year ..	1920	1891	1920	1914	1913	1914	1914

3. **Graphs of Annual Marriages, Commonwealth and States** (page 106).—The Commonwealth marriage graph from 1860 to 1885 reveals a moderate but somewhat fluctuating increase in the annual number of marriages between 1860 and 1871, a more rapid increase between 1871 and 1879, and a still more rapid increase between 1879 and 1885. From 1885 to 1891 the numbers continued to increase, but with marked fluctuations in magnitude. The financial crisis associated with the period subsequent to the latter year was accompanied by a strongly-marked decline in the number of marriages, which reached its lowest point in 1894. From that year onwards a fairly rapid recovery was effected, the record for 1891 being exceeded by that of 1897. This progress was maintained until 1902, when the severe drought of that and the succeeding year was collateral with a rapid fall in the number of marriages. An equally rapid recovery, however, has since taken place, and the number of marriages in the Commonwealth during 1915 was greater than in any preceding year. In 1916, 1917, and 1918, as already mentioned, there was a heavy falling off. In 1919 and 1920 a rapid recovery took place, with the result that the number recorded during the latter year was the highest on record.

4. **Graphs of Annual Deaths, Commonwealth and States** (page 107).—The curves shewing the progression of the annual number of deaths indicate clearly that the periods for which exceptionally large numbers of deaths occurred were:—(a) 1866-7, (b) 1875-6, (c) 1884-5, (d) 1889-1891, (e) 1893, (f) 1898, (g) 1902-3, (h) 1916, (i) 1919, and (j) 1920. It is remarkable that in each of the periods specified the phenomenon of a relatively high number of deaths was experienced in the majority of the States. Thus, as regards 1866-7, all the States except Western Australia and Tasmania were so affected; in 1875-6 all except Western Australia; in 1884-5 all were affected; in 1889 all except Western Australia and South Australia; in 1891 all except Queensland; whilst in 1893, 1898, and 1902-3 all were affected. In 1916 all States except Queensland were affected, and in 1919 each State shewed a large increase owing to the prevalence of influenza. The fact that the periods of high death rates have been practically identical in the several States furnishes an indication that the excessive mortality has been due to a considerable extent to some common cause operating throughout the Commonwealth.

It may be noted as curious that periods of heavy mortality have occurred at intervals of approximately nine years, viz.:—1866-7, 1875-6, 1884-5, 1893, and 1902-3. There are, however, two marked increases between the third and fourth dates, and one between the fourth and fifth.

Periods in which the number of deaths was exceptionally low are far less clearly defined than those in which the number was high, and the agreement amongst the States is also less complete. The principal periods of low mortality may be said to be 1861, 1869-71, 1879, 1892, 1897, 1900, 1904-5, 1909, 1914. In 1917 there were marked declines in all the States, succeeded in 1918 by less marked increases, and in 1919 by large increases, for the reason already stated.

5. Graphs of Annual Birth, Death, and Marriage Rates and of Rate of Natural Increase—Commonwealth (page 108).—(i) General. These graphs represent the number of births, deaths, and marriages, and the excess of births over deaths (natural increase) per 1,000 of the population of the Commonwealth, for each of the years 1860 to 1920.

(ii) *Births.* In the case of births, the graph indicates a well marked decline in rate during the period, and represents a fall from 42.56 per 1000 of population in 1860 to 23.78 per 1000 in 1919. This enormous reduction has been subject to small fluctuations during the period under review, but may, on the whole, be said to have been in evidence throughout. There are, however, two periods of arrested decline noticeable, one from 1877 to 1890, and the other from 1898 to the present time. The course of the graph thus indicates a rapid fall from 42.56 in 1860 to 34.99 in 1877, succeeded by a fluctuating but, on the whole, fairly stationary period to 34.98 in 1890, then a fall even more rapid to 27.15 in 1898, and a further comparatively stationary period to 23.78 in 1919. The lowest point reached, until 1919, viz., 23.78, was attained in 1903, the year in which the Commonwealth suffered severely from the worst drought it has ever experienced. From 1903 to 1912 there was an advance in the rate, followed by a decline to 1919. A recovery to 25.74 took place in 1920. A declining birth rate is usually due to complex causes, amongst which the variations in the age constitution of the population, and the adoption of preventive measures, are generally considered the most potent. The highest birth rate recorded was 43.27 in 1862.

(iii) *Deaths.* The three graphs relating to deaths furnish particulars concerning the rates experienced during the period amongst males and females separately, and in the population as a whole, the latter occupying naturally a position between the other two. Throughout the period the rate for males has largely exceeded that for females, but the fluctuations in the two rates have synchronised remarkably, indicating that the conditions which have been responsible for the marked variations which have occurred from time to time have affected males and females alike. On the whole, the graphs furnish clear evidence of a satisfactory decline in the general death rate of the Commonwealth, a fall having taken place from 20.86 in 1860 to 10.66 in 1915. In 1916 there was a slight rise to 11.04, followed in 1917 by a fall to 9.80, the lowest rate yet recorded in the Commonwealth as a whole. In 1918 there was a slight rise to 10.09 followed by a rise to 12.82 in 1919. The rate for 1920 was 10.62. The graphical representation of the death rates brings into prominence six years in which the rates were exceptionally high when compared with those of adjacent years. These years are 1860, 1866, 1875, 1884, 1898, and 1919. The principal cause of the excessive rate of 1860 was the prevalence in that year of measles, scarlatina, and diphtheria, while the high rates of 1866, 1875, and 1898 were also largely due to epidemics of measles. Prior to 1892, when a rate of 12.91 was experienced, the lowest general death rate for the Commonwealth was that of 1871, viz., 13.24. The highest male death rate for the period was 20.97 in 1860, and the lowest 11.47 in 1917. For females the highest was 20.71 in 1860, and the lowest 8.18 in 1917. The difference between the male and female rate has, since 1869, been fairly constant, and has ranged between 1.97 and 3.68, with a mean value of about 2.7.

(iv) *Marriages.* In the case of the graph representing marriage rates, the fluctuations are less abrupt than in the case of the birth rate and death rate graphs, and the rate for 1920, 9.73, the highest ever recorded, does not differ very considerably from that of 1860, which was 8.42. The lowest marriage rate for the period was that of 1894, viz., 6.08, marking the culmination of the commercial and financial depression indicated by the declining rates from 1888 onwards. From 1894 to 1915 a satisfactory increase has been in evidence, disturbed only by the sharp decline which, in 1903, accompanied the severe drought experienced in the Commonwealth in that year. In 1916, 1917, and 1918 the rate declined to 8.21, 6.87, and 6.65 respectively, but increased to 9.73 in 1920.

(v) *Natural Increase.* This graph, which represents the excess of births over deaths per 1000 of population, exhibits marked fluctuations arising from the combined fluctuations in birth and death rates. Thus, corresponding to the high death rates of 1860, 1866, 1875, 1898, and 1919 there are exceptionally low rates of natural increase, accentuated in the last-mentioned year by a comparatively low birth rate. A combination of low birth rate and comparatively high death rate was also responsible for the very low rate of natural increase in 1903. The highest rate of natural increase for the period was 26.58 in 1864, and the lowest 10.96 in 1919.

6. Graphs of Annual Birth Rates—States (page 109).—These graphs furnish for the several States information similar to that supplied in the graph on page 108 for the Commonwealth as a whole. It will be seen that in every case the total effect has been an extensive decline in rate, subject to very marked fluctuations. In all the States the period from 1875 to 1885 was one of arrested decline, if not of actual advance, in the birth rate. With the exception of a very low rate accompanying the drought in 1903, the variations in any of the States since 1901 have not been very marked, and in most cases a slight tendency to increase is in evidence up to 1913. From 1914 onwards decreases have been experienced.

The highest birth rates during the period were as follows :—New South Wales (1864), 44.00 ; Victoria (1862), 44.71 ; Queensland (1860), 47.93 ; South Australia (1862), 45.44 ; Western Australia (1860), 38.96 ; and Tasmania (1884), 36.63. The following were the lowest rates for the period :—New South Wales (1919), 24.68 ; Victoria (1919), 21.56 ; Queensland (1903), 24.53 ; South Australia (1903), 23.84 ; Western Australia (1919), 21.44 ; Tasmania (1919), 23.12.

7. Graphs of Annual Death Rates—States (page 109).—These graphs furnish for the several States similar information to that given for the Commonwealth as a whole in the diagram on page 108, and indicate in each case a satisfactory decline in death rate. It may be noted that an exceptionally high death rate was experienced in all the States in 1875, and that a similar uniformity, though on a smaller scale, is observable for the year 1898, the principal cause in each case having been an epidemic of measles. The highest death rates experienced during the period were as follows :—New South Wales (1867), 19.79 ; Victoria (1860), 22.77 ; Queensland (1866), 25.96 ; South Australia, (1875), 19.97 ; Western Australia (1884), 21.54 ; and Tasmania (1875), 19.99. The following were the lowest death rates for the period :—New South Wales (1917), 9.56 ; Victoria (1917), 10.36 ; Queensland (1906), 9.50 ; South Australia (1909), 9.74 ; Western Australia (1917), 8.97 ; and Tasmania (1918), 8.84.

8. Graphs shewing Variations in Annual Death Rates from Month to Month.—The graphs on pages 110 and 111 shew for the Commonwealth as a whole and for each of the six States the annual death rates for males, females, and persons calculated for equalised months, and the infantile death rate, calculated in the same way, also distinguishing males, females, and persons. Further particulars in regard to these graphs will be found on pages 127 and 128.

SECTION VI.

LAND TENURE AND SETTLEMENT.

§ 1. Introduction and Early History.

1. **Introduction.**—A comprehensive description, in a classified form, of the land tenure systems of the several States has been given in preceding issues of this book; see especially Year Book No. 4 (pp. 235 to 333). The details of that description have been necessarily condensed in the present issue, and for more complete information for past years, reference may therefore be made to Year Book No. 4. The historical matter dealing with the development of land legislation in the individual States may be found in Year Book No. 2 (pp. 263 to 272), and in a more condensed form in Year Books No. 3 (pp. 245 to 254), and No. 4 (pp. 235 to 244).

§ 2. Land Legislation in Individual States.

1. **New South Wales.**—(i) *Acts now in Force.* The Crown Lands Act of 1884 and the supplementary Act of 1889 (now incorporated in the Crown Lands Consolidation Act 1913), were passed chiefly for the purpose of putting an end to speculative selection without *bona fide* intention of settlement. Pastoral leases were required to be surrendered to the Crown and divided into two equal parts, one of which was returned to the lessee under a lease with a fixity of tenure for a term of years, the other half the lessee was allowed to hold under an annual occupation license, but this half was always open for selection.

Nevertheless accumulation of land into large estates continued, and settlement proceeded slowly. Entirely new principles of agrarian legislation have been embodied in Crown Lands Acts passed in the years 1895 to 1919, the Closer Settlement Acts 1904 to 1919, and the Closer Settlement Promotion Act 1910, now incorporated in Closer Settlement Amendment Act 1918, which offer *bona fide* settlers special inducements by the introduction of new forms of tenure on easy terms and conditions.

(ii) *The Western Lands Acts.* All Crown lands in the Western Division of New South Wales are now subject to the special provisions of the Western Lands Acts 1901 and 1905, and amendments in 1908, 1909, 1918, and 1919. All leases or occupation licenses could be brought within the provisions of the Western Lands Act by application before the 30th June, 1902. Otherwise the leases or licenses were dealt with by the Board as if the Act had not been passed. All leases issued or brought under the provisions of the Western Lands Acts expire on the 30th June, 1943, except in cases where part of the land leased is withdrawn for the purpose of sale by auction, or to provide small holdings, in which case an extension of the term of lease of the remainder may be granted as compensation for the part withdrawn.

2. **Victoria.**—(i) *Acts now in Force.* The Land Act 1915 deals with the whole system of land occupation and alienation in this State. Closer Settlement was provided for by the Land Acts of 1898 and 1901 and amendments, until the introduction of the Closer Settlement Act 1904, amended in 1906, 1907, 1909, 1910, 1911 and 1912, and now included in the Closer Settlement Act 1915 (Discharged Soldiers' Settlement Act 1917). Other special forms of tenure have been provided for by the Settlement on Lands Act 1893 and the Small Improved Holdings Act 1906; these, however, are now embraced in the Land Act and Closer Settlement Act respectively.

(ii) *Mallee Lands.* The lands in the Mallee territory, comprising an area of about 11,000,000 acres in the north-western district of the State, can be cleared at a moderate expenditure. An extension of railway facilities and of successful systems of water supply should bring this territory into greater prominence as a field for agricultural enterprise. About 4,500,000 acres are unalienated and available for occupation.

3. Queensland.—*Acts now in Force.* The Acts now in force are the Land Acts 1910 to 1920, the Closer Settlement Acts 1906–1917, and the Discharged Soldiers' Settlement Acts 1917 to 1920. The first-mentioned Acts substitute perpetual leasehold tenures for freeholding tenures in the case of all new selections and auction purchases, but conversion of existing holdings to the leasehold tenure is optional with the selector. The last-mentioned Acts provide for the settlement of discharged soldiers on Crown land, land acquired under the Closer Settlement Acts, or land specially acquired for soldier settlement.

4. South Australia.—*Acts now in Force.* The Crown Lands Act 1915 repealed and consolidated previous Acts, and also consolidated the Closer Settlement and Village Settlement Acts. The Pastoral Act 1904 controls the pastoral occupation of lands, and the Irrigation and Reclaimed Land Act of 1914 provides for leases of reclaimed and irrigable lands.

5. Western Australia.—*Acts now in Force.* The Land Act 1898, which consolidated previous legislation as to the management of Crown lands, has in turn been amended at various times, and, with such amendments, is now in force. The Discharged Soldiers' Settlement Act 1918 provides for the settlement of discharged soldiers and sailors on the land. The principle of repurchasing Crown lands for the purpose of Closer Settlement was introduced by the Agricultural Lands Purchase Acts 1896 to 1904; these Acts were repealed and consolidated by the Agricultural Lands Purchase Act 1909.

6. Tasmania.—*Acts now in Force.* The law relating to land tenure and settlement is now consolidated in the Crown Lands Act 1911, the Closer Settlement Act 1913, and the Returned Soldiers' Settlement Act 1916 and amendments.

7. Northern Territory.—Prior to the transfer of the Northern Territory to the Commonwealth on the 1st January, 1911, the sale and occupation of lands in the Territory were regulated by the Northern Territory Crown Lands Act 1890, the Northern Territory Land Act 1899, and the Northern Territory Tropical Products Act 1904, but from that date the further alienation and occupation of land in the Territory were suspended, pending a complete reorganisation of the system of land settlement by the Commonwealth Government. In December, 1912, an ordinance, cited as the Crown Lands Ordinance 1912, dealing with this question, was made, by which the conditions of land tenure and settlement in the Territory are now determined. Under the ordinance and its amendments and regulations no further alienation of Crown lands is permitted, unless such alienation is in pursuance of existing agreements.

8. Administration and Classification of Crown Lands.—In each of the States of the Commonwealth there is now a Lands Department under the direction of a responsible Cabinet Minister, who is charged generally with the administration of the Acts relating to the alienation, occupation and management of Crown lands. The administrative functions of most of the Lands Departments are to some extent decentralised by the division of the States into what are usually termed Land Districts, in each of which there is a Lands Office, under the management of a land officer, who deals with applications for selections and other matters generally appertaining to the administration of the Acts within the particular district. In some of the States there is also a local Land Board or a Commissioner for each district or group of districts. In the Northern Territory the administration of the regulations relating to the occupation and management of Crown lands is in the hands of a Classification Board, consisting of the Director of Lands and two other officers appointed by the Administrator.

In most of the States, Crown lands are classified according to their situation, the suitability of the soil for particular purposes, and the prevailing climatic and other conditions. The modes of tenure under the Acts, as well as the amount of purchase money or rent and the conditions as to improvements and residence, may vary in each State according to the classification of the land. The administration of certain special Acts relating to Crown lands has in some cases been placed in the hands of a Board under the general supervision of the Minister; for such purpose, for instance, are constituted the Western Lands Board in New South Wales, the Lands Purchase and Management Board in Victoria, and the Closer Settlement Board in Tasmania.

In each of the States and in the Northern Territory there is also a Mines Department, which is empowered under the several Acts relating to mining to grant leases and licenses of Crown lands for mining and auxiliary purposes. Such leases and licenses are more particularly referred to in a later part of this section. (See § 9.)

Full information respecting lands available for settlement or on any matter connected with the selection of holdings may be obtained from the Commonwealth representative in London, from the Agents-General of the respective States in London, or from the Lands Departments of the various States in the Commonwealth. The administration and classification of Crown lands in each State were more fully dealt with in Year Book No. 2 (pp. 273-6).

§ 3. Tenures under which Crown Lands may be Alienated or Occupied.

1. *Introduction.*—Crown lands may now ordinarily be alienated either by free grant (in trust for certain specified purposes), by direct sale and purchase (which may be either by agreement or at auction), or by conditional sale and purchase. Crown lands may be occupied in the several States under a variety of forms of leases and licenses, issued both by the Lands and the Mines Departments.

2. *Classification of Tenures.*—The tabular statement given on pages 161 and 162 shows the several tenures under which Crown lands may be acquired or occupied in each State of the Commonwealth. The forms of tenure are dealt with individually in succeeding parts of this section.

(i) *Free Grants, Reservations, and Dedications.* The modes of alienation given in this category include all free grants either of the fee simple or of leases of Crown lands. "Free" homesteads in Queensland and Western Australia are not included in this class, these tenures being free in the sense that no purchase money is payable, but not free from residential and improvement conditions. Reservation and dedication, which are ordinarily conditions precedent to the issue of free grants, are also dealt with therein.

(ii) *Sales by Auction and Special Sales.* This class of tenure includes all methods by which the freehold of Crown lands may be obtained (exclusive of sales under the Closer Settlement and kindred Acts) for cash or by deferred payments, and in which the only condition for the issue of the grant is the payment of the purchase money.

(iii) *Conditional Purchases.* In this class are included all tenures (except tenures under Closer Settlement and kindred Acts) in which the issue of the grant is governed by the fulfilment of certain conditions (as to residence or improvements) other than, or in addition to, that of the payment of purchase money.

(iv) *Leases and Licenses.* This class includes all forms of occupation of Crown lands (other than under Closer Settlement and kindred Acts) for a term of years under leases and licenses issued by the Lands Departments. As the terms indicate, the freehold cannot be obtained under these forms of tenure.

CLASSIFICATION OF TENURES UNDER WHICH CROWN LANDS MAY BE ALIENATED OR OCCUPIED.

New South Wales.

Victoria.

Queensland.

FREE GRANTS, RESERVATIONS, AND DEDICATIONS.

Free grants in trust
Reservations and dedications
under Crown Lands Consolidation Act 1913 and Mining Act 1906

Free grants in trust and reservations under Land Act 1915

NOTE.—*Northern Territory*.—By the Crown Lands Ordinance of 1912 and its amendments, the only form of tenure under which land may be held in the Northern Territory, exclusive of land held under pre-existing rights, is that of leasehold. See § 7 of this section.

(v) *Closer Settlement Sales, Leases, and Licenses.* In this division are included all forms of tenure provided for under the various Closer Settlement Acts, and under kindred Acts, such as the Village Settlements and Small Holdings Acts.

(vi) *Mines Departments' Leases and Licenses.* The tenures specified include all methods in which Crown lands may be occupied for mining and auxiliary purposes under leases and licenses issued by the Mines Departments in the several States.

3. *Limitation of Tenures in New South Wales.*—In October, 1910, it was officially stated that it was the policy of the Government to discontinue the granting of the freehold of Crown lands. Under the Crown Lands Act 1912 this policy was partially given effect to by the discontinuance of the disposal of Crown lands by conditional purchase or as homestead selections, and by the institution of several new forms of tenure, viz., homestead farms, suburban holdings, irrigation farms, and Crown leases.

The first three are leases in perpetuity, while the term of a Crown lease is 45 years.

These four tenures did not then carry any rights of conversion, but by subsequent enactments the first and last mentioned may now be converted into other tenures, and ultimately into freehold, and the holder of a suburban holding may under certain conditions be permitted to purchase same.

4. *Tenure of Lands by Aliens.*—In the States of New South Wales, Queensland, South Australia, and Western Australia, restrictions are imposed upon the tenure of lands by aliens (*i.e.*, persons other than natural-born or naturalized British subjects). In Victoria and Tasmania there are no such restrictions.

(i) *New South Wales.* Under the Crown Lands Consolidation Act 1913, an alien is not qualified to apply for an original homestead selection, original conditional purchase lease, settlement lease, original homestead lease, or original conditional purchase, unless he has resided in New South Wales for one year, and at the time of making application lodges a declaration of his intention to become naturalized within five years. If he fails to become naturalized within that period, the land is forfeited. This residential limit of twelve months does not, however, apply to applicants for homestead farms, Crown leases, suburban holdings, and leases within irrigation areas, but any alien who becomes the holder of any of these tenures must become naturalized within three years after his becoming such holder. Failure to comply with this regulation involves forfeiture of such holding, together with all improvements thereon.

(ii) *Victoria.* Under the Supreme Court Act 1915 (section 3), every alien friend resident in Victoria may acquire, either by grant from the Crown or otherwise, both real and personal property.

(iii) *Queensland.* Under the Land Act 1910 (section 59b and 62) an alien cannot apply for any land in Queensland unless he obtains a certificate that he is able to read and write from dictation words in such language as the Minister for Lands may direct. If he acquire a selection he must within five years of such acquisition become a naturalized subject.

(iv) *South Australia.* In South Australia, Asiatics are disqualified from holding perpetual leases of lands in irrigation areas under section 19 of the Irrigation and Reclaimed Lands Act 1914.

(v) *Western Australia.* Every application to acquire Crown lands, whether by a British subject or an alien, is subject to the approval of the Minister for Lands, with an appeal to the Governor in Council.

(vi) *Tasmania.* By the Aliens Act 1913 all restrictions on the holding of real estate by aliens are removed.

(vii) *Northern Territory.* Leases are not granted to aliens, but they may hold occupation licenses for twelve months, subject to renewal, provided the land is not required for other purposes. Under the Mining Act 1903 Asiatic aliens are disqualified from holding gold or mineral leases. Naturalized British subjects may hold leases.

§ 4. Free Grants, Reservations, and Dedications.

1. **Introduction.**—Although free grants of Crown lands were virtually abolished as far back as 1831, the Land Acts of all the States now contain provisions under which the free alienation or occupation of Crown lands for certain specified purposes—comprising generally charitable, educational, and public purposes—is allowed. In all the States, also, Crown lands may be excepted from sale and reserved to the Crown or dedicated for various public and special purposes. Generally, reservation and dedication are conditions precedent to the issue of a free grant. In addition to reservations of a permanent nature, temporary reservations are also made, but these are, as a rule, subject to considerable fluctuations in area by reason of withdrawals, renotifications, and fresh reservations.

The following table shews the area for which free grants were issued and the areas permanently reserved or dedicated in each State during 1901, and from 1915 to 1919 inclusive :—

* Including both permanent and temporary reservations and dedications.

† Free leases.

‡ These are free leases for 99 years.

§ Not available.

|| Exclusive of South Australia.

¶ Including 222 acres reserved for recreation grounds.

** The minus sign (—) indicates area of reserves cancelled in excess of areas set apart as reserves.

†† Omitting Queensland.

2. **New South Wales.**—Crown lands may be reserved or dedicated for certain charitable, educational, and public purposes specified. No promises of dedication for religious purposes were made after the 11th May, 1880, on which date a resolution against any further such grants was passed by the Legislative Assembly. Volunteer Land Office Certificates ceased to be operative after the 31st January, 1912. All cases have now been dealt with.

(i) **Reservations.** In addition to the reservations referred to above, Crown lands may also be temporarily reserved as sites for cities, towns, or villages, and may be reserved for mining purposes. Crown lands within one mile of any made or projected railway may be temporarily reserved from sale, and any Crown lands may be reserved from sale for the preservation and growth of timber. Further, Crown lands may be reserved by notification in the *Gazette* from being sold or let upon lease or license, in such particular manner as may be specified, or may be reserved from sale or lease generally.

(ii) *Areas Granted and Reserved, 1919-20.* During the financial year 1919-20, the total area for which free grants were prepared was 641 acres, including grants of 633 acres of land resumed under the 12th clause of the Public Roads Act 1902. During the same period 693 acres were dedicated and permanently reserved, the number of separate dedications being 67.

On the 30th June, 1920, the total area temporarily reserved was 21,482,773 acres, of which 5,945,096 acres were for travelling stock, 3,598,757 acres for forest reserves, 866,215 acres for water, 1,329,423 acres for mining, and the remainder for temporary commons, railways, recreation and parks, and miscellaneous purposes.

3. *Victoria.*—Under section 10 of the Land Act 1915, the Governor is authorised to reserve Crown lands, either temporarily or permanently, from sale, lease or license, for any public purpose whatever.

During the year 1919 three free grants, comprising an area of 1,349 acres, were issued. During the same year reservations of both a permanent and temporary nature, comprising an area of 960 acres, were made; of this area 128 acres were reserved for recreation grounds.

4. *Queensland.*—Under the Land Act 1910, the Governor in Council may grant in trust, or reserve from sale, or lease, temporarily or permanently, any Crown lands required for public purposes.

(i) *Reservations.* Under section 2 of the State Forests and National Parks Act 1906, the Governor in Council may permanently reserve any Crown lands and declare them to be a State Forest or a National Park.

(ii) *Areas Granted and Reserved, 1919.* During the year 1919 no free grants were issued. During the same period the area of reserves cancelled was 68,647 acres in excess of areas set apart as reserves. The total area reserved up to the end of the year 1919 was 14,244,059 acres.

5. *South Australia.*—Under section 7 (d) of the Crown Lands Act 1915, the Governor is empowered to dedicate by proclamation any Crown lands for various charitable, educational and public purposes, and may, at any time after dedication, grant the fee simple of such lands to secure the use thereof for the purpose for which they were dedicated.

(i) *Reservations.* Under section 7 (f) of the same Act, the Governor may by proclamation reserve any Crown lands (i) for the use of aborigines; (ii) for the purposes of military defence, (iii and iv) for forest or travelling stock reserves, (v) for public recreation grounds, (vi) for railways or tramways, (vii) for park lands, and (viii) for any other purposes he may think fit.

(ii) *Artesian Leases.* Under special circumstances free leases of pastoral lands may be granted to discoverers of artesian wells.

(iii) *Areas Granted and Reserved, 1919.* During the year 1919 there were 19 free grants issued for a total area of 344 acres. During the same year reserves comprising 220,463 acres were proclaimed.

6. *Western Australia.*—Under section 39 of the Land Act 1898, as amended by section 27 of the Act of 1906, the Governor may reserve any Crown lands which may be required for religious, charitable, or public purposes. These reservations may be either temporary or permanent.

During the year 1919, no free grants were issued, while the area reserved was 273,392 acres.

7. *Tasmania.*—Under section 11 of the Crown Lands Act 1911, the Governor may reserve any Crown lands for the purposes therein specified. The lands are ordinarily leased for a period of ninety-nine years at a peppercorn rental.

During the year ending 31st December, 1919, there were 3 free leases, comprising an area of 2 acres, issued. During the same period 22,053 acres were reserved, 11,621 acres being reserved for scenic purposes, 2 acres for cemetery purposes, 25 acres for recreation purposes, 500 acres as a sanctuary for wild fowl, and 9,903 acres for other purposes. The total area reserved from sale and selection to the end of the year 1919 was 4,822,000 acres.

§ 5. Sales by Auction and Special Sales.

1. Introduction.—In all the States, except Queensland since 1916 (see paragraph 4 hereunder), sales by auction of Crown lands are held from time to time. Notifications of such sales are given in the *Government Gazettes* together with particulars as to the upset price and conditions of sale. Excepting in the case of South Australia, where land is sold at auction for cash only, the purchase may be either for cash or on credit by deferred payments. In most of the States land may also be purchased by private contract at the upset price, when it has been offered at auction and not sold. In the case of auction sales on credit in the States of Western Australia and Tasmania, certain improvement conditions are imposed, and such sales are therefore classed for the purposes of this article among *Conditional Purchases*. (See § 6.) In most of the States comparatively small areas of Crown lands may be sold without competition under special circumstances. Sales by auction and special sales under Closer Settlement Acts are referred to in a later part of this section. (See § 8.)

2. New South Wales.—Under the Crown Lands Act, lands not exceeding in the aggregate 200,000 acres for the whole State may be sold by auction during any one year. The sales are notified in the *Gazette* not less than one month before the day of sale. The upset prices may not be less than £8 an acre for town lands: £2 10s. for suburban lands; and other lands fifteen shillings. Town lands may not be sold in areas exceeding half an acre; suburban lands in areas exceeding twenty acres; and country lands in areas exceeding 640 acres. A deposit of 10 per cent. on the purchase money must be paid at the sale, and the balance in ordinary circumstances within three months. The Minister may submit land to sale on deferred payments, in which case the balance is spread over a fixed period (not exceeding 10 years) and is payable in annual instalments with 5 per cent. interest.

A fuller description of the conditions under which land may be purchased at auction may be found in the previous issues of the Year Book. (See Year Book No. 5, p. 273.)

Alienation by Auction and Special Sales. During the year ended the 30th June, 1920, the area of Crown lands sold by auction and special sales for which grants were prepared amounted to 8,627 acres, of which 5,889 acres were sold by auction in 602 lots: 673 acres were sold by after-auction sales in 433 lots: 133 acres were sold as improvement purchases in 76 lots; and 1,932 acres were sold as special purchases in 182 lots. The following table gives particulars of Crown lands alienated by auction and special sales during 1901 and for each year from 1915 to 1920:—

NEW SOUTH WALES—AUCTION AND SPECIAL SALES, 1901 AND 1915 TO 1920.

Year.	Auction and After-auction Sales.	Improvement Purchases.	Special Sales.	Total.	
				Area.	Price.
	Acres.	Acres.	Acres.	Acres.	£
1901* ..	49,074	43	445	49,562	116,562
1915 ..	501†	49	1,897	2,447	36,411
1916 ..	492	66	2,707	3,265	35,614
1917 ..	900.	39	1,120	2,059	39,967
1918 ..	10,115	55	1,791	11,961	103,796
1919 ..	11,228	32	2,215	13,475	81,532
1920 ..	6,699	28	1,640	8,367	43,764

* Year ended 31st December. Subsequent years to 30th June. † Exclusive of frontages sold under the Centennial Park Sale Act.

Particulars of total areas alienated are given hereinafter. (See § 11.)

3. **Victoria.**—Lands specially classed for sale by auction, and any land in any city, town, or borough, may be sold by auction in fee simple, not exceeding 100,000 acres in any one year, at an upset price of £1 an acre, or at any higher price determined. The purchaser must pay the survey charge at the time of the sale, together with a deposit of $12\frac{1}{2}$ per cent. of the whole price; the residue is payable in equal half-yearly instalments, not exceeding forty in number, according to the amount, with interest at the rate of 4 per cent. per annum.

(i) *Special Sales without Competition.* Detached strips of land not exceeding twenty acres may be sold at a valuation to the owner of the adjoining freehold in cases somewhat similar to those specified above in respect to Crown lands in New South Wales.

(ii) *Areas Sold at Auction and by Special Sales.* The following table gives particulars of auction sales and special sales for the year 1901 and from 1915 to 1919 :—

VICTORIA—AUCTION AND SPECIAL SALES, 1901 AND 1915 TO 1919.

Particulars.			1901.	1915.	1916.	1917.	1918.	1919.
			Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
Country lands	4,079	818	625	615	450	336
Town and suburban lands	2,127	1,276	622	617	739	368
Special sales	846	1,193	814	546	1,657	318
Total	7,052	3,287	2,061	1,778	2,846	1,022

Particulars of total areas alienated are given hereinafter. (See § 11.)

4. **Queensland.**—Up to 31st December, 1916, the Minister might, with the approval of the Governor-in-Council, cause any Crown lands to be offered for sale by auction. Town or suburban lands might be under either freeholding or perpetual lease tenure. The notification specified the amount of deposit, and the term for payment of the balance of the money, which term might not exceed ten years. The upset price might not be less than £8 per acre for town lands, £2 per acre for suburban lands, and 10s. per acre for country lands. Since the close of the year 1916, however, the perpetual lease tenure only is available.

(i) *After-auction Sales.* The notification of lands for sale by auction might declare that any lands therein mentioned, which had been offered at auction but not sold or withdrawn, should be open to purchase at the upset price by the first applicant. The price might be paid in the same instalments and at the same periods as if the land had been bought at the auction.

(ii) *Special Sales without Competition.* Land might be sold without competition to the holder or holders of adjoining lands at a price to be determined by the Land Court, under circumstances similar to those specified above in the case of New South Wales. When the holder of any land proved that, owing to danger from flood or other reasons, it was unsafe to reside on his holding, he might be granted, on payment of a price determined by the Land Court, an area not exceeding ten acres out of the nearest convenient and available Crown lands. Perpetual leasehold is now an alternative tenure.

(iii) *Areas Sold at Auction, after Auction, and by Special Sales.* The following table shows the areas sold at or after auction, and by special sales, during the year 1901 and from 1915 to 1919 :—

QUEENSLAND—AUCTION AND SPECIAL SALES, 1901 AND 1915 TO 1919.
(FREEHOLDING TENURES.)

Particulars.	1901.	1915.	1916.	1917. (a)	1918. (a)	1919. (a)
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
Town	334	149
Suburban	793	541
Country—						
Ordinary sales	52,132	2,623
Special sales	55	79	108
Total	53,314	3,392	108

(a) Freeholding tenures not granted since 31st December, 1916.

Particulars of total areas alienated are given hereinafter. (See § 11.)

During 1919 there were in Queensland auction sales, under perpetual lease, of 231 acres for town areas, 199 acres for suburban areas, and 607 acres for country areas—a total of 1,037 acres. Particulars for five years are shewn in the following table :—

QUEENSLAND—SALES OF PERPETUAL LEASES AT AUCTION, 1915 TO 1919.

Year.	Number of Lots Sold.				Area Sold.			
	Town.	Suburban.	Country.	Total.	Town.	Suburban.	Country.	Total.
					Acres.	Acres.	Acres.	Acres.
1915 ..	384	87	..	471	158	749	..	907
1916 ..	690	292	..	982	296	1,275	..	1,571
1917 ..	279	62	125	466	107	168	2,599	2,874
1918 ..	441	168	57	666	163	428	1,218	1,809
1919 ..	660	58	40	758	231	199	607	1,037
Total ..	2,454	667	222	3,343	955	2,819	4,424	8,198

(iv) *Unconditional Selections.* This form of tenure is similar to that of a sale by auction with deferred payment. The minimum price for the land is 13s. 4d. an acre, payable in twenty annual instalments, and the maximum area granted to the applicant is 1,280 acres. A deed of grant may be obtained upon payment of the purchase money. Selection under this tenure, in common with other freeholding tenures, has now ceased.

The following table shows the number and area of unconditional selections for which applications were accepted during the year 1901 and from 1915 to 1919 :—

QUEENSLAND—UNCONDITIONAL SELECTIONS, 1901 AND 1915 TO 1919.

Particulars.	1901.	1915.	1916.	1917. (a)	1918. (a)	1919. (a)
Number	151	35	8
Area acres	24,322	5,639	3,035
Rent £	1,180	213	103

(a) See note first table on this page.

5. *South Australia.*—The following lands may be sold by auction for cash :—
(a) Special blocks. Any single section of Crown lands which may be surrounded by lands sold or contracted to be sold, and any section (not exceeding 100 acres in area) which may be required for the establishment of any industry. (b) Crown lands which have been offered for perpetual lease or agreement to purchase, and not taken up for two years.

(c) Town lands. (d) Suburban lands. The upset price is determined by the Commissioner, and 20 per cent. of the purchase money must be deposited at the time of sale, and the residue paid within such a time as the Commissioner may allow.

(i) *After-auction Sales.* All Crown lands except town or suburban lands offered at auction and not sold remain open for leasing or sale under agreement, or may be sold by private contract for cash at the upset price.

(ii) *Sales for Special Purposes.* The Governor may, on the application of the purchaser or lessee under any of the Crown Lands Acts, grant two acres of the land comprised in such agreement or lease to trustees, to be used for any public or charitable purposes, or he may grant not over one acre of land, comprised in such agreement or lease, as a site for a shop, mill, or post office. The purchase money for such land must be paid at the time of application.

(iii) *Areas Sold for Cash.* The following table shews the areas sold for cash during the year 1901 and from 1915 to 1919. The total areas sold under all types of sale are shewn in a later part of this section. (See § 11.)

SOUTH AUSTRALIA.—AUCTION AND SPECIAL SALES, 1901 AND 1915 TO 1919.

Year	1901.	1915.	1916.	1917.	1918.	1919.
Area in acres	11,314	29,081	30,799	36,964	29,921	38,507

6. *Western Australia.*—Surveyed town lots notified in the *Gazette* as open for sale, either to purchase outright, or to lease, are sold by public auction at a prescribed upset price. In the case of suburban lands, the purchaser must carry out certain improvements, which are more particularly referred to later. (See § 6, *Conditional Purchases.*)

Areas Sold by Auction. The following table shews the areas of town and suburban lands sold at auction during the year 1901 and from 1915 to 1920:—

WESTERN AUSTRALIA.—AUCTION SALES, 1901 AND 1915 TO 1920.

Year.. .. .	1901.	1915.(a)	1916.(a)	1917.(a)	1918.(a)	1919.(a)	1920.(a)
Area sold .. Acres	856	1,396	419	543	964	277	496
Number of Allotments	1,366	353	102	144	278	137	140

(a) For the year ended 30th June.

Particulars as to total areas alienated are given in a later part of this section. (See § 11.)

7. *Tasmania.*—Any town lands may be sold at auction or by private contract, either for cash or on credit, provided that no such lands may be sold on credit if the price is less than £15. Rural lands may also be sold at auction or by private contract, but lots of first-class land may not be sold on credit if less than fifteen acres in area. In the case of sales on credit both of town and rural lands, improvement conditions are imposed, and such sales are therefore classified for the purposes of this article as *Conditional Purchases.* (See § 6.)

(i) *After-auction Sales.* All rural lands and town lands, not within five miles of any city, which have been offered at auction and not sold, may be purchased by private contract at the upset price, and subject to the conditions on which they were offered at auction.

(ii) *Sale of Land in Mining Towns.* The holder of a residence or business license, who is in occupation and is the owner of buildings and improvements upon the area licensed of a value equal to the upset price of such area, is entitled to purchase not more than half an acre in area. The areas may be sold on credit.

(iii) *Areas Sold for Cash.* The following table shews the areas sold for cash during the year 1901 and from 1915 to 1919:—

TASMANIA—AUCTION AND SPECIAL SALES, 1901 AND 1915 TO 1919.

Year	1901.	1915.	1916.	1917.	1918.	1919.
Area in acres	1,915	339	170	133	310	120

Particulars of total areas alienated are given in a later part of this section. (See § 11.)

§ 6. Conditional Purchases.

1. *Introduction.*—In all the States of the Commonwealth* the freehold of the land may be acquired under what are known as systems of conditional purchase by deferred payments of half-yearly or yearly instalments. Certain conditions, generally as to residence and improvements, have to be complied with before the freehold is granted, but these conditions are usually of a light nature and are inserted chiefly with the object of guaranteeing that the occupier will become of benefit to the community by making a reasonable effort to render his holding wealth-producing. Though there is a considerable similarity between some of the forms of tenure in the several States, the terms and conditions vary greatly in detail. As a rule a lease or license for a certain period is first issued to the selector, and upon fulfilment of the prescribed conditions and payment of the full amount of purchase-money the freehold is conveyed to him. In Queensland† and Western Australia “free” homesteads may be acquired. Although under these tenures no purchase-money is payable, the grant is conditional on the performance of residential and improvement conditions; these tenures are therefore included here with conditional purchases rather than with free grants.

2. *New South Wales.*—The following are the methods by which land may be alienated by conditional purchase:—(i) Residential conditional purchase; (ii) non-residential conditional purchase; (iii) conversion of certain holdings into conditional purchase; and (iv) homestead selections.

A description of the conditions under which land may be taken up under this form of tenure is given in previous issues of the Year Book. (See No. 6, p. 277.)

During the year ended the 30th June, 1920, deeds of grant were prepared on the completion of conditional purchases for 686,385 acres, making the total number of conditional purchases in existence at the end of the financial year 82,938 for a total area of 19,365,856 acres. The following table gives particulars of conditional purchases in 1901 and from 1915 to 1920:—

NEW SOUTH WALES.—CONDITIONAL PURCHASES, 1901 AND 1915 TO 1920.

Year.	Applications Made.		Applications Confirmed.		Areas for which Deeds have been Issued.	
	Number.	Area.	Number.	Area.	During the Year (b).	To end of Year.
		Acres.		Acres.	Acres.	Acres.
1901 ..	2,277	549,898	1,555	360,910	500,554	4,212,189
1915 (a) ..	362	47,175	287	35,249	304,012	16,264,942
1916 (a) ..	216	22,495	183	23,552	307,016	16,571,958
1917 (a) ..	168	25,761	108	13,025	357,828	16,929,786
1918 (a) ..	271	32,085	121	16,211	388,338	17,318,124
1919 (a) ..	511	75,370	201	24,911	559,779	17,877,903
1920 (a) ..	773	126,179	257	35,612	686,385	18,564,288

(a) Year ended 30th June. (b) Exclusive of exchanges under the Crown Lands Act 1895.

Further particulars as to the total areas alienated and in process of alienation are given hereinafter. (See § 11.)

* Except Queensland since 1916.

† Prior to 1st January, 1917.

During the year ended 30th June, 1920, there were 13 original and 10 additional homestead selections applied for, comprising an area of 15,365 acres. During the same period the total number of applications confirmed was 8, comprising 9,690 acres, and 2,937 homestead selections and grants, comprising an area of 912,573 acres, were in existence on the 30th June, 1920. This tenure is now practically superseded by the Homestead Farm tenure. Further particulars for previous years are given in a later part of this section. (See § 11.)

3. Victoria.—The freehold of agricultural and grazing lands may be acquired by conditional purchase under the following tenures:—(i) Agricultural, grazing and selection purchase allotments; (ii) agricultural and grazing allotments by selection from grazing area or perpetual leases; (iii) Mallee selection purchase leases; (iv) Murray settlements leases; and (v) swamp or reclaimed lands purchase leases.

A description of the conditions under which land may be taken up under this form of tenure may be found in previous issues of the Year Book. (See No. 6, p. 278.)

With reference to Murray settlement leases, on the Merbein and Mildura Irrigation Settlements the development has been maintained and extended in a very satisfactory manner. These are proving the most successful irrigation settlements in the State. An area, 1,275 acres, adjoining Merbein and Mildura, has been subdivided and allotted to 83 soldiers. The Nyah Settlement also is making good progress.

The subjoined table gives particulars shewing the areas selected conditionally during the year 1901 and from 1915 to 1919. A large proportion of the areas shewn has reverted to the Crown in consequence of non-fulfilment of conditions.

VICTORIA.—AREAS PURCHASED CONDITIONALLY, 1901 AND 1915 TO 1919.

(EXCLUSIVE OF SELECTION IN THE MALLEE COUNTRY.)

Particulars.	1901.	1915.	1916.	1917.	1918.	1919.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
With residence	466,155	112,144	117,180	69,210	61,884	76,003
Without residence	50,257	15,645	22,485	19,462	12,093	6,635
Total	516,412	127,789	139,665	88,672	73,977	82,638
No. of selectors	2,979	883	902	646	526	698

Particulars as to total areas alienated and in process of alienation are given in a later part of this section. (See § 11.)

4. Queensland.—The several types of selection under which the freehold might, prior to 1917, have been acquired by conditional purchase are as follows:—(i) Agricultural farms; (ii) agricultural homesteads; (iii) prickly pear selections; and (iv) free homesteads.

In previous issues of this book may be found the conditions under which land might be selected under this form of tenure. (See No. 6, p. 280.)

Since the close of the year 1916, no selections can be acquired on a freeholding basis, but existing selections are not affected, though they may be converted to perpetual leases if the selectors so desire.

Number and Area of Conditional Purchases prior to 1917. The following table shews the number and area of conditional purchases for which applications were accepted in 1901 and from 1914 to 1916 :—

QUEENSLAND.—CONDITIONAL PURCHASES (APPLICATIONS ACCEPTED),
1901 AND 1914 TO 1916.

Year.	Agricultural Farms.		Agricultural Homesteads.		Prickly Pear Selections.		Total.	
	Number.	Area.	Number.	Area.	Number.	Area.	Number.	Area.
		Acres.		Acres.		Acres.		Acres.
1901 ..	661	160,804	669	155,512	19	48,450	1,349	364,766
1914 ..	1,554	538,844	25	5,927	636	683,000	2,215	1,227,771
1915 ..	978	300,302	12	1,913	451	481,258	1,441	783,473
1916 ..	399	120,207	5	1,337	203	180,921	607	302,465

During the years 1917 to 1919, no land was opened for selection, nor was any selected, under tenures involving freehold.

Particulars as to total areas alienated and in process of alienation may be found hereinafter. (See § 11.)

5. *South Australia.*—The types of conditional purchases under which land may be alienated in this State are as follows :—(i) Agreement to purchase, and (ii) Agreement under the Pinnaroo Railway Act 1903.

(i) *Agreement to Purchase.* Surveyed Crown lands are available for agreement to purchase, as well as for perpetual lease under the Crown Lands Acts of 1915, the purchase money being fixed by the Land Board, and payable in sixty half-yearly payments, including interest at not less than 2 per cent. per annum. The condition as to payment of instalments for land offered under the provisions of Act of 1915 in newly surveyed mallee lands is that no payment is made for the first four years, from the fifth to end of the tenth year interest only at the rate of 2 per cent. per annum on value of land is payable, the first instalment of purchase money, including interest at the rate of 4 per cent. per annum, being payable at the commencement of the eleventh year. All payments are made in advance, the term of agreement being thereby extended to forty years. If the conditions relating to fencing, vermin destruction, and, in some cases, to residence are fulfilled, the purchase may be completed after a term of six years from commencement of the agreement on payment of all principal and interest due. All minerals are reserved to the Crown, and the Crown may resume any part of the land for the purposes of roads, water conservation, mining, &c., compensation being payable to the purchaser for loss occasioned by resumption.

(ii) *Pinnaroo Railway Lands.* Under the Pinnaroo Railway Act 1903 provision was made for opening up about 1,500,000 acres of good agricultural country in the vicinity of a line from Pinnaroo, adjoining the Victorian border, to Tailem Bend, a distance of eighty-seven miles. These lands are now offered on agreement with covenant to purchase or on perpetual lease under the Crown Lands Act 1915. The railway has been paid for from the proceeds of the land already selected. The conditions of purchase are similar to those stated in par. (i) above.

The total area held on 30th June, 1920, was 1,100,240 acres; of this area purchase has been completed of 472,102 acres, and 16,179 acres are held on perpetual and right of purchase leases, allotted before the Pinnaroo Railway Act was passed.

(iii) *Particulars of Conditional Purchases.* The subjoined table gives particulars of the areas alienated by conditional purchase, on fulfilment of the conditions, at the end of 1901 and from 1915 to 1919 :—

SOUTH AUSTRALIA—AREAS ALIENATED UNDER AGREEMENTS TO PURCHASE, 1901 AND 1915 TO 1919.

Year	1901.	1915.	1916.	1917.	1918.	1919.
Area in acres	57,460	55,181	46,098	26,418	17,963	32,929

Particulars as to the total areas alienated and in process of alienation are given in a later part of this section. (See § 11.)

6. *Western Australia.*—The various types of selection under which the freehold can be alienated by conditional purchase in this State are as follows :—(i) Residential conditional purchase; (ii) non-residential conditional purchase, (iii) conditional purchase by direct payment; (iv) conditional purchase of blocks for vineyards, orchards, or gardens; (v) conditional purchase of grazing lands; (vi) free homestead farms; and (vii) town and suburban lots.

A full description of the various conditions under which land may be held under this form of tenure may be found in the previous issues of the Year Book. (See Year Book No. 5, pp. 283 and 284.) The following table shews the area of the selections for which grants were issued, the prescribed conditions having been fulfilled, during the year 1901 and from 1915 to 1920 :—

WESTERN AUSTRALIA—AREAS SELECTED CONDITIONALLY FOR WHICH CROWN GRANTS WERE ISSUED, 1901 AND 1915 TO 1920.

Particulars.	1901.	1915.(a)	1916.(a)	1917.(a)	1918.(a)	1919.(a)	1920.(a)

Number of holdings ..	1,888	1,51-	860	637	973	1,136	2,621

(a) For year ended 30th June. (b) Provisions repealed by Act of 1906. (c) Closer settlement. (See § 8, 7.) (d) Deferred payments (with residence) are now combined with grazing leases.

Particulars as to the total areas in process of alienation are given in a later part of this section. (See § 11.)

7. **Tasmania.**—The various types of conditional purchases in this State are as follows:—(i) Selection of rural land; (ii) homestead areas; (iii) selection in mining areas; and (iv) sales by auction on credit, either of town or rural lands. The conditions under which land may be selected under this form of tenure are given in previous issues of the Year Book. (See No. 6, p. 283.)

The following table shews the areas alienated absolutely under systems of conditional purchases and sales on credit, the conditions having been fulfilled, and also shews the areas sold conditionally and the applications for conditional purchases received and confirmed, during the year 1901 and from 1915 to 1919:—

TASMANIA.—CONDITIONAL PURCHASES, 1901 AND 1915 TO 1919.

(a) Including selections and sales on credit.

Particulars of total areas alienated and in process of alienation are given hereinafter. (See § 11.)

§ 7. Leases and Licenses.

1. **Introduction.**—Leases and licenses are issued in all the States and in the Northern Territory for various terms and upon various conditions. In Victoria, Queensland, South Australia, and the Northern Territory perpetual leases are issued for an indefinitely long period upon payment of an annual rent, while in all the States leases or licenses of comparatively large areas may be obtained for pastoral purposes. Provision has also been made in all the States for convenient forms of leases and licenses for various special purposes, and also for special classes of lands. The leases and licenses dealt with below are exclusive of those issued under Closer Settlement and kindred Acts, and of those issued for mining and auxiliary purposes. (See §§ 8 and 9.)

2. **New South Wales.**—The following are the various types of leases and licenses issued in this State:—(i) Conditional leases; (ii) conditional purchase leases; (iii) settlement leases; (iv) improvement leases; (v) annual leases; (vi) residential leases; (vii) special leases; (viii) snow leases; (ix) pastoral leases; (x) scrub leases; (xi) inferior lands leases; (xii) occupation licenses; (xiii) Western lands leases; (xiv) homestead farm leases; (xv) suburban holdings leases; (xvi) Crown leases; (xvii) irrigation farm leases; (xviii) week-end leases; (xix) leases of town lands; (xx) returned soldiers' special holdings.

A description in detail of the conditions which govern the issue of these various leases and licenses may be found in previous editions of the Year Book. (See Year Book No. 6, p. 285.)

On the 30th June, 1920, there were 58,351 leases and licenses current under the Lands Department and the Western Land Board, comprising 115,631,338 acres of Crown lands. Of these leases 3,006, comprising 75,450,265 acres, are held under the Western Lands Acts.

The following table shews the areas held under various descriptions of leases and licenses at the end of the year 1901, and at the end of 1916-17 and following financial years, and also the area and rental of leases current on the 30th June, 1920 :—

(a) Includes permissive occupancy.

(b) Permissive occupancies in the Western Division not included.

The total annual rent derived from the leases and licenses issued by the Lands Department and the Western Lands Board amounted to £611,247, or an average of 1.27 pence per acre. Particulars regarding leases and licenses issued by the Mines Department are given in a later part of this section. (See § 9, *Occupation of Crown Lands for Mining Purposes*.)

3. **Victoria.**—The various types of leases and licenses (exclusive of Closer Settlement and Mines Department leases and licenses) which may be issued in this State are as follows :—(i) Grazing area leases; (ii) selection purchase leases; (iii) perpetual leases; (iv) Mallee perpetual leases; (v) licenses of auriferous lands; (vi) swamp or reclaimed lands leases; (vii) grazing licenses; (viii) leases and licenses for other than pastoral purposes; and (ix) State forests and timber reserves licenses.

A description in detail of the conditions which govern the issue of these various leases and licenses may be found in the previous issues of the Year Book. (See Year Book No. 5, pp. 291-2.)

Areas held under Leases and Licenses. The following statement shews the areas of Crown lands occupied under leases and licenses at the end of the year 1901 and from 1915 to 1919:—

**VICTORIA.—OCCUPATION OF CROWN LANDS UNDER LEASE OR LICENSE,
1901 AND 1915 TO 1919.**

Total	17,110,709	13,035,612	12,433,959	12,383,810	10,649,247	13,531,476

4. *Queensland.*—In this State Crown lands may be occupied under the following types of leases and licenses:—(i) Grazing homesteads; (ii) grazing farms; (iii) occupation licenses; (iv) special leases; (v) perpetual lease selections; (vi) perpetual lease prickly-pear selections; (vii) pastoral leases; (viii) preferential pastoral leases; (ix) auction perpetual leases (town, suburban, and country); (x) non-competitive leases. An applicant for a grazing homestead or grazing farm may not hold more than 60,000 acres, and the term of the lease may not exceed 28 years. The rents of grazing selections are redetermined by the Land Court for each period of seven years, and those of pastoral holdings for each period of ten years.

(i) *Grazing Homesteads.* Lands opened for grazing selections are available for fifty-six days as grazing homesteads only. In the case of land selected up to 31st December, 1916, personal residence was necessary for the first five years, and prior to the expiration of such period or the earlier death of the lessee, a grazing homestead could not be assigned or transferred. Without the special permission of the Minister it could not be mortgaged during the five years except to the Agricultural Bank; thereafter the lease was subject to the condition of occupation. Since 1st January, 1917, grazing homesteads are subject to personal residence by the selector during the whole term of the lease, but the restrictions on assignment or transfer still operate only during the first five years.

(ii) *Grazing Farms.* In order to obtain priority of claim the applicant may tender an annual rent higher than the notified one, for the first seven years. As soon as the land is fenced the selector becomes entitled to a lease, and may thereafter transfer or mortgage the same. The lease is subject to the condition of occupation during the whole term. The Crown may resume the whole or part of the lease.

Particulars of the selection of grazing farms and grazing homesteads are given in the following paragraph.

(iii) *Grazing Farms, Homesteads, and Scrub Selections.* The following table shews the number of grazing farms, grazing homesteads, and scrub selections, for which applications were accepted in 1901 and from 1915 to 1919:—

**QUEENSLAND.—GRAZING FARMS, HOMESTEAD, AND SCRUB SELECTIONS,
1901 AND 1915 TO 1919.**

Year.	Grazing Farms.		Grazing Homesteads.		Scrub Selections.		Total.	
	No.	Area.	No.	Area.	No.	Area.	No.	Area.
		Acres.		Acres.		Acres.		Acres.
1901 ..	247	1,371,283	47	290,785	19	48,450	313	1,710,518
1915 ..	222	2,461,836	275	3,984,517	497	6,446,353
1916 ..	112	1,412,652	247	3,065,096	359	4,477,748
1917 ..	129	1,925,059	197	2,243,218	326	4,168,277
1918 ..	175	3,111,716	210	2,597,571	385	5,709,287
1919 ..	292	4,437,564	196	2,094,413	488	6,531,977

The average rent in 1919 was .71d. per acre for grazing farms and 1.21d. per acre for grazing homesteads.

Particulars of total areas held under leases and licenses are given in a later part of this section. (See § 11.)

(iv) *Occupation Licenses.* Annual licenses are granted to occupy Crown lands which have been declared open for such occupation by notification in the *Gazette*. The rent is as specified by the notification or as bid by the licensee, but the Minister may by notice before the 1st September in any year increase the rent. The total number of licenses in force at the end of the year 1919 was 2,780, comprising an area of 57,173 square miles, the total rent being £52,863. Particulars of the area held under license for previous years are given in a later part of this section. (See § 11.)

(v) *Special Leases.* Leases of any portion of Crown land may be issued for a term not exceeding thirty years to any person for any manufacturing, industrial, business or recreation purposes. Leases for a similar term may be issued for any country lands reserved for public purposes and which are infested with noxious weeds.

During the year 1919 there were 135 leases for special purposes granted, comprising an area of 7,478 acres, the total annual rent being £919, and there were extant at the end of the year 847 such leases, comprising an area of 61,400 acres and reserving rents amounting to £4,556 per annum. In addition, 63 leases of reserves, aggregating 15,249 acres, were granted at rentals amounting to £372 per annum, the total number of these leases of reserves in force at the end of the year being 415, comprising an area of 148,801 acres and reserving rents amounting to £1,869. Particulars of special leases for previous years are given in a later part of this section. (See § 11.)

(vi) *Perpetual Lease Selections.* Up to 31st December, 1916, land proclaimed to be open for agricultural farm selection (see § 6, 4) might also be opened for perpetual lease selection, and the latter mode might be conceded priority of application over the former. The rent for the first period of ten years of the lease was $1\frac{1}{2}$ per cent. on the proclaimed purchase price of the land for agricultural farm selection. The rent for each succeeding period of ten years was determined by the Land Court. Similar conditions of occupation and improvement as were prescribed for agricultural farms were attached to perpetual lease selections. From 1st January, 1917, land opened for agricultural selection may be opened only for perpetual lease selection, and land opened for prickly-pear selection may be opened only for perpetual lease prickly-pear selection. In the case of perpetual lease selections, the rent for the first period of 15 years is $1\frac{1}{2}$ per cent. of the notified capital value of the land, and for each succeeding period of 15 years may be determined by the Land Court. In the case of perpetual lease prickly-pear selections, no rent is payable during the pear-clearing period, but thereafter rents are paid in the same manner as for perpetual lease selections. The conditions of selection are similar to those for the previous tenures of agricultural farms and prickly-pear selections.

QUEENSLAND.—PERPETUAL LEASE SELECTIONS, 1915 TO 1919.

Particulars.				1915.	1916.	1917.	1918.	1919.
Number		175	294	605	898	1,285
Area	acres	59,760	114,011	207,581	305,873	609,483
Rent	£	973	1,806	3,141	4,596	8,055

Particulars of perpetual lease prickly-pear selections taken up, 1917 to 1919, were as follows :—

QUEENSLAND.—PERPETUAL LEASE PRICKLY-PEAR SELECTIONS, 1917 TO 1919.

Particulars.				1917.	1918.	1919.
Number	180	178	460
Area	acres	141,336	153,151	514,064

(vii) *Special Licenses.* Licenses to cut timber or to dig for any stone, gravel, earth, shells, or guano, may be issued.

(viii) *Pastoral Leases.* Up to 31st December, 1916, existing pastoral leases were deemed to be held under the Land Act 1910. Lands open for pastoral lease might be leased for a period not exceeding thirty years. The annual rent, per square mile, for the first ten years must be as notified in the *Gazette*, or in case of competition, bid at auction. If the value of the holding became enhanced by the development of public works in the neighbourhood, or by the occurrence of minerals on or near the holding, the rent might be redetermined. A new pastoral tenure, as from 1st January, 1917, was introduced by the amending Act of 1916, viz., preferential pastoral lease. Holdings under this tenure are confined to persons with no interests or limited interests in pastoral leases, and priority of application may be obtained by an applicant undertaking to reside on the holding personally during the first seven years.

The following table shews the total areas of pastoral leases occupied under the various Acts at the end of the year 1901 and from 1915 to 1919 inclusive:—

**QUEENSLAND (a).—PASTORAL LEASES OCCUPIED UNDER VARIOUS ACTS,
1901 AND 1915 TO 1919.**

Particulars.	Area in Square Miles.					
	1901.	1915.	1916.	1917.	1918.	1919.
Pastoral Leases Act 1869	39,307
Crown Lands Act 1884	243,586
Land Act 1897	15,046
Pastoral Leases Act 1900	50,076
Pastoral Holdings New Leases Act 1901
Land Act 1902
Land Act 1910	349,838	337,423	330,596	331,937	325,709
Land Act Amendment Act 1916 (preferential)	636	1,935	4,026
Total	348,015	349,838	337,423	331,232	333,872	329,735

(a) Up to the year 1910, resumed parts of pastoral holdings were included in these figures, but since that year they are held under occupation license, and are included in the figures under that head.

The gross area held at the end of the year 1919 for purely pastoral purposes (under *Occupation Licenses and Pastoral Leases*) was 386,908 square miles, at rentals aggregating £375,807 per annum. The area was 10,549 square miles less than that for the previous year, and the rental was £9,204 more. The average rent was 19s. 5½d. per square mile, as against 18s. 5½d. for the previous year.

Eight non-competitive perpetual leases were issued during 1919, the total area being 224 acres, and the annual rent £14.

5. *South Australia.*—The following are the various types of leases and licenses which are issued in this State:—(i) Perpetual leases; (ii) miscellaneous leases; (iii) miscellaneous grazing and cultivation leases; (iv) irrigation and reclaimed swamp leases; (v) licenses for special purposes; (vi) leases under the Pastoral Act 1904; and (vii) leases with right of purchase.

(i) *Perpetual Leases.* Surveyed Crown lands are available for perpetual leases as well as for agreements to purchase under the Crown Lands Act of 1915. Under the Crown Lands Act of 1888 perpetual leases were granted in perpetuity, and the rent determined for each period of fourteen years, at least twelve months before the expiration of each such period. Under the Crown Lands Act of 1893 the revaluation section was repealed and the rent was fixed in perpetuity, generally at rates varying from 2 per cent. to 4 per cent. per annum on the value of the land as fixed by the Land Board. The condition as to payment of rent of land offered under provisions of the Act of 1915 in newly surveyed mallee lands is that no rent is charged for the first four years, and from the fifth to the end of the tenth year payment is made at the rate of 2 per cent. per annum, the full rate at 4 per cent. becoming due at the commencement of the eleventh year. All minerals are reserved to the Crown, and the Crown may reserve any part of the land for the purposes of roads, water conservation, mining, &c., compensation being payable to the lessee for loss occasioned by resumption.

The conditions under which the other leases and licenses are issued will be found in detail in previous issues of the Year Book. (See Year Book No. 5, pp. 294 and 295).

(ii) *Areas held under Lease.* The following table shews the areas held under leases and licenses at the end of the year 1901 and from 1915 to 1919 :—

SOUTH AUSTRALIA.—AREAS UNDER LEASES AND LICENSES, 1901 AND 1915 TO 1919.

Particulars.	1901.	1915.	1916.	1917.	1918.	1919.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
Right of Purchase Leases	5,639,519	2,574,640	2,504,143	2,440,731	2,402,355	2,329,100
Perpetual Leases	7,115,782	14,943,771	14,851,173	14,810,026	14,625,839	14,650,223
Pastoral Leases	68,916,125	95,756,850	95,016,370	100,889,010	95,264,050	96,358,400
Other Leases	3,905,729	1,144,683	1,128,630	1,049,522	617,654	806,029
Total held under Lease	85,577,155	114,419,944	113,500,316	119,189,289	112,909,898	114,143,802

6. *Western Australia.*—The following are the various types of leases and licenses issued in this State :—(i) Pastoral leases; (ii) permits and licenses to cut timber; (iii) special leases; and (iv) licenses for quarrying.

The conditions of tenure with respect to these leases and licenses may be found in previous issues of the Year Book. (See Year Book No. 5, pp. 296-7.)

Areas held under Leases and Licenses. The following table shews the number and areas of leases and licenses issued during the year 1901 and from 1915 to 1920 :—

WESTERN AUSTRALIA.—LEASES AND LICENSES ISSUED, 1901 AND 1915 TO 1920.

Particulars.	1901.	1915.(a)	1916.(a)	1917.(a)	1918.(a)	1919.(a)	1920.(a)
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
Pastoral Leases	19,909,251	7,630,023	7,489,683	9,436,159	20,287,672	39,016,706	18,961,478
Special Leases	149	5,571	1,707	626	8,097	16,845	1,509
Leases in Reserves	324	196,340	434,455	128,402	87,712	539,041	215,134
Timber Leases and Permits (b)	109,630	38,000	219,088	329,370	84,770	93,171	..
Residential Lots	221
Total	20,019,575	7,869,934	8,144,933	9,894,557	20,468,251	39,665,763	19,178,121
Number issued	1,466	1,410	1,105	510	508	1,014	545

(a) For financial year ended the 30th June. (b) No timber leases granted since 1903. Timber leases and permits are now under the control of the Forests Department.

Particulars as to the total area occupied under leases and licenses are given in a later part of this section. (See § 11.)

7. *Tasmania.*—The several forms of leases and licenses in this State are as follows :—(i) Grazing leases; (ii) miscellaneous leases; (iii) timber licenses; (iv) occupation licenses; (v) temporary licenses; and (vi) timber leases.

The conditions which govern the issue of these leases and licenses are more fully dealt with in previous issues of the Year Book. (See Year Book No. 5, p. 297.)

Areas held under Leases and Licenses. The following table shews the areas of Crown lands occupied under leases and licenses at the end of the year 1901 and from 1915 to 1919 :—

TASMANIA.—LEASES AND LICENSES ISSUED, 1901 AND 1915 TO 1919.

Particulars.	1901.	1915.	1916.	1917.	1918.	1919.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
Ordinary Leased Land	1,280,688	1,452,068	1,434,113	1,193,169	1,201,169	1,341,000
Islands	149,165	204,630	207,630	197,406	197,918	151,000
Land Leased for Timber	40,768	120,832	146,881	155,889	183,304	218,784
Total	1,470,621	1,777,530	1,788,624	1,546,464	1,582,391	1,710,784

8. *Northern Territory.*—The system of land settlement in the Northern Territory has been reorganised by the Commonwealth Government. A New Lands Ordinance was passed in December, 1912, known as the Crown Lands Ordinance 1912, and future disposal of land in the Territory will be made in accordance with this Ordinance, which provides for a leasehold system only, and no further alienation of Crown lands will be permitted, unless such alienation is in pursuance of existing agreements. Under this

Ordinance, the classification and control of Crown lands is in the hands of a Board, consisting of the Director of Lands and two other officers appointed by the Administrator. The classified land is leased in blocks, the maximum areas for agricultural lands being 1,280 acres in class 1, and 2,560 acres in class 2; for mixed farming and grazing, 12,800 acres in class 1, and 38,400 acres in class 2; for pastoral purposes, 300 square miles in class 1, 600 square miles in class 2, and 1,500 square miles in class 3. Before offering any land for leasing, the Board fixes the annual rental, but every lease is subject to reappraisal of rent at specified periods, viz., every fourteen years in the case of town lands, and every 21 years in the case of agricultural and pastoral lands.

Leases under this Ordinance are in perpetuity except as regards pastoral and miscellaneous leases, the maximum term of which is fixed by the Classification Board when advertising lands for lease, but does not exceed 21 years for miscellaneous lease and first class pastoral lands, or 42 years for second and third class pastoral land.

In order to promote settlement in the Territory, the first 5,000 blocks of agricultural land taken up on perpetual lease under this Ordinance will be rent free during the life of the applicant, or for 21 years from the commencement of the lease, whichever period is longer.

The lessee must make a home on the land within two years after the date of the lease and thereafter reside on the land for a period of six months in each year in the case of land for cultivation, and four months in the year in the case of mixed farming and grazing; he must also fence, improve, and stock his land in accordance with the terms of the lease.

Amending Ordinances have been passed from time to time, and regulations have been made modifying improvement conditions on leases, also allowing for the issue of licenses to graze stock on Crown lands. In November, 1918, an important amendment to the principal Ordinance was passed, amending Section 48, by providing that no resumptions should be made from pastoral leases held under that Ordinance, in class 1 during the first ten years of the lease, and in classes 2 and 3 during the first fourteen years of the lease, and at no time within 5 miles of the Head Station during the whole term of the lease, except for public purposes such as railways, tramways, &c., as specified in sub-section 2 of that section.

The various types of leases, licenses, and permits current are as follows:— (i) Agricultural leases; (ii) pastoral leases; (iii) special leases; (iv) town leases; (v) miscellaneous leases; (vi) leases with right of purchase; (vii) tropical products leases; (viii) leases for horsebreeding stations; (ix) licenses (grazing, occupation, &c.); and (x) pastoral and other permits. (See § 2, 7.) The permit system, and the granting of leases with right of purchase, tropical provident leases, and leases for horsebreeding purposes, were discontinued in 1911. Those issued before that year have, to a great extent, expired and been cancelled, and the land otherwise brought under the Ordinance.

Areas held under Lease, License, and Permit. The following table shows the total areas held under lease, license, and permit at the end of the years 1901 and 1915 to 1920:—

NORTHERN TERRITORY.—AREA HELD UNDER LEASE, LICENSE, OR PERMIT, 1901 AND 1915 TO 1920.

Particulars.	1901.	1915.	1916.	1917.	1918.	1919.	1920.

On 31st December, 1920, the areas held under other leases and licenses were:— Pastoral permits, 4,471,040 acres; annual pastoral leases, 63,360 acres; gold mining leases, 994 acres; mineral leases, 2,299 acres; perpetual leases, 233 acres; agricultural leases, 24,095 acres; miscellaneous leases (including water leases), 1,380,426 acres; coal permits, 3,886,720 acres; tin-dredging leases, 200 acres; and special (garden, occupation, &c.) leases, 188 acres.

§ 8. Closer Settlement and Soldier Settlement.

1. **Introduction.**—In all the States, Acts have been passed authorising the Governments to repurchase alienated lands for the purpose of cutting them up into blocks of suitable size and throwing them open to settlement on easy terms and conditions. Special Acts have also been passed in several of the States authorising the establishment on particular lines of co-operative communities, village settlements, and labour colonies. Lands may be acquired either compulsorily or voluntarily in New South Wales, Victoria, Queensland, and Tasmania, but only voluntarily in South Australia and Western Australia. A scheme of soldier settlement, for those who took part in the European war of 1914–1918, was inaugurated in connexion with repatriation activities, and has been very largely availed of. Particulars of the operation of the scheme will be found in Section XXVIII, § 9 *infra*. In some cases, areas acquired for Closer and Soldier Settlement have been transferred to other uses. The bulk of the land set apart under these projects has been specially acquired from private owners.

The following table gives particulars up to the latest available date of operations under the Closer Settlement Acts for each State and the whole Commonwealth:—

CLOSER SETTLEMENT.—TOTAL AREAS ACQUIRED AND ALLOTTED AT 30th JUNE, 1920.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	C'wealth.

(a) The price of a considerable area resumed has not yet been determined.

(b) Not available.

(c) Incomplete.

2. Government Loans to Settlers.—For the purpose of promoting pastoral, agricultural, and similar pursuits, and with the object of assisting settlers in erecting buildings and carrying out improvements on their holdings, general systems have been established in all the States and in the Northern Territory under which financial aid is rendered to settlers by the State Governments. These general systems are more particularly referred to in the section in this book dealing with "Agriculture." In many of the Closer Settlement and similar Acts, however, special provisions have been inserted with the object of lending money to settlers taking up land under these Acts, with which to build homes or effect improvements. The principal features of these provisions are referred to below.

3. New South Wales.—Under the Closer Settlement Act of 1901 provision was made for the acquisition of private lands or of Crown lands held under lease, for the purpose of closer settlement. No power of compulsory resumption was conferred by the Act, which was in consequence practically inoperative. Under the Closer Settlement Act of 1904 and subsequent amendments, and the Promotion Section of the Closer Settlement Acts, the Government is empowered to resume private lands, either by agreement or by compulsory purchase, and to alienate them on favourable terms to persons who desire to settle and make homes for themselves and their families on the soil. Land acquired under the Closer Settlement Acts is subdivided into blocks or farms, and by notification in the *Government Gazette* is declared to be a settlement purchase area available for application. The *Gazette* notice also gives all necessary information as to the class and character of the land, and the capital value, area, &c., of each block or farm.

(i) *Closer Settlement Purchase.* Under this tenure a settler may acquire the freehold of the land under a system of deferred payments. A deposit of $6\frac{1}{2}$ per cent. of the notified value of the settlement purchase must be lodged with the application, except in the case of discharged soldiers or sailors, who are not required to pay any deposit, and a similar amount by way of instalment, paid annually until the purchase-money, together with interest at the rate of $5\frac{1}{2}$ per cent., is paid off. Prior to 1st September, 1917, the deposit and annual instalments ranged from 5 per cent. to 6 per cent., and the interest from 4 per cent. to 5 per cent. Under this system the balance due to the Crown will be paid off in thirty-one years, the holding then becoming a freehold. A condition of residence for five years attaches to every settlement purchase. Under the amending Act of 1918, interest only may be paid in lieu of such instalments for such periods, and subject to such conditions as the Minister may determine. The Minister may also postpone payment conditionally or unconditionally of such interest, or one or more instalments of purchase money, if satisfied of the inability of the holder to pay, provided that the amount owing to the Crown does not exceed the original capital value plus 80 per cent. of the value of improvements effected on the settlement purchase since commencement of title.

(ii) *Closer Settlement Permissive Occupancies.* The Minister may grant permits to occupy any lands within a settlement purchase area which remain undisposed of, subject to certain terms and conditions.

(iii) *Sales by Auction.* Areas within closer settlement districts necessary for township settlement may be set apart by notification in the *Gazette*. Allotments, each of which may not exceed half an acre in extent, within such areas may be sold by auction.

(iv) *The Promotion Section of the Closer Settlement Acts.* Under this Section any three or more persons or any one or more discharged soldiers within the meaning of the Returned Soldiers' (Amendment) Act 1917, each of whom is qualified to hold settlement purchases and who desire to purchase from the same owner any private lands may, upon entering into an agreement with the owner and subject to valuation by the Advisory Board and the Savings Bank Commissioners, acquire such lands through the Minister on closer settlement conditions.

The number of farms allotted since the passing of the Act to date (1910–11 to 1918–19) was 1,149, the area 471,104 acres, and the amount advanced £2,439,229.

(v) *Areas Acquired and Disposed of.* Up to the 30th June, 1920, 753 estates had been opened for settlement under the Closer Settlement Acts.

The following statement gives particulars of the aggregate areas opened up to the 30th June in each year from 1915 to 1920 :—

NEW SOUTH WALES—CLOSER SETTLEMENT AREAS, 1915 TO 1920.

Year ended 30th June.	Areas.			Capital Values.		
	Acquired Lands.	Adjoining Crown Lands.	Total.	Acquired Lands.	Adjoining Crown Lands.	Total.
	Acres.	Acres.	Acres.	£	£	£
1915	685,156	89,540	774,696	2,685,660	163,254	2,848,914
1916	745,883	91,987	837,870	2,870,116	167,962	3,038,078
1917	747,204	91,996	839,200	2,895,638	168,175	3,063,813
1918	759,526	91,996	851,522	2,947,221	170,259	3,117,480
1919	801,366	94,254	895,620	3,173,885	175,331	3,349,216
1920	993,318	94,254	1,087,572	4,218,713	175,331	4,394,044

The total area thus set apart has been divided into 2,405 farms, comprising 1,011,224 acres, the remaining area being reserved for recreation areas, roads, stock routes, schools, &c.

The following table gives particulars as to the disposal of the farms by closer settlement purchase for the years ended the 30th June, 1915 to 1920 :—

NEW SOUTH WALES.—CLOSER SETTLEMENT ALLOTMENTS, 1915 TO 1920.

Year.	Farms Allotted by Board to Date.			Total Amount received in respect of Settlement Purchases.	Total Number of Applications received.
	Number.	Area.	Value.		
		Acres.	£	£	
1914-15 ..	1,588	742,610	2,834,792	506,073	1,591
1915-16 ..	1,609(a)	748,573(a)	2,860,636(a)	718,660	1,612
1916-17 ..	1,622	759,753	2,905,550	834,485	1,625
1917-18 ..	1,624	760,083	2,907,055	985,863	1,625
1918-19 ..	1,736	786,942	3,105,214	1,139,176	1,740
1919-20 ..	2,326	1,007,000	4,263,001	1,349,393	2,330

(a) Including 45 Settlement Purchase Farms of 24,714 acres, with a capital value of £107,716, since converted into Homestead Farms.

(vi) *Labour Settlements.* These settlements were founded by the Labour Settlements Acts 1893 and 1894, which were amended and repealed by the Labour Settlements Act 1902. Land might be set apart for lease for a period of 28 years as a labour settlement under the superintendence of a Board of Control. The functions of the Board of Control were to enrol members of the settlement; to make regulations concerning the work to be done; to apportion the work among the members; and to distribute the wages and profits. The Minister was empowered to grant financial assistance to the Board of Control. Only two settlements, those at Bega and Wilberforce, were established under the Act. The Labour Settlements Act 1902 was repealed by the Bega and Wilberforce Labour Settlements Act 1917, which dissolves the Boards of Control, and provides for the settlers applying for the blocks they occupy as Homestead Farms under the Crown Lands Consolidation Act 1913.

The Murrumbidgee Irrigation Act 1910 provides for the acquisition of 1,668,000 acres near Narrandera, in Riverina, for irrigation and other purposes in connexion with the Burrinjuck Irrigation Scheme. Part of this area has since been made available.

4. *Victoria.*—(i) *Closer Settlement Act 1915.* The Closer Settlement Act in Victoria is administered by a Board consisting of three persons appointed by the Governor in Council, and entrusted with power to acquire, either compulsorily or by agreement, private lands in any part of the State for the purpose of Closer Settlement. The Board may dispose of all lands acquired, either Crown lands or repurchased lands, on conditional purchase leases either as (a) farm allotments not exceeding £2,500 in value, (b) workmen's homes allotments not exceeding £250 in value, and (c) agricultural

labourers' allotments not exceeding £350 in value. The price of the land must cover the cost of the original purchase and the cost of all improvements. Land acquired by the Board may also be sold in small areas in fee simple as sites for churches, public halls, butter factories, creameries, recreation reserves, or other public purposes.

The Board may approve of an agreement between an owner and one or more persons to purchase a farm or farms, not exceeding £2,500 in value. On the property being acquired by the Board, the applicant obtains a lease under Closer Settlement conditions.

(a) *Closer Settlement Leases.* Every conditional purchase lease is for such a term of years as may be agreed upon by the lessee and the Board, and payment must be made with interest at $4\frac{1}{2}$ per cent. per annum by sixty-three half-yearly instalments, or such lesser number as may be agreed upon. Under the Act, postponement of payment of instalments may be granted by the Board up to 60 per cent. of the value of improvements. The lessee must personally reside during eight months in each year on his allotment, and for six years he must carry out prescribed improvements. Thereafter he may, with permission, transfer, assign, mortgage or sublet his allotment. After twelve years, if all conditions have been fulfilled, a Crown grant, with the same residence condition as that contained in the lease, will be issued. In the case of workmen's homes allotments the land must be fenced within one year, and a dwelling-house to the value of at least £50 must be erected within the same time; within two years further improvements must be made to the value of at least £25. As regards agricultural labourers' allotments, a dwelling-house to the value of at least £30 must be erected within one year, and within two years the allotment must be fenced. In the case of workmen's homes and agricultural labourers' allotments, the lessee may at any time transfer, assign or sublet with the consent of the Board.

(b) *Advances to Settlers.* The Board may make advances for the purpose of fencing and building dwelling-houses, and is empowered to erect dwelling-houses, outbuildings, or improvements on any allotment at a cost not exceeding £500 for any one allotment. Any sum so expended is repayable, with interest added, by instalments extending over a prescribed period, not greater than twenty years. Provision has also been made for deferring payments in case of hardship, as well as for advances (to the extent of 60 per cent. of the value of the improvements) to enable work to be carried on. Special advances may also be granted to purchase wire netting in rabbit-infested districts.

(c) *Loans to Municipalities.* Loans may be made out of the Closer Settlements Fund for the purpose of carrying out any road-making or other public works within the boundaries of an estate.

(d) *Areas acquired and made available for Closer Settlement.* The following statement shows the operations which have taken place in Victoria under the provisions of the Closer Settlement Acts 1898 to 1915, up to the 30th June, 1901 and 1915 to 1920 :—

(a) During 1915, areas previously classed as Workmen's Homes and Agricultural Allotments were transferred to Farm Allotments.

Up to 30th June, 1920, there were also acquired under the Discharged Soldiers' Settlement Act 1917 (including Crown Lands and Closer Settlement Areas taken over), 1,168,779 acres, at a cost of £7,641,526. Applications granted numbered 3,825; and 972,990 acres were made available for farm allotments.

(ii) *The Small Improved Holdings Act 1906.* Under this Act, which has been repealed, 2,822 acres at a cost of £53,568 allotted to 260 settlers were purchased close to towns where industrial employment could be obtained by the settlers.

These settlements are now under the control of the Closer Settlement Board.

(iii) *Village Communities.* The rights of lessees of land in Village Communities are now provided for in the Land Act 1915. Certain unalienated Crown lands were surveyed into allotments of one to twenty acres. The price is not less than twenty shillings an acre. Additional areas may be acquired by conditional purchase. The rent is a nominal one for three years. The total amount of monetary aid advanced up to the 30th June, 1919, was £67,379, of which sum the amount repaid to date was £44,768. After three years a lease may be obtained.

On the 30th June, 1919, there were 346 settlers actually residing, and 146 not residing, but improving, making a total of 492 in occupation. Including wives and children the total number in residence was 1,360.

(iv) *Closer Settlement in the Irrigation Districts.* The movement for closer settlement in the irrigation districts started about eleven years ago, when the State adopted the policy of purchasing large areas of land commanded by irrigation schemes, and subdividing them for intensive culture. The management and supervision of these areas were formerly vested in two bodies—the Closer Settlement Board and the State Rivers and Water Supply Commission, but in order to do away with this dual control, the Amending Closer Settlement Act of 1912 (now incorporated in the Closer Settlement Act 1915) was passed, transferring to the Water Supply Commission the entire management, leasing, and general supervision of all such areas within irrigation districts. The State had expended between three and four million pounds on irrigation works, which were not being used to their full extent. Under the Goulburn Scheme, the largest of the State works, less than half the available water was being used, owing to lack of settlers to cultivate the land as irrigation requires. Previously, in the various districts the average size of farms varied from 400 to 600 acres, while under irrigation from about 12 to 80 acres will now give employment to a good-sized family and furnish them a comfortable living. The large farms of the irrigation districts could not be properly cultivated by their owners, and the only way to make irrigation a success was to subdivide these holdings and bring in farmers to cultivate the smaller areas. To this end the State offered to buy suitable land in any district having a reliable and ample water supply, at a price fixed by impartial expert valuers, and has purchased 180,300 acres for this purpose, and now administers also the irrigated closer settlements established on Crown lands at Merbein and Nyah, which contain respectively about 8,000 acres and 3,500 acres. This land is sold to settlers on $31\frac{1}{2}$ years' terms with $4\frac{1}{2}$ per cent. interest on deferred payments, under what are known as closer settlement conditions, which, while providing for the liberal terms and advances referred to in this paragraph, require, on the part of the settler or his successor, residence on the block for at least eight months in each year. These payments are calculated on the *Crédit Foncier* basis and are equalised through the whole period. As a result, the settlers by paying an additional $1\frac{1}{2}$ per cent., or 6 per cent. in all, in $31\frac{1}{2}$ years pay off both principal and interest. In the early stages of irrigated closer settlement the State undertook, where desired by settlers, to prepare portions of their holdings for irrigation by grading, seeding, check-banking, and constructing distributory channels, settlers being allowed to pay the cost of such works by instalments extending over ten years. The development of these settlements has, however, now reached such a stage that this is no longer necessary. Contract labour is available to new settlers, and there are facilities for the carrying-out of this work locally, but financial assistance to the same extent is still available. To further help the settler of limited means, the State will build a house and allow twenty years to pay for it. The cash payments required are as follows:—On houses costing less than £100, £10; on houses costing more, the cash payment varies from $12\frac{1}{2}$ to 30 per cent. of the estimated cost. The State also makes loans to settlers equal to 60 per cent. of the value of permanent improvements, these loans to be repaid in twenty years. Five per cent. interest is charged on all advances—whether for houses, preparing land, or money furnished the

settler. In the case of discharged soldiers, the cash deposits on both land and houses are dispensed with, and further concessions can be made in the form of suspension of payment of instalments during the first one, two, or three years of occupation. Last year 540 blocks were granted to new settlers, 529 of whom were discharged soldiers. During the past ten years 129,000 acres have been settled in farms averaging fifty-three acres each—which are now the homes of 2,436 new settlers. There are also 153 allotments comprising 6,800 acres ready for immediate occupation, and a further 20,000 acres being prepared for settlers. At Shepparton, one of the oldest of these settlements, there are now 309 settlers living where there were originally twenty-six. At Cohuna, another early settlement, some settlers made such satisfactory progress, that they paid in full their land and other instalments, when their leases, which were for 31½ years, were only some seven years old. In Koyuga there are fifty settlers with good houses, many young orchards, fine crops of lucerne and vegetables, where in November 1910 there was not a house, a family, or an acre of cultivated land. There are now fifteen settlers' homes for every one that existed on these areas when repurchased by the State. One thousand of the settlers are discharged soldiers.

The progress of settlers in the various irrigation districts continues to be most satisfactory. The prices being obtained for their products have enabled a very large number to improve their position, while the high values now placed on and being obtained for irrigation lands is convincing evidence of the great advance made during the last few years.

The volume of production from the irrigated districts is increasing at a most rapid rate. At the Shepparton co-operative cannery it is expected that, during the coming season, 3,000 tons of fruit will be processed. To cope with the further great expansion of output in sight, the Government has advanced to this company a further large amount for the installation of the most modern canning machinery. The cannery has proved a great boon to the district, and a large number of applications for fruit-processing plants have been received from other centres.

In other districts, such as Cohuna, Rochester, Swan Hill, and Tongala, there is also a gratifying change in the settlers' position, the splendid returns from dairying being responsible in a marked degree for the improvement; while at Werribee, which is fast becoming a great lucerne-producing centre, the returns received by the settlers last year from the sale of that fodder were most encouraging.

The Murray River Settlements, both at Nyah and Merbein, are each year becoming more prosperous. Already 200 qualified soldier settlers have been allotted irrigable blocks, but the demand for orchard lands in this part of the State has become so keen, that, with a view to fully meeting all requirements, the Commission acquired the large estate of 30,000 acres known as Red Cliffs, adjacent to Mildura Settlement. It contains irrigable land sufficient to provide holdings for about 1,000 soldiers.

The first portion of this estate between the Murray River and the Mildura Railway, now being prepared for settlement, will provide 300 irrigable holdings. Surveys are well forward, and other preparatory work, such as clearing, is providing employment for the soldiers pending the actual allocation of the blocks. In the meantime, another portion of the estate is being used as a nursery, in which some 2,000,000 vines are being propagated so that an adequate supply of rooted plants will be available for the ensuing season.

This settlement will be supplied with water from the Murray River by means of a powerful pumping plant, which will deliver the water through a concrete rising main into distributary channels lined with concrete to prevent seepage troubles.

It is anticipated that the new settlers on these areas will in a very few years be sharing in the general prosperity of this district.

5. Queensland.—(i) *Closer Settlement.* Under the provisions of the Act of 1906, private lands for closer settlement may be repurchased by the Crown, either by agreement or compulsorily.

(a) *Compulsory Acquisition.* The owner of an estate in possession, the whole of which is proposed to be taken compulsorily, has the right to retain in one block land of the value of £10,000 to £20,000, according to the value of the whole estate. The maximum sum which may be expended in any one year on the acquisition of land for the purpose of closer settlement is £500,000.

(b) *Disposal of Land.* A sufficient part of the land acquired must be set apart for roads, public reserves, and townships, and, up to the end of 1916, the remainder was proclaimed open for selection as agricultural farms under the Land Act 1910, which repealed the Land Acts 1897 to 1909, and under the Closer Settlement Act Amendment.

Act of 1913, the term of the lease was 40 years. The rent to be paid for the first year was equal to £10 for every £100 of the purchasing price; and (no payment being required during the second, third, or fourth years) an annual payment of £6 6s. 0d. for every £100, which continued from the fifth to the fortieth year, would, at the end of the term, have paid off the principal sum together with interest. From 1st January, 1917, the opening of land for agricultural farm selection has not been allowed. Under the present law, the remainder of the land (after provision for roads, reserves, &c.) is opened for selection as perpetual lease selections at an annual rent fixed by the Minister, but at a rate per cent. of the capital value not more than the rate of interest paid by the Government on the purchase money of the estate of which the land forms part. The deposit of 10 per cent. is abolished, but so also is the provision that no rent need be paid during the second, third, and fourth years of the term. The rent may be reappraised for each period of fifteen years.

(c) *Areas Acquired and Selected.* The following table gives particulars of the operations under the above Acts at the end of the year 1901 and of each year from 1915 to 1919 :—

QUEENSLAND.—CLOSER SETTLEMENT, 1901 AND 1915 TO 1919.

Year.				Number of Estates Acquired.	Total Area Acquired to Date.	Total Amount of Purchase Money.	Total Area Selected to Date. (a)
					Acres.	£	Acres.
1901	15	132,760	335,056	124,710
1915	29	664,363	1,713,165	582,788
1916	29	785,311	1,955,060	589,047
1917	30	785,311	1,955,060	587,724
1918	30	785,311	1,955,060	595,719
1919	30	785,311	1,955,060	692,153

(a) In addition, at the end of the year 1919 there were 12,320 acres sold at auction and 3,411 acres retained by the Government for experimental farms and for other sales.

The total area opened for selection up to the end of the year 1919 was 755,823 acres, of which 692,153 acres had been selected by 2,351 selectors. There remained 63,670 acres unselected or reserved. The total amount of rent paid up to the same date was £1,372,793, the amount in arrear being £53,245. At the end of the year 1919 there were 2,351 selectors holding 2,310 agricultural farms, 252 unconditional selections, 236 perpetual lease selections, five prickly-pear selections, and one perpetual lease prickly-pear selection. In addition, land and improvements to the value of £88,024 had been sold at auction.

(ii) *Group Settlement.* The Special Agricultural Selections Acts 1901 to 1905 were partly repealed by the Amending Act of 1909, which was in its turn repealed by the Land Act 1910. Under the last Act, land may be set apart for members of bodies of selectors who desire to settle in the same locality. The terms and conditions are similar to those in force for single selectors. Every group selection is subject to the condition of personal residence during the first five years of the term.

The Special Agricultural Selections Act 1905 provides that financial aid may be granted to all or any of the members of a body of selectors of agricultural homesteads. Advances may also be made to each selector for a value not exceeding £80 for the purpose of buying tools, rations, stock and poultry.

The portions opened for *group settlement* in 1919 numbered 585, and comprised a gross area of 260,994 acres. Up to the end of that year 490 portions, comprising 204,306 acres, valued at £276,930, had been applied for by members of the bodies of settlers for whom they were opened. This part of the Land Act is operated almost exclusively in the settlement of returned soldiers.

6. *South Australia.*—Under the provisions of the Crown Lands Acts the Commissioner may repurchase land for the purposes of closer settlement at a cost not exceeding £600,000 in any two years.

Reference is made on the next page to the provisions of the Irrigation and Reclaimed Lands Act 1908, as consolidated by the Act of 1914, regarding the settlement of reclaimed lands.

(i) *Disposal of Land.* The Crown Lands Act Further Amendment Acts enlarge the value of the blocks into which estates may be subdivided for closer settlement purposes from £2,000 to £4,000 unimproved value; or if the land is suitable for pastoral purposes only, to £5,000. The purchase-money, with interest thereon at a rate per annum as fixed, is payable in 128 half-yearly instalments.

For the first five years, improvements to the value of £3 for every £100 of the purchase money must be yearly effected.

(ii) *Areas Acquired and Selected.* The following table shews the area of land acquired by the Government in South Australia for the purposes of closer settlement, and the manner in which the same has been disposed of under the provisions of the Crown Lands Acts for the years 1902 and 1915 to 1919 :—

SOUTH AUSTRALIA.—CLOSER SETTLEMENT, 1902 AND 1915 TO 1919.

Year.	Area of Lands Re- purchased to 31st Dec.	Agree- ments with Covenants to Purchase.	Total Area Leased as Homestead Blocks.		Perpetual Leases.	Mis- cellaneous Leases.	Sold.	Remainder Un- occupied (including Roads).
			Right of Purchase.	Perpetual Lease.				
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
1902	156,481	-	2,717	3,073	90,128	309	403	59,851
1915	666,299	487,853	753	1,579	51,588	164	65,484	58,878
1916	729,963	487,355	733	1,513	52,138	164	66,607	121,453
1917	743,191	501,439	703	1,531	71,896	144	112,642	54,836
1918	743,191	497,032	703	1,531	54,826	144	124,728	64,227
1919	748,689	508,720	609	1,477	54,116	144	133,460	50,163

During the financial year 1919-20, one property of 19,449 acres was repurchased. The total area repurchased at 30th June, 1920, was 768,138 acres. Of this area 61,853 acres have been transferred to the Forestry Department and the Repatriation Department. The purchase-money was £2,569,350. Of the total area 666,830 acres had been allotted to 2,774 persons, the average area to each being 240 acres.

(iii) *Irrigation Areas.* Under the Irrigation and Reclaimed Lands Act 1914, special provisions are made for granting perpetual leases of reclaimed lands. The maximum area of irrigable or reclaimed land one person may hold in any irrigation area is 50 acres, but in the case of partnerships 50 acres may be held by each partner up to a maximum of 150 acres. Land above the irrigating channels is also offered to lessees of irrigable blocks for dry farming, grazing, &c. Each block is offered under perpetual lease, at a rent not less than a sum equivalent to 4 per cent. on the unimproved value of the land, plus the cost of reclaiming. In the case of swamp lands in the reclaimed lands, a drainage rate of from 5s. to 7s. 6d. per acre per annum is payable. On the irrigable land the water rate has been fixed at 30s. per acre per annum for the first four years, after which an amount will be charged sufficient to cover actual cost of supplying water, and the interest on pumping plants, channels, &c. A sliding scale covers both the rent and water rates for the first four years.

Under Part V. of the Act a fund has been constituted called the Lessees of Reclaimed Lands Loan Fund, consisting of money provided by Parliament to be expended by the Department in assisting settlers on the irrigation areas by fencing, clearing and grading their blocks, and constructing irrigation channels and drains and concrete tanks thereon. Such improvements will be undertaken up to a value not exceeding £15 per acre of the irrigable area in each lessee's block, but before the work can be commenced a deposit must be paid equal to 15 per cent. of the Department's estimated value of such improvements.

The total cost of the work, less amount of deposit paid, will be treated as a loan to the lessee, and will be repayable in twenty equal annual instalments, after the expiration of five years, or at any shorter period if so desired by the lessee, current rate of interest being charged.

Any lessee will be permitted to accept the contract for carrying out his own improvements, according to the specifications and estimate of the Department, up to the maximum amount per acre, as mentioned above.

(iv) *Village Settlement.* Out of the reserved lands, the Commissioner is directed to set apart for the purpose of village settlement such land as he shall consider fit (a) for horticultural purposes, to be termed "horticultural land"; (b) for agricultural purposes, to be termed "commonage land"; and (c) land whereon any irrigation works are situated. Land so set apart is to be divided as follows:—Horticultural lands into blocks of as nearly as practicable equal unimproved value, and of about ten acres in extent; and the commonage lands into one or more blocks of such area as the Commissioner may determine, and the lands so set apart in each case form the district of the association. No person may hold more than two blocks. Commonage lands may only be leased to the association on perpetual lease, and all unleased horticultural blocks are under the control of the association. Every member of each association must provide or contribute towards the maintenance and regulation of irrigation works, and the care and cultivation of the commonage lands.

As the Waikerie and Kingston districts were proclaimed irrigation areas under the Irrigation and Reclaimed Lands Acts 1908 and 1909, this would leave only the Lyrup Village Settlement, which is in a better position, both financially and as regards population, than the others.

(v) *Homestead Blocks.* Aboriginal reservations, except those at Point McLeay or Point Pearce, and other suitable lands may be offered as homestead blocks on perpetual lease or agreement to purchase. Each block must not exceed £100 in value, and residence by a member of the family for at least nine months of every year is compulsory.

There is now hardly any demand for homestead blocks, persons generally preferring small blocks of repurchased or Crown lands on ordinary conditions. The system appears to be of value only in centres of population where work can be obtained, and within a reasonable distance of a school.

(a) *Advances to Blockholders.* Advances up to £50 may be made by the Commissioner to any homestead blockholder who has complied with the conditions of his lease or agreement, to assist in erecting permanent buildings on the blocks, or other improvements. Advances must be repaid, with interest at 4 per cent. per annum, by twenty equal instalments, commencing twelve months from the date of advance. The Commissioner may, in case of hardship, extend the time of repayment, such deferred payments bearing interest at 5 per cent. per annum. The total amount advanced up to the 30th June, 1920, was £41,411, of which £40,013 had been repaid.

(b) *Particulars of Homestead Blocks.* The total number of leases and agreements of which purchase had been completed to the 31st December, 1919, was 2,454, comprising 36,967 acres, at a purchase price of £90,635, or an average of £2 9s. per acre, the average of each holding of which purchase was completed being 15 acres.

7. *Western Australia.*—Under the Agricultural Lands Purchase Act 1909, which repealed and consolidated the Agricultural Lands Purchase Acts 1896 to 1904, sums not exceeding in the aggregate £400,000 may be expended on the repurchase of Crown lands near the railways, suitable for immediate cultivation.

(i) *Acquisition of Land by the Government.* For the purpose of carrying out the provisions of the Acts, a Land Purchase Board has been constituted. Advised by the report of the Board, the Minister, with the approval of the Governor, may make a contract for the acquisition of the land by surrender at the price fixed by the Board, or at any lesser price.

(ii) *Sale of Repurchased Land.* After reservation of part of the repurchased land for public purposes, the remainder is thrown open for selection. The maximum quantity held by one person must not exceed 1,000 acres, or in special cases 2,000 acres.

(iii) *Conditions of Sale to Selectors.* The maximum selling price of any repurchased land is equal to 105 per cent. of the actual cost of the land plus the cost of any improvements made upon it. A lease for twenty to thirty years is issued at a rent the half-yearly instalments of which are to be at the rate of £3 17s. 9d. for each £100 of the selling price. Improvements must be made to the value of one-fifth of the purchase-money every two years of the first ten years of the lease. One-half of the land must be fenced within the first five years and the whole within ten years. Loans may be granted to selectors under the provisions of the Agricultural Bank Acts.

(iv) *Areas Acquired and Selected.* The transactions conducted under the provisions of the Agricultural Lands Purchase Acts are shown for 1901 and for each year from 1915 to 1920 in the subjoined table:—

WESTERN AUSTRALIA.—CLOSER SETTLEMENT, 1901 AND 1915 TO 1920.

(a) Year.	Total Area Acquired.	Total Purchase- money.	Roads, Reserves, &c.	Total Area made available for Selection.	Area Selected during the Year.	Total Area occupied to Date.	Balance of Area available for Selection.	Total Revenue received to Date.
	Acres.	£	Acres.	Acres.	Acres.	Acres.	Acres.	£
1901	46,824	52,764	1,459	45,165	4,295	37,235	7,930	14,451
1914-15	446,804	421,873	15,825	430,979	4,122	272,190	158,789	239,409
1915-16	446,804	421,873	15,825	430,979	342	271,242	159,737	268,232
1916-17	446,804	421,873	15,825	430,979	77	269,648	161,331	295,740
1917-18	446,804	421,873	15,825	430,979	2,813	267,008	163,971	319,759
1918-19	446,804	421,873	15,825	430,979	38,890	304,937	126,002	343,767
1919-20	446,804	421,873	15,825	430,979	40,653	386,707	94,272	363,814

(a) The figures for 1901 are up to 31st December. For subsequent years they are given as up to 30th June.

On the 30th June, 1919, the total expenditure, exclusive of purchase-money but including interest, was £192,901, which left a balance of £150,866. At the same date the amount invested as sinking fund was £143,028.

(v) *Workingmen's Blocks.* Any person not already holding land within the State is entitled to obtain a lease of lands which have been surveyed and thrown open for selection as workingmen's blocks. The maximum area that may be selected by one person is, if within any town or goldfield, half an acre, or five acres elsewhere. The price is not less than twenty shillings per acre, payable in ten years by half-yearly instalments. Residence and improvement conditions must be fulfilled. At the expiration of the lease, or at any time after five years from the date of the commencement of the lease, upon compliance with all conditions, and upon payment of the full purchase-money and fee, a Crown grant will be issued. No person who has once held a workingman's block is allowed to select another, except under very special circumstances.

The following table shews the number and area of accepted applications for workingmen's blocks during each year, as well as the total number and area in existence at the end of the year 1901 and for each year from 1915 to 1920:—

WESTERN AUSTRALIA.—PARTICULARS OF WORKINGMEN'S BLOCKS,
1901 AND 1915 TO 1920.

Year	..	1901.	1915.(a)	1916.(a)	1917.(a)	1918.(a)	1919.(a)	1920.(a)
------	----	-------	----------	----------	----------	----------	----------	----------

NUMBER AND AREA OF ACCEPTED APPLICATIONS DURING YEAR.

Number ..	2	Nil	1	Nil	Nil	Nil	1
Area in Acres	6	Nil	1	Nil	Nil	Nil	5

NUMBER AND AREA OF BLOCKS OCCUPIED AT END OF YEAR.

Number ..	7	189(b)	176	134	108	83	68
Area in Acres	31	584	565	510	482	451	425

(a) For financial year ended 30th June. (b) Increase due to cancelled leases being reinstated.

During the years 1907 to 1911 residential blocks on the goldfields were made available as workingmen's blocks, instead of under residential lease.

8. *Tasmania.*—The principles of closer settlement were not introduced into Tasmania until the Closer Settlement Act of 1906 was passed. Under this Act, which was amended in 1908 and 1911, and consolidated in 1913, power is given to the Minister for Lands, on the recommendation of the Closer Settlement Board, to purchase compulsorily or by agreement private land in any part of Tasmania for the purpose of closer settlement, and also to deal with and dispose of any unoccupied Crown land for the same purpose.

(i) *Disposal of Land.* Lands so brought under the Act are subdivided into farm allotments of a suitable size—not exceeding £4,000 in value—and are disposed of by way of lease for 99 years. The rental is determined by the Board at a rate not exceeding 5 per cent. per annum on the capital value of the land. Any lessee who has fulfilled the conditions under the Act may, after the expiration of ten years of the term of the lease, purchase the land leased to him. The Minister has power to dispose of the fee simple of such land in any estate which is considered unsuitable for closer settlement.

A lessee must improve his holding to a value equal to $2\frac{1}{2}$ per cent. on the capital value of the land in each of the first ten years of the term of his lease, and he must, within two years of the date of the lease, personally reside on his allotment during at least eight months of each of the following nine years. Provision is made for reserving a proportion of the allotments thrown open, and leasing the same, under special terms and conditions, to *bona fide* immigrants.

(ii) *Advances to Settlers.* The total advance by the Government in aid of the cost of effecting improvements to any one lessee must not exceed pound for pound of the sum expended by him in building and other improvements. Such advances must be repaid, together with interest at 5 per cent., in equal half-yearly instalments within a period not exceeding 21 years.

(iii) *Special Sales.* The fee simple of land acquired may be disposed of by sale on the recommendation of the Board as sites for churches, public halls, dairy factories, fruit-preserving factories, mills, or creameries. The area sold may not exceed one acre in the case of a church or public hall, or five acres in other cases.

(iv) *Areas Acquired and Selected.* Up to the 30th June, 1920, twenty-seven areas had been opened up for closer settlement. Particulars for ten years are given in the following statement:—

TASMANIA.—CLOSER SETTLEMENT, 1911 TO 1920.

Year.	Number of Farms made Available.	Number of Farms Allotted.	Area of Farms Allotted.	Rental of Farms Allotted.	Total Area Purchased.
			Acres.	£	Acres.
1911	37	36	4,965	168	5,143
1912	11	7	3,912	563	6,147
1913	18	21	5,652	1,134	3,745
1914	24	17	8,975	1,959	10,756
1915	36	53	15,153	4,393	12,930
1916	5	11	1,729	476	157
1917	5	15	3,900	993	1,939
1918	8	2,366	205	Nil
1919	Nil	Nil
1920	5	5	756	492	1,647

The total purchase money paid by the Government up to the 30th June, 1920, was £296,897.

9. *Northern Territory.*—In the Northern Territory, a Board is constituted to deal with assistance to settlers. In view of the unsuccessful attempts to establish Tropical Agricultural Settlement, the Board at present only grants assistance in exceptional cases. Preference is given to returned soldier applicants for pastoral lands, other things being equal. No other concession is granted by the Classification Board, but the Repatriation Department renders assistance for the purchase of stock, &c.

§ 9. Occupation of Crown Lands under Leases and Licenses Issued by Mines Departments.

1. **Introduction.**—Leases and licenses for the occupation of Crown lands for mining and other purposes are issued by the Mines Departments in all the States. Such leases and licenses may be issued with respect to all Crown lands, whether otherwise unoccupied or whether occupied also under leases and licenses issued by the Lands Departments. Certain Crown lands, such as reserves, &c., are, however, subject to special conditions.

(i) *Mining on Private Lands.* Certain of the Crown lands of the several States have been alienated from time to time, subject to various reservations in respect of gold and other minerals which might afterwards be found therein. Other lands have been alienated without such reservation, but as the mineral gold does not pass from the Crown unless by express conveyance, it has remained the property of the State on all alienated lands. All lands alienated or in process of alienation are open to mining for gold; but to mining for other minerals, those lands only are open, in respect of which the rights are reserved in the grants. There are, however, generally certain reservations, such as those with reference to town or village lands and lands which have been built on or are used for special purposes. The working of minerals on private lands is regulated in the several States either by special Acts or by special provisions of the Acts relating to mining.

(ii) *Leases and Licenses Issued and Total Areas of Crown Lands Occupied.* The following tables shew the total areas of Crown lands for which leases and licenses for mining purposes were issued in each State during 1901, and for each year from 1915 to 1919 inclusive, and also the total areas of Crown lands occupied for mining purposes at the end of each year during the same period:—

(a) Including private lands, leases, and water right licenses only. (b) Exclusive of lands held under miners' rights only. (c) Exclusive of miners' rights. (d) Excluding Victoria.

2. **New South Wales.**—Under the provisions of the Mining Act 1906 and the regulations made thereunder, Crown lands may be occupied for mining or other purposes by virtue of (i) miners' rights; (ii) business licenses; (iii) authorities to prospect; or (iv) leases.

A description of the conditions under which these licenses and leases are granted may be found in previous issues of the Year Book. (See Year Book No. 6, p. 307.)

(i) *Particulars of Leases and Licenses Issued, 1919.* The following table gives particulars of leases and licenses of Crown lands issued by the Mines Department during the year 1919 :—

NEW SOUTH WALES.—LEASES AND LICENSES ISSUED BY MINES DEPARTMENT DURING YEAR 1919.

Particulars.	Act under which Issued.		Purpose for which Issued.	Area, 1919.

3. *Victoria.*—The occupation of Crown lands for mining and auxiliary purposes in this State is regulated by the Mines Act 1915. The Department of Mines is authorised to issue mining leases (gold-mining, mineral, and dredging), also licenses (searching, tailings, and water-right), while miners' rights and business licenses are issued by the Treasury Department, and claims and residence areas are registered by local mining registrars. A description of the conditions governing the issue of these leases and licenses will be found in previous editions of the Year Book. (See Year Book No. 6. p. 308.)

Licenses of auriferous lands not for mining purposes may be issued by the Lands Department.

Leases and Licenses Issued and Areas Occupied for Mining. Particulars of leases and licenses for mining purposes of Crown lands alone are not available, the official returns including also private lands. During the year 1920 the number of mining leases, licenses, &c., issued was 168, covering an area of 7,032 acres; the rent, fees, &c., received thereon amounted to £742. No particulars are available as to the total area of either Crown or private land occupied for mining purposes.

4. *Queensland.*—The occupation of Crown lands for mining purposes in this State is regulated by the Mining Acts 1898 to 1920, the Mining for Coal and Mineral Oil Act, The Petroleum Act, and the Miners' Homestead Perpetual Leases Act. Under these Acts the Department of Mines is authorised to issue (i) miners' rights: (ii) mining leases; (iii) mining leases and licenses for coal and mineral oil; and (iv) miners' homestead perpetual leases.

The conditions which govern the issue of miners' rights and mining leases are described in previous issues of the Year Book. (See Year Book No. 6, p. 309.) The Act under which Miners' Homestead Leases were granted has been amended, and the title is now "Miners' Homestead Perpetual Leases." Most of the old provisions remain, but rent is now perpetual, and is based on the value of the land:—If sold by auction 3 per cent. of the purchase price, otherwise $1\frac{1}{2}$ per cent. of the capital value of the land. Rental is also subject to re-appraisal every ten years.

Mineral leases for coal may be granted for a term of 21 years at an annual rent of one shilling an acre, together with a royalty, according to the distance the lease is from a seaport or other place of delivery, of fourpence to sixpence per ton of coal raised during the first five years of the lease, and of eightpence to one shilling per ton during the remainder of the term. A lease for mineral oil with a maximum area of 320 acres may be granted for a term of 21 years at an annual rental of one shilling per acre, with a royalty of 5 per cent. of the value of all crude oil produced. Licenses to occupy not more than 2,560 acres may be granted to any person desiring to prospect Crown lands for coal and mineral oil upon payment of one penny for every acre comprised in the application.

Licenses to prospect for petroleum may be granted for areas up to 2,000 acres at a rental of one penny per acre, for a period of five years, and the licensee may during the currency of his license take portion of the area (60 acres) as a mineral lease at a peppercorn rental and a royalty of $12\frac{1}{2}$ per cent. of the gross value of all petroleum obtained from such lease, and he is also entitled while he is occupying and working his lease to $2\frac{1}{2}$ per cent. of the value of all petroleum which may be obtained from the balance of the land comprised in his original license.

Mineral leases up to 30 acres may be granted to mine for petroleum at a peppercorn rental and royalty of $12\frac{1}{2}$ per cent. of gross value of oil obtained.

The "Mining on Private Land Act 1909" authorises the granting of leases, &c., on and under private land, under conditions as to compensation, &c.

(i) *Particulars of Leases and Licenses Issued, 1919.* The subjoined table gives particulars of the leases and licenses of Crown lands issued for mining purposes during the year 1919:—

QUEENSLAND.—LEASES AND LICENSES ISSUED BY MINES DEPARTMENT
DURING YEAR 1919.

Lease or License.	Mining Leases.				Miners' Homestead Leases.	Coal Prospecting Licenses.	Miscellaneous Holdings.
	Purpose for which issued.	To mine for gold.	To mine for minerals other than gold.	Tramways.	Buildings and machinery.	Residence, business, &c.	Mining, residence, &c.

(a) Exclusive of lands held under miners' rights only.

5. *South Australia.*—In this State leases and licenses for mining purposes are issued by the Department of Mines under the authority of the Mining Act 1893, and amending Acts. Under these Acts mining and prospecting are permitted in virtue of (i) miners' rights; (ii) mining leases; (iii) coal or oil leases; and (iv) miscellaneous leases, and in addition occupation of Crown lands is permitted by virtue of (v) business claims, and (vi) occupation licenses.

The conditions which govern the issue of these various leases and licenses have been described in previous issues of the Year Book. (See Year Book No. 6, p. 311.)

(i) *Particulars of Leases and Licenses.* The following table gives particulars of leases and licenses of Crown lands issued by the Mines Department during the years 1919 and 1920 :—

6. *Western Australia.*—The issue of leases and licenses by the Mines Department is regulated by the Mining Act 1904. Under this Act Crown lands may be occupied by virtue of (i) miners' rights; (ii) mining leases; and (iii) miners' homestead leases.

The conditions governing the issue of these leases and licenses are described in previous issues of the Year Book. (See Year Book No. 6, p. 312.)

(i) *Particulars of Leases and Licenses Issued, 1920.* The following table gives particulars of mining leases and licenses of Crown lands issued during 1920:—

(a) Exclusive of miners' rights.

7. *Tasmania.*—Under the provisions of the Mining Act 1917, Crown lands in this State may be occupied for mining and auxiliary purposes by virtue of (i) prospectors' licenses; (ii) miners' rights; (iii) mining leases; and (iv) miscellaneous licenses. Business and residence licenses within mining areas may be issued by the Lands Department.

A description of the conditions under which these leases and licenses are issued may be found in previous editions of the Year Book. (See Year Book No. 6, p. 314.)

(i) *Particulars of Leases and Licenses Issued, 1920.* The following table shows particulars of leases and licenses of Crown lands, exclusive of prospectors' licenses and miners' rights, issued by the Mines Department during the year 1920 :—

Total ..	50,362	53,060	53,462	54,391	46,600	46,491	46,380

(a) See note to preceding table.

8. Northern Territory.—The granting of leases and licenses for mining purposes in the Northern Territory is under the control of the Administrator. The area of land held under Mining Regulations in the Northern Territory has been previously referred to in § 7 of this chapter (page 180).

§ 10. Resumption by Crown of Alienated Lands.

1. **General.**—Under various Acts, alienated lands may be compulsorily resumed by the Crown in the several States for certain purposes, generally connected with works of a public nature. Resumptions for closer settlement purposes have already been referred to (see § 8 above). In most of the States there are Lands Clauses or similar Acts providing the machinery, and indicating the procedure to be adopted in assessing the compensation to be paid by the Crown to private owners in cases where the parties have failed to agree as to the amount to be paid. The provisions of these Acts are generally incorporated in the special Acts specifying the purposes for which alienated lands may be resumed. Lands leased for pastoral purposes may generally be resumed by the Crown on short notice. The lessee is ordinarily entitled to compensation for land resumed, for loss or depreciation in value of the lease caused by such resumption, and for improvements.

(a) *Commonwealth Territory.* Lands may be resumed under the Lands Acquisition Act 1906–18.

(b) *New South Wales.* Alienated lands may be recovered by the Crown for authorized works and certain public purposes under the provisions of the Public Works Act 1912, and in other cases may be acquired by the Crown by purchase, gift, or surrender under Executive authority. Alienated lands required for public roads may be resumed under the Public Roads Act 1902, and if containing gold may be resumed for mining under section 72 of the Mining Act 1906. Lands dedicated or granted by the Crown for public purposes may be resumed under Section 25 of the Crown Lands Consolidation Act 1913, and section 1 of the Public Trusts Act 1897. Surrender and exchange of lands alienated or in process of alienation may be carried out under section 195 of the Crown Lands Consolidation Act 1913.

(c) *Victoria.* In Victoria, lands may be resumed in accordance with the provisions of the Lands Compensation Act 1915, the Public Works Act 1915, the Railways Lands Acquisition Act 1915–1918, the Land Act 1915, the Local Government Act 1915, the Water Act 1915, and the Forests Act 1915.

(d) *Queensland.* In this State, alienated lands may be resumed under the provisions of the Public Works Land Resumption Acts 1906 to 1917 for any of the purposes specified in section 4 of that Act.

(e) *South Australia.* In this State the principal Acts under which land is repurchased for public works are the Railway Commissioners Act 1887, the Water Conservation Acts 1886, 1889, and 1900, the Waterworks Act 1882, the Sewers Act 1878, Land for Public Purposes Act 1914, and the Lands Clauses Consolidation Act 1847 to 1918.

(f) *Western Australia.* In Western Australia private lands may be resumed under the provisions of the Land Act 1898, the Roads Act 1911, Agricultural Lands Purchase Act, and the Public Works Act 1902.

(g) *Tasmania.* Alienated lands in Tasmania may be resumed under the provisions of the Land Vesting Act 1894, by agreement; under the Public Works and Crown Lands Acts, by arbitration; and under the Lands Resumption Act 1910, compulsorily.

(h) *Northern Territory.* The Lands Acquisition Ordinance 1911 provides for resumption.

2. **Areas Resumed.**—Particulars of land resumed by the States for public works, &c., are not available.

§ 11. Alienation and Occupation of Crown Lands in the Several States.

1. **Introduction.**—The tables given in the previous parts of this section shew separately the areas alienated, in process of alienation, and occupied under various tenures in the several States. The tables given below shew collectively the general condition of the public estate in each State, having regard to (a) the area alienated absolutely, which includes free grants, sales, and conditional purchases for which grants have been issued, the conditions having been complied with; (b) the area in process of alienation, comprising holdings for which the fee simple has not yet been alienated, but which are in process of sale under systems of deferred payments; (c) the area occupied under all

descriptions of leases and licenses; and (d) the area unoccupied, which, ordinarily, includes roads, permanent reserves, forests, &c. In some cases, however, lands which are permanently reserved from alienation are occupied under leases and licenses, so that in such cases the areas reserved are comprised in class (c) and not in class (d). Particulars of leases and licenses of reserved areas, as distinguished from leases and licenses of other lands, are not available. It should be observed that in many cases lands occupied under leases or licenses for pastoral purposes are held on short tenures only, and could thus be made available for settlement practically whenever required.

2. **New South Wales.**—The total area of the State of New South Wales (exclusive of Commonwealth Territory) is 198,036,500 acres, of which on the 30th June, 1920, 41,885,762 acres, or about one-fifth, were alienated absolutely; 20,876,424 acres, or about one-tenth, were in process of alienation; 115,861,222 acres, or upwards of three-fifths, were occupied under Lands Department, Western Land Board, or Mines Department leases and licenses. The next table shows the areas alienated, in process of alienation, held under leases and licenses, and unoccupied; in 1901 and from 1915-16 to 1919-20.

During the year 1919-20, a total area of 671,327 acres became available for Crown leases, homestead farms, suburban holdings, additional holdings, &c. Of this area, 1,524 acres were made available for irrigation farms and allotments, and 23,454 acres were acquired under the Closer Settlement Promotion Act. In addition, 1,422,625 acres were made available for soldiers' settlement.

**NEW SOUTH WALES.—ALIENATION AND OCCUPATION OF CROWN LANDS,
1901 AND 1916 TO 1920.(a)**

Particulars.	Area in Acres.					
	1901.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.

Under system of deferred payments ..	20,044,703	18,315,181	18,693,915	19,225,824	19,435,807	19,365,866
Under system of homestead selections (including leases converted, but excluding grants issued) ..	1,550,985	(b)	(b)	(b)	(b)	(b)
Closer settlement purchases	1,094,475	1,153,822	1,244,203	1,288,407	1,510,568
Total area in process of alienation ..	21,595,688	19,409,656	19,847,737	20,470,027	20,724,214	20,876,424
3. Held under Leases and Licenses.						
Total under Lands Department and Western Land Board ..	126,921,161	118,641,247	117,015,359	116,159,073	115,110,607	115,631,338
Mineral and auriferous leases and licenses (Mines Department) ..	134,209	224,621	224,593	231,981	225,134	229,884
Total leases under all Government Departments ..	127,055,370	118,865,868	117,239,952	116,391,054	115,335,741	115,861,222
4. Unoccupied ..	23,543,468	19,397,660	20,287,586	20,320,247	20,610,010	19,413,092

Area of State (exclusive of Commonwealth Territory)—198,036,500 acres.

(a) The figures for 1901 are up to the 31st December, while for the other years given they are up to the 30th June. (b) Now included under Homestead grants.

3. **Victoria.**—The total area of the State of Victoria is 56,245,760 acres, of which 24,605,825 acres, or about three-eighths, had been alienated absolutely up to the end of the year 1919; 8,811,478 acres were in process of alienation under deferred payments and Closer Settlement Schemes; and 10,944,854 acres were occupied under leases and licenses (exclusive of leases and licenses held under the Mines Department). The following table shews the areas alienated and in process of alienation, together with the areas reserved, leased, and available for occupation at the end of the year 1901 and from 1915 to 1919:—

**VICTORIA.—ALIENATION AND OCCUPATION OF CROWN LANDS,
1901 AND 1915 TO 1919.**

Particulars.	Area in Acres.					
	1901.	1915.	1916.	1917.	1918.	1919.
1. <i>Alienated</i>	20,066,875	24,256,222	24,345,425	24,427,467	24,503,531	24,605,825
2. <i>In Process of Alienation</i> —						
Exclusive of Mallee, &c. ..	3,587,668	2,025,172	2,069,321	2,059,101	2,051,422	2,022,373
Mallee Lands	87,806	5,534,655	5,682,094	5,500,708	5,511,340	6,250,742
Under Closer Settlement Acts	494,965	507,500	518,068	527,237	514,128
Village Settlements	55,077	20,861	19,989	18,175	16,888	15,235
Total	3,730,351	8,075,653	8,278,904	8,096,052	8,106,887	8,811,478
3. <i>Leases and Licenses Held</i> —						
Under Lands Department ..	17,110,709	13,035,612	12,433,959	12,383,810	10,649,247	10,944,854
Under Mines Department(a)
4. <i>Unoccupied Crown Lands</i> (b) ..	15,337,825	10,878,273	11,187,472	11,333,431	12,986,095	11,883,603

Total area of State—56,245,760 acres.

(a) Not available. (b) Including leases and licenses held under the Mines Department, which are not available.

Crown lands in Victoria include roads, 1,751,757 acres; water reserves, 313,702 acres; agricultural colleges, &c., 85,882 acres; State forests and timber reserves (under Forest Act), 4,129,000 acres; State forests and timber reserves under Land Acts, 330,600 acres; reserves in the Mallee, 397,881 acres; unsold land in towns, &c., 1,936,645 acres; and other reserves, 303,000 acres.

4. **Queensland.**—The total area of this State is 429,120,000 acres, of which, on the 31st December, 1919, 16,893,719 acres, or about one twenty-fifth, were alienated absolutely; 9,064,089 acres, or about one forty-seventh, were in process of alienation; 326,783,036 acres, or about three-quarters, were occupied under leases and licenses; roads, reserves, &c., occupied 16,858,444 acres, the remaining 59,520,712 acres being unoccupied. From 1901 to 1919 the area alienated absolutely increased by 3,360,251 acres, or 24.8 per cent., and the area in process of alienation by 6,272,425 acres, or 225 per cent.

The following table shews the areas alienated absolutely, the areas in process of alienation, and the areas held under various forms of lease and license at the end of the year 1901 and from 1915 to 1919 :—

**QUEENSLAND.—ALIENATION AND OCCUPATION OF CROWN LANDS,
1901 AND 1915 TO 1919.**

Particulars.	Area in Acres.					
	1901.	1915.	1916.	1917.	1918.	1919.
1. Alienated Absolutely.

5. Unoccupied	132,770,889	53,277,483	59,932,387	64,436,517	59,929,584	59,520,712

Total area of State—429,120,000 acres.

The area open for selection (as distinguished from occupation for purely pastoral or special purposes) under every mode at the beginning of the year 1919 was 16,434,004 acres, and the area opened during the year was 5,316,683 acres, while the area withdrawn was 1,198,063 acres. The area selected was 7,764,507 acres, and the area remaining open at the end of the year was 12,788,117 acres. The number of grazing selections was 488 as against 385 in the previous year, and their gross area 6,531,977 acres, as against 5,709,287 acres.

5. South Australia.—The area of the State of South Australia is 243,244,800 acres. In this State, at the end of the year 1919, there were 10,857,816 acres, or about one twenty-fourth, alienated absolutely; 3,038,084 acres, or about one-eightieth, were in process of alienation; 114,288,149 acres, or about one-half, were occupied under leases and licenses; while the remaining 115,060,751 acres were unoccupied. The subjoined table shews for South Australia the areas of land alienated absolutely, and in process of alienation under deferred payments, and the area held under different forms of leases :—

**SOUTH AUSTRALIA.—ALIENATION AND OCCUPATION OF CROWN LANDS,
1901 AND 1915 TO 1919.**

Total area of State—624,588,800 acres.

(a) Figures are now given as up to the 30th June. (b) On the previous 31st December.
(c) Not available.

7. *Tasmania.*—Of the total area of Tasmania, namely, 16,777,600 acres, there were at the end of the year 1919, 5,241,292 acres, or about three-tenths, alienated absolutely; 1,054,111 acres, or about one-sixteenth, were in process of alienation; 2,003,661 acres, or about one-eighth, were occupied under leases and licenses for either pastoral, agricultural, timber, or mining purposes; or for closer or soldier settlement; or occupied or reserved by the Crown; the remaining 8,478,536 acres, or about one-half, being unoccupied. The following table shews the areas alienated, in process of alienation, and held under lease or license, and the area unoccupied at the end of the year 1901 and from 1915 to 1919. Closer Settlement leased areas are in the latter two years not included in the area alienated absolutely, although the settlers have begun to exercise their right of purchase, which right becomes operative ten years after date of lease :—

TASMANIA.—ALIENATION AND OCCUPATION OF CROWN LANDS, 1901 AND
1915 TO 1919.

Total area of State—16,777,600 acres.

(a) Included in 1. *Alienated Land.*

8. **Northern Territory.**—On the 1st January, 1911, the Northern Territory was taken over by the Commonwealth. In the Northern Territory at the end of the year 1920, there were 476,556 acres, or only about one seven-hundred-and-fourth part, alienated absolutely; 143,274,151 acres, or more than two-fifths, were held under leases and licenses; while the remaining 191,366,093, or nearly three-fifths, were unoccupied. The following table shews the area of land alienated absolutely, and also the area under lease :—

NORTHERN TERRITORY.—ALIENATION AND OCCUPATION OF CROWN LANDS, 1901 AND 1916 TO 1920.

Total area of Northern Territory—335,116,800 acres.

(a) Including Aboriginal and other reserves, and Mission stations.

§ 12. Classification of Holdings According to Size.

1. **General.**—The classification of holdings according to their area is of interest chiefly in relation to the efforts made by the several States in recent years to promote settlement on the land on blocks of suitable size, especially by means of the Closer Settlement Acts. Returns shewing such a classification are not available for Queensland and the Northern Territory.

The following table gives particulars of the number of holdings in area series, as returned to the collectors of agricultural and pastoral statistics, for all the States excepting Queensland, and for the Federal Capital Territory, to the latest available date :—

CLASSIFICATION OF HOLDINGS (ONE ACRE AND OVER) IN AREA SERIES.

Size of Holdings.	N.S.W. 1919-20. (b)	Victoria. 1918-19.	S. Aust. 1919-20.	W. Aust. 1919.	Tasmania. 1919-20.	Federal Territory. 1919-20. (b)

(a) In New South Wales, including Federal Capital Territory, an alteration was made in 1919-20 regarding the smaller holdings included in the classification. In previous years, many holdings (nearly all from 1 to 5 acres in extent), which were not used for agricultural or pastoral purposes, were included. In 1919-20, there were included only holdings on which improvements had been effected and upon which agricultural or pastoral activities were conducted.

2. **New South Wales.**—The total number of holdings of one acre and over in area in this State on the 31st March, 1901, was 69,439. On the 31st March, 1920, the corresponding number was 78,279. The following table shows the number of holdings for which returns were received for 1900-1 and the years 1913-14 to 1919-20, except 1916-17 and 1917-18, figures for which are not available :—

§ 13. The Progress of Land Settlement, 1901 to 1919.

1. *Recent Progress*.—The progress of settlement and the growth of land alienation in the States of the Commonwealth under recent legislation is seen in the subjoined statement, which shews concisely the condition of the public estate in each State and in the Commonwealth, at the end of 1901 and of each year from 1915 to 1919 inclusive. The effect of the land laws during that period has been generally to diminish the number of large holdings, at the same time restricting the area held under lease, while both the area alienated and the area in process of alienation have increased. As leases of large areas fall in or are otherwise terminated they are in many cases not renewed, but the land is then cut up for the purpose of settlement under systems of deferred payment; the State Governments, also, have in many cases acquired by repurchase considerable areas under the provisions of the various Closer Settlement Acts. Further, greater facilities have been granted to the working classes to acquire possession of the soil, and special inducements have been offered to *bona fide* settlers by the introduction of new forms of tenure on easy terms and conditions.

From 1901 to 1919 the area alienated absolutely in the whole Commonwealth increased by 31,945,650 acres, or more than 40 per cent.; the area in process of alienation increased by 20,948,928 acres, or nearly 60 per cent; the area leased by 216,268,246 acres, or nearly 30 per cent; while the area unoccupied decreased by 269,162,824 acres, or 25 per cent.

TOTAL AREA ALIENATED, IN PROCESS OF ALIENATION, HELD UNDER LEASE OR LICENSE AND UNOCCUPIED,

EXPRESSED ABSOLUTELY AND AS PERCENTAGES OF AREA OF ENTIRE STATE FOR THE YEARS 1901 AND 1915 TO 1919.

^a Including roads and reserves. ^b To 30th June. ^c Including aboriginal reserves and mission stations.
^d Including Federal Territory (601,580 acres). ^e Including Federal Territory: 41,112 acres, or 6.83 %, alienated; 78,812 acres, or 13.10 %, in process of alienation; 152,865 acres, or 25.41 %, held under lease or license; 328,791 acres, or 54.66 %, occupied by the Crown or unoccupied. ^f Including Federal Territory: 41,269 acres, or 7.07 %, alienated; 79,124 acres, or 13.56 %, in process of alienation; 152,386 acres, or 26.11 %, held under lease or license; 310,881 acres, or 53.26 %, occupied by the Crown or unoccupied.

2. Diagram shewing Condition of Public Estate. The following diagram shews the condition of the public estate in the Commonwealth at the end of the year 1917, since which year some slight increases or decreases, which can be seen from the tables (*supra*) have occurred. The square itself represents the total area of the Commonwealth, while the relative areas of individual States are shewn by the vertical rectangles. The areas alienated absolutely, in process of alienation under systems of

deferred payments, and the areas held under leases or licenses, are designated by the differently-shaded areas as described in the reference given below the diagram, while the areas unoccupied are left unshaded :—

3. Federal Capital Territory.—The following particulars relate to the tenures of land within the Federal Capital Territory at the end of the year 1920 :—

FEDERAL CAPITAL TERRITORY, TENURES OF LAND, 1920.

	Acres.
Area of acquired lands	204,094
Lands alienated	41,269
In process of alienation (conditional purchases and conditional leases) ..	78,034
Held under lease issued by the State	152,386
Unoccupied lands (roads, reserves, &c.)	107,827
Total Area of Territory	583,660

SECTION VII.

PASTORAL PRODUCTION.

§ 1. Initiation and Growth of Pastoral Industry.

1. **Early Statistics.**—In earlier issues of the Year Book will be found a brief reference to the pastoral industry in Australia prior to the year 1860. (See Year Book No. 6, page 330.)

2. **Subsequent Statistics.**—While the statistical records of live stock in Australia prior to the year 1860 are somewhat defective, from that year onwards fairly complete particulars are available for most of the States. At the present time, statistics of live stock are collected annually in all the States, principally through the agency of the police, but in the years 1885 to 1888 inclusive, and 1893 to 1895 inclusive, these particulars were not collected in South Australia, and similar gaps occur in the Victorian records for the periods 1895 to 1899 inclusive, and 1901 to 1903. In order to obtain totals for the Commonwealth for these years the missing numbers have been supplied by interpolation. The results so obtained probably differ but slightly from the actual numbers for the respective years.

3. **Increase in Numbers.**—Particulars concerning the numbers of each of the principal kinds of live stock in the Commonwealth at decennial intervals from 1860 to 1910, and from 1915 onwards in single years, are given in the following table, and are shewn continuously in the graphs hereinafter.

During the fifty-nine years covered by the table the live stock of the Commonwealth increased considerably, horses 461 per cent., cattle 221 per cent., sheep 275 per cent., and pigs 98 per cent. The average annual increases which these aggregates represent are as follows:—Horses, 2.97 per cent.; cattle, 2.00 per cent.; sheep, 2.27 per cent.; and pigs, 1.27 per cent.

COMMONWEALTH LIVE STOCK, 1860 TO 1919.

Year.				Horses.	Cattle.	Sheep.	Pigs.
1860	431,525	3,957,915	20,135,286	351,096
1870	716,772	4,276,326	41,593,612	543,388
1880	1,061,078	7,523,000	62,176,027	815,776
1890	1,521,588	10,299,913	97,881,221	891,138
1900	1,609,654	8,640,225	70,602,995	950,349
1910	2,165,866	11,744,714	92,047,015	1,025,850
1915	2,377,047	9,931,416	69,257,189	763,693
1916	2,436,148	10,459,237	76,668,604	1,006,763
1917	2,497,903	11,829,138	84,965,012	1,169,365
1918	2,527,149	12,738,852	87,086,236	913,902
1919	2,421,201	12,711,067	75,554,082	695,968

4. **Fluctuations.**—The increases referred to, however, have not been continuous, marked fluctuations having taken place during the period, mainly on account of the droughts which have from time to time left their impress on the pastoral history of Australia. These were in evidence in 1869, 1877, 1884, 1895 and subsequent years, 1902, to some extent in 1908, and in a severer form during the earlier half of 1912, and again during 1914 and 1915. Thus, at the commencement of hostilities, Australia was settling down to a disastrous drought, and the termination of the war likewise marked the beginning of a protracted dry spell which was not broken until the winter of 1920. Though the whole of Australia was visited by drought in this latter instance the visitation was not concurrent in all parts of the Commonwealth, and much country suitable for agistment purposes was available at intervals, which fact probably accounted for the slight losses of cattle recorded during 1919. The number of sheep however decreased by 11,532,154, and the wheat crop was practically a failure.

The extraordinary recuperative power of Australia is reflected in the large increases in the numbers of stock which occurred in the good seasons supervening on the various droughts. Thus, in the nine years from 1902 to 1911, horses increased by 754,426, cattle by 4,766,212, and sheep by 39,335,174, the corresponding increases per cent. per annum being horses 4.57 per cent., cattle 5.90 per cent., and sheep 6.30 per cent.

The years in which the numbers of live stock attained their maxima are as follows :—Horses, 1918, 2,527,149; cattle, 1918, 12,738,852; sheep, 1891, 106,421,068; and pigs, 1917, 1,169,365.

5. **Live Stock in Relation to Population.**—The number of each kind of live stock per head of the population of the Commonwealth has varied during the past fifty-eight years in the manner shewn in the succeeding table :—

NUMBER OF AUSTRALIAN LIVE STOCK PER HEAD OF POPULATION, 1860 TO 1919.

Year.	Horses.	Cattle.	Sheep.	Pigs.	Year.	Horses.	Cattle.	Sheep.	Pigs.
1860 ..	0.38	3.45	17.58	0.31	1914 ..	0.51	2.24	15.91	0.17
1870 ..	0.43	2.60	25.24	0.33	1915 ..	0.48	2.01	14.04	0.15
1880 ..	0.48	3.37	27.87	0.37	1916 ..	0.50	2.14	15.68	0.21
1890 ..	0.48	3.27	31.06	0.28	1917 ..	0.50	2.39	17.13	0.24
1900 ..	0.43	2.29	18.75	0.25	1918 ..	0.50	2.51	17.16	0.18
1910 ..	0.49	2.65	20.80	0.23	1919 ..	0.46	2.41	14.32	0.13

Considered in relation to population, the live stock attained its maximum for the period 1860–1919 in the quinquennium 1890–4, and its minimum in the year 1902. During the period under review, the number of horses varied but slightly in proportion to population, the range for the years shewn above being from 0.33 to 0.51 per head. In the case of cattle, the corresponding limits of variation were 2.01 and 3.45; sheep, 14.04 and 31.06; and pigs, 0.13 and 0.37.

6. **Live Stock in Relation to Area.**—The numbers of live stock per square mile in the several States and Territories of the Commonwealth are given in the following table:—

NUMBER OF LIVE STOCK PER SQUARE MILE.

States and Territories.	Date.	Horses.	Cattle.	Sheep.	Pigs.
New South Wales ..	30th June, 1920 ..	2.14	9.94	93.97	0.82
Victoria ..	1st March, 1920 ..	5.84	18.56	164.11	2.13
Queensland ..	31st Dec., 1919 ..	1.09	8.86	25.92	0.15
South Australia ..	30th June, 1920 ..	0.70	0.92	15.82	0.16
Western Australia ..	31st Dec., 1919 ..	0.18	0.90	6.86	0.06
Tasmania ..	1st March, 1920 ..	1.50	8.18	67.95	1.36
Northern Territory ..	31st Dec., 1919 ..	0.07	1.17	0.02	..
Federal Territory ..	30th June, 1920 ..	1.51	8.91	182.70	0.61
Commonwealth ..	1919-20 ..	0.81	4.27	25.40	0.23

7. **Minor Classes of Live Stock.**—The numbers of minor classes of live stock returned for 1919-20 were as follows:—Goats, 218,218; camels, 10,953; mules and donkeys, 13,129; and ostriches, 949. Of these, goats were most numerous in Queensland; camels, mules, and donkeys in Western Australia; and ostriches in South Australia. In the raising of goats, considerable attention has in recent years been devoted to the angora goat and its product (mohair), and about 15,000 angora goats are included in the total of 218,218 goats shewn above. Of these, 4,733 were in New South Wales, 2,400 in Western Australia, and 3,682 in Queensland, while the quantity of mohair produced in the latter State in 1919 was set down at 2,181 lbs., and the number of skins placed on the market was returned as 477.

8. **Net Exports of Principal Pastoral Products.**—The quantities by which the exports of the principal pastoral products of the Commonwealth exceeded the imports for the years 1915-16 to 1919-20 are as follows:—

QUANTITIES OF NET EXPORTS OF PRINCIPAL PASTORAL PRODUCTS OF THE COMMONWEALTH, 1915-16 TO 1919-20.

NOTE.—The minus sign (—) signifies net imports.

§ 2. Horses.

1. Suitability of Australia for Horse-breeding.—From the earliest times the suitability of the climate and pastures of Australia for the production of serviceable breeds of horses has been fully recognised. By the importation of high-class sires, and the careful selection of breeding mares, these natural advantages are utilised to the fullest extent, all classes of horses being bred. As a consequence of this combination of advantages, the Australian horse, whether of the heavy draught, medium weight, or light saddle and carriage variety, compares more than favourably with the product of other lands. The Australian horse has been found suitable for the army in India, and large numbers are obtained annually for remount purposes. During the last war Australian horses were found to be well adapted for all purposes, especially in Palestine.

2. Distribution throughout the Commonwealth.—As regards numbers, the State of New South Wales, the earliest settled of the group, established a lead, which it retained up to the end of 1913. For some years past Queensland has made rapid progress in

this regard, and in 1914 there were 742,159 horses in that State, as compared with 731,735 in New South Wales, and 552,053 in Victoria. New South Wales regained the lead during the next three seasons, but was again replaced by Queensland in 1918. Particulars for the several States for a series of years are as follows:—

**NUMBER OF HORSES IN STATES, TERRITORIES, AND COMMONWEALTH,
1860 TO 1919.**

Year.	N.S.W.	Vic. (a)	Q'land.	S. Aust.	W. Aust.	Tas. (a)	N.T.	F.T.	C'wealth.

(a) 1st March year following. (b) 30th June year following. (c) Statistics not collected prior to 1880.

3. Proportion in the Several States and Territories.—The percentages of the number of horses in the several States and Territories on the total for the Commonwealth for the past five years are as follows:—

**PERCENTAGE OF HORSES IN EACH STATE AND TERRITORY ON THE TOTAL
FOR COMMONWEALTH, 1915 TO 1919.**

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	F.T.	C'wealth.
	%	%	%	%	%	%	%	%	%
1915 ..	30.20	20.77	28.89	10.65	6.86	1.74	0.84	0.05	100.00
1916 ..	30.05	21.11	28.62	10.56	6.96	1.75	0.89	0.06	100.00
1917 ..	29.64	20.57	29.33	10.52	7.13	1.70	1.05	0.06	100.00
1918 ..	28.53	20.72	30.05	10.65	7.12	1.63	1.24	0.06	100.00
1919 ..	27.29	21.21	30.16	10.94	7.23	1.63	1.48	0.06	100.00

During the period under review the principal increase has occurred in Queensland, while New South Wales shewed the largest decrease. The position of the remaining States has practically remained stationary.

4. Oversea Export Trade in Horses.—Australia's export trade in horses is fairly considerable, though somewhat fluctuating. During the past five years it has varied in number between 5,939 for the year 1919–20 and 24,172 in 1917–18, and in value between £166,817 in the former and £502,557 during the latter year. The total number of horses exported during the five years, exclusive of those shipped for military purposes, amounted to 70,665, an average of 14,133 per annum. The total value of the exports for the period

was £1,478,736, or £295,747 per annum. The average export value per head for the period was £20 18s. 6d. The numbers exported to the principal countries concerned in this trade are as follows :—

**NUMBER AND DESTINATION OF HORSES EXPORTED FROM THE
COMMONWEALTH, 1915-16 TO 1919-20.**

(^a) Exclusive of shipments for military purposes.

Consequent on the greater demand for remounts for the Indian Army, a large increase took place in the number of horses exported to that country during the four years ended 30th June, 1918. In addition to the exports shewn in the above tables, there were 39,348 horses, valued at £815,300, shipped from the Commonwealth for military purposes from the commencement of the war to 30th June, 1918.

The number of horses imported into the Commonwealth is comparatively small, consisting mainly of valuable animals introduced for breeding purposes, and coming principally from New Zealand and the United Kingdom. The average value per head of the horses imported during the last five years was £170 4s. 3d., as compared with £20 18s. 6d. per head for the exports for the same period. The average number imported per annum was, however, only 300, and the average annual value £50,893. The following table furnishes a comparison of imports and exports of horses during each of the five years 1915-16 to 1919-20 :—

**COMMONWEALTH IMPORTS AND EXPORTS OF HORSES,
1915-16 TO 1919-20.**

Year.	Imports.		Exports.		Net Exports.	
	No.	Value.	No.	Value.	No.	Value.
		£		£		£
1915-16	620	91,928	15,209	277,111	14,589	185,183
1916-17	285	36,697	16,513	342,897	16,228	306,200
1917-18	296	48,941	24,172	502,557	23,876	453,616
1918-19	146	27,821	8,832	189,354	8,686	161,533
1919-20	152	49,078	5,939	166,817	5,787	117,739

5. Comparison with other Countries.—The numbers of horses in some of the leading horse-breeding countries of the world, according to the latest available returns, are as follows :—

**NUMBER OF HORSES IN SOME OF THE LEADING HORSE-BREEDING
COUNTRIES OF THE WORLD.**

Country.	Date.	Number of Horses, (,000 omitted.)	Country.	Date.	Number of Horses, (,000 omitted.)
Russian Empire (a) ..	1915-16	33,090	Sweden	1918	715

(a) Including Caucasus and Siberia. (b) Austria 1910, Hungary 1913, Croatia-Slavonia 1911, Bosnia-Herzegovina 1910. (c) Inclusive of army horses. (d) Exclusive of invaded area.

6. **Relation to Population.**—In proportion to population, horses are much more numerous in the Northern Territory than in any other of the principal divisions of the Commonwealth. Queensland is next in order, while Tasmania has the smallest number of horses per head. In several of the States, *i.e.*, New South Wales, Victoria, South Australia and Tasmania, the number of horses per head of population was somewhat lower in 1919 than in 1915. Particulars for the past five years are as follows :—

**NUMBER OF HORSES PER HEAD OF POPULATION,
1915 TO 1919.**

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	N. Terr.	F. Terr.	C'wealth.

1919 ..	0.33	0.34	1.01	0.56	0.53	0.18	7.62	0.68	0.46

§ 3. Cattle.

1. **Purposes for which Raised.**—In all the States of the Commonwealth, cattle raising is carried out on a more or less extensive scale, the main object in certain districts being the production of stock suitable for slaughtering purposes, and in others the raising of profitable dairy herds. The great impetus which the development of the export trade in Australian butter gave to the dairying industry in the Commonwealth led to a considerable increase in numbers and improvement in quality of the dairy herds of Victoria, New South Wales, and Southern Queensland in particular, the portion of Australia in the temperate zone being the best adapted to this industry. On the other hand, by far the finest specimens of beef-producing cattle are those raised in the tropical districts of the Commonwealth, *i.e.*, in the northern parts of Queensland, in the Northern Territory, and in the Kimberley districts in the north of Western Australia.

2. **Distribution throughout Commonwealth.**—Until 1880 New South Wales occupied the leading position in the Commonwealth group as a cattle-raising State, but in that year Queensland forged ahead and obtained a lead which it has since maintained. The extent of this lead has, however, varied considerably, owing principally to the effects produced by the tick fever and droughts, from both of which causes the Queensland herds suffered more severely than those of the other States. In fact, during the period from 1894, when the number of cattle in Queensland attained its maximum of rather more than 7,000,000, to 1903, when the number recorded was less than 2,500,000, an uninterrupted decline was experienced. During the next sixteen years, however, despite recurring droughts, a rapid improvement took place, and the total reached on 31st December, 1919, was 5,940,433, the highest number recorded since 1897.

Considerable increases have been in evidence in all the States during the three years following the 1914-15 drought, with the result that the Commonwealth total of 12,738,852 for 1918 represents the greatest number of cattle ever depastured in Australia.

Despite the protracted nature of the recent drought the decrease in the number of cattle amounted to only 27,785 in 1919.

The numbers of cattle in the several States and Territories at decennial intervals from 1860 to 1910 and for each of the last five years are as follows :—

**NUMBER OF CATTLE IN STATES, TERRITORIES, AND COMMONWEALTH,
1860 TO 1919.**

Year.	N.S.W.	Victoria. (a)	Q'land.	S. Aust.	W. Aust.	Tas. (a)	Nor. Ter.	Fed. Ter.	C'wealth.

(a) 1st March year following. (b) 30th June year following. (c) Statistics not collected prior to 1880.

3. Proportion in each State.—Particulars concerning the relative importance of the various cattle-breeding States during the years 1915 to 1919 are as under :—

**PERCENTAGE OF CATTLE IN EACH STATE AND TERRITORY ON TOTAL FOR
COMMONWEALTH, 1915 TO 1919.**

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Nor. Ter.	Fed. Ter.	C'wealth.
	%	%	%	%	%	%	%	%	%
1915 ..	24.17	10.51	48.14	2.28	8.27	1.71	4.87	0.05	100.00
1916 ..	26.37	11.24	45.56	2.76	8.26	1.71	4.02	0.08	100.00
1917 ..	26.62	11.59	44.94	2.65	7.84	1.67	4.58	0.11	100.00
1918 ..	25.68	12.53	45.43	2.69	7.41	1.71	4.48	0.07	100.00
1919 ..	24.20	12.83	46.73	2.75	6.93	1.69	4.80	0.07	100.00

During the past five years the percentages of cattle in the various States on the Commonwealth total have suffered little change. Victoria has shewn the largest gain, while the principal decreases occurred in Queensland and Western Australia.

4. **Imports and Exports of Cattle.**—Although the various products of the cattle-raising industry bulk largely in the export trade of the Commonwealth, the export of live cattle from Australia has never been considerable. The number of cattle imported is also small, consisting, as in the case of horses, mainly of valuable animals for breeding. Details are as follows :—

**COMMONWEALTH IMPORTS AND EXPORTS OF CATTLE,
1915-16 TO 1919-20.**

Year.	Imports.		Exports.		Net Exports.	
	No.	Value.	No.	Value.	No.	Value.
		£		£		£
1915-16 ..	440	19,169	5,857	29,258	5,417	10,089
1916-17 ..	234	14,254	2,977	18,836	2,743	4,582
1917-18 ..	222	23,570	1,339	12,577	1,117	-10,993
1918-19 ..	66	3,373	710	6,940	644	3,567
1919-20 ..	337	55,656	3,470	31,801	3,133	-23,855

NOTE.—The minus sign (—) signifies net imports.

The average value of the cattle imported into the Commonwealth during the last five years was £89 6s. 4d. per head, while the average value of the cattle exported during the same period was £6 18s. 6d. As stated previously, the imported cattle were principally for stud purposes.

5. **Cattle Slaughtered.**—The numbers of cattle slaughtered in the several States and Territories of the Commonwealth during the years 1915 to 1919 are as follows :—

**CATTLE (INCLUDING CALVES) SLAUGHTERED IN STATES, TERRITORIES, AND
COMMONWEALTH, 1915 TO 1919.**

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	N. Ter.	F. Ter.	C'wealth.

(a) Estimated.

(b) For year ended 30th June of year following.

6. Export of Beef Preserved by Cold Process.—A large export trade in beef preserved by cold process is carried on by the Commonwealth in normal times, mainly with the United Kingdom, Egypt, and the Philippine Islands. The quantities so exported during the five years 1915-16 to 1919-20 are as follows:—

QUANTITY OF BEEF PRESERVED BY COLD PROCESS EXPORTED FROM THE COMMONWEALTH, 1915-16 TO 1919-20.

Country to which Exported.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.	Total for 5 years.

During the five years under review, the largest of Australia's customers for beef preserved by cold process has been the United Kingdom, while the second largest customer has been Egypt; the Philippine Islands, the Straits Settlements, and the Hawaiian Islands ranked next in order of importance. The exporting States and Territories during 1919-20 were:—Queensland, 101,065,300 lbs., valued at £2,031,934; Northern Territory, 10,360,502 lbs., valued at £227,815; New South Wales, 6,211,564 lbs., valued at £147,554; Victoria, 2,252,509 lbs., valued at £44,532; Western Australia, 661,965 lbs., valued at £16,431; and South Australia, 527,071 lbs., valued at £10,982.

7. **Comparison with other Countries.**—In the following comparison of the herds of Australia with those of some of the principal cattle-raising countries of the world, the latest available figures have been inserted in each case :—

NUMBER OF CATTLE IN VARIOUS COUNTRIES.

Country.	Date.	No. of Cattle. (000 omitted.)	Country.	Date.	No. of Cattle. (000 omitted.)
British India (a)	1918	129,872	Colombia	1915	3,035

(a) Including buffalo calves. (b) Including Caucasus and Siberia. (c) Including buffaloes.
 (d) Austria 1910, Hungary 1913, Croatia-Slavonia 1911, and Bosnia-Herzegovina 1911. (e) Exclusive of invaded area.

8. **Relation to Population.**—The number of cattle per head of population differs considerably in the several States, and is also subject to marked variation from year to year in the same State. Particulars for the past five years are as follows :—

NUMBER OF CATTLE PER HEAD OF POPULATION, 1915 TO 1919.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Nor. Terr.	F. Terr.	C'wealth.
1915	1.29	0.74	7.04	0.52	2.58	0.84	106.06	2.30	2.01
1916	1.47	0.84	7.12	0.67	2.80	0.90	88.18	3.70	2.14
1917	1.65	0.97	7.84	0.71	3.09	0.97	110.34	5.42	2.39
1918	1.67	1.12	8.33	0.75	3.01	1.04	119.23	3.77	2.51
1919	1.52	1.09	8.19	0.74	2.66	0.99	129.74	3.77	2.41

For the Commonwealth as a whole the ratio of cattle to population has increased substantially since 1915, and the increase has been in evidence in all the States.

§ 4. Sheep.

1. **The Founding of the Commonwealth Pastoral Industry.**—Fortunately for Australia, the suitability of its climate and general conditions for the production of a high class of wool was, at an early date in the history of its settlement, surmised and tested by Captain Macarthur, one of the pioneer sheep-breeders of New South Wales.

To the energy of this enterprising pastoralist is due in large measure the rapid and extremely satisfactory development of Australia as a producer of fine wool, and though it would appear that the introduction of the Merino sheep into Australia was not due to Macarthur, a great deal of the credit for having successfully established the pastoral industry in Australia must certainly be his.

2. Distribution throughout Commonwealth.—With the exception of a short period in the early sixties, when the flocks of Victoria outnumbered those of the mother State, New South Wales has maintained amongst the Commonwealth group the lead in sheep production which naturally attached to it as the portion of the Commonwealth in which settlement was first effected. From 1878 to 1901, the number of sheep in New South Wales represented more than half the total for the Commonwealth, but in recent years the proportion has fallen away considerably.

The number of sheep in the several States and Territories at decennial intervals from 1860 to 1910, and for each year from 1915 to 1919, is as follows:—

**NUMBER OF SHEEP IN STATES, TERRITORIES, AND COMMONWEALTH,
1860 TO 1919.**

Year.	New South Wales.	Victoria. (a)	Queens- land.	South Australia.	Western Australia.	Tasmania. (a)	Nor. Terr.	Fed. Terr.	Total C'wealth.
1860	6,119,163	5,780,896	3,449,350	2,824,811	260,136	1,700,930	20,135,286
1870	16,308,585	10,761,887	8,163,818	4,400,655	608,892	1,349,775	41,593,612
1880	35,398,121	10,360,285	6,935,967	6,443,904	1,231,717	1,796,715	69,318	..	62,176,027
1890	55,986,431	12,692,843	18,007,234	7,004,642	2,524,913	1,619,256	45,902	..	97,881,221
1900	40,020,506	10,841,790	10,339,185	5,235,220	2,434,311	1,683,956	48,027	..	70,602,995
1910	45,560,969	12,882,665	20,331,838	6,267,477	5,158,516	1,788,310	57,240	..	92,047,015
1915	632,498,046	10,545,632	15,950,154	3,674,547	4,803,850	1,624,450	57,827	6102,688	69,257,189
1916	636,086,241	12,576,587	15,524,293	55,091,282	5,529,960	1,702,579	47,520	6110,142	76,668,604
1917	638,482,465	14,760,013	17,204,268	66,229,519	6,384,191	1,711,116	54,709	6138,731	84,965,012
1918	637,243,770	15,773,902	18,220,985	66,625,144	7,143,747	1,841,924	58,620	6133,104	87,086,236
1919	629,077,514	14,422,745	17,379,332	66,014,565	6,697,951	1,731,425	8,811	6171,739	75,554,082

(a) 1st March year following. (b) 30th June of year following. (c) Statistics not collected prior to 1880.

During the year 1919 the Avon Downs Pastoral Company in the Northern Territory disposed of the whole of their flock numbering about 50,000, and this property is now stocked with cattle only.

3. Proportion in the Several States and Territories.—Particulars concerning the relative positions of the several States and Territories with respect to the total flocks of Australia during the years 1915 to 1919 are as hereunder:—

**PERCENTAGE OF SHEEP IN EACH STATE AND TERRITORY ON TOTAL FOR
COMMONWEALTH, 1915 TO 1919.**

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	N. Terr.	F. Terr.	C'wealth.
	%	%	%	%	%	%	%	%	%
1915 ..	46.92	15.23	23.03	5.30	6.94	2.35	0.08	0.15	100.00
1916 ..	47.07	16.41	20.25	6.64	7.21	2.22	0.06	0.14	100.00
1917 ..	45.29	17.37	20.25	7.33	7.52	2.01	0.07	0.16	100.00
1918 ..	42.77	18.11	20.92	7.61	8.25	2.11	0.07	0.16	100.00
1919 ..	38.49	19.09	23.00	7.96	8.86	2.36	0.01	0.23	100.00

During the period, the percentage on the total Commonwealth flocks declined considerably in the case of New South Wales, while in the cases of Victoria, Western Australia, and South Australia substantial advances were experienced.

4. **Oversea Imports and Exports of Sheep.**—As in the case of cattle, the oversea exports of live sheep from Australia are of comparatively small importance. During the past five years the principal consignments of ordinary sheep have been made to the Straits Settlements from the State of Western Australia. The purchases made by South African and Japanese buyers at the Australian Stud Sheep Sales during recent years have opened up a regular export trade with these two countries in stud sheep, the bulk of which have been secured from the leading flocks of New South Wales, Victoria and South Australia. The following are particulars of the imports and exports for the years 1915-16 to 1919-20 :—

COMMONWEALTH IMPORTS AND EXPORTS OF SHEEP, 1915-16 TO 1919-20.

Year.	Imports.		Exports.		Net Exports.	
	No.	Value.	No.	Value.	No.	Value.
		£		£		£
1915-16 ..	6,597	36,511	7,325	19,004	728	-17,507
1916-17 ..	3,809	24,470	7,007	32,944	3,198	8,474
1917-18 ..	1,719	9,850	10,799	24,899	9,080	15,049
1918-19 ..	607	4,776	18,608	39,783	18,001	35,007
1919-20 ..	269	6,258	21,870	64,112	21,601	57,854

NOTE.—The minus sign (—) signifies net imports.

5. **Sheep Slaughtered.**—The numbers of sheep slaughtered in the several States during each of the years from 1915 to 1919 are as follows :—

SHEEP (INCLUDING LAMBS) SLAUGHTERED, 1915 TO 1919.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania. (a)	Nor. Ter.	Fed. Ter.	C'wealth.
1915	64,173,511	2,973,803	1,316,152	918,526	564,535	288,419	c500	63,376	10,238,822
1916	63,756,477	2,647,200	909,415	668,112	547,041	283,313	c500	62,975	8,833,233
1917	63,198,445	2,499,002	689,905	6808,914	590,244	259,287	c500	63,713	8,050,030

1919	65,533,484	6,324,490	717,191	61,478,557	800,252	332,977	(d)	63,800	15,190,751

(a) Partly estimated. (b) Year ended 30th June year following. (c) Estimated.
(d) Not available.

6. **Exports of Mutton and Lamb Preserved by Cold Process.**—Australia's export trade in mutton and lamb preserved by cold process has, in recent years, advanced rapidly. In 1903 the value of exports was £492,114, while eleven years afterwards in 1914-15, the value amounted to no less a sum than £3,413,848. During the next four years, consequent on drought and war conditions, the value of the exports fell considerably, averaging for the period only £1,015,351 per annum. With the release of shipping and the high prices ruling in England the trade rapidly recovered, and during 1919-20 the record shipment of 246,971,346 lbs., valued at £5,482,564, was made. In all the States considerable attention is now being paid to the breeding of a class of sheep that will best meet the requirements of consumers. Crosses between the Merino and the Lincoln, or between the Merino and the Leicester breeds, have proved exceedingly valuable, as they furnish both a good quality of wool and an excellent carcase for export purposes. The breeding of Shropshire and Southdown sheep with a view to combining meat production

with that of wool is also on the increase. Special attention is being paid to the raising of lambs, as it has become widely recognised that with suitable breeds the export trade in lambs is very profitable.

As in the case of frozen beef, Australia's principal customer in this trade is the United Kingdom, which has absorbed 93 per cent. of the total quantity exported from the Commonwealth during the past five years, while the balance was shipped mainly to Egypt and the Straits Settlements.

QUANTITY OF MUTTON AND LAMB PRESERVED BY COLD PROCESS EXPORTED FROM THE COMMONWEALTH, 1915-16 TO 1919-20.

7. Comparison with other Countries.—As regards the size of its flocks, and the quantity and quality of wool produced, Australia has long occupied a leading position amongst the sheep-raising countries of the world. From estimates published in the Year Book of the United States Department of Agriculture it would appear that the

approximate number of sheep in the world is in the neighbourhood of 550,000,000, to which total Australia contributes nearly 14 per cent. The following comparison taken mainly from the same source gives the latest available figures relative to the number of sheep in the principal wool-producing countries :—

NUMBER OF SHEEP IN VARIOUS COUNTRIES.

Country.	Date.	No. of Sheep. (,000 omitted.)	Country.	Date.	No. of Sheep. (,000 omitted.)
Australia	1919	75,554	Brazil	1916	7,205

8. Relation to Population.—The relation of the flocks of the several States and Territories to the population at the end of each year from 1915 to 1919 is as follows :—

NUMBER OF SHEEP PER HEAD OF POPULATION, 1915 TO 1919.

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	F.T.	C'wealth.
1915 ..	17.42	7.43	23.50	8.38	15.11	8.08	12.67	41.64	14.04
1916 ..	19.24	8.99	23.19	11.77	17.91	8.52	9.97	49.55	15.68
1917 ..	20.14	10.46	25.38	14.18	20.63	8.42	11.15	56.10	17.13
1918 ..	18.97	11.02	26.24	14.53	22.92	8.82	12.26	58.59	17.16
1919 ..	14.33	9.64	23.96	12.73	20.20	8.22	1.87	77.29	14.32

A comparison of the ratios of sheep to population for 1919 with those for 1915 discloses increases in all the States excepting New South Wales and the Northern Territory, where the proportions have diminished considerably.

§ 5. Wool.

1. Importance of Wool Production.—The chief contributing factor to the pastoral wealth of Australia is the production of wool, the value of the output for the season ended 30th June, 1920, being about £42,835,000. The bulk of the wool produced in the Commonwealth is exported, but with the greater activity of the local woollen mills there has, in recent years, been an increasing quantity used in Australia, although even now the quantity so used represents only about 3 per cent. of the whole clip.

2. Greasy and Scoured Wool.—For the purpose of comparing the clips of the several States or of the Commonwealth as a whole for a series of years, it is convenient to have the total production expressed in terms of greasy wool.

The quantity of Australian wool scoured and washed before export during recent years has been on the average about 20 per cent. of the total clip. The loss of weight in scouring varies largely with season, locality, breed, and condition. It seems preferable to express "scoured and washed" wool in terms of "greasy" rather than vice versa, since the absolute error arising from uncertainty as to average loss of weight has thus the less effect.

In the following tables relative to the production of wool, "scoured and washed" wool has been converted into the estimated equivalent amount of "greasy" wool, on the assumption that two pounds of "greasy" wool are on the average required to produce one pound of "scoured and washed" wool.

3. Total Production.—The estimated production of wool in the several States, formerly based on the Customs returns, being no longer available from that source, an effort has been made to arrive at approximate figures from data collected by the State Statisticians from growers, fellmongers, &c. Particulars for years prior to 1915-16 will be found in earlier issues (see Year Book No. 6, page 346, and No. 9, page 296). The following table gives the estimates obtained in reference to the five seasons ended 30th June, 1916 to 1920 :—

**ESTIMATED QUANTITY OF WOOL AS IN THE GREASE, SHORN, FELLMONGERED
OR ON SKINS SHIPPED DURING THE SEASONS ENDED 30th JUNE, 1916
TO 1920.**

Northern Territory (b)	350,000	350,000	330,000	330,000	50,000
Commonwealth ..	550,578,541	547,632,674	573,693,252	657,911,710	663,249,164

(a) Including Federal Territory. (b) Approximate figures.

It is to be noted that a shortage has apparently occurred in the collection of these statistics, the estimates falling considerably below the approximate totals obtained from oversea shipments of wool and skins, together with the quantity used in local manufactories. For the three seasons ended 30th June, 1914, this average annual shortage amounted to nearly 46,000,000 lbs. of wool. The abnormal conditions of wool shipment obtaining during the last five seasons do not admit of any similar comparisons being made. The appraisement figures of the Central Wool Committee, however, furnish further evidence of shortage in the figures supplied by the State Statisticians for the past three seasons. During these years the total appraisements amounted to 2,094,261,297 lbs., thus revealing an average annual deficit of 66,469,057 lbs. in the estimated production for those seasons based on the State Statisticians' returns.

The weight and value of wool per sheep shorn in the past five seasons is shown in the following table :—

ESTIMATED WEIGHT AND VALUE OF WOOL PER SHEEP SHORN FOR THE SEASONS ENDED 30th JUNE, 1916 TO 1920.

Season ended 30th June. N.S.W. Vic. Q'land. S. Aust. W. Aust. Tas. C'wealth.

(a) Previous year's figures. (b) Year ended 30th June.

5. Bounties on Combed Wool or Tops Exported.—Under the Bounties Act 1907. bounties were payable on combed wool or tops exported from the Commonwealth, provided they were produced therein. The maximum amount to be paid might not exceed a total of £10,000 per annum; any unexpended sum might be carried forward and be available for the years following. For the three years commencing 1st January, 1909. the rate of bounty granted was 1½d. per lb., and for the two years commencing 1st January, 1912, 1d. per lb. was payable for all combed wool or tops produced; thenceforward to the end of 1915, 1d. per lb. was payable up to 1,000,000 lbs., to any one manufacturer during a year, and ¾d. per lb. in excess of that quantity. No bounties have been paid on combed wool or tops since 1915. During the year 1908-9, an amount of £326 was paid in bounties. in 1909-10, £4,933; in 1910-11, £8,522; in 1911-12, £16,898; in 1912-13, £13,061; in 1913-14, £12,706; in 1914-15, £7,727; and in 1915-16, £5,828. The quantities of wool on which these amounts were paid were 52,085, 789,216, 1,363,555, 3,122,244, 3,134,614, 3,068,170, 3,635,811 and 2,824,436 lbs. respectively.

Figures shewing the exports of wool tops for the years 1915-16 to 1919-20 inclusive will be found on the next page.

6. **Exports of Wool.**—During the two calendar years prior to the war, about 38 per cent. of the exports of wool from the Commonwealth was despatched to the United Kingdom, whereas the shipments for the same destination during the past five years have averaged 69 per cent. The other leading consignees for the last five years were the United States of America, Italy, Japan, France, and, prior to the war, Germany and Belgium. The following table shews for the years 1915-16 to 1919-20 the quantities of "greasy" wool exported from the Commonwealth and the principal countries to which consigned:—

COMMONWEALTH EXPORTS OF WOOL IN THE GREASE, 1915-16 TO 1919-20.

Country to which Exported.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.	Total for 5 years.

(a) Including "tops."

The figures for "scoured and washed wool" include tops, amounting in 1915-16 to 4,981,975 lbs., valued at £680,656; in 1916-17, 4,869,452 lbs., valued at £1,204,570; in 1917-18, 4,571,357 lbs., valued at £1,510,799; in 1918-19, 2,822,578 lbs., valued at £935,212; and in 1919-20, 6,148,118 lbs., valued at £2,957,679. The total exports of

wool tops during the last five years amounted to 23,393,480 lbs., valued at £7,288,916, of which 20,069,394 lbs., or nearly 86 per cent., were shipped to Japan.

The total value of the wool exported from the Commonwealth to the principal countries during the five years under review was :—

**TOTAL VALUE OF WOOL EXPORTED FROM THE COMMONWEALTH,
1915-16 TO 1919-20.**

Country to which Exported.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.	Total for 5 years.

New Zealand ..	4,931	4,931
Other Countries ..	118,121	63,384	30,833	37,315	154,445	404,098
Total ..	26,854,091	28,953,338	24,586,864	42,766,755	50,543,803	173,704,851

7. **Care Needed in Comparing Clips.**—The Customs returns prior to 1914-15 do not furnish a reliable indication of increase or decrease in successive clips, since in each case they relate to the year ended 31st December, and include imports and exports of wool belonging to two distinct clips. A further defect in the comparability of successive clips is due to the circumstance that owing to climatic or other conditions, the time of shearing may be so far delayed that one clip may include almost thirteen months' growth of wool, while the succeeding one may include little more than eleven months' growth.

8. **Wool-producing Countries in Southern Hemisphere.**—The next table, compiled by one of the leading English wool-broking firms, furnishes interesting evidence of the relative importance of the three great wool-producing areas of the Southern Hemisphere. The figures given are the latest available, and represent for the respective years the imports of wool into Europe and North America :—

**IMPORTS OF WOOL INTO EUROPE AND NORTH AMERICA,
1912 TO 1916.**

Year.	Australia and New Zealand.	Cape Colony.	River Plate.	Total.	Average Value of Australasian and Cape Bales.
	Bales.	Bales.	Bales.	Bales.	£
1912 ..	2,463,000	463,000	497,000	3,423,000	15.0
1913 ..	2,296,000	484,000	437,000	3,217,000	16.5
1914 ..	2,332,000	499,000	406,000	3,237,000	17.0
1915 ..	2,157,000	519,000	378,000	3,054,000	19.0
1916 ..	1,919,000	500,000	344,000	2,763,000	27.0

As the River Plate bale is much larger than the Australasian or Cape bale, a comparison of the number of bales is somewhat misleading. Allowing approximately for the difference in size of the several bales, it may be said that during the five years shewn above the importations from Australia and New Zealand represented about 65 per cent. of the total.

9. United Kingdom Importation of Wool.—The quantity and value of wool imported into the United Kingdom during the year 1919 from the principal wool-producing countries furnish evidence of the important position which the Commonwealth occupies in the supply of wool to the mother country. This is shewn in the following table:—

IMPORTS OF WOOL INTO THE UNITED KINGDOM, 1919.

Country from which Imported.	Quantity.	Value.	Country from which Imported.	Quantity.	Value.
	lbs.	£		lbs.	£
Australia ..	587,557,420	57,522,055	Uruguay ..	1,012,702	116,582
New Zealand ..	254,196,274	21,898,528	Portugal ..	1,169,940	87,581
Union of S. Africa ..	80,552,564	7,525,501	China ..	1,156,961	86,732
British India ..	63,005,908	4,285,043	Russia ..	1,324,820	86,007
Argentine Re-public ..	22,123,433	2,348,606	U.S. of America	695,095	63,319
Chile ..	8,590,723	837,487	British Possessions, n.e.i.	638,559	57,069
Egypt ..	5,036,375	492,376	Foreign Countries, n.e.i.	2,277,699	230,861

Peru ..	2,519,785	333,031			
Falkland Islands	2,943,332	289,112			
Canada ..	1,920,278	185,610	Total ..	1,042,899,164	96,888,830

It will be seen that of the total importations of wool into the United Kingdom, Australian wool represented 56 per cent. of quantity and 59 per cent. of value, and New Zealand 24 per cent. of quantity and 22½ per cent. of value. It is interesting to note that a total of 995,850,710 lbs., valued at £92,235,294 was received from British Possessions, being 95·5 per cent. of the total weight imported, and 95·2 per cent. of the total value.

10. The Wool Market.—(i) *General.* A résumé of Australian wool market conditions for the seasons 1907–8 to 1912–13 will be found in Year Book No. 7 (pages 296 and 297), for the season 1913–14 in Year Book No. 8 (page 297), and for the seasons 1914–15 and 1915–16 in Year Book No. 10 (page 310).

(ii) *Purchase by British Government.* The purchase by the Imperial Government of the balance of the Australian wool clip, for the season 1916–17, was brought about as a result of war conditions. Owing to the demand for wool for British and Allied military clothing, it was decided to acquire the Australian clip at the flat rate of 15½d. per pound greasy—an increase of 55 per cent. on the prices ruling in the season immediately preceding the war, viz., 1913–14. The control of the scheme was placed in the hands of a body called the Central Wool Committee, assisted by a committee in each State. These committees consisted of representatives of the wool growers, wool sellers, wool buyers, manufacturers, and scourers or fellmongers. In addition the Central Wool Committee had a Government nominee, who acted as chairman. The broad policy laid down was that existing trade conditions were not to be disturbed; this meant that

the carrying out of the details of the scheme was left to the trade itself. The wool was prepared, catalogued and shewn in the usual way, but instead of being sold by public auction, it was valued by duly appointed Government Wool Appraisers, according to a table of limits prepared by a body of experts acting as an Advisory Board to the Central Wool Committee. On appraisalment, the wool became the property of the Imperial Government, and was shipped as freight space became available, the allotment of freight being on the basis of the quantity of wool appraised in each State.

The Central Wool Committee, at the request of the Imperial Government, undertook to scour and re-class as much wool as would keep the local industries going to their full capacity.

(iii) *Financial.* Funds received from the Imperial Government were used to effect a payment of 90 per cent. of the appraised price to wool brokers for distribution to the growers within fourteen days from the final date of each series of appraisements. The balance of 10 per cent. was withheld for possible adjustments. The money so retained was placed at interest, the earnings being added to the amount available for final distribution. The average appraised price per pound having worked out less than the purchase price of 15½d., the money retained, amounting to £2,313,461, was paid over on the 14th August, 1917. A dividend—the first—of 10 per cent. was paid on 23rd October, 1917, amounting to £2,312,608. This represents slightly more than the payment in full of the flat rate of 15½d. per pound. A small dividend will follow as soon as final adjustments can be made.

(iv) *Quantity and Value of Wool Appraised, 1916-17.* The quantity of wool appraised under the Imperial Government's purchase of a portion of the clip for the season 1916-17 amounted to 323,752,519 lbs. greasy, and 34,307,991 lbs. scoured, equivalent to 392,368,501 lbs. of wool in the grease. The average appraised price per pound of wool in the grease was 14.72d., the average for scoured wool was 22.86d. per pound, and the average of all wool—greasy, and scoured calculated as greasy—appraised under the scheme was 14.15d. per pound, the difference between this average and the 15½d. basis being equal to 9.5 per cent. on the average appraised price.

(v) *Purchase of 1917-18 Clip.* The organisation for the carrying out of the Imperial Government's purchase of the Australian wool clip 1917-18 was the same as for the balance of the season 1916-17.

With the exception of a few modifications necessary for the better working of the scheme, no alteration was made in the method of appraisalment.

Ninety per cent. of the appraised value was paid to wool growers through the wool selling brokers fourteen days after the completion of each series of appraisements, 10 per cent. again being withheld for possible adjustments.

The total quantity of greasy wool appraised was 569,629,520 lbs., and scoured wool 47,340,403 lbs., a total of 616,969,923 lbs., equal to 664,310,326 lbs. greasy.

The average appraised price of the greasy wool was 14.98d. per lb., and of the scoured wool 25.62d. per lb. The average appraised price on the greasy basis works out at 14.68d. per lb. The difference between this and the flat rate of 15½d. is equal to 5.59 per cent. of the appraised price.

The 10 per cent. retention money, together with a dividend of 5 per cent., was distributed in all centres on the 21st August, 1918, involving a sum of approximately £6,094,713. A small further dividend will be payable when outstanding accounts are finally adjusted.

NOTE.—Woollen manufacturers obtained their supplies at the appraised price, but wool top manufacturers were required to pay the flat rate value for all their purchases.

(vi) *Purchase of 1918-19 Clip.* The purchase of the 1918-19 clip and appraisement thereof were virtually carried out on the same lines as for the clip of 1917-18.

The total wool appraised during the 1918-19 season consisted of 599,447,103 lbs. greasy and 52,662,569 lbs. scoured wool, or an equivalent of 704,772,241 lbs. in terms of greasy.

The total greasy wool appraised represented a value of £38,310,763, the average price being 15.34d. per lb., while the scoured value was £5,670,405, or an average per lb. of 25.84d.

Reducing all appraised wool to a greasy basis the average price would be 14.98d. per lb.

The difference between the appraised price and the flat rate of 15½d. was 3.49 per cent. of the appraisement.

A dividend of 3½ per cent., together with the 10 per cent. retained, or a total of 13½ per cent., was accordingly made payable on the 26th August, 1919.

Grand total in terms of Greasy	704,772,241	..	45,516,540

NOTE.—Woollen manufacturers again purchased at appraised price, while the wool tops companies paid the flat rate, and have contracted to pay, in addition, a percentage increase equal to that of the final dividend on the whole clip, when determined.

(vii) *Purchase of 1919-20 Clip.* Arrangements having been concluded for the purchase by the Imperial Government of the Australian wool clip for the currency of the war and for one full wool year thereafter, the agreement embraced the 1919-20 season's production, the conditions being on the same lines as for previous seasons.

The total wool appraised during the 1919-20 season consisted of 586,576,318 lbs. greasy and 69,315,732 lbs. scoured wool, or an equivalent of 725,207,782 lbs. in terms of greasy.

The total greasy wool appraised represented a value of £38,231,129, the average price being 15.64d. per lb., while the scoured value was £7,769,373, or an average per lb. of 26.90d. Reducing all appraised wool to a greasy basis the average price would be 15.22d. per lb.

The difference between the appraised price and the flat rate of 15½d. was 1.817 per cent. of the appraisement. The Central Wool Committee decided to increase the percentage adjustment from 1.817 to 2.0 per cent.

A payment of £906,423, representing an adjustment between appraised price and flat rate, also the retention money, £4,532,118, making a total of £5,438,541, equal to 12 per cent. of appraised value, was distributed in all centres on the 22nd September, 1920.

Grand total in terms of greasy	725,207,782	..	46,836,299

NOTE.—Woollen manufacturers purchased at appraised price sufficient wool to maintain their normal output to 30th June, 1920. After that date they had the option of purchase at prices determined by the Central Wool Committee on parity with London auction prices. The wool tops companies again paid the flat rate, and have contracted to pay in addition a percentage increase equal to that of the final dividend on the whole clip when determined.

Fifty per cent. of the profits resulting from the resale of wool by the Imperial Government and credited to Australian woolgrowers up to 31st March, 1919, amounted to £6,486,992. The amount of profits, distinct and additional to the 50 per cent. of profits from the resale of wool by the Imperial Government, earned by the Central Wool Committee since the inception of the scheme, is estimated at £1,667,469.

The Central Wool Committee distributed an interim dividend on the 27th October, 1920, comprising the full amount of profits earned by the Imperial Government up to 31st March, 1919, and an additional sum of £1,166,300 from the Central Wool Committee's administration profits, making a total of £7,653,292, which is equal to 5 per cent. on all wool appraised during the past four seasons.

As very high prices for wool ruled for practically the whole of the year ending 31st March, 1920, further substantial profits may reasonably be expected. It must not, however, be overlooked that a considerable portion of the 2,000,000 bales of carry-over Australian wools is not at present readily saleable, and it is more than probable that the lower grade crossbred wools will not return Australian appraised prices plus charges, consequently debits from this source may seriously reduce the profits earned on the fine grade wools.

The quantity of appraised wool in the Commonwealth awaiting shipment overseas on the 30th June, 1920, was 7,520 bales of the 1917-18 season, 164,377 bales of the 1918-19 season, and 989,926 bales of the 1919-20 season, or a total of 1,161,823 bales, representing a value of approximately £25,075,000.

(viii) *Wool Realization Scheme.* The 30th June, 1920, marked the termination of the contract with the Imperial Government for the purchase of the Australian wool clips at a flat rate of 15½d. per lb. greasy, and the return to the Australian woolgrowers of 50 per cent. of the profits realized from the resale of surplus wool. This meant that the wool trade was free to return, as far as was possible under existing conditions, to the methods of disposal followed prior to the commencement of the contract. Owing, however, to the unsettled state of the world's markets, and the unsatisfactory exchange rates ruling on the Continent and elsewhere, the sales both in England and in Australia have been disappointing, withdrawals being very heavy, and prices, except in a few instances, far from satisfactory.

Towards the end of 1920, steps were taken to bring about some arrangement whereby the enormous stocks of carry-over wool held by the British Imperial Government, both in England and in Australia, could be handled in such a way that the disposal of the 1920-1 clip would not be seriously menaced. After various proposals had received consideration, it was decided to form a company to be known as the "British Australian Wool Realisation Association, Limited." This company, of which the Australian woolgrowers are the shareholders, will deal with the disposal of surplus stocks of Australian and New Zealand wools from the Imperial Government Purchase Scheme.

In order that there will be no clashing of interests, action has been taken to put into effect a scheme whereby the offerings of wool by the Association and by wool selling brokers in Australia and in London will be apportioned according to stocks held, and to the market demands.

(ix) *Average Export Value.* The average values per lb. of Australian greasy wool according to the export returns for the past five years have been as follows:—

EXPORT VALUE PER LB. OF AUSTRALIAN GREASY WOOL, 1915-16 TO 1919-20.

Year	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.
					d.	d.	d.	d.	d.
Average value per lb.	11.86	15.81	16.71	16.49	16.69

(x) *Exports of Wool from each State, and Quantity sold Locally.* Over 86½ per cent. of the wool grown in Australia was sold in the local markets prior to export from the Commonwealth during 1913-14. Under normal conditions prior to the war buyers from the United Kingdom, France, Germany, and other European countries, also from America, Japan, China, and India, attended the sales conducted in Sydney, Melbourne, Geelong, Brisbane, Adelaide, Fremantle, Hobart, and Launceston.

The following table shews the number of bales of wool exported oversea from each State during the season ended 30th June, 1920, and bales appraised or sold for shipment, for use in local woollen mills, for scouring, etc. It must be noted that as considerable quantities of wool grown in some States are sold in or shipped

from others, these figures do not shew actual local production, but total overseas shipments and sales. The estimated quantity of wool produced in each State is given on page 228.

EXPORTS OF WOOL TO PLACES OUTSIDE THE COMMONWEALTH, AND THE QUANTITY APPRAISED OR SOLD IN THE SEVERAL STATES, DURING THE SEASON ENDED 30th JUNE, 1920.

State.	Overseas Exports.		Sales or Appraisements.	
	Bales.	%	Bales.	%
New South Wales	733,920	36.02	744,170	36.37
Victoria	516,320	25.34	607,717	29.70
Queensland	352,840	17.31	319,922	15.64
South Australia	215,934	10.60	213,754	10.45
Western Australia	174,347	8.55	122,341	5.98
Tasmania	44,384	2.18	38,008	1.86
Commonwealth	2,037,745	100.00	2,045,912	100.00

(xi) *Exports of Wool from Commonwealth and Quantity sold Locally.* The number of bales of wool exported from the Commonwealth and the number sold at local sales prior to shipment, or taken for local use, during 1895, 1900, 1905, 1910, and the succeeding four seasons is shewn in the following table:—

EXPORTS OF WOOL FROM THE COMMONWEALTH, AND THE QUANTITY SOLD LOCALLY FROM 1895 TO 1914.

Year ended 30th June.				Overseas Exports.	Local Sales.(a)	Ratio of Wool sold locally to Exports.
				Bales.	Bales.	%
1895	1,595,652	817,333	51.22
1900	1,221,163	807,031	66.09
1905	1,218,969	926,940	76.04
1910	1,921,705	1,624,561	84.54
1911	1,975,378	1,642,555	83.15
1912	2,020,547	1,700,494	84.16
1913	1,718,486	1,518,650	88.37
1914	1,966,576	1,703,744	86.64

(a) Including wool absorbed by local woollen mills and wool-scouring establishments.

The steady development of the Australian wool market is clearly shewn in this table. In the nineteen years ended 1914, the quantity sold locally more than doubled, and the ratio of wool sold locally to that exported increased from 51 per cent. in 1895 to over 86½ per cent. in the season ended 30th June, 1914. The abnormal conditions obtaining since the outbreak of war have materially affected the ratios, which in consequence are no longer serviceable as a measure of growth of the local market.

(xii) *Quantities of Various Descriptions of Wool Sold or Appraised in each State.*
The quantities and ratios of the various descriptions of wool marketed in each State are shewn in the following table:—

Wool in the grease represented nearly 86 per cent. of the total marketed during 1919-20. Of fleece and lambs' wool, the former represents 94.86, and the latter 5.14 per cent. The class of wool produced is largely merino, which is almost exclusively grown in the northern, western, and central parts of the continent, the bulk of the merino wool dealt with in Victoria coming from Riverina and other parts of New South Wales. The development of the frozen mutton and lamb export trade and the resultant raising of a type of sheep suitable for both mutton and wool have led to a

considerable increase in the production of crossbred wool throughout Australia during recent years. The proportion of such wool sold in Australia to the total sales amounted to 18.6 per cent. in 1912, whereas, eight years later, in 1919-20, the proportion had increased to 33.9 per cent. The whole of the crossbred and other strong bred wools are grown in Victoria and Tasmania and in the southern parts of New South Wales, South Australia and Western Australia.

(xiii) *Percentages in each State of Various Descriptions of Wool Sold or Appraised.* The following table gives the percentages of each description of wool sold or appraised in the several States during the season 1919-20 :—

PERCENTAGE OF BALES OF EACH DESCRIPTION OF WOOL SOLD OR APPRAISED IN THE SEVERAL STATES ON THE TOTAL SOLD OR APPRAISED IN THE COMMONWEALTH, 1919-20.

§ 6. Hides and Sheepskins.

1. *Extent of Trade.*—In addition to the hides and sheepskins treated in the tanneries of the several States, a very considerable export trade is carried on, the total value of cattle hides and sheepskins exported from Australia during the five years 1915-16 to 1919-20 being no less than £11,077,948, or an average of £2,215,590 per annum.

2. *Sheepskins with Wool.*—By far the largest item included in the amount mentioned in the preceding paragraph arises from the value of sheepskins with wool exported, which are shipped principally to the United Kingdom and France. Details concerning the number so exported during the five years 1915-16 to 1919-20 are as follows :—

COMMONWEALTH EXPORTS OF SHEEPSKINS WITH WOOL, 1915-16 TO 1919-20.

GRAPHS SHEWING NUMBER OF HORSES, CATTLE, SHEEP, AND PIGS IN THE
COMMONWEALTH FROM 1860 TO 1919.

(See page 212.)

EXPLANATION OF GRAPHS.—The base of each small square represents an interval of one year. The totals of the horses, cattle, sheep, and pigs for the Commonwealth are indicated by the several curves or graphs, the vertical side of a small square representing 2,000,000 in the case of sheep; 200,000 for cattle; 50,000 for horses; 40,000 for pigs.

GRAPHS SHEWING THE PRODUCTION OF BUTTER AND CHEESE, AND BACON AND HAM IN THE COMMONWEALTH, FROM 1896 TO 1919.

EXPLANATION OF GRAPHS.—The base of each small rectangle represents an interval of one year, and the vertical height of each small rectangle denotes in the case of butter 10,000,000 lbs.; in the case of bacon and ham, 4,000,000 lbs.; and in the case of cheese 3,000,000 lbs.

GRAPHS SHEWING THE QUANTITY AND VALUE OF NET EXPORTS OF BUTTER FROM THE COMMONWEALTH, FROM 1901 TO 1919.

EXPLANATION OF GRAPHS.—The base of each small rectangle represents an interval of one year, and the vertical height of each small rectangle represents 5,000,000 lbs. in weight, or £1,000,000 in value.

The next table furnishes corresponding particulars as to value :—

**VALUE OF SHEEPSKINS WITH WOOL EXPORTED FROM THE COMMONWEALTH,

4. **Hides.**—The Commonwealth trade in cattle hides has now assumed considerable proportions, and during 1914-15 the total value of such hides exported amounted to £1,303,201. The exports were principally to the United Kingdom and the United States of America. The disastrous drought of 1914-15, coupled with the increased demand for leather, more especially for military purposes, resulted in a considerable falling-off in the quantity of hides available for export during the war period. The 1919-20 figures, however, shew that much of the former trade has been regained, whilst the enhanced prices make the total value of the exportation equal to any pre-war shipment. Large quantities of hides are imported into the Commonwealth, mainly from New Zealand and the Pacific Islands.

Particulars concerning the export of cattle hides during the past five years are as follows :—

COMMONWEALTH EXPORTS OF CATTLE HIDES, 1915-16 TO 1919-20.

The number and value of cattle hides, including calfskins imported into the Commonwealth during the five years 1915-16 to 1919-20 are as follows :—

CATTLE HIDES IMPORTED INTO THE COMMONWEALTH, 1915-16 TO 1919-20.

Particulars.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.	Total for 5 years.
No.	146,657	94,065	132,218	260,237	205,662	838,839
Value £	293,052	161,380	151,531	424,339	579,915	1,610,217

During the past five years the exports of calfskins amounted to 416,053, valued at £235,967, and of horse hides, 6,128, valued at £8,848; the imports of horse hides during the same period amounting to 9,058, valued at £11,319.

§ 7. Graphical Representation of Pastoral Production.

1. General.—As comparatively complete statistics relative to the number of horses, cattle, sheep and pigs are available from 1860, the graphical representation of the fluctuations in numbers for the Commonwealth as a whole, shewn on page 241, covers the period from 1860 to 1919.

2. Horses.—With relatively unimportant fluctuations the number of horses in the Commonwealth increased at a fairly consistent rate until 1895, when a decline set in, culminating in the losses of the drought of 1902. At this latter point the number was practically identical with that for 1890. From 1902 onwards a rapid improvement was experienced, the total for 1913 being the highest then recorded. The disastrous drought of 1914-15 was responsible for heavy losses, but subsequent annual increases made the total number of horses in 1918 the greatest ever recorded. As the result of the prolonged drought recently experienced throughout Australia the number of horses declined by 105,948 during 1919.

3. Cattle.—The graph for cattle furnishes evidence of rapid increase in number, interrupted by four marked periods of decline, of which the first extended from 1862 to 1866, the second from 1881 to 1885, the third from 1894 to 1902. So extensive was this last-mentioned decline that the number receded to that of 1879. From 1902 a rapid recovery took place, and the total for 1911 exceeded that existing at the end of the year 1895, though still short of the 12,311,617 cattle recorded in 1894. The fourth period of decline commenced in 1912, the figures from that year to 1914 shewing a slight decline, while those for 1915 shew a very serious falling-off, the difference between the 1911 and 1915 returns amounting to over 16 per cent. In 1916 the number of cattle commenced to ascend, and, assisted by considerable increases during the next two seasons, reached its highest point in 1918. The decrease in the number of cattle during 1919, i.e., 27,785, was remarkably small, considering the protracted nature of the drought of 1918-20.

4. Sheep.—In the case of sheep the graph shews that the upward movement in number is subject to periodic reversals.

The greatest of these occurred between 1891 and 1902, when the number of sheep declined by one-half, or nearly 53,000,000.

So great are the recuperative powers of Australia that at the end of 1911, nine years later, the number had increased by 40,000,000.

The second great period of decline set in in 1912, and at the end of the severe drought of 1914-15 the number of sheep had decreased by 24,000,000 as compared with 1911.

During the recent drought of 1918-20 the number declined by 11,532,154 in 1919, the greatest decline in any one year save the disastrous drought year of 1902 when the decrease amounted to 18,371,864.

5. Pigs.—The graph for pigs exhibits more numerous fluctuations than that for any of the other classes of live stock represented, and from 1904 to 1908 furnished evidence of a persistent decline. In 1909, however, an upward movement took place; and this was well maintained during the two succeeding years, the 1911 returns exceeding all previous records. The position fluctuated considerably during subsequent years, first descending then ascending, until in 1917 the number of pigs attained its maximum. During the next two years considerable decreases occurred, the numbers of pigs in 1919 being the lowest recorded since 1908.

SECTION VIII.

AGRICULTURAL PRODUCTION.

NOTE.—Except where otherwise stated, the “agricultural” years hereinafter mentioned are taken as ending on the 30th June.

§ 1. Introductory.

1. Early Attempts at Agriculture.—The instructions issued to Captain Phillip on the 25th April, 1787, directed him, amongst other things, to proceed as soon as possible to the cultivation of the soil “under such regulations as may appear to be necessary and best calculated for securing supplies of grain and provisions.” When the settlers landed at Botany Bay, however, it was found that the glowing accounts published in England by members of Captain Cook’s expedition of the fertility of the soil in that locality were considerably overdrawn. Even when Phillip and his company moved round to Port Jackson on the 26th January, 1788, matters were for a time in no better case. The ground in the immediate neighbourhood of the settlement was not suitable for the cultivation of cereal crops, and when the time came to cultivate the soil it was found that there were very few who possessed the slightest acquaintance with the art of husbandry.

2. The First Sowing.—In his despatch of the 15th May, 1788, Captain Phillip states that it was proposed to sow eight acres with wheat and barley, although, owing to the depredations of field mice and ants, he was doubtful of the success of the crops.

3. Discovery of Suitable Agricultural Land.—A branch settlement was formed at Rosehill, on the Parramatta River, towards the close of 1788, and here grain crops were successfully raised. In his despatch of 12th February, 1790, Phillip refers to the harvest at Rosehill at the end of December, 1789, as consisting of 200 bushels of wheat and 60 of barley, in addition to small quantities of oats, Indian corn, and flax. By the year 1791 there were 213 acres under crop in this locality. In 1792 a new settlement was formed at Toongabbie, about three miles westward of Parramatta, where Phillip states “there are several thousand acres of exceeding good ground.” The Hawkesbury Valley, which probably contains some of the richest land in the world, was first settled in 1794. For a long time agricultural operations in Australia were restricted to the narrow belt of country between the tableland and the east coast of New South Wales, as it was not until the year 1813 that a passage was discovered across the Blue Mountains to the fertile plains of the west.

§ 2. Progress of Agriculture.

1. Early Records.—In an “Account of Live Stock and Ground under Crop in New South Wales, 19th August, 1797,” Governor Hunter gives the acreage under crop as follows:—Wheat, 3,361 acres; maize, 1,527 acres; barley, 26 acres; potatoes, 11 acres; and vines, 8 acres.

At a muster taken in 1808 the following was the return of crops:—Wheat, 6,877 acres; maize, 3,389 acres; barley, 544 acres; oats, 92 acres; peas and beans, 100 acres; potatoes, 301 acres; turnips, 13 acres; orchards, 546 acres; and flax and hemp, 34 acres.

By the year 1850 the area under crop had increased to 491,000 acres, of which 198,000 acres were cultivated in what is now the State of New South Wales, and 169,000 acres in Tasmania. At the end of 1850 the area under cultivation in Victoria, which was then the Port Phillip District of New South Wales, was 52,190 acres.

The gold discoveries of 1851 and subsequent years had at first a very disturbing effect on agricultural progress, the area under crop declining from 491,000 acres in 1850 to 458,000 acres in 1854; the area under cultivation in New South Wales decreased by nearly 66,000 acres, while in Tasmania a falling-off of over 41,000 acres was experienced. The demand for agricultural products occasioned by the large influx of population was, however, soon reflected in the increased area cultivated, for at the end of 1858 the land under crop in Australia totalled over a million acres. The largest increase took place in Victoria, which returned an area of 299,000 acres. For the same year South Australia had 264,000 acres in cultivation, Tasmania 229,000 acres, and New South Wales 223,000 acres.

2. Progress of Cultivation since 1860.—The following table shows the area under crop in each of the Commonwealth States and Territories at decennial intervals since 1860 and during each of the last five seasons. The area under permanent artificially-sown grasses is excluded in all the States, except for the years 1860–79 in the case of New South Wales, where the acreage cannot be separated. During those years, however, the area laid down under permanent grasses could not have been very large.

1918–19	3,891,823	3,942,899	525,517	3,111,079	1,605,088	254,109	99	1,779	13,332,393
1919–20	3,773,577	4,000,815	563,762	3,058,770	1,628,163	270,955	365	2,109	13,298,516

The increase in the area under crop during the past ten years has been most marked in the case of Western Australia, New South Wales, and South Australia, the respective increases being 906,077, 593,016, 528,469 acres. During the same period an increase of 342,280 acres was experienced in Victoria, while Queensland and Tasmania suffered decreases of 43,028 and 3,071 acres respectively. The total area under crop in the Commonwealth increased during the period by 2,326,217 acres. The percentage of increase was particularly high in Western Australia, viz., 125 per cent. South Australia had an increase of 21 per cent., while New South Wales and Victoria added to their areas under crop to the extent of 19 and 9 per cent. respectively. The decreases for the ten years represented about 7 per cent. in Queensland and 1 per cent. in Tasmania, while the increase for the whole of the Commonwealth during the same period was 21 per cent.

3. Relation to Population.—From the following table it will be seen that the acreage under crop per 1,000 of the population has consistently declined in all the States during the past four years. The decreased areas are particularly noticeable in New South Wales,

Victoria, South Australia, and Western Australia, and are mainly attributable to the decline of wheat growing in Australia since 1915-16. Details for the past five seasons are as follows:—

TOTAL AREA UNDER CROP PER 1,000 OF POPULATION, 1915-16 TO 1919-20.

Season.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Nor. Ter.	Fed. Ter.	C'wealth.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
1915-16 ..	3,099	4,025	1,075	8,584	6,885	1,658	60	2,390	3,757
1916-17 ..	2,779	3,468	1,322	8,383	6,493	1,353	57	959	3,447
1917-18 ..	2,373	2,913	1,074	7,060	5,429	1,172	27	829	2,897
1918-19 ..	2,016	2,756	757	6,980	5,121	1,217	21	797	2,650
1919-20 ..	1,884	2,674	777	6,533	4,909	1,250	78	1,099	2,534

4. *Relation to Total Area.*—The next table furnishes a comparison of the area under crop in the several States and Territories and the Commonwealth with the respective total areas. For the Commonwealth as a whole, the area under crop in 1919-20 represented only about one acre in every 143. In Victoria the proportion was about one acre in every 14, in New South Wales one in 52, in Tasmania one in 62, in South Australia one in 80, in Western Australia one in 384, in Queensland one in 761, in the Federal Territory one in 285, and in the Northern Territory about one in 918,128.

PERCENTAGE OF AREA UNDER CROP ON TOTAL AREA, 1915-16 TO 1919-20.

Season.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Nor. Ter.	Fed. Ter.	C'wealth.
	%	%	%	%	%	%	%	%	%
1915-16 ..	2.927	10.154	0.170	1.547	0.351	1.937	0.0001	0.749	0.973
1916-17 ..	2.608	8.625	0.206	1.491	0.321	1.612	0.0001	0.354	0.883
1917-18 ..	2.253	7.308	0.170	1.266	0.269	1.420	..	0.290	0.751
1918-19 ..	1.965	7.010	0.122	1.279	0.257	1.515	..	0.296	0.700
1919-20 ..	1.905	7.113	0.131	1.257	0.261	1.615	..	0.351	0.699

5. *Artificially-sown Grasses.*—In all the States considerable areas are devoted to artificially-sown grasses, mainly sown on uncultivated land after burning off the existing vegetation and consequently not included with "area under crops." Statistics regarding the area under such grasses are as shewn hereunder:—

AREA UNDER SOWN GRASSES, 1915-16 TO 1919-20.

Season.	New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia.	Tasmania.	Nor. Ter.	Fed. Ter.	Commonwealth.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
1915-16	1,247,029	1,182,995	305,186	25,443	9,119	675,335	200	70	3,445,377
1916-17	1,357,087	1,292,817	363,876	29,644	8,327	654,072	200	70	3,706,093
1917-18	1,389,557	1,268,310	406,094	20,155	11,769	679,512	460	83	3,775,940
1918-19	1,438,382	1,269,493	418,467	21,987	14,158	666,954	600	83	3,830,124
1919-20	1,543,317	1,062,244	449,010	18,107	16,672	667,300	600	871	3,758,120

The considerable increase in the area of the grass lands of the Commonwealth is due in large measure to the great development of the dairying industry which has taken place during recent years, and which is referred to in the succeeding section.

§ 3. Relative Importance of Crops.

1. **Distribution of Crops.**—In the following table are furnished details concerning the areas in the several States under each of the principal crops for the season 1919-20:—

DISTRIBUTION OF CROPS IN AUSTRALIA, 1919-20.

Crop.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Nor. Ter.	Fed. Ter.	Total for C'wealth.

2. **Relative Areas of Crops in States and Territories.**—Taking the principal crops, i.e., those in the case of which the cultivation amounts to more than 50,000 acres in the Commonwealth, the proportion of each in the various States and Territories to the total area under crop for the season 1919-20 is shewn in the next table. In four of the States, viz., New South Wales, Victoria, South Australia, and Western Australia, wheat-growing for grain is by far the most extensive form of cultivation, while in the same States, with the exception of New South Wales where green forage displaced hay for the first time, the hay crop is second in importance. In Victoria, South Australia, and Western Australia the oat crop occupies third position, while hay ranks third in New South Wales followed by maize. In Queensland, on the other hand, the three principal crops in the order of importance are green forage, sugar-cane, and maize, while in Tasmania hay, oats, and orchards and fruit gardens, occupy the leading positions. For the Commonwealth as a whole, the wheat, hay, and oat crops represent nearly 80 per cent. of the total area under crop.

PROPORTION OF AREA UNDER CHIEF CROPS, 1919-20.

3. Relative Positions of States and Territories in regard to Principal Crops.—The relative proportion of acreage of the several crops for 1919-20 and the position regarding them in each State and Territory is shewn in the following table. New South Wales exhibited the largest area under green forage and maize, and was second in hay, orchards, and sugar-cane; Victoria was in the leading position in regard to hay, oats, orchards and fruit gardens, and potatoes; and Queensland was first in sugar-cane and second in green forage and maize. South Australia had the largest area under wheat, vineyards, and barley, and occupied second position in regard to oats; Western Australia held third position in oats and barley, and fourth in wheat, hay, and vineyards; while Tasmania was second in regard to potatoes, and third in orchards and fruit gardens.

RELATIVE POSITIONS OF STATES AND TERRITORIES IN REGARD TO AREA UNDER EACH OF THE PRINCIPAL CROPS DURING THE SEASON 1919-20.

All other Crops ..	121,185	125,918	132,112	136,049	131,193
Total	18,528,234	16,806,380	14,298,982	13,332,393	13,298,516

During the period under review the area devoted to the several crops has varied considerably, that under wheat attaining a maximum in the season 1915-16, and a minimum in 1919-20, the decline during the four years amounting to 6,065,213 acres, while hay also reached its maximum area in 1915-16, and its minimum in 1917-18. Of the other crops, green forage, oats, orchards and fruit gardens, and vineyards attained their maximum areas in 1919-20, maize and potatoes, in 1916-17, sugar-cane in 1917-18, and barley in 1918-19.

§ 4. Wheat.

1. **Progress of Wheat-Growing.**—(i) *Acreage.* The area under wheat for grain is given below for each State at various periods since 1860, and is shewn diagrammatically in the graph hereinafter :—

AREA UNDER WHEAT, 1860-1 TO 1920-1.

Season.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Nor. Ter.	Fed. Ter.	C'wealth.

1920-1a	3,124,370	2,295,865	175,750	2,163,646	1,272,953	22,000	9,054,584

(a) Preliminary figures except Victorian which are final.

The area devoted in the Commonwealth to the production of wheat for grain was higher for the season 1915-16 than for any previous season, there being an increase in all the States with the exception of Queensland, which shewed a falling-off. The figures for the season 1916-17 shew a reduction in area under wheat for grain throughout the Commonwealth with the exception of Queensland and South Australia, where the acreages for both States are the highest on record. During the next three years a serious decline took place in the area under wheat in all the States, the Commonwealth total for the latter year exhibiting a shortage of over 6 million acres as compared with 1915-16. The average area under wheat in the Commonwealth during the last ten seasons, 1910 to 1920, was 8,927,988 acres, or roughly 2½ million acres more than were sown during 1919-20.

Although final figures for 1920-21 for all the States are not yet available, the data to hand indicate the total area under wheat for grain in the Commonwealth at about 9,054,584 acres, representing a notable increase of 41 per cent. on the 1919-20 area. This increase was in evidence in all the wheat producing States, being most marked in New South Wales, where the area under wheat for grain increased by 1,650,196 acres. The total for the Commonwealth during 1920-21 exceeded the ten-yearly average by 126,596 acres.

(ii) *Yield.* The production during the same period for each State and for the Commonwealth as a whole is given below :—

PRODUCTION OF WHEAT, 1860-1 TO 1920-21.

(a) Final figures Victoria, those for remaining States approximate.

The 1915-16 harvest of 179,065,703 bushels was the largest ever reaped in the Commonwealth. The 1916-17 yield of 152,420,189 bushels comes next in order, followed by the yields obtained during 1917-18, 1913-14, 1910-11, 1912-13, and 1909-10, i.e., 114,733,584; 103,344,132; 95,111,983; 91,981,070, and 90,413,597 bushels respectively. These seven seasons represent the only occasions on which a harvest exceeding 90,000,000 bushels was garnered. During the past four seasons the production of wheat in the Commonwealth has declined from 179,065,703 bushels in 1915-16 to 45,975,805 bushels in 1919-20, a decrease of 133,089,898 bushels, or 33,272,475 bushels per annum. In order to arrest this serious decline an earnest endeavour was made throughout the wheat growing States to increase the acreage during 1920-21.

Satisfactory Government guarantees and the prospects of high prices ruling in England when the crop would be garnered proved sufficient inducement to growers to sow 9,054,584 acres, an increase of 2,635,285 acres on the 1919-20 area. The season was an exceptionally good one, the average yield per acre equalling nearly 16 bushels, and the total production amounted to 144,243,734 bushels, which figure has only been exceeded on two occasions, viz., in 1915-16 and 1916-17.

(iii) *Average Yields.* In the next table will be found the average yield of wheat per acre in each of the last five seasons, and for the decennium 1910-20:—

YIELD OF WHEAT PER ACRE, 1915-16 TO 1919-20.

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N.Ter.	F. Ter.	C'wealth.
	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	Bshls.	Bushels.	Bushels.
1915-16..	15.94	15.90	4.42	12.46	10.52	20.43	..	16.21	14.34
1916-17..	9.61	16.37	10.81	16.46	10.28	12.53	..	14.06	13.22
1917-18..	11.33	14.03	8.10	12.18	7.44	11.57	..	14.32	11.74
1918-19..	7.60	11.40	4.83	10.49	7.72	15.66	..	10.00	9.47
1919-20..	2.98	7.75	6.71	7.77	10.77	18.58	..	5.85	7.16
Average 10 seasons 1910-20	(a)10.75	11.92	10.43	10.08	8.85	18.44	2.50	(b)14.14	10.69

(a) Including Federal Territory.

(b) Average for nine seasons.

As the above figures shew, there were considerable variations in the average yields, chiefly due to the vagaries of the seasons. Since 1915-16, the record wheat producing year, the average yield per acre has continuously declined, culminating in the low yield of 7.16 bushels for the drought year of 1919-20.

(iv) *Relation to Population.* During the seasons embraced in the following table, the Commonwealth's production of wheat per head of population has varied between $8\frac{3}{4}$ bushels in 1919-20 and $36\frac{3}{4}$ bushels in 1915-16. The State in which wheat-growing generally occupies the most important position relatively to population is South Australia, which in 1919-20 had a yield averaging nearly 32 bushels per head. Queensland and Tasmania are the States in which the average production of wheat per head is least, the quantity raised being considerably below that required for local consumption. Particulars for the past five seasons are as follows:—

AUSTRALIAN WHEAT PRODUCTION PER 1,000 OF POPULATION, 1915-16 TO 1919-20.

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N. Ter.	F. Ter.	C'wealth.
	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.
1915-16..	35,675	41,241	611	77,854	57,344	4,944	..	21,023	36,307
1916-17..	19,685	36,574	3,679	105,718	52,147	1,742	..	5,677	31,264
1917-18..	19,943	26,745	1,527	65,776	30,068	1,242	..	3,505	23,247
1918-19..	9,493	17,641	150	51,462	28,220	893	..	161	15,036
1919-20..	2,191	9,932	430	31,996	33,839	985	..	424	8,762

The normal annual consumption of wheat in Australia, exclusive of the requirements for seed, poultry and other live stock, is 327 lbs. (5.448 bushels) per head of population.

2. *Australian and Foreign Wheat Yields.*—In the next table will be found a statement of the average return per acre in the principal wheat-growing countries of the world, ranging from Denmark with a maximum of 47.5 bushels per acre to Mexico with a minimum of 3 bushels per acre. Australia with approximately 7.2 occupies a relatively subordinate position.

AVERAGE YIELD OF WHEAT PER ACRE IN VARIOUS COUNTRIES, 1919.

Country.	Average Yield in bushels per acre.	Country.	Average Yield in bushels per acre.
Denmark	47.5	France	15.7
Netherlands	37.2	Argentine Republic	14.3
New Zealand	32.7	Austria (1916)	13.8
Belgium	30.1	India	12.6
United Kingdom	29.2	United States	12.5
Sweden	27.3	Spain	12.5
Switzerland	27.1	Russia in Europe (1916)	10.4
Egypt (1918)	25.3	Canada	10.1
Germany	24.9	Union of South Africa (1918)	9.0
Japan	21.7	Uruguay	8.0
Hungary (1915)	17.9	Portugal (1918)	7.6
Bulgaria	16.4	Algeria	7.5
Rumania	16.4	Australia (a)	7.2

Serbia (1914)	16.0	Tunis	6.2
Chile	15.9	Mexico (1914)	3.0

(a) Average yield per acre for 10 years, 10.69.

3. Wheat Crops of the World.—The latest available official statistics of the production of wheat in various countries are given in the following table:—

WHEAT YIELD IN VARIOUS COUNTRIES, 1919.

Country.	Yield in bushels.	Country.	Yield in bushels.
United States	912,384,000	Austria (1916)	27,811,000
Russia in Europe (1917)	377,900,000	Algeria	20,961,000
India	376,880,000	Chile	20,930,000
Russia in Asia (1917)	230,406,000	Turkey in Europe (1915)	17,449,200
Argentine Republic	214,400,000	Persia (1915)	15,510,400
Canada	193,260,000	Mexico (1918)	10,470,000
France	177,929,000	Belgium	9,892,000
Italy	169,517,000	Sweden	9,507,000
Spain	129,215,000	Tunis	7,347,000
Hungary (1917)	111,995,000	Union of South Africa	6,628,000
Germany	79,824,000	Portugal (1918)	6,051,000
United Kingdom	69,320,000	Netherlands	6,013,000
Rumania	48,287,000	Denmark	5,914,000
Australia (a)	45,976,000	Uruguay	5,732,000
Bulgaria	34,019,000	New Zealand	4,560,000
Turkey in Asia (1915)	33,929,000	Serbia (1918)	4,000,000
Egypt (1918)	32,555,000	Switzerland	3,523,000
Japan	29,809,000		

(a) Average yield for 10 years, 95,479,948.

Various estimates of the total quantity of wheat produced in the world have been made. That furnished by the International Institute of Agriculture, Rome, gives the following figures for the ten years 1909 to 1918:—

WORLD'S PRODUCTION OF WHEAT, 1909 TO 1918.

Year.	1,000,000 bushels.	Year.	1,000,000 bushels.	Year.	1,000,000 bushels.
1909	3,575	1913.. ..	4,035	1917.. ..	3,243
1910	3,532	1914.. ..	3,579	1918.. ..	3,675
1911	3,525	1915.. ..	4,270	Average for 10	
1912	3,810	1916.. ..	3,301	years	3,655

In this estimate the figures given for Australia and New Zealand relate to the agricultural year ending on 30th June in the year specified.

For the ten years referred to, the Australian production of wheat aggregated 999,237,270 bushels, thus representing 2.7 per cent. of the world's production. The total quantity of wheat produced in the British Empire during the same period of ten years was approximately 7,608 million bushels, so that the Australian production of wheat represented 13.1 per cent. of that of the British Empire, while the British Empire production represented 20.82 per cent. of the world's total.

4. Prices of Wheat.—(i) *British Wheat.* Since the United Kingdom is the largest importer of Australian wheat, the price of wheat in the British markets is a matter of prime importance to the local producer. The table below gives the average prices per Imperial quarter realised for British-grown wheat:—

PRICES OF BRITISH WHEAT PER QUARTER, 1861 TO 1919.

Year.	Average for Year.	Highest Weekly Average.	Lowest Weekly Average.	Year.	Average for Year.	Highest Weekly Average.	Lowest Weekly Average.
	s. d.	s. d.	s. d.		s. d.	s. d.	s. d.
1861 ..	55 4	61 6	50 0	1914 ..	34 11	43 3	30 11
1871 ..	56 8	60 0	52 6	1915 ..	52 10	62 0	42 9
1881 ..	45 4	55 2	40 9	1916 ..	58 5	75 10	46 3
1891 ..	37 0	41 8	32 3	1917 ..	75 9	83 10	70 3
1901 ..	26 9	27 8	25 8	1918 ..	72 10	74 5	71 2
1911 ..	31 8	33 4	30 0	1919 ..	72 11	73 4	72 5
1913 ..	31 8	34 3	30 0				

(ii) *Australian Export Values.* In the next table will be found a statement of the export values of Australian wheat during each of the last five years:—

EXPORT VALUES OF AUSTRALIAN WHEAT, 1915-16 TO 1919-20.

Year	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.
	s. d.	s. d.	s. d.	s. d.	s. d.
Price per bushel	5 7	4 10	5 3	5 1	5 0

The export values here shown are the average declared values for the successive years at the several ports of shipment in the Commonwealth.

5. Imports and Exports of Wheat and Flour.—(i) *Quantities.* The table hereunder shews the imports, exports, and net exports of wheat and flour from 1915-16 to 1919-20. For the sake of convenience, flour has been expressed at its equivalent in wheat, one ton of flour being taken as equal to 50 bushels of grain. During 1915-16 the Commonwealth imports of wheat and flour were equivalent to 5,633,596 bushels of wheat occasioned by the failure of the Australian wheat crop during the 1914-15 drought year. In ordinary seasons the import of wheat and flour is negligible. During the past five years the export has ranged between 35,969,195 bushels in 1915-16 and 108,360,358 bushels in 1919-20, the net exports for the period averaging 63,782,847 bushels.

IMPORTS AND EXPORTS OF WHEAT AND FLOUR, COMMONWEALTH.
1915-16 TO 1919-20.

Year.	Imports.			Exports.			Net Exports.
	Wheat.	Flour.	Total.	Wheat.	Flour.	Total.	
	Bushels.	Eq. Bushels. ^a	Bushels.	Bushels.	Eq. Bushels. ^a	Bushels.	Bushels.
1915-16	5,616,696	16,900	5,633,596	28,621,445	7,347,750	35,969,195	30,335,599

1919-20	285	4,300	4,585	82,470,658	25,889,700	108,360,358	108,355,773

(a) Equivalent in bushels of wheat.

(ii) *Destination of Exported Breadstuffs.* In the next two tables will be found a list of the principal countries to which the Commonwealth exported wheat and flour during each year of the period 1915-16 to 1919-20. The countries are as shown in the Australian Customs returns, but owing to the fact that in normal times wheat ships are frequently instructed to call for orders at various ports, the countries to which these ports belong cannot always be considered as the ultimate destination of the whole of the wheat said to be exported to them.

EXPORTS OF WHEAT FROM THE COMMONWEALTH, 1915-16 TO 1919-20.

Country to which Exported.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.	Total for Five Years.

Total ..	146,955	290,633	374,083	483,395	517,793	1,812,859

For the five years under review the export of wheat to the United Kingdom amounted to 101,698,430 bushels, or 43½ per cent. of the total export for the period, while the export of flour to the United Kingdom aggregated 526,102 tons, or 29 per cent. of the total export. During the quinquennium the heaviest exports of flour have been to the United Kingdom, Egypt, Straits Settlements, France, South Africa, and the Philippine Islands.

(iii) *Exports of Wheat and Flour.* From the foregoing returns it will be seen that the quantity of Australian wheat exported in the form of flour during the past five years represents, on the average, about 28 per cent. of the total equivalent in wheat exported as wheat or flour from the Commonwealth.

A point of some interest in connexion with the export of wheat, and one which bears also on the proportions of wheat and flour exports just referred to, is that concerning the quantity of phosphoric acid which this export has the effect of removing from the Commonwealth, and the necessity which exists for the return to the soil of this substance in some form.

According to an estimate furnished by the chemist to the New South Wales Department of Agriculture (F. B. Guthrie, Esq., F.C.S., etc.), the proportions of milled product from a bushel (60 lbs.) of wheat are, approximately, 42 lbs. of flour, 9 lbs. of bran, and 9 lbs. of pollard, while the percentage of phosphoric acid contained in these products is as follows:—

Flour	0.32 per cent., or 0.13 lb. per bushel.
Bran	3.00 „ 0.27 „
Pollard	0.90 „ 0.08 „

The total amount of phosphoric acid contained in a bushel of wheat is, therefore, 0.48 lb., of which 0.13 lb. is in the flour and 0.35 lb. in the offal.

During the last ten years the net exports from the Commonwealth of wheat and its milled products have amounted to 409,304,833 bushels of wheat, 2,570,687 tons of flour, and 3,862,980 bushels of bran, pollard, and sharps. On the basis of the figures quoted above this export would contain no less than 257,285,136 lbs. of phosphoric acid, the value of which as a fertilizer would amount to nearly three million pounds sterling.

(iv) *Local Consumption of Wheat.* The estimated consumption of wheat for food and for seed purposes in the Commonwealth during the past ten years is given in the following tables:—

WHEAT USED FOR HUMAN CONSUMPTION IN THE COMMONWEALTH, 1911 TO 1919-20.

Year.	Flour Milled.	Net Exports of Flour.		Net Quantity Available for Home Consumption.		Net Quantity Available per Head of Population.	
		Flour.	Flour in Biscuits Exported.	Flour.	Equivalent in Terms of Wheat.	Flour.	Equivalent in Terms of Wheat.
	Tons.	Tons.	Tons.	Tons.	Bushels.	Tons.	Bushels.
1911 ..	696,301	175,649	2,570	518,082	25,904,100	.1154	5.769
1912 ..	677,053	167,948	2,820	506,285	25,314,250	.1090	5.450

1916	12,894,917	11,523,000	.894	2.348
1917	10,910,669	9,713,000	.890	1.968
1918	9,428,398	9,054,000	.960	1.800
1919	8,250,572	7,774,000	.942	1.482
Aggregate for 10 years ..	104,072,622	96,009,000	.923	1.977

In addition to the above, there is to be taken into consideration grain fed to poultry and other live stock. This, doubtless, varies in quantity from year to year according to the prices current for wheat, and other causes. No data are available on which to base an estimate of actual quantity so consumed. The flour available for human consumption necessarily fluctuates from year to year coincident with stocks being heavy or light. In some years the flour available per head of population, after deducting net exports from quantity milled, shews a substantial increase over the average for the previous year, this, however, being counterbalanced by a decline in the following year. The average quantity of flour consumed per annum for the ten years under consideration was 0.1090 tons per head of population, which, when expressed in equivalent terms in wheat, represents 5.448 bushels. The estimates of quantity of grain used for seed purposes have been based on data supplied by the Agricultural and Statistical Departments of the several States giving average quantities of seed used per acre for wheat sown either for grain or hay. The average annual quantity thus used during the ten years was 1,977 bushels per head of population, and 0.923 bushels or nearly 55½ lbs. per acre sown.

6. **Value of the Wheat Crop.**—The estimated value of the wheat crop in each State and in the Commonwealth during the season 1919-20 is shewn below :—

VALUE OF THE WHEAT CROP, (a) 1919-20.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Fed. Ter.	C'wealth.

Value per acre ..	£1/12/9	£3/0/0	£2/3/7	£3/10/0	£5/2/4	£6/16/3	£3/4/9	£3/3/8

(a) Exclusive of the value of straw.

7. **The Australian Wheat Marketing Scheme.**—(i) *General Principles.* Owing to the abnormal conditions prevailing, a Wheat Marketing Scheme was entered into by the Governments of the Commonwealth and of the States of New South Wales, Victoria, South Australia, and Western Australia, for the purpose of realizing to the best advantage the 1915-16 wheat harvest of the States named, and of making advances to farmers pending realization. It was subsequently decided that the 1916-17 harvest, and later, the 1917-18, 1918-19, 1919-20 and 1920-21 harvests, should be dealt with on similar lines to those of the 1915-16 harvest.

The general principles of the scheme may be shortly stated thus :—

1. That all growers should participate equitably in the realization of the harvest and the proceeds thereof.
2. That the limited freights available should be allotted between the States in accordance with the exportable surplus of each.

The securing and general allotment of freights with the exception of the 1920-21 crop was under the control of the Chartering Agents, who were responsible to the Commonwealth Government. The Australian Wheat Board made its own chartering arrangements for 1920-21.

The distribution of freights among the States is in charge of the Australian Wheat Board, which also has the duty of realizing the crop. This Board consists of Ministerial representatives of the Governments of the Commonwealth and of the States and representatives of the growers, one from each State. It has the assistance of an Advisory Board consisting of well-known wheat shippers. A London Wheat Committee, consisting of the High Commissioner and the Agents-General of the States concerned, acting with the advice of the London representatives of the wheat shippers, arranges overseas sales. Adjustments are to be made between the States so that, having regard to the quantity shipped, each will ultimately receive the average net result of the whole of the overseas realizations.

In certain States the crop is bought by the State Government, and in others the wheat is received from the growers for sale on their behalf.

The Australian Wheat Board fixes all prices at which wheat may be sold, except in the case of poultry feed, which is left to the States to regulate.

Each State has a local Board or Commission to control the operations of the scheme within the State concerned. This Board or Commission effects all local sales, including sales to millers.

(ii) *Advances and Finance.* Under arrangements with the Australian banks made by the Commonwealth and State Governments, advances are made to farmers upon delivery of their wheat at railway stations to representatives of agents appointed by the different State Governments. The following advances per bushel have been made in respect of the six pools for each of the States up to the 1st August, 1921 :—

POOLED WHEAT ADVANCES PER BUSHEL, 1915-16 TO 1920-21.

State.	1915-16. (b)	1916-17.	1917-18. (a)	1918-19. (a)	1919-20. (a)	1920-21.
	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>
New South Wales	4 10	3 3	4 0	4 10	7 6	6 3
Victoria ..	4 9	(a) 4 0	5 0	5 2	7 6	6 3
South Australia	4 7½	3 3	4 9	5 4	8 9	6 3
Western Australia	4 7½	(n) 4 1½	4 9	5 2	8 6	6 3

(a) Less rail freight.

(b) Less rail freight and handling charges.

Proceeds of wheat as realized are applied in reduction of the bank overdrafts caused by payment of advances and expenses. The rate of interest payable to the banks is six per cent. for 1920-21, five per cent. being the rate for previous pools. The Government of each State has undertaken to repay all advances made on account of such State, and the Commonwealth Government has guaranteed repayment by the States. Advances to growers are made by means of certificates issued by the agents appointed by the various States. The certificates are payable at banks named by the growers.

(iii) *Results of the Scheme.* In all the States, certain wheat, particularly seed wheat, has not been brought under the scheme. The quantity of wheat pooled therefore differs from that harvested in each State. In addition, wheat grown in one State may be pooled in another. A considerable quantity of New South Wales wheat is included in Victorian returns, and the Victorian total also includes a small quantity of South Australian wheat.

Deliveries made on account of each harvest to 1st August, 1921, are as follows :—

WHEAT POOLED IN EACH STATE, 1915-16 TO 1920-21.

State in which Pooled.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.	1920-21. (to 1/8/1921).

Total shipments and local deliveries ..	49,369,000	61,079,000	43,382,000	18,608,000	172,438,000

Since the initiation of the "Pool," several sales of magnitude have been made, notably one of 3,000,000 tons to the British Wheat Commission, at a rate of 4s. 9d. per bushel f.o.b., equalling £26,600,000, which is the largest wheat transaction ever recorded, and another of 1,500,000 tons to the same purchaser for £15,400,000, at the rate of 5s. 6d. per bushel.

§ 5. Oats.

1. **Progress of Cultivation.**—Oats came next in importance to wheat amongst the grain crops cultivated last season, but while wheat grown for grain accounted for 48 per cent., oats represented only 8 per cent. of the area under crop in the Commonwealth. The progress of cultivation of oats since 1860 is shewn in the table hereunder, and more fully in the graphs hereinafter :—

CULTIVATION OF OATS, 1860-1 TO 1919-20.

Season.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Fed. Ter.	C'wealth.

1919-20	586,758	6,603,067	2,871	1,634,239	2,486,918	1,242,258	3,255	12,559,366

The principal oat-growing State of the Commonwealth is Victoria. During the past five seasons it has produced 56 per cent. of the total quantity of oats grown in the Commonwealth; South Australia, Western Australia, Tasmania, and New South Wales come next in order of importance. In New South Wales and Tasmania, the highest production of oats for any season was that of 1909-10, while Victoria experienced its maximum yield in 1903-4, South Australia in 1915-16, Queensland in 1916-17, and Western Australia in 1912-13. For the Commonwealth as a whole, the record yield was that of 17,541,210 bushels in the season 1903-4, while the yields of 16,538,979 and 16,248,857 for 1915-16 and 1908-9 respectively rank second and third.

3. **Average Yield.**—The average yield per acre of the oat crop of the Commonwealth varies considerably in the different States, being highest in Tasmania and lowest in South Australia. Particulars as to average yield in each of the last five seasons, and for the decennium 1910-20, are given in the succeeding table :—

AVERAGE YIELD OF OATS PER ACRE, 1915-16 TO 1919-20.

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Fed. Ter.	C'wealth.
	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.
1915-16	23.00	26.36	7.24	16.87	14.78	27.99	16.08	22.92
1916-17	16.16	18.77	16.55	12.13	13.82	18.28	18.06	16.61
1917-18	17.60	20.94	14.89	11.72	9.50	16.95	37.56	16.87
1918-19	14.72	15.38	12.19	9.58	10.60	23.42	25.30	13.59
1919-20	7.71	11.80	7.91	8.50	12.96	25.78	14.53	11.75
Average for 10 seasons 1910-20	(a)16.79	17.18	16.22	10.57	12.23	26.50	(b)18.26	15.94

(a) Including Federal Territory.

(b) Average for nine seasons.

The smallest average yield per acre ever recorded for the Commonwealth was that experienced in the abnormally dry season 1914-15, viz., 5.60 bushels, while the largest in the past ten years was that of the season 1915-16, amounting to 22.92 bushels per acre.

4. **Relation to Population.**—The State in which oat production occupies the most important position in relation to population is Tasmania, the yield for that State representing about 5.72 bushels per head during the last five years under review, as compared with 2.56 bushels per head for the Commonwealth as a whole. Particulars for the seasons 1915-16 to 1919-20 are furnished in the succeeding table :—

OAT PRODUCTION PER 1,000 OF POPULATION, 1915-16 TO 1919-20.

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Fed. Ter.	C'wealth.

1915-16	719	6,574	4	4,868	4,837	10,892	820	3,353
1916-17	583	5,926	162	4,251	5,471	5,033	877	2,875
1917-18	768	4,352	66	2,862	2,936	2,900	1,410	2,105
1918-19	659	3,687	5	3,457	4,785	4,062	601	2,076
1919-20	293	4,414	4	3,491	7,498	5,731	1,696	2,394

5. **Value of Oat Crop.**—The estimated value of the oat crop of the several States of the Commonwealth for the season 1919-20 is as follows :—

VALUE OF OAT CROP, (a) 1919-20.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Fed. Ter.	C'wealth.
Aggregate value..	£190,700	£1,925,895	£861	£408,560	£572,509	£341,620	£1,060	£3,441,205
Value per acre ..	£2/10/1	£3/8/10	£2/7/5	£2/2/6	£2/10/8	£7/1/10	£4/14/8	£3/4/5

(a) Exclusive of the value of straw.

6. **Imports and Exports.**—The production of oats in the Commonwealth has not yet reached such a stage as to admit of a regular export trade in this cereal; in fact in certain years the imports have exceeded the exports, notably in 1903, 1906, 1908, 1910, and in each of the four years prior to 1916-17. The quantities and values of oats imported into and exported from the Commonwealth during the years 1915-16 to 1919-20 are given hereunder:—

COMMONWEALTH IMPORT AND EXPORT OF OATS, 1915-16 TO 1919-20.

Year.	Imports.		Exports.		Net Exports.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	Bushels.	£	Bushels.	£	Bushels.	£
1915-16 ..	2,473,412	501,755	582,055	85,119	- 1,891,357	- 416,636
1916-17 ..	3,700	635	670,985	97,879	667,285	97,244
1917-18 ..	838	219	368,113	53,809	367,275	53,590
1918-19 ..	41,728	9,713	149,413	35,326	107,685	25,613
1919-20 ..	146,700	41,759	290,323	83,175	143,623	41,416

NOTE.—The minus sign (—) signifies net imports.

The principal countries from which the Commonwealth imports of oats have been obtained are the Dominion of New Zealand, Chile, Japan, and the United States of America, while the principal countries to which oats were exported during the period under review were New Zealand, Java and the United Kingdom.

7. **Oatmeal, etc.**—Importations of oatmeal, etc., into the Commonwealth take place principally from the United Kingdom, the United States, and New Zealand. The total importations of oatmeal, wheatmeal, and rolled oats during 1919-20 amounted to 237,490 lbs., and represented a value of £6,029, while the exports amounted to 2,312,225 lbs., valued at £32,347, principally to India, New Zealand, Java and Papua.

8. **Comparison with Other Countries.**—A comparison of the Australian production of oats with that of the leading oat-producing countries of the world is furnished in the following table:—

PRODUCTION OF OATS IN VARIOUS COUNTRIES, 1919.

Country.	Quantity of Oats Produced.	Country.	Quantity of Oats Produced.	Country.	Quantity of Oats Produced.
	Bushels.		Bushels.		Bushels.
United States ..	1,210,361,000	Sweden ..	62,825,000	Norway ..	12,391,000
Russia in Europe (1916) ..	674,593,000	Argentine Rep. ..	46,849,000	Rumania ..	12,131,000
Canada ..	343,825,000	Denmark ..	38,994,000	Algeria ..	8,695,000
Germany ..	253,951,000	Czecho-Slovakia ..	37,814,000	Japan ..	8,140,000
United Kingdom ..	203,960,000	Italy ..	28,482,000	New Zealand ..	6,968,000
France ..	138,057,000	Spain ..	27,000,000	Union of South Africa ..	6,270,000
Russia in Asia (1915) ..	82,243,000	Belgium ..	22,082,000	Bulgaria ..	6,060,000
Hungary (1915) ..	78,449,000	Netherlands ..	19,884,000	Tunis ..	2,826,000
Austria (1916) ..	76,475,000	Australia ..	12,559,000	Switzerland ..	2,272,000

9. **Comparison of Yields.**—The average yield per-acre of oats in Australia is a very low one compared with the results obtained in other countries, where the cultivation of this cereal is more extensively carried on. Arranging the countries contained in the foregoing table according to the magnitude of the average yield of oats for the years specified, the results are as follows :—

YIELD OF OATS PER ACRE, VARIOUS COUNTRIES, 1919.

Country.	Average per Acre.	Country.	Average per Acre.	Country.	Average per Acre.
	Bushels.		Bushels.		Bushels.
Netherlands ..	54.0	Hungary (1915)	29.5	Rumania ..	20.3

Average price per bushel ..	6 4	5 1½	6 1	4 4	4 2¾	4 11½

(a) Year ended 30th June, 1920.

§ 6. Maize.

1. **States Growing Maize.**—The only States in which maize is at all extensively grown for grain are those of New South Wales and Queensland, the area so cropped in these two States during the season 1919-20 being 241,769 acres, or 91 per cent. of the total for the Commonwealth. Of the balance, Victoria contributed 23,474 acres, South Australia 165 acres, Western Australia 11 acres, and the Northern Territory 50 acres. The climate of Tasmania prevents the growing of maize for grain in that State. In South Australia, prior to 1908, particulars concerning maize had not been specially asked for on the form used in the collection of agricultural statistics. In all the States, maize is grown to a greater or less extent as green forage, particularly in connexion with the dairying industry.

2. **Area under Maize.**—The area devoted to the growing of maize for grain in each State, from 1880 onwards, is given in the following table, and the actual fluctuations from year to year are shewn more fully on the graph hereinafter.

The total area under maize in the Commonwealth exceeded 350,000 acres for the first time in the season 1909-10, and although it fluctuated somewhat during the succeeding eight years, it may be considered to have remained at about that figure. During the last two years, however, the area under maize has diminished considerably, the 1919-20 area exhibiting a deficit of nearly 100,000 acres on the 1909-10 total. This decline has occurred principally in New South Wales.

AREA UNDER MAIZE, 1880-1 TO 1919-20.

Season.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	N. Ter.	F. Ter.	C'wealth.

1919-20 ..	136,509	23,474	105,260	165	11	50	..	265,469

(a) Particulars for years prior to 1907-8 not available.

3. **Total Yield.**—The average yield for the season 1919-20 was the lowest since the disastrous drought year of 1902. The 1910-11 crop was a record one, and exceeded 13,000,000 bushels, while the average annual production of maize during the last decade was 8,580,904 bushels. Particulars concerning the yield from 1880 onwards are given hereunder:—

MAIZE CROP, 1880-1 TO 1919-20.

(a) Particulars for years prior to 1907-8 not available.

4. **Average Yield.**—In the following table particulars are given of the average yield per acre of the maize crops of the several States for the seasons 1915-16 to 1919-20, and also for the decennium 1910-20:—

AVERAGE YIELD OF MAIZE PER ACRE, 1915-16 TO 1919-20.

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	N. Ter.	F. Ter.	C'wealth.
	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.
1915-16 ..	24.48	44.92	13.68	22.56	9.75	10.00	17.73	20.99
1916-17 ..	27.89	50.80	16.64	8.49	18.61	10.00	10.00	23.68
1917-18 ..	24.01	54.93	25.37	11.37	7.23	17.28	20.43	26.63
1918-19 ..	18.26	31.55	27.46	15.68	15.97	13.33	..	24.10
1919-20 ..	29.68	37.44	17.39	10.97	7.64	10.00	..	25.48
Average for 10 seasons 1910-20	27.23	44.33	22.13	13.75	12.90	17.50	14.41	25.93

(a) Including Federal Territory.

(b) Average for nine seasons.

The extraordinarily high average yield obtained in Victoria is due, in large measure, to the fact that the area under maize in that State is comparatively small and is situated in districts that are peculiarly suited to the production of this grain. The average yield in New South Wales is appreciably higher than that obtained in Queensland.

5. **Value of Maize Crop.**—The value of the Commonwealth maize crop for the season 1919-20 has been estimated at £2,861,951, made up as follows :—

VALUE OF MAIZE CROP, 1919-20.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	N. Ter.	C'wealth.
	£	£	£	£	£	£	£
Aggregate value ..	1,722,110	406,501	732,266	905	49	120	2,861,951
Value per acre ..	£12/12/4	£17/6/4	£6/19/2	£5/9/8	£4/9/1	£2/8/0	£10/15/7

6. **Relation to Population.**—During the past ten seasons the Commonwealth production of maize has ranged between 1.29 bushels per head of population in 1919-20 and 3 bushels per head in 1910-11. The production in Queensland, the State in which the maize yield per head of population is highest, ranged during the same period between 2½ bushels per head in 1919-20 and 7½ bushels per head in 1910-11. Details for the several States during the past five seasons are as follows :—

MAIZE PRODUCTION PER 1,000 OF POPULATION, 1915-16 TO 1919-20.

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	N. Ter.	F. Ter.	C'wealth.

1919-20..	2,023	588	2,524	4	..	106	..	1,289

7. **Australian and Foreign Maize Production.**—The following table gives the production of maize in Australia and in the leading maize-producing countries of the world. The figures shew that the United States of America was responsible for over 73 per cent. of the total production.

PRODUCTION OF MAIZE IN VARIOUS COUNTRIES, 1919.

Country.	Production of Maize.	Country.	Production of Maize.
	Bushels.		Bushels.
United States ..	2,828,760,000	Canada ..	16,940,000
Argentine Republic ..	241,375,000	Serbia (1915) ..	11,632,800
Hungary (1915) ..	175,025,170	France ..	10,985,000
Rumania ..	94,600,000	Philippine Islands (1918) ..	10,926,000
India (British) (1918) ..	89,844,000	Russia in Asia (1913) ..	10,765,860
Italy ..	80,101,000	Bulgaria (1918) ..	8,144,000
Mexico (1918) ..	73,660,000	Australia ..	6,764,000
Russia in Europe (1917) ..	67,137,000	Austria (1916) ..	5,702,000
Egypt (1917) ..	63,758,000	Portugal (1917) ..	5,353,000
Union of South Africa ..	34,452,000	Japan (1918) ..	3,756,000
Spain ..	23,844,000	Uruguay ..	2,597,000

8. **Comparison of Yields.**—The average yield per acre of maize in the Commonwealth during 1919 was 25.5 bushels, and may be regarded as highly satisfactory when compared with that of other maize-producing countries. Canada, Egypt, Argentine Republic,

Hungary, United States and Japan are the only countries shewing a higher average. The remaining countries shewn in the following table had average yields per acre ranging from 10.1 to 21.6 bushels.

AVERAGE YIELD OF MAIZE PER ACRE IN VARIOUS COUNTRIES, 1919.

Country.	Average Yield per Acre.	Country.	Average Yield per Acre.
	Bushels.		Bushels.
Canada	64.0	Mexico (1918)	19.1
Egypt (1917)	32.5	Russia in Europe (1916)	19.0
Argentine Republic	29.5	Serbia (1913)	15.9
Hungary (1915)	28.3	Austria (1916)	15.8
United States of America	27.7	France	14.8
Japan (1918)	26.3	India (1918)	14.3
Australia (a)	25.5	Union of South Africa (1918)	11.7
Italy	21.6	Philippine Islands (1918)	10.6
Spain	20.2	Russia in Asia (1913)	10.1
Rumania	19.5		

(a) Average yield for 10 years, 25.9 bushels.

9. Oversea Imports and Exports.—The Commonwealth oversea trade in maize is practically insignificant, any importation or exportation depending solely on the success or failure of the Australian crop. During the past five years owing to droughty conditions the total net import amounted to nearly 4,000,000 bushels. Details of imports and exports for the years 1915-16 to 1919-20 are as follows:—

COMMONWEALTH IMPORTS AND EXPORTS OF MAIZE, 1915-16 TO 1919-20.

Year.	Imports.		Exports.		Net Imports.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	Bushels.	£	Bushels.	£	Bushels.	£
1915-16	3,432,571	712,650	4,237	1,088	3,428,334	711,562
1916-17	41,952	8,162	50,296	11,894	— 8,344	— 3,732
1917-18	3,226	770	128,988	29,069	— 125,762	— 28,299
1918-19	255,605	73,774	84,120	20,804	171,485	52,970
1919-20	494,278	158,361	6,632	3,001	487,646	155,360

NOTE.—The minus sign (—) signifies net exports.

The principal countries to which maize has been exported from the Commonwealth are New Zealand and the Pacific Islands, while the principal countries from which importations have taken place are South Africa, Java, and the Pacific Islands.

10. Prepared Maize.—A moderate quantity of corn-flour is imported annually into the Commonwealth, the principal countries of supply being the United Kingdom and the United States. During the year 1919-20 these importations amounted to 320,803 lbs., and represented a value of £6,572. The exports of this commodity have been steadily increasing in dimensions during recent years, the amount exported during 1919-20 amounting to 401,878 lbs., valued at £10,086.

11. Price of Maize.—The average wholesale price of maize in the Sydney market is given in the following table for each of the last five years:—

AVERAGE SYDNEY PRICE OF MAIZE PER BUSHEL, 1915-16 TO 1919-20.

Particulars.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.
	s. d.	s. d.	s. d.	s. d.	s. d.
Average price per bushel ..	5 2	3 8	4 8½	6 11½	8 11

§ 7. Barley.

1. **Area under Barley.**—The area devoted to barley in the Commonwealth has fluctuated very considerably, though with a tendency to increase during the past few years. Originally the principal barley-growing State was Victoria, but for the past seven seasons South Australia has attained the lead in regard to acreage, and for 1919-20 accounted for more than 59 per cent. of the Commonwealth area devoted to this crop; Victoria was next in importance with a percentage of nearly 32; the remaining 9 per cent. being represented by Western Australia, Tasmania, New South Wales, and Queensland, in the order named. The figures here given relate to the areas harvested for grain; only small areas are cropped for hay, while more considerable quantities are cut for green forage. These, however, are not included in this sub-section. The area under barley for grain in the several States from 1880 onwards is shewn in the following table:—

COMMONWEALTH AREA UNDER BARLEY, 1880-1 TO 1919-20.

Season.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	C'wealth.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
1880-1 ..	8,056	68,630	1,499	13,074	6,363	8,297	105,919
1890-1 ..	4,937	87,751	584	14,472	5,322	4,376	117,442
1900-1 ..	9,435	58,853	7,533	15,352	2,536	4,502	98,211
1910-11 ..	7,082	52,687	5,578	34,473	3,369	5,235	108,424
1915-16 ..	6,369	61,400	1,367	84,900	10,069	5,409	169,514
1916-17 ..	5,195	93,015	12,674	103,627	11,105	4,637	230,253
1917-18 ..	6,370	84,931	7,702	95,654	5,028	5,185	204,870
1918-19 ..	7,980	100,198	1,316	130,357	7,982	7,036	254,869
1919-20 ..	5,354	85,323	3,275	157,897	9,167	6,293	267,309

2. **Total Yield.**—Despite a greater acreage in South Australia, Victoria, with its higher average yield per acre, produced the greatest quantity of barley during the past ten years. For the past two years, however, South Australian production exceeded that of Victoria, the excess in 1919-20 amounting to 920,282 bushels. Particulars concerning the yields of the several States from 1880 onwards are as follows:—

COMMONWEALTH BARLEY CROP, 1880-1 TO 1919-20.

Season.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	C'wealth.

3. **Malting and other Barley.**—In recent years the statistics of all the States have distinguished between "malting" and "other" barley. Particulars for 1919-20 season are as follows:—

MALTING AND OTHER BARLEY, 1919-20.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	C'wealth.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
Malting barley ..	3,772	50,049	2,979	137,932	4,896	5,124	204,752
Other barley	1,582	35,274	296	19,965	4,271	1,169	62,557
Total ..	5,354	85,323	3,275	157,897	9,167	6,293	267,309
	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.
Malting barley ..	25,014	917,274	31,637	2,215,029	62,708	100,365	3,352,027
Other barley	13,878	611,380	3,255	233,907	53,329	20,151	935,900
Total ..	38,892	1,528,654	34,892	2,448,936	116,037	120,516	4,287,927

Taking the Commonwealth as a whole, over 76 per cent. of the area devoted to this grain in 1919-20 was cropped for malting barley. The proportion varies considerably in the several States.

4. **Total Acreage and Yield.**—The following table sets out the total acreage and yield of malting and other barley in the Commonwealth as a whole during the past five seasons:—

AREA AND YIELD, MALTING AND OTHER BARLEY, COMMONWEALTH, 1915-16 TO 1919-20.

Season.	Acres.			Bushels.			Average Bushels per Acre.		
	Malting.	Other.	Total.	Malting.	Other.	Total.	Malting.	Other.	Total.
1915-16 ..	106,217	63,297	169,514	2,365,126	1,436,424	3,801,550	22.27	22.69	22.43
1916-17 ..	141,846	88,407	230,253	2,505,118	1,575,374	4,080,492	17.66	17.82	17.72
1917-18 ..	136,785	68,085	204,870	2,602,449	1,394,409	3,996,858	19.03	20.48	19.51
1918-19 ..	179,186	75,683	254,869	3,419,863	1,343,858	4,763,721	19.09	17.76	18.69
1919-20 ..	204,752	62,557	267,309	3,352,027	935,900	4,287,927	16.37	14.96	16.04
Average 10 seasons									
1910-20	130,687	60,244	190,931	2,361,522	1,070,698	3,432,220	18.07	17.77	17.98

For the past ten seasons the area and production of malting barley have represented approximately twice the corresponding figures for other barley. The average yield per acre differs very little in respect of the two classes of barley, malting obtaining a slight average advantage of 0.30 bushels per acre during the last ten years.

5. **Value of Barley Crop.**—The estimated value of the total barley crop of the Commonwealth for the seasons 1915-16 to 1919-20 was £655,917, £734,154, £834,075, £1,221,863, and £1,360,411 in the order named. The extent to which the several States have contributed to the latter total is shown in the following table:—

VALUE OF BARLEY CROP, (a) 1919-20.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	C'wealth.
Total value ..	£13,460	£537,582	£9,305	£725,557	£39,525	£34,982	£1,360,411
Value per acre ..	£2/10/3	£6/6/0	£2/16/10	£4/11/11	£4/6/3	£5/11/2	£5/1/9

(a) Exclusive of the value of straw.

6. **Relation to Population.**—During the last five seasons the quantity of barley produced in the Commonwealth has averaged a little over three-quarters of a bushel per head of population. For the season 1919-20 the production ranged from 5½ bushels per head in South Australia to 0.02 pounds per head in New South Wales. Details for the years 1915-16 to 1919-20 are as follows:—

BARLEY PRODUCTION PER 1,000 OF POPULATION, 1915-16 TO 1919-20.

Season.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	C'wealth.
	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.
1915-16	61	1,222	12	3,872	412	575	771
1916-17	39	1,287	374	4,008	434	444	837
1917-18	52	1,397	212	3,785	116	482	810
1918-19	45	1,418	13	5,424	260	676	947
1919-20	19	1,022	48	5,231	350	556	817

7. **Commonwealth Imports and Exports.**—The Commonwealth oversea trade in barley is not large, though it shews signs of extension during recent years. Owing to the severe drought during 1914-15, the barley crop for that year was very low, and a fairly heavy importation of barley was necessary, the bulk of which came from the United States. During the next five years, however, the Commonwealth exported 1,976,102 bushels of barley valued at £568,637, principally to New Zealand, United Kingdom, and Japan. Particulars of the Commonwealth overseas imports and exports of barley for the years 1915-16 to 1919-20 are contained in the following table:—

COMMONWEALTH IMPORTS AND EXPORTS OF BARLEY, 1915-16 TO 1919-20.

Year.	Imports.		Exports.		Net Exports.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	Bushels.	£	Bushels.	£	Bushels.	£
1915-16	147,144	27,387	185,122	36,661	37,978	9,274
1916-17	58	9	256,804	52,891	256,746	52,882
1917-18	34	8	282,252	64,703	282,218	64,695
1918-19	456	203	176,478	49,573	176,022	49,370
1919-20	438	236	1,075,446	364,809	1,075,008	364,573

NOTE.—The minus sign (—) signifies net imports.

From time to time an export trade in Australian pearl and scotch barley has been carried on, the total exports for 1919-20 reaching 2,513,758 lbs., valued at £29,124. The trade for the year was mainly with the South African Union, New Zealand, and Japan.

8. **Commonwealth Imports and Exports of Malt.**—In pre-war times the importations of malt into the Commonwealth were fairly extensive, the supply being obtained principally from the United Kingdom. Since the outbreak of the war in 1914, however, imports have continuously declined, and the quantities exported have practically remained negligible, with the exception of 1917-18, when 117,075 bushels, valued at £47,626, were exported mainly to Japan, South Africa, and the Philippines. Details of imports and exports for the years 1915-16 to 1919-20 are given hereunder:—

COMMONWEALTH IMPORTS AND EXPORTS OF MALT, 1915-16 TO 1919-20.

Year.	Imports.		Exports.		Net Imports.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	Bushels.	£	Bushels.	£	Bushels.	£
1915-16	23,910	9,596	30	13	23,880	9,583
1916-17	7,452	4,196	73	35	7,379	4,161
1917-18	35	106	117,075	47,626	- 117,040	- 47,520
1918-19	1	1
1919-20

NOTE.—The minus sign (—) signifies net exports.

9. **Comparison with other Countries.**—In comparison with the barley production of other countries of the world, that of Australia appears very small indeed. Particulars for some of the leading countries for the year 1919 are as follows, the Australian figures being added for the sake of comparison:—

PRODUCTION OF BARLEY IN VARIOUS COUNTRIES, 1919.

Country.	Production of Barley.	Country.	Production of Barley.
	Bushels.		Bushels.
Russia in Europe (1916) ..	336,213,000	Sweden	12,372,000
United States	160,681,000	Rumania	11,504,000
British India (1918) ..	160,555,000	Argentine Republic ..	10,579,000
Japan	87,798,000	Bulgaria	9,954,000
Germany	84,209,000	Egypt (1918)	9,475,000
Spain	78,515,000	Italy	7,992,000
United Kingdom	57,704,000	Tunis	5,730,000
Hungary (1915)	54,466,708	Norway	5,062,000
Canada	54,134,000	Australia	4,288,000
Austria (1916)	37,469,000	Chile	3,855,000
Russia in Asia (1915) ..	35,452,000	Belgium	3,471,000
Algeria	27,243,000	Netherlands	2,580,000
Denmark	23,539,000	Serbia (1915)	2,181,150
France	22,674,000	Union of South Africa ..	1,113,000
Czecho-Slovakia	20,700,000		

10. **Average Yield of Barley per Acre in various Countries.**—The following table shows the average yield of barley per acre in various countries of the world, ranging from 46 bushels in Belgium to 6 bushels in Tunis :—

AVERAGE YIELD OF BARLEY PER ACRE IN VARIOUS COUNTRIES, 1919.

Country.	Average yield per Acre.	Country.	Average yield per Acre.
	Bushels.		Bushels.
Belgium	46.2	Canada	20.5
Netherlands	44.1	Rumania	19.6
Denmark	41.4	Hungary (1915)	19.3
Chile	39.3	Spain	18.5
New Zealand	35.6	India (1918)	18.1
Norway	32.4	Argentine Republic	17.2
United Kingdom	30.9	Union of South Africa (1917)	17.0
Japan	30.0	France	16.9
Sweden	30.0	Russia in Asia (1916)	16.9
Egypt (1918)	28.2	Italy	16.7
Germany	27.0	Australia	16.0
Czecho-Slovakia	23.2	Russia in Europe (1916)	15.3
United States	21.7	Algeria	10.3
Bulgaria	21.0	Tunis	5.9

11. **Average Yield.**—The average yield per acre of barley varies considerably in the different States, being as a rule highest in Tasmania and Victoria, and lowest in Western Australia. Details for each State during the past five seasons, and for the decennium 1910-20, are given in the following table :—

AVERAGE YIELD PER ACRE OF BARLEY, 1915-16 TO 1919-20.

Season.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	C'wealth.
	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.
1915-16	18.03	28.25	5.95	20.00	13.00	21.36	22.43
1916-17	14.12	19.35	19.74	16.74	12.07	19.13	17.72
1917-18	15.36	23.20	18.64	17.26	7.11	13.90	19.51
1918-19	10.82	20.25	6.71	18.54	10.20	20.06	18.69
1919-20	7.26	17.92	10.65	15.51	12.66	19.15	16.04
Average for 10 seasons 1910-20	13.79	20.82	15.48	16.37	11.47	22.69	17.98

12. **Price of Barley.**—The average price of barley in the Melbourne market during each of the past five years is given in the following table :—

AVERAGE MELBOURNE PRICE OF BARLEY PER BUSHEL, 1915 TO 1919.

Particulars.	1915.	1916.	1917.	1918.	1919.
	s. d.	s. d.	s. d.	s. d.	s. d.
Malting barley	5 4 ³ / ₄	4 4 ¹ / ₄	4 4 ³ / ₄	5 9	5 9 ¹ / ₄
Cape barley	4 4 ¹ / ₄	3 1 ¹ / ₂	3 1 ¹ / ₂	4 0	4 6 ¹ / ₄

§ 8. Other Grain and Pulse Crops.

In addition to the grain crops already specified, the only grain and pulse crops at all extensively grown in the Commonwealth are beans, peas, and rye. The total area under the two former crops for the season 1919-20 was 39,553 acres, giving a yield of 520,919 bushels, or an average of 13.17 bushels per acre, being less than the average yield for the decennium ended 1919-20, which was 16.32 bushels per acre. The States in which the greatest area is devoted to beans and peas are Tasmania, Victoria and South Australia. The total area under rye in the Commonwealth during the season 1919-20 was 3,663 acres, yielding 32,472 bushels, and giving an average of 8.86 bushels per acre. This was below the average for the past ten seasons, which was 11.08 bushels per acre. Over 35 per cent. of the rye grown during the season was produced in New South Wales and 26 per cent. in Victoria. In addition to these grain crops a small area of rice has for some years been cultivated in Queensland and the Northern Territory. The results obtained, however, have not up to the present been very satisfactory. Should rice-growing ever be seriously taken up in Australia, it is probable that large tracts of country in the northern parts of Queensland and Western Australia and in the Northern Territory will be found well suited to its cultivation.

§ 9. Potatoes.

1. *Area*.—The principal potato-growing State of the Commonwealth as regards area is Victoria; Tasmania, for some years prior to 1909-10, usually ranking second, and New South Wales third. The relative positions of the two latter States were, however, reversed during the five seasons ended 1913-14, but Tasmania again took the lead over New South Wales in the last six seasons ended 1919-20.

The area under potatoes in each State from 1890 onwards is given hereunder :—

COMMONWEALTH AREA UNDER POTATOES, 1890-1 TO 1919-20.

Season.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	F. Ter.	C'wealth.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
1890-1 ..	19,406	53,818	6,270	6,626	511	20,133	..	106,764
1900-1 ..	29,408	38,477	11,060	6,628	1,794	23,068	..	110,435
1910-11 ..	44,462	62,904	8,326	7,812	1,791	26,230	..	151,515
1915-16 ..	19,582	56,910	5,796	4,341	4,866	29,491	7	120,993
1916-17 ..	22,437	73,618	8,908	4,737	5,838	34,345	12	149,895
1917-18 ..	22,558	66,966	10,738	4,164	4,484	27,309	22	136,241
1918-19 ..	20,877	51,620	6,434	3,275	3,936	25,023	2	a 111,169
1919-20 ..	20,043	53,918	4,432	3,411	3,585	28,511	7	113,907

(a) Includes 2 acres in Northern Territory.

GRAPHS SHEWING THE AREA UNDER THE PRINCIPAL CROPS IN THE
COMMONWEALTH FROM 1860-1 TO 1919-20.

(See pages—for wheat, 252; oats, 262; maize, 266; barley, 269; hay, 279; sugar-cane, 283; and vineyards, 287.)

EXPLANATION OF GRAPHS.—The base of each small square represents an interval of one year, while the vertical height represents a number of acres, varying with the nature of the crop in accordance with the scale given on the left-hand of the diagram. The height of each graph above the base line denotes, for the crop to which it relates, the total area under cultivation in the Commonwealth during the successive seasons.

GRAPHS SHEWING THE PRODUCTION OF THE PRINCIPAL CROPS IN THE COMMONWEALTH
FROM 1860-1 TO 1919-20.

(See pages—for wheat, 253 ; oats, 262 ; maize, 266 ; barley, 269 ; and hay, 280.)

EXPLANATION OF GRAPHS.—In this diagram a separate base line is provided for each of the crops dealt with. In each instance the base of a small square represents an interval of one year, the vertical height of such square representing in the case of wheat 10,000,000 bushels; oats, 2,000,000 bushels; barley, 500,000 bushels; maize, 2,000,000 bushels; and hay, 500,000 tons. The height of each graph above its base line denotes the aggregate yield in the Commonwealth of that particular crop during the successive seasons.

2. **Total Yield.**—For the season 1919-20, Victoria's production represented about 47½ per cent. of the total for the Commonwealth, Tasmania and New South Wales coming next in order with 25 and 17½ per cent. respectively. The total Commonwealth production for the season 1906-7 viz., 507,153 tons, was the highest ever attained, the yield which most nearly approached it being 449,383 tons in 1903-4. Details as to production in the several States during the period from 1890 onwards are as follows :—

COMMONWEALTH PRODUCTION OF POTATOES, 1890-1 TO 1919-20.

Season.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	F. Ter.	C'wealth
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.
1890-1 ..	52,791	204,155	13,112	23,963	1,900	73,158	..	369,079
1900-1 ..	63,253	123,126	20,014	14,566	4,836	93,862	..	319,657
1910-11 ..	121,033	163,312	15,632	23,920	5,864	70,090	..	399,851
1915-16 ..	44,420	173,821	7,439	12,991	14,118	79,890	25	332,704
1916-17 ..	45,296	187,992	19,457	20,343	16,841	67,038	35	357,002
1917-18 ..	49,934	182,195	22,139	11,315	11,320	70,442	50	347,395
1918-19 ..	30,353	137,533	11,083	13,219	11,697	56,528	3	260,416
1919-20 ..	49,986	145,888	7,844	11,020	13,240	66,225	24	294,227

3. **Average Yield per Acre.**—The suitability of the soil, climate, and general conditions for potato growing is evidenced by the satisfactory yields per acre which are generally obtained in Australia, except in the most northerly portions, the average yield during the past ten seasons being 2.57 tons per acre. The lowest average yield is that obtained in Queensland with an average of 1.83 tons for the same period.

Particulars for each State for the seasons 1915-16 to 1919-20, and also for the past decennium, are given hereunder :—

AVERAGE YIELD OF POTATOES PER ACRE, 1915-16 TO 1919-20.

Season.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Fed. Ter.	C'wealth.
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.

(a) Including Federal Territory. (b) Average for nine seasons.

4. **Value of Potato Crop.**—The estimated value of the potato crop of each State for the season 1919-20 is furnished in the following table, together with the value per acre :—

VALUE OF POTATO CROP, 1919-20.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Fed. Ter.	C'wealth.
Total value ..	£735,030	£1,444,291	£183,942	£145,558	£235,010	£794,700	£340	£3,538,871
Value per acre	£36/13/5	£26/15/9	£41/10/1	£42/13/6	£65/11/1	£27/17/6	£48/11/5	£31/1/4

5. **Relation to Population.**—The average production of potatoes per annum per head of the population of the Commonwealth for the past five seasons has been approximately 140 lbs. In Tasmania, where this crop is of far greater importance in relation to population than is the case in any other State, the production per head in 1906-7 was nearly a ton, while for the past five seasons it has averaged about 7½ cwt. Details for the seasons 1915-16 to 1919-20 are as follows :—

POTATO PRODUCTION PER 1,000 OF POPULATION, 1915-16 TO 1919-20.

Season.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	F. Ter.	C'wealth.
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.
1915-16 ..	24	122	11	30	44	397	14	67
1916-17 ..	24	134	29	47	55	335	16	73
1917-18 ..	26	129	33	26	37	347	24	70
1918-19 ..	16	96	16	30	37	271	1	52
1919-20 ..	25	98	11	24	40	306	13	56

6. **Commonwealth Imports and Exports.**—Under normal conditions there is generally a fairly large export trade in potatoes carried on by the Commonwealth, principally with New Zealand, the Pacific Islands, and the Philippine Islands. On the other hand, when the recurrence of droughts causes a shortage in some of the States, large importations from New Zealand usually take place. The quantities and values of the Commonwealth overseas imports and exports of potatoes during the past five years are shewn in the following table :—

COMMONWEALTH IMPORTS AND EXPORTS OF POTATOES, 1915-16 TO 1919-20.

Year.	Imports.		Exports.		Net Exports.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	Tons.	£	Tons.	£	Tons.	£
1915-16 ..	17,596	149,488	1,208	13,110	- 16,388	- 136,378
1916-17 ..	91	951	4,492	37,579	4,401	36,628
1917-18 ..	38	367	3,348	23,203	3,310	22,836
1918-19 ..	308	3,570	6,742	50,308	6,434	46,738
1919-20 ..	2,614	41,391	1,455	22,954	- 1,159	- 18,437

NOTE.—The minus sign (—) signifies net imports.

§ 10. Other Root and Tuber Crops.

1. **Nature and Extent.**—Root crops, other than potatoes, are not extensively grown in Australia, the total area devoted to them for the season 1919-20 being only 15,927 acres. The principal of these crops are onions, mangolds, sugar beet, turnips, and "sweet potatoes" (*Batatas edulis*). Of these, onions, sugar beet, and mangolds are most largely grown in Victoria, turnips in Tasmania, and sweet potatoes in Queensland. The total area under onions in the Commonwealth during the season 1919-20 was 7,842 acres, giving a yield of 31,552 tons, and averaging 4.02 tons per acre. The area devoted in 1919-20 to root crops other than potatoes and onions, viz., 8,085 acres, yielded 50,506 tons, and gave an average of 6.25 tons per acre. The areas and yields here given are exclusive of the production of "market gardens," a reference to which will be made later.

2. **Commonwealth Imports and Exports.**—The only root crop, other than potatoes, in which any considerable overseas trade is carried on by the Commonwealth is that of onions. During the past five years 4,147 tons, valued at £53,603, were imported, principally from New Zealand, Japan, and the United States, while during the same period, the exports totalled 19,324 tons, valued at £188,682, and were shipped mainly to New Zealand, the Pacific Islands, the Philippines, and the United States.

§ 11. Hay.

1. *Nature and Extent.*—As already stated, the most important crop of the Commonwealth is that of wheat grown for grain. Next to this in importance is the hay crop, which for the five seasons ended 1919–20 averaged more than 18½ per cent. of the area under crop in the Commonwealth, and for 1919–20 itself, 23½ per cent. In most European countries the hay crop consists almost entirely of meadow and other grasses, whilst in Australia a very large proportion of the area under hay comprises cereal crops, mainly wheat and oats. A considerable quantity of lucerne hay is also made, particularly in New South Wales and Queensland. The area under hay of all kinds in the several States from 1860 onwards is given hereunder :—

AREA UNDER HAY, 1860–1 TO 1919–20.

Season.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	N. Ter.	F. Ter.	C'wealth.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
1860–1	46,584	90,921	276	55,818	6,626	31,837	232,062
1870–1	65,404	163,181	3,671	140,316	17,173	33,612	423,357
1880–1	131,153	249,656	12,022	272,567	19,563	31,615	716,576
1890–1	175,242	413,052	31,106	345,150	23,183	45,381	1,033,114
1900–1	466,236	502,105	42,497	341,330	104,254	61,541	1,517,963
1910–11	638,577	832,669	98,558	440,177	175,432	72,992	2,258,405
1915–16	1,107,228	1,330,455	55,174	709,831	290,036	103,216	140	1,691	3,597,771
1916–17	857,533	897,186	112,964	483,040	240,726	79,274	140	999	2,671,862
1917–18	619,614	748,808	96,431	407,011	265,899	74,107	14	1,030	2,212,914
1918–19	813,379	984,479	54,772	501,731	249,796	87,136	30	1,581	2,692,904
1919–20	938,471	1,116,998	48,843	590,835	327,498	102,908	100	1,671	3,127,324

It will be seen from this table that in all the States marked fluctuations occur in the area devoted to the hay crop from year to year. These fluctuations are due to various causes, the principal being the variations in the relative prices of grain and hay, and the favourableness or otherwise of the season for a grain crop. Thus, crops originally sown for grain are frequently cut for hay owing to the improved price of that commodity, or owing to the fact that the outlook for the due development of the grain is not satisfactory. On the other hand, improved grain prices or the prospect of a heavy yield will frequently cause crops originally intended for hay to be left for grain. The area under hay in the Commonwealth for the season 1915–16 was the highest on record, that for 1912–13 the next highest, while the 1919–20 acreage occupied third position.

2. *Kinds of Hay.*—Particulars concerning the kinds of crop cut for hay are furnished in the returns prepared by five of the States. In the case of Tasmania the bulk consists of oaten hay; full particulars, however, are not available for that State.

Details for the past five seasons are given in the following table :—

KINDS OF HAY GROWN, 1915–16 TO 1919–20.

Total	290,036	240,726	265,899	249,796	327,498

It will be seen that wheaten hay is the principal hay crop in New South Wales, South Australia, and Western Australia, oaten hay in Victoria and Tasmania, and lucerne in Queensland.

3. **Total Yield.**—The Commonwealth hay crop for the season 1915-16 was the highest on record, and amounted to 5,633,988 tons. The second in importance was 3,955,311 tons for the season 1912-13, while the third was 3,507,589 tons for 1916-17. For many years past the State of Victoria has been the largest hay producer in the Commonwealth, and in the five seasons, 1915-16 to 1919-20 inclusive, accounted for nearly 39 per cent. of the total production. The total yields of the several States from 1860 onwards are given hereunder:—

COMMONWEALTH HAY CROP, 1860-1 TO 1919-20.

4. **Value of Hay Crop.**—The following table furnishes particulars concerning the total value and the value per acre of the hay crop of the several States of the Commonwealth for the season 1919-20:—

VALUE OF HAY CROP, 1919-20.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Nor. Ter.	Fed. Ter.	C'wealth.
	£	£	£	£	£	£	£	£	£

5. **Average Yield per Acre.**—The States of the Commonwealth in which the highest average yields per acre have been obtained during the last decennium are those of Tasmania and Queensland, these being also the States in which the smallest areas are devoted to this crop. For the same period the lowest yield for the Commonwealth as a whole was that of 13 cwt. per acre in 1914-15; while the highest was that of 31 cwt. in 1915-16. The average for the decennium was 23½ cwt. Particulars for the several States for the seasons 1915-16 to 1919-20, and the average for the last ten years, are given hereunder:—

AVERAGE YIELD OF HAY PER ACRE, 1915-16 TO 1919-20.

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N. Ter.	F. Ter.	C'with.

(a) Including Federal Territory.

(b) Average for nine seasons.

6. **Relation to Population.**—During the past five seasons the Commonwealth hay production per head of population has varied between 11 cwt. in 1917-18 and 22½ cwt. in 1915-16; averaging about 14 cwt. per head for the period. The State in which the hay production per head of population is highest is South Australia. Details for the seasons 1915-16 to 1919-20 are given hereunder:—

HAY PRODUCTION PER 1,000 OF POPULATION, 1915-16 TO 1919-20.

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N. Ter.	F. Ter.	C'wealth.
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.
1915-16 ..	840	1,651	79	2,509	1,243	838	77	1,639	1,142
1916-17 ..	631	881	217	1,421	767	516	73	887	719
1917-18 ..	414	673	227	1,120	863	396	3	937	552
1918-19 ..	389	779	133	1,274	798	555	6	1,068	575
1919-20 ..	290	831	58	1,279	1,143	660	106	1,227	570

7. **Oversea Imports and Exports.**—Under normal conditions hay, whether whole or in the form of chaff, is somewhat bulky for oversea trade, and consequently does not in such circumstances figure largely amongst the imports and exports of the Commonwealth. During 1919-20, 259 tons were imported, while the exports amounted to 1,987 tons, valued at £21,392, the principal purchases being made by India, the Philippines, and the Straits Settlements.

8. **Hay Production in Other Countries.**—As already noted, the hay crops of most European countries consist of grasses of various kinds, amongst which clover, lucerne, sainfoin and rye grass occupy prominent places. The statistics of hay production in these countries are not prepared on a uniform basis, and consequently any attempt to furnish extensive comparisons would be misleading. It may be noted, however, that in Great Britain the production of hay from clover, sainfoin, etc., for the year 1919 amounted to 2,290,000 tons from 1,895,499 acres, while from permanent grasses a yield of 3,608,000 tons of hay was obtained from 4,318,188 acres, giving a total of 5,898,000 tons from 6,213,687 acres, or about 19 cwt. per acre.

§ 12. Green Forage.

1. **Nature and Extent.**—In all the States of the Commonwealth a considerable area is devoted to the production of green forage, mainly in connexion with the dairying industry. The total area so cropped during the season 1919-20 was 1,401,237 acres. Of the total, the New South Wales area represented about 72 per cent., that of Queensland 11½ per cent., while that of Victoria amounted to 6½ per cent. Under normal conditions the principal crops cut for green forage are maize, sorghum, oats, barley, rye, rape, and lucerne, while small quantities of sugar-cane also are so used. Particulars concerning the area under green forage in the several States from 1890 onwards are furnished in the following table :—

AREA UNDER GREEN FORAGE, 1890-1 TO 1919-20.

Season.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	N. Ter.	F. Ter.	C'wealth.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
1890-1	37,473	10,091	9,546	7,349	161	1,497	66,117
1900-1	78,144	18,975	41,445	13,136	1,024	3,749	156,473
1910-11	179,382	71,826	89,667	20,728	4,545	8,695	19	..	374,862
1915-16	162,808	60,426	236,293	32,664	15,622	7,587	24	137	515,561

1917-18	152,374	55,903	87,909	41,869	29,856	5,873	47	19	373,850
1918-19	331,079	73,641	90,635	56,067	28,141	6,827	..	50	586,440
1919-20	1,007,435	89,802	157,568	114,126	27,007	5,271	..	28	1,401,237

2. **Value of Green Forage Crops.**—The value of these crops is variously estimated in the several States, and the Commonwealth total for the season 1919-20 may be taken approximately as £2,627,051, or about £1 17s. 6d. per acre.

3. **Relation to Population.**—Particulars concerning the area under green forage per 1,000 of the population of the Commonwealth and the several States for the seasons 1915-16 to 1919-20 are given hereunder :—

AREA UNDER GREEN FORAGE PER 1,000 OF POPULATION, 1915-16 TO 1919-20.

Season.	N.S.W.	Vict.	Q'land.	S. Aust.	W. Aust.	Tas.	N. Ter.	F. Ter.	C'wealth.

1917-18 ..	80	40	130	96	96	29	10	9	76
1918-19 ..	172	51	131	126	90	33	..	22	117
1919-20 ..	503	60	217	244	81	24	..	15	267

§ 13. Sugar-cane.

1. **Area.**—Sugar-cane is grown for sugar-making purposes in only two of the States of the Commonwealth, viz., Queensland and New South Wales, and much more extensively in the former than in the latter. Thus, of the total area of 159,037 acres under sugar-cane in the Commonwealth for the season 1919–20, there were 148,469 acres, or about 93½ per cent., in Queensland. Sugar-cane growing appears to have been started in the Commonwealth in or about 1862, as the earliest statistical record of sugar-cane as a crop is that which credits Queensland with an area of 20 acres for the season 1862–3. In the following season the New South Wales records shew that an area of two acres was devoted to the crop in the mother State. The area under cane in New South Wales reached its maximum in 1895–6 with a total of 32,927 acres. From thence onwards with slight variations, it gradually fell to 10,568 acres in 1919–20. In Queensland, on the other hand, although fluctuations in area are in evidence throughout, the general trend has been one of satisfactory increase, the area under cane for the season 1917–18 being the highest on record. The area under sugar-cane in the Commonwealth from 1870 is given in the following table:—

AREA UNDER SUGAR-CANE, 1870–1 TO 1919–20.

Season.	New South Wales.		Queensland.		Commonwealth.		
	Productive.	Unproductive.	Productive.	Unproductive.	Productive.	Unproductive.	Total.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
1870–1 ..	1,475	2,607	2,188	4,154	3,663	6,761	10,424
1880–1 ..	4,465	6,506	12,306	7,918	16,771	14,424	31,195
1890–1 ..	8,344	12,102	39,435	11,487	47,779	23,589	71,368
1900–1 ..	10,472	11,642	72,651	35,884	83,123	47,526	130,649
1910–11 ..	5,596	8,167	94,641	47,138	100,237	55,305	155,542
1915–16 ..	6,030	5,228	94,459	58,568	100,489	63,796	164,285
1916–17 ..	5,223	5,746	75,914	91,307	81,137	97,053	178,190

1918–19 ..	4,566	5,924	111,572	48,962	116,138	54,886	171,024
1919–20 ..	4,827	5,741	84,877	63,592	89,704	69,333	159,037

2. **Productive and Unproductive Cane.**—The areas given in the preceding table represent the area on which sugar-cane was grown during the seasons specified for purposes other than green forage. The whole area was not in any case cut for crushing during that season, there being always a considerable amount of young and “stand over” cane, as well as a small quantity required for plants. The season 1917–18 had the highest recorded acreage under sugar-cane, while the greatest area of productive cane was cut for crushing during the 1918–19 season.

3. **Yield of Cane and Sugar.**—Queensland statistics of the production of sugar-cane are not available for dates prior to the season 1897–8. In that season the total for the Commonwealth was 1,073,883 tons, as against 2,879,092 tons for the record season 1917–18. The second highest yield was in the season 1913–14, with a total of 2,271,558 tons. The average production of cane during the decennium ended 1919–20 was 1,823,652 tons. The three highest yields of sugar were in 1917–18, 1913–14, and 1914–15, the quantities being 327,589 tons, 265,029 tons, and 245,876 tons respectively. The decennial average was 211,774 tons of sugar. Particulars relative to the total yields of cane and sugar for a series of years are as follows:—

YIELD-OF CANE AND CANE-SUGAR, 1900-1 TO 1919-20.

Season.	New South Wales.		Queensland.		Commonwealth.	
	Cane.	Sugar.	Cane.	Sugar.	Cane.	Sugar.
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.
1900-1 ..	199,118	19,938	848,328	92,554	1,047,446	112,492
1910-11 ..	160,311	20,115	1,840,447	210,756	2,000,758	230,871
1915-16 ..	157,748	19,144	1,152,516	140,496	1,310,264	159,640
1916-17 ..	143,558	16,064	1,579,514	176,973	1,723,072	193,037
1917-18 ..	174,881	19,875	2,704,211	307,714	2,879,092	327,589
1918-19 ..	105,234	12,278	1,674,829	189,978	1,780,063	202,256
1919-20 ..	91,321	10,837	1,258,760	162,136	1,350,081	172,973

Large quantities of molasses are produced as a by-product in the sugar mills; details giving the quantity produced and proportions used for distilling, fuel, manure and other purposes for a series of years will be found in Section XIII.—“Manufacturing Industries.”

4. **Average Yields of Cane and Sugar per Acre.**—The average yield per acre of productive cane is much higher in New South Wales than in Queensland, the average during the last decade being 26.87 tons for the former and 17.54 for the latter State. For some years prior to 1910–11, the yield remained practically constant in New South Wales at about 21 tons per acre. Since that year, the average yield per acre has shewn an upward tendency, reaching 30 tons or over during 1913–14, 1914–15, and 1917–18. The climatic conditions affecting the tremendous length of coastline embracing this industry in Queensland are largely responsible for the great variations in the yields of sugar for that State, which ranged, during the past decennium, from 12.20 tons per acre in 1915–16 to 24.88 tons in 1917–18.

The greatest production of sugar per acre crushed in the Commonwealth during the past quinquennium occurred in 1917–18, when 2.87 tons were obtained, the respective crushings for New South Wales and Queensland averaging 3.56 and 2.83 tons. The average yield per acre for the past ten years was 3.15 tons in New South Wales, and 2.03 tons in Queensland.

5. **Quality of Cane.**—The quantity of cane required to produce a ton of sugar varies not only with the district in which the cane is grown but also with the season, and for the decennium ended 1919–20 averaged 8.61 tons, the average production of sugar being approximately 11½ per cent. of the weight of cane crushed. The systematic study of beet culture in European countries has shewn that by suitable methods the sugar

contents of the root can be greatly increased, and it is believed that a similar improvement can be effected in the yield from sugar-cane.

AVERAGE YIELD OF SUGAR-CANE AND SUGAR PER ACRE, 1900-1 TO 1919-20.

Season.	New South Wales.			Queensland.			Commonwealth.		
	Cane per acre Crushed.	Sugar per acre Crushed.	Cane to each ton of Sugar.	Cane per acre Crushed.	Sugar per acre Crushed.	Cane to each ton of Sugar.	Cane per acre Crushed.	Sugar per acre Crushed.	Cane to each ton of Sugar.

1919-20	18.92	2.25	8.43	14.83	1.91	7.76	15.05	1.93	7.81
Average 10 seasons 1910-20	26.87	3.15	8.53	17.54	2.03	8.62	18.05	2.10	8.61

6. **Relation to Population.**—The sugar production of the Commonwealth during the past five seasons has averaged about 95 lbs. per head of population. In the same period in Queensland, the principal sugar-producing State, the production of sugar per head has ranged between 464 lbs. in 1915-16 and 1,017 lbs. in 1917-18. Details for the period 1915-16 to 1919-20 are as follows:—

SUGAR PRODUCTION PER HEAD OF POPULATION, 1915-16 TO 1919-20.

State.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.
	lbs.	lbs.	lbs.	lbs.	lbs.
New South Wales	23	19	24	14	12
Queensland	464	592	1,017	613	501
Commonwealth	73	89	149	90	74

7. **Sugar Bounties.**—The provision of bounties or similar aids to the sugar-growers of the Commonwealth early occupied the attention of the Commonwealth Parliament, the object in view being that of assisting the industry, and at the same time diminishing the employment of coloured labour in connexion therewith. An account of the various Acts in connexion with sugar bounties and sugar excise tariffs will be found on pages 394 to 396 of Year Book No. 6. In 1912 the Sugar Excise Repeal Act and the Sugar Bounty Abolition Act were passed by the Federal Parliament, conditionally on the Queensland Parliament approving of legislation prohibiting the employment of coloured labour in connection with the industry. The State Sugar Cultivation Act, the Sugar Growers Act, and the Sugar Growers' Employees Act, of 1913, having been approved of. the 1912 Federal Acts, which repeal all previous enactments in regard to excise on sugar and bounty on cane, came into force by proclamation in July, 1913.

8. **Sugar Purchase by Commonwealth Government.**—In June, 1915, the Commonwealth Government assumed control of the Australian sugar output, paying the growers a fixed price of £18 per ton of raw sugar, subsequently raised in 1917 to £21. The

Commonwealth Government disposed of the refined product at an average of £25 10s. per ton in 1915, the object then being to enable the consumer to purchase sugar of 1A grade at 3d. per lb. In January, 1916, however, the wholesale price was raised to £29 5s. per ton, and the retail price to 3½d. per lb. This arrangement was continued from year to year until June 26th, 1920, when an agreement was made with the Queensland Government for a period of three years, covering the seasons of 1920, 1921, and 1922, fixing the price of raw sugar for the first year at £30 6s. 8d. per ton, and making that price the minimum for each of the succeeding seasons, any increase being limited to the extra cost of production, due to higher wages paid to the sugar workers to meet the increased cost of living. In order to recoup the Commonwealth Government for the loss entailed in the purchase at very high prices of large quantities of foreign sugar, owing to the shortage of the Australian crop, the wholesale price of refined sugar was raised on March 25th, 1920, to £49 per ton, and the retail price to 6d. per lb.

9. Beet Sugar.—During the past few years an effort has been made to revive the sugar-beet industry in Victoria. The State Government is proceeding with a comprehensive irrigation scheme at Maffra, where the sugar-beet factory is situated. When completed, this scheme will make available for beet growing large areas of land hitherto unsuitable. The price of beet has risen to 35s. per ton with the prospect of a further increase. A fine grade of white sugar is manufactured, and considerable quantities of beet pulp and molasses are distributed for stock feed.

10. Acreage and Yield of Sugar Beet.—The following table shews the acreage under sugar beet, and the production in Victoria during the past five seasons :—

AREA AND PRODUCTION OF SUGAR BEET IN VICTORIA, 1915-16 TO 1919-20.

Particulars.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.
Area acres	461	1,320	1,200	1,009	1,090
Production tons	4,928	15,159	14,487	12,290	13,195
Average per acre,	10.69	11.48	12.07	12.18	12.11

11. Imports and Exports of Sugar.—The production of sugar in the Commonwealth during the past five years has not been sufficient to supply the growing requirements of Australian consumption. It has been found necessary to annually import on the average some 75,690 tons, valued at £1,839,835, the principal countries engaged in supplying this commodity being Java and Fiji. Particulars concerning the imports and exports of cane sugar for the past five years are as follows :—

IMPORTS AND EXPORTS OF CANE SUGAR, 1915-16 TO 1919-20.

Year.	Oversea Imports.		Oversea Exports.		Net Imports.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	Tons.	£	Tons.	£	Tons.	£
1915-16 ..	116,111	1,869,768	1,103	22,458	115,008	1,847,310

1918-19 ..	52,569	1,052,124	2,029	52,136	50,540	999,988
1919-20 ..	112,805	4,359,203	2,825	83,729	109,980	4,275,474

NOTE.—The minus sign (—) signifies net exports.

§ 14. Vineyards.

1. Nature and Extent.—The introduction of the vine into Australia has been set down by different investigators as at various dates, the years 1815 and 1828 being principally favoured. It would seem, however, that the vine was really brought out with the first fleet which initiated the colonisation of Australia in 1788, and that consequently the Australian vine is as old as Australian settlement. As already mentioned, a report of Governor Hunter's gives the area under vines in 1797 as 8 acres. From New South Wales the cultivation spread to Victoria and South Australia, and these States have now far outstripped the mother State in the area which they have devoted to its cultivation. In Queensland and Western Australia also, vine-growing has been carried on for many years, but in neither State has the industry progressed with the rapidity attained in Victoria and South Australia. In Tasmania the climate is not favourable to the growth of grapes. The purposes for which grapes are grown in Australia are three in number, viz.—(i) for wine-making, (ii) for table use, and (iii) for drying. The total area under vines in the several States from 1860 onwards is given in the following table:—

COMMONWEALTH VINEYARDS, 1860-1 TO 1919-20.

Season.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	C'wealth.
	Acres.	Acres.	Acres.	Acres.	Acres.	There are no vineyards in Tasmania.	Acres.
1860-1	1,584	1,138	..	3,180	335		6,237
1870-1	4,504	5,466	416	6,131	710		17,227
1880-1	4,800	4,980	739	4,337	659		15,515
1890-1	8,044	20,686	1,981	9,535	1,024		41,270
1900-1	8,441	30,634	2,019	20,158	3,325		64,577
1910-11	8,321	23,412	1,634	22,952	2,795		59,114
1915-16	7,883	22,353	1,373	27,764	2,751		62,124
1916-17	8,666	23,264	1,256	29,177	3,031		65,394
1917-18	8,594	25,236	1,274	29,762	2,996		67,862
1918-19	8,740	26,072	1,287	31,023	2,936		70,058
1919-20	8,923	27,441	1,203	32,784	2,975		73,326

The area devoted to vines in the Commonwealth amounted to 65,673 acres in 1904-5. From that year onwards a gradual decline set in, and at the end of 1914-15, ten years later, the acreage had decreased to 60,985. Since that date, however, as the result of satisfactory annual increases, the 1904-5 figure has been exceeded, and the 1919-20 total represents the maximum area planted with vines.

The wine-growing industry in Australia, more particularly in Victoria and New South Wales, received a severe check by various outbreaks of phylloxera. With a view to the eradication of this disease extensive uprooting of vineyards in the infested areas was undertaken, while further planting within such areas, except with phylloxera-resistant vines, was prohibited.

2. Wine Production.—The production of wine in Australia has not increased as rapidly as the suitability of soil and climate would appear to warrant. The cause of this is probably twofold, being in the first place due to the fact that the Australians are not a wine-drinking people and consequently do not provide a local market for the product, and in the second to the fact that the new and comparatively unknown wines of Australia find it difficult to establish a footing in the markets of the old world, owing to the competition of well-known brands. Active steps are being taken in various ways to bring the Australian wines under notice, and it may be confidently expected that when

their qualities are duly recognised the wine production of this country will exhibit a rapid development. Particulars concerning the quantity of wine produced in the several States during the past five seasons are contained in the table given hereunder :—

AUSTRALIAN WINE PRODUCTION, 1915-16 TO 1919-20.

Season.	New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia.	Tasmania.	Commonwealth.
	Gallons.	Gallons.	Gallons.	Gallons.	Gallons.	No production of wine in Tasmania.	Gallons.
1915-16 ..	571,000	1,380,367	59,008	3,709,878	166,820		5,887,073

1917-18 ..	538,215	800,068	39,125	5,331,166	156,532		6,865,106
1918-19 ..	555,770	1,349,309	44,491	6,544,125	199,142		8,692,837
1919-20 ..	717,893	1,634,680	48,495	5,085,939	162,397		7,649,404

3. *Relation to Population.*—In relation to population the areas of the vineyards of the several States exhibit an upward tendency during the last five years, the Commonwealth total increasing from 13 to 14 acres per 1,000 of the population during the same period. Details for the seasons 1915-16 to 1919-20 are furnished in the succeeding table :—

AREA OF VINEYARDS PER 1,000 OF POPULATION, 1915-16 TO 1919-20.

Season.	New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia.	Tasmania.	Commonwealth.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
1915-16 ..	4	16	2	63	9	..	13
1916-17 ..	5	17	2	67	10	..	13
1917-18 ..	5	18	2	68	10	..	14
1918-19 ..	5	18	2	70	9	..	14
1919-20 ..	4	18	2	70	9	..	14

4. *Imports and Exports.*—The principal countries of origin of wine imported into Australia are France, Spain, Portugal, and Italy, the greater portion of the sparkling wines coming from France. Particulars relative to the importations of wine into the Commonwealth during the past five years are given hereunder :—

COMMONWEALTH IMPORTS OF WINE, 1915-16 TO 1919-20.

Year.	Quantity.			Value.		
	Sparkling.	Other.	Total.	Sparkling.	Other.	Total.
	Gallons.	Gallons.	Gallons.	£	£	£
1915-16 ..	26,744	62,357	89,101	55,573	27,494	83,067

1917-18 ..	9,274	31,808	41,082	20,569	20,635	41,204
1918-19 ..	7,551	30,464	38,015	16,226	21,121	37,347
1919-20 ..	34,383	57,211	91,594	118,164	50,112	168,276

The principal countries to which wine is exported from Australia are the United Kingdom and New Zealand, a small but fairly regular export trade being also carried on with India, Ceylon, Fiji, and the South Sea Islands. Details concerning the exports of wine from Australia during the past five years are given in the following table :—

COMMONWEALTH EXPORTS OF WINE, 1915-16 TO 1919-20.

Year.	Quantity.			Value.		
	Sparkling.	Other.	Total.	Sparkling.	Other.	Total.

5. Other Viticultural Products.—In addition to grapes for wine-making purposes, large quantities are grown in all the States for table use, while, particularly in Victoria and South Australia, the drying of raisins and currants is also carried on. The quantities of table grapes grown in the several States during the past five seasons are as follows :—

TABLE GRAPES, 1915-16 TO 1919-20.

Season.	New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia.	Tasmania.	Commonwealth.
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.

6. Imports and Exports.—The following table gives the oversea imports and exports of raisins and currants during each of the past five years :—

**COMMONWEALTH OVERSEA IMPORTS AND EXPORTS OF RAISINS AND CURRANTS,
1915-16 TO 1919-20.**

Year.	Oversea Imports.		Oversea Exports.		Net Exports.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
RAISINS.						
1915-16 ..	124,964	3,983	6,952,041	215,270	6,827,077	211,287
1916-17 ..	45,237	1,907	5,621,551	166,341	5,576,314	164,434
1917-18 ..	164,699	4,791	3,957,863	114,510	3,793,164	109,719
1918-19 ..	28,818	927	3,111,055	95,523	3,082,237	94,596
1919-20 ..	42,169	2,201	8,839,839	359,561	8,797,670	357,360

CURRANTS.						
1915-16 ..	1,218,947	17,728	1,168,557	25,316	— 50,390	7,588
1916-17 ..	2,416	54	6,525,426	165,006	6,523,010	164,952
1917-18 ..	201	5	4,934,822	134,654	4,934,621	134,649
1918-19 ..	19,909	505	3,470,803	100,326	3,450,894	99,821
1919-20 ..	2,877	120	7,947,811	246,382	7,944,934	246,262

NOTE.—The minus sign (—) signifies net imports.

The quantities of raisins and currants imported into Australia were generally greater than the exports for all years prior to 1912, when the increased production in Australia left a surplus available for export. During the last five years the value of the exports exceeded that of the imports by £1,590,668, the average annual excess for the quinquennium being £318,134.

§ 15. Orchards and Fruit Gardens.

1. Nature and Extent.—Fruit-growing has made rapid progress in the Commonwealth during recent years, the area devoted thereto having increased in the past ten years by no less than 93,097 acres. The States in which the increase is most marked are :—Victoria, 30,228 acres; New South Wales, 26,911 acres; Tasmania, 13,618 acres; and Queensland, 9,276 acres. During the same period the South Australian fruit-growing area increased by 8,857 acres, while that in Western Australia exhibited an increase of 4,206 acres. The increased areas in Tasmania and Western Australia are mainly due to extensive plantings of apple trees with a view to the possibilities of the London market for fresh fruit. The total area devoted to orchards and fruit gardens in the several States is given hereunder :—

COMMONWEALTH ORCHARDS AND FRUIT GARDENS, 1915-16 TO 1919-20.

The varieties of fruit grown differ materially in various parts of the several States, and range from such fruits as the pineapple, paw-paw, mango, and guava of the tropics, to the strawberry, the raspberry, and the currant of the colder parts of the temperate zone. The principal varieties grown in Victoria are the apple, pear, peach, apricot, and plum. In New South Wales, citrus fruits (orange, lemon, &c.), occupy the leading position, although peaches, bananas, apples, and plums are also extensively grown. In Queensland the banana, the pineapple, the orange, the apple, the peach, and the mango are the varieties most largely grown. In South Australia, in addition to the apple, orange, apricot, peach, and plum, the almond and the olive are also largely grown. In Western Australia, the apple, orange, peach, pear, plum, fig, and apricot are the sorts chiefly grown, while in Tasmania, although the apple represents over four-fifths of the area in that State devoted to fruit-growing, small fruits, such as the currant, raspberry, and gooseberry, are very extensively grown, and the balance of the area is mainly occupied with the pear, plum, apricot, peach, and cherry. The following table gives the acreage under the principal kinds of fruit grown, and the quantity and value of fruit produced. The acreages shewn are exclusive of young trees not yet bearing. The acreages for each kind of fruit in Victoria are not available :—

2. Relation to Population.—The acreage of orchards and fruit gardens of the Commonwealth in relation to population has increased during the last eighteen years to an extent which more than compensates for the decline experienced in the case of

vineyards. Taking the two in conjunction, the relative area under vineyards and orchards has, during the period, considerably increased, averaging 55 acres per 1,000 of population in 1901-2, and 66 in 1919-20. Details for orchards and fruit gardens for the years 1915-16 to 1919-20 are as follows :—

**AREA OF ORCHARDS AND FRUIT GARDENS PER 1,000 OF POPULATION.
1915-16 TO 1919-20.**

Season.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	N. Ter.	F. Ter.	C'wealth.

3. **Commonwealth Imports and Exports.**—A considerable fruit trade, both import and export, is carried on by the Commonwealth with overseas countries, the major portion of the importations consisting of fresh fruits, while dried fruits, principally raisins and currants, bulk largely in the exports. The principal fresh fruits imported during the past five years were bananas, apples, oranges, and lemons, the bananas coming from Fiji, while the apples and citrus fruits were supplied by the United States. The fresh fruits exported during the same period consisted largely of apples consigned to the United Kingdom, and citrus fruits to New Zealand. Many varieties of dried fruits were imported into the Commonwealth since 1915-16, but the bulk of those exported consisted of currants and raisins, which were shipped mainly to the United Kingdom, New Zealand, and Canada.

Particulars concerning the overseas imports and exports of dried fruits for the last five years are as follows :—

**COMMONWEALTH OVERSEA IMPORTS AND EXPORTS OF DRIED FRUITS. (a)
1915-16 TO 1919-20.**

NOTE.—The minus sign (—) signifies net imports.

4. **Jams and Jellies.**—A considerable oversea trade in jams and jellies is now carried on by the Commonwealth, the value of the imports for the year 1919-20 amounting to £9,913, and of the exports to £1,218,997. The destinations of the exports were principally the United Kingdom, Egypt, United States of America, France, and South African Union. Particulars relative to imports and exports during each of the last five years are as follows:—

**COMMONWEALTH OVERSEA TRADE IN JAMS AND JELLIES,
1915-16 TO 1919-20.**

Year.	Oversea Imports.		Oversea Exports.		Net Exports.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	lbs.	£	lbs.	£	lbs.	£

5. **Preserved Fruit.**—Details concerning the quantities and values of preserved fruit imported into and exported from the Commonwealth cannot readily be obtained, owing to the fact that in the Customs returns particulars concerning fruit and vegetables are in certain cases combined. The total value of fruit and vegetables, other than fresh fruits, dried fruits, potatoes, and onions, imported into Australia during 1919-20 was £72,877, and the corresponding value of exports was £564,799.

§ 16. Minor Crops.

1. **Nature and Extent.**—In addition to the leading crops which in the foregoing pages have been dealt with in some detail, there are many others which, owing either to their nature, or to the fact that their cultivation has advanced but little beyond the experimental stage, do not occupy so prominent a position. Some of the more important of these are included under the headings—Market Gardens, Pumpkins and Melons, Nurseries, Grass Seed, Tobacco, Flax, Hops, and Millet. Cotton-growing has in recent years received some attention in the tropical portions of the Commonwealth, although the industry cannot yet be said to be beyond the experimental stage. The total area in the Commonwealth during the season 1919-20 devoted to crops not dealt with in previous sections was 71,918 acres, of which market gardens accounted for 28,416 acres, or nearly 40 per cent.

2. **Market Gardens.**—Under this head are included all areas on which mixed vegetables are grown. Where considerable areas are devoted to the production of one vegetable, such for instance as the potato, the onion, the melon, the tomato, etc., the

figures are usually not included with market gardens, but are shewn either under some specific head, or under some general head as "Other Root Crops," or "All Other Crops." The area under market gardens in the several States of the Commonwealth during each of the last five seasons is given in the table hereunder :—

COMMONWEALTH MARKET GARDENS, 1915-16 TO 1919-20.

Season.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N. Ter.	F. Ter.	C'wealth.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
1915-16 ..	10,940	11,379	2,330	1,712	2,787	435	..	27	29,610
1916-17 ..	10,683	10,746	2,305	1,522	2,153	448	..	27	27,884
1917-18 ..	10,100	11,362	1,991	1,502	2,334	447	..	39	27,775
1918-19 ..	10,004	11,594	1,814	1,405	2,237	389	..	39	27,482
1919-20 ..	9,872	12,633	1,752	1,343	2,410	367	..	39	28,416

The area of market gardens has declined in all the States, with the exception of Victoria, during the past five years, the total area for the Commonwealth decreasing by 1,194 acres since 1915-16.

3. **Grass Seed.**—The total area under this crop during 1919-20, exclusive of New South Wales, for which State no figures as to area are available, was 6,765 acres, of which 1,235 acres were in Victoria, 3,131 acres in Queensland, and 2,360 acres in Tasmania. The total yield for 1919-20, including New South Wales, was 65,344 bushels, valued at £34,896.

4. **Tobacco.**—Tobacco-growing is an industry which has experienced marked fluctuations, although at one time it promised to occupy an important place amongst the agricultural industries of the Commonwealth. Thus, as early as the season 1888-9 the area under this crop amounted to as much as 6,641 acres, of which 4,833 were in New South Wales, 1,685 in Victoria, and 123 in Queensland. This promise of importance was, however, not fulfilled, and after numerous fluctuations, in the course of which the Victorian area rose in 1895 to over 2,000 acres, and that in Queensland to over 1,000 acres, the total area for the season 1919-20 had declined to 2,331 acres, distributed as follows :—New South Wales, 1,604 acres; Victoria, 406 acres; and Queensland, 321 acres. This decline in production appears to have been due to the comparatively small demand which existed in Australia for the locally-produced leaf, and to the fact that the cost of production and preparation in the Commonwealth prevented the Australian leaf from obtaining a footing in outside markets. Possibly under more favourable circumstances, and with greater attention given to the production of leaf of the best quality only, the industry may eventually assume considerable proportions. In all the States in which its cultivation has been tried, the soil and climate appear to be very suitable for the growth of the plant, and the enormous importations of tobacco in its various forms into the Commonwealth furnish an indication of the extensive local market which exists for an article grown and prepared in such a manner as to meet the requirements of consumers. The value of the net importations of tobacco into the Commonwealth during the year 1919-20 amounted to £2,330,452, comprising unmanufactured tobacco £2,441,179, cigars £94,933, cigarettes £62,137, and snuff £1,635, while manufactured tobacco shewed a balance in favour of exports amounting to £269,432.

5. **Pumpkins and Melons.**—The total area under this crop in the Commonwealth during 1919-20 was 17,031 acres, of which 3,436 acres were in New South Wales, 1,089 acres in Victoria, 11,743 acres in Queensland, 413 acres in Western Australia, and 250 in South Australia. The production for the Commonwealth amounted to 51,520 tons.

6. **Hops.**—Hop-growing in the Commonwealth is practically confined to Tasmania and some of the cooler districts of Victoria, the total area for the season 1919-20 being 1,384 acres, of which 1,312 acres were in Tasmania, and 72 acres in Victoria. The Tasmanian area, though still small, has increased considerably during the past eighteen years, the total for the season 1901-2 being only 599 acres. On the other hand, the Victorian area, which in 1901-2 was 307 acres, had diminished to 72 acres in 1919-20. The cultivation of hops was much more extensive in Victoria some forty years ago than at present, the area devoted to this crop in 1883-4 being no less than 1,758 acres. During the year 1919-20 the imports of hops exceeded the exports by 253,240 lbs., the excess value being £17,347.

7. **Flax.**—For the past twenty years flax has been grown intermittently in the Gippsland district of Victoria, and attempts have also been made to introduce its cultivation into Tasmania and New South Wales, but without success. The chief reason for this failure was the dominant position held by Russia in the European fibre markets. That country produced 80 per cent. of the world's output of fibre, and the low standard of wages resulted in a correspondingly low price for fibre. Consequently the price the Australian farmer received for his flax rendered its cultivation unattractive compared with that of other agricultural products. In 1907, the Commonwealth Government, with a view to foster the industry, provided for the payment of a bounty of 10 per cent. of the market value of all flax products, but the low returns for fibre, about £45 per ton, prevented the extension of flax growing to any appreciable degree, and on 1st July, 1917, the bounty provisions expired. At the end of that year, however, the shortage of flax fibre in Europe had become very acute owing to the occupation of the Baltic Provinces by Germany, and at the suggestion of the Advisory Council of Science and Industry, and with a view primarily to assisting the Imperial Government, the Commonwealth Government formulated a scheme to encourage the cultivation of flax. A Flax Industry Committee, consisting of representatives of the Department of Agriculture of Victoria, the flax growers, and the cordage manufacturers, was appointed with executive powers under War Precautions Regulations. At the same time, a guarantee was given by the Commonwealth Government of £5 per ton for flax of specified standard grown in 1918.

The area was increased from 400 acres in 1917 to 1,420 acres in 1918. The contract under which the Imperial Government agreed to purchase the fibre from the 1918 flax crop was cancelled, and the fibre was sold on the open market. The actual value f.o.b. Melbourne of the products from this crop was as follows:—Fibre, £15,000; linseed, £7,500; and tow, £1,900, or a total of £24,400. In addition to the guaranteed price of £5 per ton, the growers of this crop received dividends to the amount of £4 per ton. Owing to the disorganization of Russian industries, and the depletion of the world's stocks of linens, there is every indication that the present high values of flax products will be retained for many years. A further guarantee was given by the Commonwealth Government of £6 per ton for the 1919 flax crop. Although about 2,200 acres were planted in 1919 under the £6 guarantee, the product of 1,611 acres only was delivered to the mills. As a result of the unfavourable season, the yield from this 1,611 acres was small, amounting to 1,625 tons. Owing to the present unsettled state of the fibre market, it is difficult to estimate the value of the fibre and tow from the 1919 flax crop, but the following figures have been calculated on a conservative basis:—Fibre, £6,000; linseed, £9,800; and tow, £1,500, making a total of £17,300. In order to encourage farmers to take advantage of this unprecedented opportunity of firmly establishing the flax industry, the Commonwealth Government has guaranteed a price for the flax grown in Australia during the next three years. With a three years' guarantee of remunerative prices, there is every incentive to farmers in suitable districts not only to grow flax, but to co-operate in the erection of flax-mills for the treatment of the flax straw. The guarantee for 1920 and 1921 is £6 per ton, and for 1922 £5 per ton for raw flax. The total area sown to flax in 1920 was approximately 1,500 acres, but only the product of approximately 1,100 acres, representing 1,507 tons of crop, were delivered to the various flax mills. Australia imports annually flax products to the value of £1,800,000, and as it has been demonstrated that flax can be grown to perfection in many parts of the Commonwealth, it would appear that there is a good prospect of successfully establishing a local industry. There are five mills operating in Gippsland, and the erection of additional mills is anticipated. The whole of the commercial flax crop is grown in Victoria, but a grant of £1,000 has been made by the Commonwealth Government for experimental work, and in all the States experiments are being carried out to determine the suitability of the soil and climate for the cultivation of this crop. Experiments have also been carried out with a view to improve the methods of treatment at the mills.

8. **Millet.**—Millet appears in the statistical records of four of the Commonwealth Divisions. The total area devoted thereto in 1919-20 was 6,864 acres, of which 4,220 acres were in New South Wales, 1,850 in Victoria, 769 in Queensland, and 25 in the Northern Territory. The particulars here given relate to millet grown for grain and fibre. That grown for green forage is dealt with in the section relating thereto.

9. **Nurseries.**—In all the States somewhat extensive areas are devoted to nurseries for raising plants, trees, etc. Statistics concerning the area so occupied for flowers, fruit trees, etc., are available for New South Wales, Victoria, South Australia, and Western

Australia. During 1919-20 the areas in those States were 569, 756, 146, and 122 acres respectively. Statistics so far as they relate to forestry are given elsewhere.

10. **Cotton.**—Cotton-growing on a small scale has been tried in Queensland, but so far without very marked success. In 1902, 8 acres were devoted to this crop, in 1907, 300 acres were under cultivation, and in 1911 the maximum either in regard to area or production was reached, an area of 605 acres producing 186,894 lbs. of unginned cotton. A gradual falling-off has since been experienced, and in 1919-20 the area was only 72 acres with a production of 27,470 lbs. of cotton. Special efforts have recently been made to encourage cotton-growing in Queensland, and hopes are entertained that with the invention of a mechanical device for the picking of the cotton the industry will become firmly established, since the soil and conditions appear eminently suitable for the growth of this crop. Small areas in the Northern Territory have also been planted with cotton. The tropical portions of Western Australia have also long been regarded as suitable for its cultivation.

11. **Coffee.**—Queensland is the only State of the Commonwealth in which coffee-growing has been at all extensively tried, and here the results have up to the present time been far from satisfactory. The total area devoted to this crop reached its highest point in the season 1901-2, when an area of 547 acres was recorded. The area then continuously declined to 1906-7, when it was as low as 256 acres. In subsequent seasons the area fluctuated somewhat, but on the whole with a downward tendency, and in 1919-20 only 24 productive acres were recorded, with a yield of 16,101 lbs.

12. **Other Crops.**—Miscellaneous small crops are grown in the several States, amongst which may be mentioned tomatoes, rhubarb, artichokes, arrowroot, chicory, and flowers.

§ 17. Bounties on Agricultural Products.

1. **General.**—The Bounties Act of 1907, passed by the Federal Parliament in order to encourage the manufacture and production of certain articles in the Commonwealth, included among the items on which bonuses were payable several agricultural products. Under an Act passed in 1912 the provisions of the 1907 Act in respect of certain items were renewed. During 1918 an Apple Bounty Act was passed, which provided for the payment of a bounty on the export of apples grown and evaporated in Australia and sold to the Imperial Government for delivery between 1st April and 31st August, 1918. Products of the soil on which these bounties were payable are as follows:—

BOUNTIES ON AGRICULTURAL PRODUCTS.

Article.	Period dating from 1st July, 1907, during or in respect of which Bounty may be paid.	Rates of Bounty.	Maximum amounts which may be assigned in any one year.
Cotton, ginned	8 years	10 % on market value	£ 6,000
Fibres—			
New Zealand flax	10 "	10 " "	3,000
Flax and hemp	10 "	10 " "	8,000
Jute	10 "	20 " "	9,000
Sisal hemp	10 "	10 " "	3,000
Oil materials supplied to an oil factory for the manufacture of oil—			
Cotton seed	8 "	10 " "	1,000
Linsced (flax seed)	10 "	10 " "	5,000
Rice, uncleaned	10 "	20s. per ton	1,000
Coffee, raw, as prescribed ..	8 "	1d. per lb.	1,500
Tobacco leaf for the manufacture of cigars, high grade, of a quality to be prescribed	10 "	2d. "	4,000
Fruits—			
Dates (dried) (a)	15 "	1d. "	1,000
Dried (except currants and raisins) or candied, and exported	10 "	10% on market value	6,000
Evaporated apples	1½d. per lb. ..	12,000

(a) Any unexpended amount assigned in any year to be available for the years following.

At the present time the only one of these bounties still in force is that relating to dates.

2. Bounties Paid.—Although the rate of bonus on the several articles was fairly liberal, the bounties were not availed of to any great extent, as will be seen from the following table, which gives particulars as to the quantity of the articles raised and the amounts paid as bounties in respect thereto for the five financial years ended 1919-20 :—

PARTICULARS OF BOUNTIES PAID ON AGRICULTURAL PRODUCTS (OTHER THAN SUGAR), 1915-16 TO 1919-20.

§ 18. Fertilizers.

1. General.—In the early days of settlement and cultivation in the Commonwealth, scientific cultivation was in a comparatively undeveloped state. The early farmers were neither under the necessity, nor in fact aware of the necessity, of supplying the constituents to the soil demanded by each class of crop. The widely divergent character of the soils in the Commonwealth, their degeneration by repeated cropping, the limitations of climatic conditions, the difficulties of following any desired order of rotation of crops, all rendered it essential to give attention to artificial manuring. The introduction of the modern seed-drill, acting also as a fertilizer distributor, has greatly facilitated the use of artificial manures, and much land formerly regarded as useless for cultivation has now been made productive. There is reason to believe that this feature will be even more strikingly characteristic of the future.

2. Fertilizers Acts.—In order to protect the interests of users of artificial manures legislation has been passed in each of the States, regulating the sale and preventing the adulteration of fertilizers. A list of these Acts and their main features will be found in Year Book No. 12 (page 378).

3. Imports.—The local production of artificial manures has assumed large proportions during the last few years, though considerable quantities are still imported. The importation of fertilizers has increased over 100 per cent. since 1901. The chief items, as regards both quantity and value, are those relating to phosphates, a fertilizer which has proved itself to be very suitable for the growing of cereals in Australian soils. During 1919-20 the values of rock phosphates imported represented nearly 60 per cent. of the total importation of fertilizers. Pleasant Island, with 41 per cent., was the largest contributor, Christmas Island coming next with 31½ per cent., while the bulk of the remainder was supplied by the colony of Gilbert and Ellice Islands. The whole of the soda nitrate came from Chile.

The imports of artificial manures during the last five years are given in the following table. It will be noticed that the values of rock phosphates imported have been consistently large, representing over 79 per cent. of the total importation of fertilizers during the period. No importations of manufactured superphosphates were made during 1917-18, 1918-19, and 1919-20, though considerable quantities were imported during 1914-15.

COMMONWEALTH IMPORTS OF FERTILIZERS, 1915-16 TO 1919-20.

4. Exports.—The subjoined table shews the exports of artificial manures for the years 1915-16 to 1919-20. Practically the whole of these fertilizers are manufactured locally, and are shipped mainly to New Zealand, Japan, Java, and the Pacific Islands:—

1917-18	1,679,772	1,586,748	94.46	49,578	58,989
1918-19	1,605,088	1,547,144	96.39	49,900	57,276
1919-20	1,628,163	1,561,957	95.93	54,487	58,153

Statistics relating to the use of manures in Tasmania for the past five seasons are as follows :—

FERTILIZERS USED IN TASMANIA, 1915-16 TO 1919-20.

Season.	Total Area of Crops.	Area Manured.		Manure Used.	
		Aggregate.	Percentage on Total Area of Crops	Natural (Stable-yard, etc.).	Artificial.
	Acres.	Acres.	%	Tons.	Tons.
1915-16	333,334	182,374	54.71	30,486	15,232
1916-17	270,526	144,532	53.43	30,990	13,886
1917-18	238,199	120,476	50.58	28,006	11,472
1918-19	254,109	135,558	53.35	25,032	11,367
1919-20	270,955	153,606	56.69	21,604	12,588

6. **Local Production of Fertilizers.**—Statistics relative to the local production of fertilizers are incomplete, and detailed returns for fertilizer factories other than bone mills are not available. The number of firms engaged in the manufacture of artificial manures in the Commonwealth at latest available date was 94, made up as follows :—New South Wales, 21; Victoria, 29; Queensland, 22; South Australia, 10; Western Australia, 4; and Tasmania, 3.

7. **Benefits Derived from the Use of Fertilizers.**—There is little doubt that the increasing use throughout the Commonwealth of fertilizers, natural and artificial, combined with the greater attention being devoted to fallowing and to the combination of sheep-farming with agriculture, is having the effect of improving the prospects of those dependent for a livelihood on the products of the soil. Reference has previously been made to the loss to the soil of phosphoric acid which the Commonwealth export of wheat and its milled products involves, and the necessity which thus arises for returning this ingredient in some form. Similarly, other staple products exported impose their respective tolls upon the soil, and the increased use of fertilizers furnishes evidence that producers are alive to the necessity for making good the deficiency so arising.

§ 19. Ensilage.

1. **Value to Stockowners.**—The use of ensilage as a substitute for green fodder during periods of drought or spells of dry weather, or for winter use, is less extensive in Australia than the circumstances would appear to warrant. There is, however, a growing disposition on the part of dairy farmers to make silos on their holdings, as they find that

dairy cattle eat ensilage greedily, and that by its means the output of milk, both in regard to quantity and quality, may be kept up long after the supply of ordinary green food is exhausted. Sheepbreeders are also recognising the fact that during protracted periods of dry weather the silo enables them to keep their stock in good condition, and that lambing can take place satisfactorily. Ensilage thus obviates the expense of travelling or trucking sheep for hundreds of miles to get beyond the drought area, or the equally costly and even ruinous alternative of providing chaff for food at high prices and costly freight. In the rearing of lambs for the London market, ensilage appears to be destined to play an important part, as the lambs thrive upon it much better than upon dry food. By the judicious economising of the surplus growth of green food with the use of the silo, farmers and squatters can carry more stock on their holdings than they otherwise would be justified in doing. Not only is the great waste of superabundant food thus avoided, but it becomes possible to change into a succulent and nutritious food much growth that in any other state would not be eaten by stock. Thus such vegetation as marsh mallows, thistles, weeds of all sorts, and even the swamp reed (*Arundo phragmites*), which grows in great quantities in lagoons, billabongs, and swamps, are all eaten with avidity when offered to stock in the form of ensilage. The pit and stack silos are rapidly being superseded by those built of red gum and hardwood or concrete. This is found to a great extent to obviate the loss sustained by mould, at the same time reducing the risk of fire. A portable silo made of iron has been devised in sections of such size and weight as to admit of ready handling. These silos can be increased in diameter or height by the addition of further sections.

2. Government Assistance in the Production of Ensilage.—The Government of Victoria, recognising that defective methods of making ensilage have often been adopted, has for some years been making special efforts to educate the farming community, by the issue of bulletins, lectures, etc., so that mistakes may be avoided, and the conditions essential for the production of good ensilage may be better appreciated. These conditions vary with the climate and with the locality. The Government also undertakes the erection of different types of silos on very liberal terms, repayment extending over a series of years. Experts erect the silos and give practical lessons as to packing them, etc. The New South Wales Government has, by giving advice in the "Agricultural Gazette," and by the issue of special bulletins, taken steps towards the education of the farmers. Silos also have been erected on the various experimental farms with a view to demonstrating the value of ensilage. No financial assistance is, however, given in New South Wales in this connexion.

3. Quantity Made.—Particulars concerning the number of silos and the quantity of ensilage made in the several States of the Commonwealth in the seasons 1915-16 to 1919-20 are furnished in the following table:—

ENSILAGE MADE IN COMMONWEALTH, 1915-16 TO 1919-20.

(a) No. of holdings on which ensilage was made.

Following the drought of 1902-3 greater attention was paid to ensilage than was previously the case, and during the four seasons ended 1909-10 a continuous and fairly rapid increase was in evidence in all the States, both in the number of holdings on which ensilage was made and in the quantity produced. The following five seasons, however, shewed a falling-off, but the reduction cannot be accepted as an indication of a lessening of appreciation of the benefits of ensilage, but rather of the fact that stocks had not been drawn upon to any great extent during the previous seasons. The accumulated stocks proved of very great value during the 1914 drought, though far below what would have been the case if more attention had been paid to ensilage-making during the previous years of surplus green food. A very substantial increase took place in 1915-16, both in the holdings on which ensilage was made and in the quantity produced, but during the last four years the number of holdings and the quantity of ensilage made declined considerably, the falling off in Victoria being particularly heavy.

§ 20. Agricultural Colleges and Experimental Farms.

1. **Introduction.**—In most of the States, agricultural colleges and experimental farms have been established with a view to promoting agriculture and to establishing improved and more scientific systems of stock-breeding and dairying. In these colleges, and on some of the farms, provision is made for the accommodation of pupils, to whom both practical and theoretical instruction is given by experts in various branches of agriculture. Analyses of soils and fertilizers are made, manures are tested, and elementary veterinary science, etc., is taught, while general experimental work is carried on with cereal and other crops, not merely for the purpose of shewing that it is practicable to produce certain crops in a given place, but also to shew how it is possible to make farming pay best in that locality. Opportunities are afforded for practice in general agricultural work, and instruction is given in the conservation of fodder; in cheese and butter making; in the management, breeding, and preparation for the market of live stock; in the eradication of pests and weeds; and in carpenters', blacksmiths', and other trades.

Travelling expert lecturers are sent to the various agricultural and dairying centres, and there is a wide distribution of periodical agricultural gazettes and bulletins on matters of importance at special seasons.

2. **Particulars of Agricultural Colleges and Experimental Farms.**—In previous issues detailed information is given in respect of agricultural colleges, experimental farms and agricultural education generally. See Year Book No. 11, pp. 393-5.

§ 21. Government Loans to Farmers.

1. **Introduction.**—All the Australian States have established systems under which financial aid is rendered to agriculturists by the Government. The principle upon which such aid is founded was probably first practically applied in Germany, in the year 1770, when the *Landschaften Bank* was created. The establishment of the *Crédit Foncier* nearly a century later in France was a creation of a similar character. This latter institution was designed to enable house and land owners to raise money on mortgage at a low rate of interest, with facility for repayment by annual instalments including redemption of the capital. It dates from 1852, but the mortgage bank known as the *Caisse Hypothécaire*, which, after a struggling existence, was finally liquidated in 1864, was based essentially on the same principle. Over the operations of the *Crédit Foncier*, created under governmental patronage and invested with such special privileges as to virtually constitute it a monopoly, the Government exercised a direct control, by appointing its governor and its two deputy-governors. The *Crédit Foncier* was empowered to lend money only on a first mortgage, and to the amount of one-half of the estimated value of houses and farms, and one-third that of vineyards, woods, and other plantations, and the commission charged could not exceed six-tenths per cent. The system developed and adopted in the Commonwealth, with the object of assisting farmers to make improvements or to develop or utilise the agricultural or pastoral resources of the land, is analogous. Particulars of advances made under the Closer Settlement and similar Acts are dealt with in the section on Closer Settlement.

2. Aggregate of Transactions in each State, 1917 to 1920.—The subjoined table gives aggregates of transactions in reference to advances to farmers in each State during the past four years:—

STATE GOVERNMENT ADVANCES DEPARTMENTS—AGGREGATE OF LOANS TO FARMERS, 1917 TO 1920. (a)

(a) Compiled from figures furnished by the Government Savings Bank of Victoria. (b) Includes loans to farmers and other producers and to local bodies on the security of their own rates. (c) Including profits in connexion with house and similar loans. (d) Not shown since amalgamation with Government Savings Bank. (e) See note (d). (f) Not available. (g) Exclusive of Western Australia.

3. Legislation in each State.—An account of the initial legislation in each State in reference to advances to settlers; subsequent legislation; security on which, and objects for which advances were made; amount of advances and repayments up to the end of 1917-18, etc., will be found in previous issues of the Year Book (see No. 12, pages 384 to 389).

4. Particulars Respecting Agricultural and Stock Departments.—A synopsis of the activities and operations of the Agricultural and Stock Departments of the several States of the Commonwealth as on 30th June, 1920, will be found in the appendix to this volume. The main features of organisation are set out under their respective headings, and will be found to embrace such items as the number on staffs, expenditure, facilities for agricultural education and work undertaken in agricultural colleges, technical schools, experimental farms, and orchards and vineyards. The nature of lectures and other forms of agricultural instruction by experts is dealt with, as well as the extent of distribution of plants, and the special steps taken by the departments to disseminate information amongst agriculturists, and also to facilitate placing the products of the State on the market.

§ 22. Graphical Representation of Crops.

1. Areas of Principal Crops.—A graphical representation of the areas devoted to each of the principal crops in the Commonwealth since 1860 will be found on page 275. The crops so represented are as follows:—Wheat, hay, oats, maize, sugar-cane, barley, and vines.

2. Production.—On page 276 will be found a graphical representation of the aggregate yields in the Commonwealth since 1860 of wheat, oats, barley, maize, and hay.

SECTION IX.

FARMYARD AND DAIRY PRODUCTION.

§ 1. Introductory.

1. **General.**—The introduction of cattle into Australia, and the early history of the dairying industry are referred to in some detail in earlier issues of this work (see Official Year Book No. 6, p. 430). It may here be noted that the original stock has been crossed with specially imported stud cattle, while further judicious crossing of strains has resulted in an increased and improved milk supply. In Australia, dairy cattle thrive in the open throughout the year, local climatic conditions demanding no protection other than tree plantations for shelter, and rugging in the coldest weather. Indigenous and imported grasses furnish food during the greater part of the year, and winter fodder, when necessary, is given to the cattle in the fields. With the adoption of scientific methods in the treatment of animals and pasturage and in the processes of manufacture, coupled with effective State supervision, the dairying industry has shewn rapid expansion.

2. **Official Supervision of Industry.**—Dairy experts, under the supervision of the various State Agricultural Departments, give instruction in approved methods of production, and inspect animals, buildings, and marketable produce. A high standard of cleanliness, both of *personnel* and *matériel*, prevails. Financial assistance of a temporary nature is also given, advances made being generally repaid with promptitude.

The export trade is regulated by the terms of the Commonwealth Commerce Act 1905 and regulations thereunder. The provisions of this Act are set out in detail in Official Year Book No. 6, pp. 431–2. It will be sufficient to note here that the true trade description, etc., must be marked on all produce intended for export, while official inspection ensures the maintenance of purity and quality. Upon request of the exporter the goods are certificated by the inspector.

3. **Mixed Farming.**—Dairying is not now, as formerly, wholly confined to farmers, since many graziers in a large way of business have lately given it their attention. In non-coastal regions it is generally carried on in conjunction with agriculture and sheep-raising, sufficient fodder being grown to carry the cattle through the winter months. Local wants are thus met, and in many places remote from the metropolis well-equipped factories have been established.

4. **Factory System.**—Cream separation and butter-making are often carried on together under the co-operative system. The creation of large central butter factories, supplied by numerous separating establishments or “creameries,” has resulted in a considerable reduction in the cost of manufacture, since improved appliances, such as refrigerators, may be profitably worked at the larger establishments. The product is also of a more uniform quality. The number of farmers who adhere to hand processes is rapidly diminishing. Formerly the average quantity of milk used per pound of hand-made butter was about 3 gallons, but separator butter requires less than $2\frac{1}{2}$ gallons.

5. **Butter and Cheese Factories.**—The factories in the Commonwealth for the manufacture of butter, cheese, and condensed milk numbered 563 in 1919-20. These were distributed in the various States as follows:—New South Wales, 155; Victoria, 181; Queensland, 137; South Australia, 46; Western Australia, 7; Tasmania, 37.

§ 2. Milk, Butter, and Cheese.

1. **Dairy Herds.**—Following the drought year 1902 there was up to 1911 a general increase in the number of dairy cows; the returns for 1912 and the three years following, however, shew a decrease in all the States, with the exception of Western Australia. Satisfactory increases were again noted in 1916 and 1917, while during the next two years the numbers remained practically stationary. In New South Wales, Victoria, South Australia, and Tasmania—as will be seen from the table given below—the proportion of dairy cattle to all cattle is high. In Queensland, the Northern Territory, and Western Australia there is a greatly preponderating number of other cattle, dairying not being firmly established in the tropical regions of the Continent. In southern Queensland, however, the industry has developed remarkably during the last decade. The figures for the Northern Territory are rough estimates only:—

CATTLE AND DAIRY CATTLE, COMMONWEALTH, 1915 TO 1919.

	{ Dairy Cows ..	1,684,393	1,747,351	1,904,906	1,902,036	1,908,536

2. **Milk.**—The annual quantity of milk produced per dairy cow varies greatly with locality and season, probably reaching as high as 500 gallons, but averaging for the whole of Australia, for all dairy cows and for all seasons, prior to 1916, considerably under 300 gallons per annum. During 1916 and 1917 the average yield exceeded that quantity, amounting to 320 and 333 gallons respectively, but, owing to adverse weather conditions, it again failed to reach the 300 gallons mark in 1918 and 1919, the respective averages being only 293 and 278 gallons per cow. The best yields over a series of years appear to be in Victoria, South Australia and New South Wales, while Queensland and Tasmania in normal years are above Western Australia. In the following table the annual average yields per cow for the last five years are taken from the number of dairy cows which were in milk during any part of the year. The average given is considerably below that for cows which were yielding during the greater part of the year. The highest averages obtain in those States which have most extensively adopted scientific methods of dairying, such as systematic breeding, culling of herds, milk testing, etc.

(a) Mean for the year.

(b) Exclusive of Northern Territory.

3. Butter and Cheese.—The butter output shews, in general, a tolerably steady increase since the drought year 1902, the most marked development being in Queensland. During the past five years the annual production of butter, after allowing for seasonal fluctuations, has practically remained constant, the average for the period amounting to nearly 174,000,000 lbs., which is considerably less than the record yield of 211,573,745 lbs. in 1911.

The manufacture of cheese has been steadily increasing throughout the Commonwealth during recent years, the 1917 production being the highest yet recorded. A sharp decline was noticeable in 1918, followed by a satisfactory increase, despite droughty conditions, in 1919. Particulars for the past five years are as follows :—

PRODUCTION OF BUTTER AND CHEESE, COMMONWEALTH, 1915 TO 1919.

(a) For year ended 30th June of year following.

4. **Concentrated Milk.**—"Condensed" or "concentrated" milk denotes milk the bulk of which is reduced by evaporation. Small quantities of such milk were made prior to 1911, in which year the output for the Commonwealth was nearly doubled. Increasing quantities were annually manufactured till 1915, when a substantial falling off was in evidence in each of the three contributing States. During the next four years however the condensed milk industry developed considerably, particularly in Victoria, where the output for 1919 was 27,500,000 lbs. greater than that for 1915. There is still a considerable import of milk, as will be seen from the tables hereunder; but in each year, with the exception of 1915-16, there was an excess of exports. No condensed or concentrated milk is made in South Australia, Western Australia, or Tasmania. In New South Wales, Victoria, and Queensland the following are the returns for the last five years:—

CONDENSED AND CONCENTRATED MILK MADE, 1915 TO 1919.

Year.	N.S.W.	Victoria.	Queensland.	Commonwealth.
	lbs.	lbs.	lbs.	lbs.
1915	4,918,064a	16,690,426	5,368,510	26,977,000
1916	5,829,990a	33,280,635a	6,584,272	45,694,897
1917	8,973,916a	37,805,070a	9,409,059	56,188,045
1918	11,192,325a	45,251,710a	6,845,610	63,289,645
1919	12,969,679a	44,219,389a	9,170,034	66,359,102

(a) For year ended 30th June of year following.

5. **Oversea Trade in Milk, Butter, and Cheese.**—The following tables give the imports, exports, and net exports or imports of butter, cheese, and milk. In each of the five years exports of butter exceeded imports, but there was a net import of cheese and milk in 1915-16.

IMPORTS, EXPORTS, AND NET EXPORTS OF BUTTER, CHEESE AND MILK, COMMONWEALTH, 1915-16 TO 1919-20.

NOTE.—The minus sign (—) signifies net imports.

(a) See definition above. (b) Excess of exports over imports.

6. **Local Consumption of Butter and Cheese.**—The total production of butter and cheese, with the net export or import for the corresponding period subtracted or added, gives approximately the quantity available for consumption in the Commonwealth. In the period considered hereunder, with the exception of the year 1915, the local supply of cheese was adequate:—

BUTTER AND CHEESE FOR LOCAL CONSUMPTION, 1915 TO 1919.

Products.	1915.	1916.	1917.	1918.	1919.
	lbs.	lbs.	lbs.	lbs.	lbs.
Butter .. Total ..	124,213,328	107,626,000	128,228,098	140,704,350	126,679,261
.. .. Per head of population ..	25.19	22.08	25.08	27.97	24.26
Cheese .. Total ..	17,202,559	14,908,451	19,049,683	21,500,835	18,699,987
.. .. Per head of population ..	3.49	3.06	3.86	4.27	3.58

The quantity available for consumption in 1919 averaged 24½ lbs. of butter and about 3½ lbs. of cheese per head of population, an amount probably unsurpassed anywhere. The consumption of butter and cheese in the United Kingdom in normal times is given as about 20 lbs. per head per annum.

§ 3. Pigs, Bacon, etc.

1. **Pigs.**—Attention has been paid, both privately and by the various State Governments, to improving the breed, and consequently the market value of pigs. The number of pigs in the Commonwealth from 1915 to 1919 is shewn below:—

NUMBER OF PIGS, COMMONWEALTH, 1915 TO 1919.

State.	1915.	1916.	1917.	1918.	1919.
New South Wales (b) ..	280,869	359,504	395,639	294,338	253,338
Victoria (a) ..	192,002	254,436	323,159	267,819	186,810
Queensland ..	117,787	129,733	172,699	140,966	99,593
South Australia ..	66,237	118,542b	110,353b	79,078b	60,295b
Western Australia ..	58,231	90,756	111,844	85,863	58,155
Tasmania (a) ..	37,778	53,033	54,653	44,328	35,530
Northern Territory ..	500	500	500	1,200	1,675
Federal Territory (b) ..	289	259	518	310	572
Commonwealth ..	753,693	1,006,763	1,169,365	913,902	695,968

(a) As on 1st March of year following.

(b) As on 30th June of year following.

An examination of the returns of pigs shews remarkable fluctuations. There was a heavy falling off in 1915, followed by substantial increases during 1916 and 1917 in which latter year the number of pigs was the highest ever recorded in Australia. The figures for 1918 and 1919 reveal considerable decreases in practically all the States, the number of pigs in the Commonwealth being reduced by 473,397. The number of pigs per head of population, and the number per square mile, will be found in the tables of live stock, pages 213 and 214.

2. **Bacon and Ham.**—During the four years 1915–18, the production of bacon and ham increased considerably in all the States, the Commonwealth total of 66,171,428 lbs. for the latter year being the greatest quantity ever made in Australia. The 1919 figures, however, reveal a substantial falling off in production, the decrease being noticeable in all the States

" £	- 95,249	46,980	55,973	204,219	374,818

NOTE.—The minus sign (—) signifies net imports.

From 1901 to 1903 there was a considerable net import of bacon and ham, but for the following years, up to 1919-20, with the exception of 1915-16, when the figure was small, there was a large net export. The local production of pork and lard for each of the years 1911 to 1913 was more than sufficient for the local demand; during 1914-15, 1915-16, and 1916-17, however, the imports of frozen pork exceeded the exports by 25,546 lbs., 859,985 lbs., and 40,613 lbs. respectively, while in 1915-16 the net import of lard amounted to 3,530,655 lbs.

The net exports of pig products have assumed considerable proportions during the past five years. In 1915-16, owing to decreased production, a heavy net import of 4,225,129 lbs. was necessary, but during each of the next four years the net exports amounted to 2,463,461, 6,785,732, 12,421,748, and 11,344,726 lbs. respectively.

4. **Local Consumption of Bacon and Ham.**—From 1904 to 1919 the production of bacon and ham was sufficient to meet the local demand, and there was a surplus for export.

BACON AND HAM AVAILABLE FOR LOCAL CONSUMPTION, 1915 TO 1919.

(a) For year ended 30th June, 1920. (b) A portion only from pigs slaughtered in the State, the balance being imported and subsequently cured.

§ 4. Poultry Farming.

1. Development of the Industry.—Poultry stocks are largely maintained by farmers, and production therefrom furnishes a considerable addition to the annual agricultural or dairying returns. During recent years, however, poultry-keeping has assumed an independent position among rural industries, while it is also carried on in conjunction with pig farming. Special poultry farms have been instituted for scientific breeding, and poultry experts engaged by the State Governments give lectures and instruction. Poultry for consumption is extensively reared, and the egg-producing qualities of the birds have also been greatly improved by careful breeding. Co-operative egg-collecting circles have been formed in some districts; eggs are also delivered with the milk and cream to the local butter factories, and thence forwarded to market.

2. Poultry Products.—There is some difficulty in obtaining correct figures for the yield of poultry products. The following values are returned :—

ESTIMATED VALUE OF POULTRY AND EGGS, COMMONWEALTH, 1915-16 TO 1919-20.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania. (a)	C'wealth.
	£	£	£	£	£	£	£
1915-16 ..	2,146,000	1,747,000	107,370	518,808	184,360	200,000	4,903,538
1916-17 ..	1,908,000	1,714,770	324,958	618,441	201,284	250,000	5,017,453
1917-18 ..	2,082,000	2,160,650	295,882	669,105	188,982	250,000	5,646,619
1918-19 ..	2,501,000	2,738,620	319,602	690,539	189,471	300,000	6,739,232
1919-20 ..	2,814,000	3,579,230	356,590	924,986	191,288	300,000	8,166,094

(a) Estimated.

3. **Oversea Trade in Poultry Products.**—The imports and exports of eggs shew a balance on the side of imports in 1915-16 and 1916-17. During the next three years, however, the exports exceeded the imports, the value of the excess amounting to £1,028, £577, and £17,231 respectively.

The number of eggs imported into the Commonwealth since 1915-16 amounted to 700,980 dozen. Of this number China has supplied 654,518 dozen; Japan, 30,230 dozen; Straits Settlements, 6,190 dozen; and United Kingdom, 4,230 dozen.

There is at present only a small oversea trade in either live or frozen poultry, the values of the net exports during 1919-20 being £884 and £10,158 respectively.

§ 5. Bee Farming.

1. **The Bee-farming Industry.**—Bee farming, like poultry farming, is ordinarily an adjunct to agricultural or dairying industries. The returns of honey from productive hives during 1919-20 gave an average of $41\frac{1}{2}$ lbs. per hive, while the average quantity of wax was $\frac{1}{2}$ lb. per hive.

2. **Production of Honey and Beeswax.**—The particulars of honey and beeswax production are as given in the following table:—

**NUMBER OF HIVES AND PRODUCTION OF HONEY AND BEESWAX,
SEASON 1919-20.**

State.	Bee Hives.			Honey Produced.		Beeswax Produced.

1919-20	12,195	24,735	7,215	7,350	6,611	2,329	..	60,435

The quantity of honey and beeswax produced from year to year naturally varies according to the conditions of the seasons. During the last five years New South Wales has produced 8,460,958 lbs. of honey and 144,001 lbs. of beeswax, while the Victorian figures amounted to 10,496,995 lbs. and 155,839 lbs. respectively for honey and beeswax. These two States together accounted for 67½ per cent. of the total production of honey, and 69 per cent. of that of beeswax. The States following next in order of importance were South Australia, Queensland, and Western Australia.

3. Oversea Trade in Bee Products.—In normal years honey is produced in the Commonwealth in sufficient quantities to supply all local requirements, and a considerable quantity is sent oversea. During the past five years the value of the exports amounted to £357,296, or an annual average of £71,459. It is believed that this export could be considerably increased. Australian honey exhibited at the Franco-British Exhibition in London in 1908 obtained the highest award. The more general use of frame hives in recent years has affected the production of wax, and as a result the quantity imported has exceeded that exported during each of the past five years.

" £	650,788	1,301,209	899,346	763,484	1,075,563

(a) Frozen, chilled, and salted.

2. **Butter.**—Australia has for many years past contributed large quantities of the butter annually imported into the United Kingdom. During the past five years the value of the imports from Australia has considerably increased, amounting in 1919 to £5,251,176, which was the largest sum paid by Great Britain to any country for butter during the year.

IMPORTS OF BUTTER INTO THE UNITED KINGDOM, 1919.

Country from which Imported.	Quantity.	Value.	Country from which Imported.	Quantity.	Value.
	Cwt.	£		Cwt.	£
Australia ..	417,371	5,251,176	Norway ..	6,240	86,560
New Zealand ..	318,872	3,910,432	Foreign Countries		
Argentine Republic	265,675	3,344,213	n.e.i. ..	1,645	20,839
United States ..	216,495	2,746,908	British Possessions		
Canada ..	33,337	417,588	n.e.i. ..	3,324	41,268
Denmark ..	290,291	3,947,835			
Russia ..	6,954	87,608	Total ..	1,560,204	19,854,427

The average price of the best quality Australian butter in London during the past ten years is shewn in the following table:—

AVERAGE PRICE OF AUSTRALIAN BUTTER IN LONDON, 1910 TO 1919.

Year.	Average Top Price per Cwt.	Year.	Average Top Price per Cwt.
	s. d.		s. d.
1910	112 0	1915	144 6
1911	114 0	1916	169 6
1912	119 0	1917	(a) 206 0
1913	114 6	1918	(b) 252 0
1914	119 0	1919	(b) 252 0

(a) Proclaimed price.

(b) Flat rate for all imported butter.

The British Government under contract purchased the surplus output of Australian butter during the period from 1st July, 1918, to 31st July, 1920. The price paid was 175s. per cwt. for butter scoring 90 points, a shilling per cwt. being added or deducted as the grading score exceeded or came below that standard. On the 1st August, 1920, this contract was extended for a further period, the price of butter having been increased to 240s. per cwt., subsequently raised to 272s., the grading price being likewise increased to 1s. 6d. per cwt. This contract terminated on 31st March, 1921, after which date butter sales again reverted to the open market in the United Kingdom.

3. **Cheese.**—The value of the United Kingdom cheese imports in 1919 was £15,170,620, of which nearly eight and a half million pounds' worth was received from New Zealand, and nearly five million pounds' worth from Canada. Small experimental shipments from Australia were made in 1908 and following years, fair prices being realised. The value of the imports from Australia has increased from £91,729 in 1915 to £830,935 in 1919.

4. **Bacon and Ham.**—Of a total import of bacon and ham valued in 1919 at £89,681,616, the United Kingdom received imports to the value of £67,379,260 from the United States, and £19,534,159 from Canada. The import from Australia was small, experimental shipments only having been made during recent years.

5. **Pork.**—The total value of the United Kingdom imports of pork (including refrigerated, frozen, and salted) was £1,075,563 in 1919. There was no import from Australia, the chief supplying countries being Argentine Republic and the United States.

6. **Other Products.**—There is practically no United Kingdom import from Australia of beeswax, poultry, game, lard, or eggs, but honey to the value of £305,056, and frozen rabbits to the value of £553,106 were received from the Commonwealth in 1919.

§ 9. Graphical Representation of Dairy Production.

Two graphs shewing respectively the development in dairy production and in the exports of butter will be found on page 242.

SECTION X.

FORESTS, FORESTRY, AND FORESTAL PRODUCTS.

§ 1. The Forests of Australia.

1. Extent of Forests.—Although no definite survey of forest lands has been made on a uniform basis for the different States of Australia, the following table gives the results of careful estimates made for each State :—

FOREST RESERVES AND FOREST AREAS, STATE AND COMMONWEALTH, 1919.

State.	Area of Forest Reserves.		Total Forest Area.	Percentage of State Area.		Percentage of Commonwealth Area.	
	Permanent.	Temporary.		Specially Reserved.	Total Forest.	Specially Reserved.	Total Forest.
	(a)	(b)					
	Acres.	Acres.	Acres.	%	%	%	%
c New South Wales	5,085,050	1,746,069	11,000,000	3.45	5.55	0.36	0.57
Victoria ..	4,092,625	125,500(f)	11,800,000	7.49	20.98	0.22	0.62
Queensland ..	1,122,129	2,671,139	40,000,000	0.88	9.32	0.20	2.10
South Australia	161,027	18,700(f)	3,800,000	0.07	1.56	0.01	0.20
Western Australia	10,008	1,612,000(f)	15,900,000(d)	0.26	2.55	0.09	0.84
Tasmania	1,028,000	10,000,000	6.13	59.60	0.05	0.53
(e) Commonwealth	10,470,839	7,201,408	92,500,000	0.93	4.86

(a) Reservations in perpetuity. (b) Reservations which may be cancelled at any time.
 (c) Inclusive of Federal Area. (d) S.W. Division only. (e) Exclusive of Northern Territory
 and portion of Western Australia. (f) Figures uncertain.

The actual area of wooded land is probably in all cases much greater than that shewn above. For example, that of Western Australia is estimated at 97,900,000 acres; Queensland has probably 143,000,000 acres; and Victoria has a considerable extent of "Mallee" country not included in the above estimate. The basis of estimation for each State in any case cannot be regarded as identical. Considerable areas not included as forest lands possess timber of local value.

The absolute and relative forest areas of Australia and other countries are shewn in the table on the next page.

RELATIVE AREAS OF FOREST LANDS, AUSTRALIA AND OTHER COUNTRIES.(a)

Country.	Total Wooded Area.	Per- centage of Total Area.	Country.	Total Wooded Area.	Per- centage of Total Area.

Austria	37,700	31.66	Japan	71,890	48.33
Hungary	34,750	29.30*			

(a) Areas as before the war.

2. **Distribution of Timber.**—The characteristics of the forest areas are given in some detail for each State in Official Year Book No. 6, pp. 446-9. The more conspicuous timber regions of Australia as a whole are the eastern and southern portions, including Tasmania, and, again, the south-western portion northwards and eastwards from Cape Leeuwin. In regard to distribution, on the eastern side of the continent the largest timber is found on the crests and coastal slopes of the mountain ranges, but in the south-west, in addition to the vegetation between mountains and sea, a large area of forest stretches inland from the coastal ranges. The hills encircling Adelaide and Yorke and Eyre Peninsulas also bear good forest. The Kimberley district is timbered, and in the Northern Territory and round the shores of the Gulf of Carpentaria there are considerable forest areas. In the coastal regions of parts of West and North-West Australia, and along the shores of the Great Australian Bight and Encounter Bay, there is little forest. The areas in the centre of the continent are thinly timbered.

Special articles relating to Australian Eucalyptus timbers will be found in Official Year Book No. 10, pp. 85-98.

§ 2. Forestry.

1. **Objects.**—Economic forestry, aiming at the conservation of forestal wealth by safeguarding forests against inconsiderate destruction, and by the suitable re-afforestation of denuded areas, is essential to the preservation of industries dependent upon an adequate supply of timber, and to the perpetuation of a necessary form of national wealth. Though in Australia large areas of virgin forests still remain, the inroads made by timber getters, by agriculturists, and by pastoralists—who have destroyed large areas by “ring-barking”—are considerable, and it is not unlikely that climatological changes are caused thereby. It is stated that beneficial consequences follow on the planting of trees on denuded lands, or along eroding coasts, and that a forest covering beneficially regulates the effects of rainfall.

Successful planting of exotics in various parts of the Commonwealth has demonstrated that the Australian climate is suitable for the cultivation of a large number of the most valuable and beautiful of the world's timber trees.

2. **Forestry Departments.**—Each State of the Commonwealth has organised a separate forestry department or branch of service specially charged with forestal matters. Forest improvement work is carried on, areas of young forest being cleaned up by the felling and removal of stunted, diseased and suppressed growth, the burning of débris and the making of fire breaks. Provision is made for effective patrols in forest districts to check the ravages caused by fires, often due, it is believed, to carelessness.

3. **Sylvicultural Nurseries and Plantations.**—Recognition of the necessity for systematic sylviculture has led to the creation in most of the States of a number of sylvicultural nurseries and plantations. The locality of these establishments, together with a brief statement of the nature of their activities, is given in previous issues of the Year Book. (Reference may be made to Official Year Book No. 6, pp. 451-3.) Details regarding forest nurseries and plantations are as follows:—

FOREST NURSERIES AND PLANTATIONS, 1919.

5. **Instruction in Scientific Forestry.**—Several schools have been established in which, while general scientific instruction is imparted, special attention is paid to forestry. In the classes, theoretical forestry, botany, geology, physics, land surveying, etc., are taught; while in outside work trainees receive practical instruction in the preparation of seed-beds, seed-sowing, propagation, planting out, pruning, the general care and improvement of plantations and natural forests, and the employment of timber to the best advantage. The desire is to give the prospective forester a thorough training in all branches of the work. Courses of lectures are also given at various centres, and, at some of the higher technical schools, members of the forest staffs are afforded opportunities of qualifying in special subjects. Methods of training, etc., are not uniform in the various States, and one of the prime objects of a Conference held in 1916 was the evolution of a system which, while aiming at uniformity, would be sufficiently elastic to provide for special needs in any State.

6. **Forest Congresses.**—Interstate Conferences on Forestry were held in 1911 and 1912, chiefly with a view of securing uniformity of management. An International Forest Congress was held at Paris in June, 1913, when a Professor of South Kensington Imperial College represented the Commonwealth Government. The papers and reports dealt chiefly with the threatened shortage of timber, and the measures necessary to avert the danger. An Imperial Forestry Conference was held in London in the summer of 1920, at which also Australia was represented. Important Interstate Forestry Conferences were held at Adelaide in May, 1916; at Perth in November, 1917; and at Hobart in April, 1920.

§ 3. Commercial Uses of Principal Australian Timbers.

1. **General.**—The uses of the more important of Australian timbers are many and various, and are indicated in previous issues of this work. (See Official Year Book No. 6, pp. 454-6; and Official Year Book No. 10, Section III., § 7 and 8.)

The Commonwealth Government utilises Australian woods for rifle stocks, telephone switch boards, aeroplane parts, etc. Queensland maple (*Flindersia chatawaiana*) is largely used for rifle stocks, and coachwood is available for the same purpose. Australian timber is also seasoned and stored, depots having been established by the Commonwealth Government at Canberra and Newington in New South Wales and at Maribyrnong in Victoria; by States Governments at the principal centres; and by private enterprise as required.

2. **Uniformity in Nomenclature.**—Unfortunately the vernacular names applied to the gums, ironbarks, etc., in the various States, and even in different parts of the same State, do not always refer to identical timbers. The resulting confusion has not only been productive of loss, but it has, to some extent, prejudicially affected the timber trade. This subject is referred to at some length in the special article, "Australian Eucalyptus Timbers," in Section III., § 7 and 8, in Official Year Book No. 10. At the 1916 Forestry Conference alluded to above, the matter came up for special consideration, and steps were taken to establish a uniform nomenclature.

§ 4. Forestal Industries and Production.

1. **Timber.**—Estimates of the quantity and value of local timber sawn and hewn in each State are given hereunder:—

QUANTITIES OF LOCAL TIMBER SAWN OR HEWN IN EACH STATE OF THE COMMONWEALTH, 1914 TO 1920.

State.	1914.	1915.	1916-17.	1917-18.	1918-19.	1919-20.

Commonwealth	675,866,000	496,472,000	473,236,000	451,096,000 ^b	491,620,000	593,109,000

(a) Year ended 31st December.

(b) Including Northern Territory, 75,000 sup. feet.

2. **Other Forest Produce.**—(i) *General.* No satisfactory estimates of the total value of forest production are available. Large returns are credited to firewood, but these are subject to a wide range of uncertainty.

(ii) *Eucalyptus Oil.* A considerable quantity of eucalyptus oil is produced each year, chiefly in Victoria, the product being used as a drug and also in connexion with ore flotation processes. Complete information regarding local production and consumption is not available. Oversea exports amounted in 1914-15 to £21,000, in 1915-16 to £36,000, in 1916-17 to £60,000, in 1917-18 to £77,000, in 1918-19 to £84,000, and in 1919-20 to £92,000, the bulk of the product being forwarded to the United Kingdom. Large quantities have also been exported to the United States.

(iii) *Tan Barks.* In addition to the wattle bark, mentioned at the close of this section, a valuable tan bark is obtained from the mallet (*E. occidentalis*) of Western Australia. Its exploitation has, however, been so rapid that the available supply is now comparatively small.

§ 5. Oversea Trade.

1. **Imports.**—The quantity and value of timber imports during the four years 1916-17 to 1919-20 inclusive are shown according to countries of origin in the following tables. The figures in the first table are exclusive of a few items such as veneers, etc.:—

IMPORTS OF DRESSED TIMBER, COMMONWEALTH, 1916-17 TO 1919-20.

Country of Origin.	Quantity.				Value.			
	1916-17.	1917-18.	1918-19.	1919-20.	1916-17.	1917-18.	1918-19.	1919-20.
	sup. ft.	sup. ft.	sup. ft.	sup. ft.	£	£	£	£
United Kingdom ..	1,109	100	20	105,970	51	18	3	584
New Zealand ..	70,317	163,979	9,135	..	1,070	2,064	206	..
Other British Countries ..	22,230	40,975	31,564	94,725	252	461	358	1,208
Norway ..	3,245,724	400	..	9,433,921	32,711	2	..	201,593
Sweden	532,845	4,251,220	9,900	87,757
United States ..	481,603	107,323	73,459	66,863	8,023	2,658	2,621	2,793
Other Foreign Countries ..	20,727	10,838	13,294	2,320	398	207	641	109
Total ..	3,841,710	323,615	660,317	13,955,028	42,505	5,410	13,729	294,044

The bulk of the imports of dressed timbers normally comes from Norway, Sweden, and the United States. War conditions caused some dislocation of trade during the period covered by the table. Practically the whole of this timber consists of softwoods—deal and pine—used for lining, weatherboards, flooring, shelving, doors, box-making, etc.

IMPORTS OF UNDRESSED TIMBER, INCLUDING LOGS, COMMONWEALTH,
1916-17 TO 1919-20.

Country of Origin.	Quantity.				Value.

Other Foreign Countries ..	51,382	94,774	106,666	1,059,665	955	1,331	3,397	19,781
Total ..	196,604,729	169,657,075	143,782,637	143,208,372	1,352,136	1,335,555	1,756,739	2,078,906

By far the larger proportion of the undressed timber imports also consists of softwoods such as yellow pine, redwood, and oregon from the United States and Canada; kauri, rimu, and white pine from New Zealand; pine from Japan, and (prior to the war) red deals from Russia, Norway, and Sweden. Amongst the hardwoods imported the principal are oak from the United States and Japan, and teak from India.

2. Exports.—The quantity and value of undressed (sawn) timber exported from 1915-16 to 1919-20 are given below, the countries of destination being also shown:—

EXPORTS OF UNDRESSED TIMBER (SAWN), COMMONWEALTH,

(a) Exclusive of timber not measured in super. feet.

As the table shews, the bulk of the exports of undressed timber was consigned to South Africa, New Zealand, and (except for latest years) the United Kingdom, and consisted of Australian hardwoods, which have earned an excellent reputation for such purposes as railway sleepers, harbour works, wood paving, etc. There was a notable increase in the quantity supplied to the United States in the later war years.

The quantities of timber imported and exported during the last five years are given in the next table:—

**QUANTITIES OF TIMBER IMPORTED INTO AND EXPORTED FROM THE

NOTE.—The minus sign (—) signifies excess of exports over imports.

A fair amount of sandalwood is exported each year, principally from Western Australia, and to a smaller extent from Queensland. The largest proportion of this product is consigned to Hong Kong, China, and the Straits Settlements.

Prior to the war there was a fairly considerable export of tan bark to Germany and also to Belgium. The exports westward have naturally dwindled away, and at the present time New Zealand receives the largest share of the available export, while there is also some trade with Japan, China, and Java. During recent years the largest proportion of the exports consisted of wattle bark from Tasmania, Victoria and New South Wales.

A comparison of the imports and exports of tanning bark during the last five years is given in the next table:—

TANNING BARK IMPORTED INTO AND EXPORTED FROM THE COMMONWEALTH, 1915-16 TO 1919-20.

Excess of exports over imports	-5,965	-22,547	20,979	-28,644	10,494

NOTE.—The minus sign (—) denotes excess of imports.

The imports consist almost exclusively of wattle bark from the plantations in South Africa. One variety of Australian wattle is found to flourish in the sandy belts near the coast, but it is the *Acacia decurrens*, var. *mollis*, which is chiefly relied upon for the production of wattle bark in the South African plantations. Seed has been tried from New South Wales, Tasmania, and Victoria, but it is stated that most of the seed is obtained from the best wattle bark areas in eastern Tasmania and western Victoria.

Two reasons are given to account for the success of the industry in South Africa. (i) It is found that the treeless, grassy highlands of Natal are specially suitable for wattle culture, and the trees can therefore be grown in rows and economically attended to, while the necessary bark sheds and other appurtenances can be placed in the most advantageous positions. (ii) There is an abundance of cheap and efficient Hindoo labour available for employment on the plantations.

SECTION XI.

FISHERIES AND PISCICULTURE.

§ 1. Commercial Fisheries.

1. **Fish Stocks.**—Australasia possesses an abundant and varied fish fauna, which embraces both tropical and temperate varieties and includes destructive as well as valuable species. In rivers and lakes both indigenous and imported varieties thrive. The latter have been introduced and acclimatised for industrial and sporting purposes by Governments and angling societies. Exploitation of the fishing areas—for some classes of fish for the whole year, for others during the breeding season only, or until a certain size is attained—is, where necessary, expressly forbidden; proclaimed localities are closed against net-fishing, and a minimum size of mesh for nets is fixed. The sea-fishermen in some districts have made regulations in their own interests for the purpose of controlling the market supply, and these they rigorously observe.

2. **Economic Fisheries.**—Although Australia's food fishes are abundant, the development of the industry has been slow. It has been authoritatively stated that the marine fisheries, properly fostered, will develop into an industry of national importance. Local catches of lake and river fishes furnish, in the aggregate, a not inconsiderable amount of food supply.

3. **Distribution of Supplies.**—Present methods of distribution impose serious difficulties on the development of fishing generally, since there is a wide divergence between the price paid by the consumer and the return received by the producer. States and municipalities are interesting themselves in the direction of more economic distribution. Good markets are assured in the chief cities for regular deliveries of fresh fish.

4. **Oyster Fisheries.**—Natural oyster beds, whose ample product is of excellent quality, exist on the foreshores in the shallow waters of inlets and estuaries in several parts of Australia. By husbanding the natural crop, and by judicious transplanting, the oyster output has been very materially augmented, and it is believed that there is a great future for the industry. The areas are leased by the Government to private persons, lengths of foreshore being taken up and profitably exploited. In New South Wales and Queensland particularly, the industry has developed; and small yields have been obtained in South Australia and Victoria.

5. **Pearl-shelling, Beche-de-Mer, etc.**—(i) *General.* Pearl-shelling is carried on in the tropical waters of Queensland, the Northern Territory, and Western Australia. The pearl oyster inhabits the northern and western coastal waters from Cape York to Shark Bay, a length of shore of over 2,000 miles. The shells are marketed in considerable quantities, and pearls also are obtained in Queensland and Western Australia. The fishing is generally conducted with the aid of diving apparatus, in water varying from 4 to 20 fathoms in depth. In Queensland and the Northern Territory the beche-de-mer

industry is carried on, and tortoise-shell is obtained on the coasts. Experiments have been made in cultivating the pearl oyster on suitable banks. In October, 1911, a pearl weighing 178 grains, and valued at £3,000, was obtained at Broome. Further details regarding pearl-shelling are given in Official Year Book No. 6, p. 463. Trochus-shell to the value of £12,000, £23,000, £21,800, £37,886, and £30,280 was raised in Queensland during 1915, 1916, 1917, 1918, and 1919 respectively.

(ii) *Royal Commission on Pearl-shelling Industry.* In accordance with the "White Australia" policy, it was originally determined that the employment of Asiatic labour in the pearl-shelling industry should be restricted, and ultimately cease, and it was proposed that after 31st December, 1913, permits to indent Asiatics for the pearling fleet should no longer be issued. In view, however, of the disorganisation of the industry occasioned by the war, the time was extended to the 30th June, 1918, after which date permits to introduce Asiatic labour were to be granted only in cases where the diver and tender of a boat were Europeans. Since the receipt of the Report of the Royal Commission, referred to hereunder, this proviso was, however, revoked. In March, 1912, a Royal Commission to inquire into the pearling industry was appointed by the Commonwealth Government, and after visits to the Queensland and Western Australian waters, various sittings, and the issue of a progress report, presented its final report in 1916. The Commissioners stated that, though it might be practicable, they did not consider it desirable or profitable to attempt by any drastic methods to transfer the industry from Asiatics to Europeans. They further stated that, while the labour now employed is almost entirely Asiatic, they did not consider that the "White Australia" policy would be weakened or imperilled by allowing the industry to continue as at present conducted. At Thursday Island the pearling industry is almost monopolised by Japanese.

§ 2. Fisheries Statistics.

1. *Estimates for the Commonwealth.*—The returns given below have been furnished by the State departments. Estimates and approximations, where shown, are official. The data do not generally lend themselves to presentation on a uniform scheme, but the principal facts have as far as possible been compiled for the Commonwealth.

GENERAL FISHERIES (EXCLUDING EDIBLE OYSTERS, PEARL-SHELL, AND BÊCHE-DE-MER), COMMONWEALTH, 1919.

State or Territory.	No. of Boats Engaged.	Value of Boats and Equip- ment.	No. of Men Em- ployed.	Total Take of—		Value of Take.

Northern Territory (e)	10	700	33	600	..	1,900	..
Commonwealth (d)	3,838	261,587	7,774	(a)	(a)	877,120	26,896

(a) Not available. (b) Including 43,691 cwt. fish, valued at £91,751, obtained by State trawlers. (c) Also 77 dozen crabs and 5,039 cwt. prawns. (d) Incomplete. (e) Year ended 30th June, 1920. (f) Included with fish.

The available returns from the Commonwealth oyster fisheries appear in the next table. Edible oysters are not found in Western Australia. There is no information available in regard to the small consumption of local oysters in Tasmania.

EDIBLE OYSTER FISHERIES, COMMONWEALTH (a), 1919.

State or Territory.	Number of Boats Engaged.	Value of Boats and Equipment.	Number of Men Employed.	Number of Leases.	Oysters Taken.	
					Quantity.	Value.
	No.	£	No.	No.	cwt.	£
New South Wales	418	14,142	384	3,297	41,674	59,840
Victoria (b)	(c)	(c)	(c)	2	10,849	8,100
Queensland	85	11,046	108	572	25,907	32,970
South Australia (c)
Commonwealth	3,871d	78,430d	100,910d

(a) Practically no oyster fisheries in Western Australia, Tasmania, and Northern Territory. (b) Year ended 30th June, 1920. (c) Included with General Fisheries. (d) Exclusive of South Australia.

The pearling industry is carried on in the tropical waters of Queensland, Western Australia, and the Northern Territory. During the last few years the return from the pearling industry has been adversely affected by labour conditions, coupled with the restriction in the market consequent on the war. Some of the pearling fleets have transferred their operations to Dutch waters. Bêche-de-mer is obtained in Queensland and the Northern Territory, the product being exported to China.

PEARL, PEARL-SHELL, AND BÊCHE-DE-MER FISHERIES, COMMONWEALTH (a), 1919.

State or Territory.	Number of Boats Engaged.	Value of Boats and Equipment.	Number of Men Employed.	Quantity of Pearl-shell obtained.	Value of Pearl-shell obtained.	Value of Pearls obtained (d).	Value of Bêche-de-mer obtained.	Value of Tor- toise-shell obtained.
	No.	£	No.	Tons.	£	£	£	£
Queensland (b)	155	90,000	1,267	817	115,756	200	34,881	96
Western Australia	290	166,738	2,080	1,453	265,778	74,012
Northern Territory (c)	26	5,500	106	30	5,500	..	7,840	(c)
Commonwealth	471	262,238	3,453	2,300	387,034	74,212	42,721	(d) 96

(a) No pearl-shelling industry in New South Wales, Victoria, South Australia, and Tasmania. (b) Also trochus-shell to the value of £30,280. (c) Not available. (d) Incomplete. (e) Year ended 30th June, 1920.

For obvious reasons the returns in regard to the value of pearls obtained can be regarded as rough approximations only. The trochus-shell raised in Queensland is used principally in the manufacture of "pearl" buttons. The next table gives the revenue from fisheries in each State :—

PUBLIC REVENUE FROM FISHERIES, COMMONWEALTH, 1919.

Fines and forfeitures .. £	713	764	358	438	523
Other sources .. £	218	255	999	575	3,919
Total revenue .. £	21,652	23,757	22,857	22,562	27,370

(a) There are practically no oyster fisheries in Western Australia, Tasmania, and Northern Territory.

(b) Exclusive of Tasmania.

(c) Exclusive of South Australia and Tasmania.

(d) Exclusive of

South Australia.

(e) Exclusive of Victoria and South Australia.

The following table gives in summarised form for the years 1915-19 the details available in regard to pearling and bêche-de-mer fishery for the States where these industries are carried on, i.e., Queensland, Western Australia, and the Northern Territory. The low production of pearl-shell in 1915 was, of course, due to the loss of market occasioned by the war. For obvious reasons, figures regarding value of pearls obtained can be taken as rough approximations only.

PEARL, PEARL-SHELL, AND BÊCHE-DE-MER FISHERIES, COMMONWEALTH, 1915 TO 1919.

Particulars.	1915.	1916.	1917.	1918.	1919.
No. of boats engaged ..	346	429	471	401	471

(a) Incomplete; but as returned.

(b) Also trochus shell valued at £12,000 in 1915; at £23,000 in 1916; at £21,800 in 1917; at £37,886 in 1918; and at £30,280 in 1919.

(c) Incomplete.

§ 3. Oversea Trade in Fish.

That the development of the fishing industry in Australia leaves much to be desired is evident from the fact that the import of preserved fish into the Commonwealth is very large. The figures for the imports for the last five years were as follows :—

IMPORTS OF FISH, COMMONWEALTH, 1915-16 TO 1919-20.

Classification.		1915-16.	1916-17.	1917-18.	1918-19.	1919-20.
Fresh (oysters) ..	{ cwt. £	4,736 3,040	3,059 2,157	1,583 1,098	2,321 1,617	520 762
Fresh, or preserved by cold process	{ cwt. £	25,771 68,676	18,363 48,191	11,080 26,306	5,383 15,144	9,444 39,796
Potted ..	{ cwt. £	(a) 54,414	(a) 44,268	(a) 1,300	(a) 10,075	(a) 97,340
Preserved in tins	{ cwt. £	213,347 755,286	174,145 715,741	148,421 788,728	62,426 345,918	148,684 989,742
Smoked, dried, and n.e.i.	{ cwt. £	10,403 32,868	10,015 37,239	7,320 35,602	2,313 15,863	6,106 38,298
Total ..	{ cwt. (b) £	254,257 914,284	205,582 847,596	168,404 853,034	72,443 388,617	164,754 1,165,938

(a) Not available. (b) Exclusive of potted fish.

Tinned fish constitutes by far the largest proportion of the imports, the bulk of it consisting of salmon from the United States, Canada, Japan, and Alaska. The potted fish comes chiefly from the United Kingdom. New Zealand supplies the largest proportion of the fresh fish, the bulk of the remainder coming from the United Kingdom and Canada. The small import of oysters consists entirely of New Zealand produce.

The exports of local fish produce for the five years 1915-16 to 1919-20 are given hereunder :—

EXPORTS OF FISH (AUSTRALIAN PRODUCE), COMMONWEALTH,
1915-16 TO 1919-20.

Classification.		1915-16.	1916-17.	1917-18.	1918-19.	1919-20.
Fish, fresh, smoked, or preserved by cold process	{ cwt. £	918 2,806	764 3,089	983 4,048	530 2,591	790 6,017
Preserved, in tins, dried, salted, etc.	{ cwt. £	11,044 40,441	12,222 39,839	13,413 57,254	7,072 45,342	9,259 66,255
Total ..	{ cwt. £	11,962 43,247	12,986 42,928	14,396 61,302	7,602 47,933	10,049 72,272

The quantity of fresh fish exported from the Commonwealth is trifling, and the amount of £6,017 shewn in the table above consists chiefly of cured bêche-de-mer exported to Hong Kong from the Northern Territory. The bulk of the amount of £66,255 consists of an export of salt fish also to Hong Kong from Queensland.

The exports of pearl-shell and tortoise-shell are given hereunder for the five years 1915-16 to 1919-20:—

**EXPORTS OF PEARL-SHELL AND TORTOISE-SHELL, COMMONWEALTH.
1915-16 TO 1919-20.**

Article.		1915-16.	1916-17.	1917-18.	1918-19.	1919-20.
Pearl-shell	.. { cwt.	50,124	70,030	59,598	49,300	46,080
	.. { £	194,052	363,669	347,964	316,154	467,050
Tortoise-shell	.. { lbs.	570	1,283	1,241	478	2,837
	.. { £	333	802	609	402	3,215

Most of the pearl-shell exported during 1919-20 was consigned to the United States and the United Kingdom, values being £265,000 and £197,000 respectively. A small export was also made to Japan.

§ 4. Development of the Fishing Industry.

1. Transport and Marketing.—Up to the present the question of adequate transport and marketing of the proved supplies of fish has not been satisfactorily dealt with in all the States. In New South Wales, as shewn in § 6 hereinafter, the matter of exploiting and marketing trawlable fish has been undertaken by the State Government, which has also taken steps to improve the conditions under which the ordinary coastal fishing is carried on. In Queensland, also, State trawling was developed in 1919, and some good trawling bottoms have been located and charted between Cape Moreton and Caloundra.

2. Experiment and Culture.—In many respects the fishing industry is capable of modification and development. Although some valuable work has been done by the State Governments in the way of experiment and culture, a uniform policy of development for Australia is desirable, and recommendations have been made that the Fisheries Departments of the various States should co-operate with the Federal Government with a view to increasing the productiveness of the Commonwealth waters; and that uniform fisheries laws should be adopted by adjacent States.

All live fish imported into Australia are examined on shipboard in order to prevent the importation of undesirable fish.

With the object of ascertaining something of the movements of oceanic fishes, as well as of those estuarine fishes which make periodical oceanic migrations, reports are furnished regarding the various kinds of fishes, etc., and their movements along the coast.

Fuller details regarding the activities of the States in fish-culture are given in Official Year Book No. 6, pp. 471-2.

By arrangement with the Commonwealth Fisheries Department, members of the staff of the Australian Museum, Sydney, accompanied the F.I.S. *Endeavour* on various cruises. Specimens were collected, mounted for scientific purposes, and distributed to other Australian Museums, a considerable number being put aside for the Commonwealth Fishery Museum.

3. Consumption of Fish.—Despite the circumstance that numerous varieties of valuable food fishes abound in the coastal waters of Australia, while the freshwater rivers and lakes yield abundant supplies of natural and acclimatised species, the fishing industry has not developed to the extent that might reasonably be expected. It has been said that the Australians are not an "ichthyophagous race." The annual consumption of fish per head of population in Great Britain is 42 lbs.; in Australia it has been estimated at 10 lbs. The comparatively heavy import of dried and preserved fish would appear to indicate that there is great scope for the development of the industry, which now seems to be ill-managed, the price to the consumer being high, while the fisherman's gain is uncertain, and the system of distribution lacks method. Considerable improvement has, however, been effected in recent years, particularly in New South Wales (*vide* § 6 herein).

§ 5. The Commonwealth Department of Fisheries.

1. **The Federal Council of Australasia.**—The Federal Council had power to legislate with regard to fisheries in Australasian waters beyond territorial limits. In its second session (opened 16th January, 1888) an Act was passed to regulate pearl-shell and bêche-de-mer fisheries in Australasian waters adjacent to Queensland; and in the third session, opened shortly afterwards, the Act was made applicable to Western Australia. Upon the passing of the Commonwealth Constitution Act of 1900, however, the Federal Council ceased to exist.

2. **Commonwealth Investigations.**—In 1907 the Commonwealth Government decided to demonstrate what might be attained commercially by the application of modern methods. A Federal Investigation Ship, the *Endeavour*, was constructed specially for the work, and a Director of Fisheries was appointed. Experimental cruises were immediately undertaken. These showed that the Commonwealth possesses an asset of considerable value in her sea fisheries. The scope and results of the inquiries are set out in the reports issued by the late Director.

3. **Scope of the Inquiry.**—The immediate scope laid down for the investigation was shortly, as follows:—

- (i) By various means of capture to ascertain what marketable food-fishes may be found in ocean waters adjacent to Australia.
- (ii) In what quantity they may be taken.
- (iii) To what extent they migrate, and whither.
- (iv) How they may be conveniently and economically captured.
- (v) By systematic survey to find out and chart suitable fishing grounds.

In addition to the work which was thus carried on in the various recognised methods of capture (including long-line and drift-net fishing, etc.), hydrographic survey work, etc., was carried out for the purpose of ascertaining the nature of the sea bottom, depth of water, currents, and sea temperature.

4. **The F.I.S. "Endeavour."**—The construction of the investigation vessel was undertaken in the Commonwealth, and was upon the lines shown by the most recent European experience to be of greatest advantage, with necessary modifications to suit the Australian climate. A description of the vessel, which was the first Commonwealth-owned seagoing ship, is given in Official Year Book No. 6, p. 473. Up to the end of 1913, 85 cruises had been made in eastern and southern waters. In 1914, 13 more cruises were successfully undertaken; but the vessel with all on board, including the Director, was lost on her 99th cruise, which was commenced on 20th November, 1914.

5. **Trawling Grounds Discovered by the "Endeavour."**—According to information supplied by the Commonwealth Department of Trade and Customs, it would appear from the experiments carried out by the *Endeavour* on the shelf of the east coast of Australia, that the best trawling grounds extend from near Port Stephens, in New South Wales, past Sydney to Gabo Island, continuing across the eastern slope of Bass Strait past Flinders Island to Tasmania. These trawling grounds cover an area of approximately 6,000 square miles, and are within easy access to two markets—Sydney and Melbourne. Extensive operations have been carried out on these grounds, and fish in payable quantities have been obtained.

A very rich trawling ground has also been located in the centre of the Great Australian Bight, estimated to cover an area of about 4,000 square miles. The depth varies from 80 to 300 fathoms, but the greater portion of the trawlable area is situated between 100 and 200 fathoms. Excellent results were obtained by the *Endeavour* in this locality, fine rock ling and flathead being among the many choice varieties caught. This ground is situated about half-way between Adelaide and Albany, and about two days' steaming from either place.

In both of the trawling areas referred to above, considerable quantities of prime edible fish have been caught by the *Endeavour*, thus demonstrating the potential value of Australia's deep-sea fisheries.

6. **The Continental Shelf.**—In addition to the primary duty of locating payable trawling grounds, extensive hydrographic surveys were carried out by the *Endeavour* along the coast from the north of Queensland to the west coast of Western Australia. Soundings, samples of the sea bottom, sea temperatures, etc., were taken, principally

within the hundred-fathom line, in order to determine the suitability or otherwise of the localities for trawling. These observations were, in most instances, taken prior to the casting of the trawl net, which was the principal means of capture used by the *Endeavour* for ascertaining the richness of areas so far as the abundance of fish food was concerned. Most of the soundings have been charted and are available for public information.

The late Mr. H. C. Dannevig, formerly Director of Fisheries for the Commonwealth, in his "Report on the Continental Shelf on the East Coast of Australia" (Fisheries—Volume III., Part 6), explained how systematic surveys were carried out by him on the *Endeavour* and information obtained as to the nature of the continental shelf which surrounds the Australian continent.

The shelf consists of a narrow submerged ledge, varying in width from 10 miles to more than 100 miles, covered by a depth of less than 100 fathoms. From the outer edge of this ledge or shelf the bottom slopes away more or less abruptly towards the great ocean depths. It is within the area of the shelf that trawling grounds may be looked for.

On the east coast of Australia, the typical shelf commences at Sandy Cape in Queensland, and continues southwards. For about 360 miles, or south of Smoky Cape in latitude 31° S., the shelf presents peculiarities which gradually disappear further south. One of these peculiarities is that the shallow portion of the shelf continues seawards for a considerable distance, so that, for instance, at Double Island, the depth is only 50 fathoms. At this depth the shelf may here be said to terminate, as, at depths from 60 to 100 fathoms, apart from being narrow and rocky, the sea floor is frequently so steep as to form part of the general slope downwards to abysmal depths. Another peculiarity is that northwards from Cape Moreton the shallow portion of the ledge is mainly covered with coral sand, which southwards gives way to a somewhat yellow sand, occasionally interspersed, in localities where the currents are strong, with gravelly beds.

Southwards from Smoky Cape the relative proportion between the inner and outer areas becomes reversed. At the Cape itself the shelf is narrow and divides into two equal belts; the shallow area of less than 50 fathoms, and a deeper stratum with an average depth of 70 fathoms. From here southwards the outer stratum becomes gradually wider at the expense of the inshore or secondary ledge, a maximum width of which is found in the Newcastle Bight, where the inshore ledge is seven to eight miles wide, while the outer ledge extends for another twenty-one miles before breaking off into the deep. Simultaneously with the appearance of the outside ledge at Smoky Cape the depth of the "break off" increases quickly to about 100 fathoms, and remains so for the remainder of the coast south to Gabo Island.

Southwards from Gabo Island the shelf widens out considerably, and consists entirely of the outward or deeper stratum, which, between 50 and 300 fathoms, is many miles wide. The edge gradually bends westward parallel with the coast until opposite the mouth of the Snowy River, where at a distance of about thirty miles from land it turns abruptly to the south. On approaching the bend, the shallow area (of less than 50 fathoms) has gradually extended at the expense of the outer ledge, and while the former continues westward through Bass Strait and connects Victoria and Tasmania, the latter extends as a relatively narrow belt along the eastern slope past Flinders Island and along the east coast of Tasmania.

The hundred-fathom line from the south of Tasmania to the western end of the Great Australian Bight was also surveyed by the *Endeavour*. On that portion of the coast it was found that the continental shelf was considerably wider than on the east coast, and the slope of the shelf more gradual.

7. Publications of the Commonwealth Fisheries Department.—New and rare species of fish and marine forms secured by the *Endeavour* have been preserved, examined and described by various scientists, recognised as authorities on the subject of marine life. The following monographs have been published by the Department of Trade and Customs, the names of the authors being appended:—

Subject.	Author.
<i>Mollusca</i> (2 parts)	Charles Hedley, F.L.S. (Assistant Curator and Conchologist, Australian Museum, Sydney).
<i>Fishes</i> (4 parts)	Allan R. McCulloch (Zoologist, Australian Museum).

Subject.	Author.
<i>Sponges</i>	E. F. Hallmann, B.Sc. (Australian Museum).
<i>Assymetron</i>	Miss Janet W. Raff, B.Sc. (Melbourne University).
<i>Globigerina Ooze</i>	F. Chapman, B.A., A.L.S. (Palæontologist, National Museum, Melbourne).
<i>Hydroïda</i> (3 parts)	W. M. Bale, F.R.M.S.
<i>Foraminifera and Ostrea</i>	F. Chapman, B.A., A.L.S.
<i>Algæ</i>	A. H. Lucas, M.A. (Sydney Grammar School).
<i>Polychæta</i> (2 parts)	William Benham, M.A., D.Sc., F.R.S. (Professor of Biology at the University of Otago, N.Z.).
<i>Gephyrean Priapulus</i>	Do. do. do.
<i>Sea Lilies, Star Fishes, Brittle Stars and Sea Urchins</i>	Hubert Lyman Clark (Curator of Echinoderms, Museum of Comparative Zoology, Cambridge, Mass., U.S.A.).
<i>Cephalopoda</i>	S. Stillman Berry.
<i>Spider Crabs</i>	Miss Mary J. Rathbun (United States National Museum, Washington, D.C.).

The following papers were, in addition, prepared by the Director of Fisheries, the late Mr. H. C. Dannevig:—

First and Second Preliminary Reports on the Fishing Experiments carried out by the F.I.S. *Endeavour*.

Notes on Australia's Fisheries, with a summary of the results obtained by the F.I.S. *Endeavour*.

Paper on the Continental Shelf of the East Coast of Australia.

Paper on the Physiography of Bass Strait.

§ 6. The State Trawling Industry—New South Wales.

As far back as the year 1898, the New South Wales Government equipped a small vessel called *Thetis* for the purpose of investigating the potentialities of the State coastal waters in regard to the supply of edible fish. The knowledge gained from the cruises of this vessel was, of course, considerably augmented by that obtained since 1907 by the more modern methods adopted by the Commonwealth vessel *Endeavour*. In view of the favourable outlook, the State Government determined to exploit the fishing industry. The necessary vessels and equipment were ordered, and by the middle of the year 1915, three steam trawlers built of steel and equipped in accordance with the most up-to-date methods had commenced operations in the coastal waters. Other vessels have also been built for trawling and surface fishing. It was not long before these vessels had proved the existence of highly valuable trawling grounds within a day's steam of Sydney Heads, and what is believed to be one of the most prolific areas in the world has been located within three hours' steam of the home wharf. The ample product has been landed and sold to the public at extremely low rates in the State retail depots, of which several have been established, as well as at occasional sales in markets and in country districts.

Moreover, in connexion with the undertaking, arrangements have been made for the collection and distribution of fish taken by coastal and estuarine fishermen. With this end in view, large refrigerating stations have been built at Newcastle, Clarence River, and Port Stephens. The scheme has proved a great boon to fishermen by obviating the losses caused by the uncertain supply of ice and the absence of facilities for marketing.

§ 7. Fish Preserving.

Bounties were provided for ten years by the Federal Government for fish preserving, the rate payable being $\frac{1}{2}$ d. per lb. The amounts paid were £27 in 1907-8; £1,727 in 1908-9; £311 in 1909-10; £115 in 1910-11; £168 in 1911-12; £103 in 1912-13; £80 in 1913-14; £156 in 1914-15; £106 in 1915-16; £177 in 1916-17. In 1917-18, £35 was paid in satisfaction of a claim made in the preceding year. Up to the present but little development has taken place, the establishments which claimed bounty for fish preserving numbering only one in 1917-18, as compared with five in 1916-17, two in 1915-16, and five in 1914-15. No bounties were paid in the years 1918-19 and 1919-20.

SECTION XII.

MINES AND MINING.

§ 1. The Mineral Wealth of Australia.

1. *Place of Mining in Australian Development.*—The value of production from the mineral industry is now considerably less than that returned by the agricultural or the pastoral industry, nevertheless it was the discovery of gold in payable quantities that first attracted population to Australia, and thus laid the foundation of its nationhood. Prior to 1851, the year when Hargraves' memorable discovery was made, coal and copper had both been mined to some extent, and the existence of deposits of other minerals, including gold, had been proved. But it was the news of the sensational finds of the precious metal in 1851 and the year immediately following that brought about a constant stream of immigration, and caused an increase in population from 221,000 at the end of 1841 to upwards of 1,168,000 at the end of 1861.

2. *Extent of Mineral Wealth.*—The extent of the total mineral wealth of Australia cannot yet be regarded as completely ascertained, as large areas of country still await systematic prospecting. The presence of considerable deposits of valuable minerals has long been known. Thus, coal was discovered in 1797, and a shipload was exported to Bengal in 1799; silver was discovered by Count Strzelecki as early as 1839, and was worked as early as 1864; copper mining dates back to 1844; lead to about 1848; iron to about 1850; while the discovery of gold in payable quantities dates back to 1851. Cobalt, nickel, manganese, chromium, tungsten, molybdenum, mercury, antimony, bismuth, zinc, radio-active ores, etc., have all been found, some in fairly large quantities.

Among the more valuable non-metalliferous substances may be mentioned coke, kerosene shale, graphite, alunite, asbestos, diatomaceous earth, clays, ochres, etc.; in building stones: sandstones, syenites, granites, basalts, augite-andesite, porphyries, serpentines, slates, limestones, and marbles; in precious stones: diamonds, emeralds, rubies, sapphires, amethysts, precious opal, turquoise, topazes, garnets, chrysolites, cairngorm, agates, etc. In general, it may be said that the variety of Australian mineral wealth is very great.

3. *Quantity and Value of Production during 1919.*—The value of production from the mineral industry in 1919 shewed a decline of nearly £6,500,000 on that for the preceding year. In New South Wales, where there was a falling-off amounting to upwards of £4,000,000, the lessened output was chiefly due to the cessation of operations early in the year at the Broken Hill mines, and in part to the dry conditions prevailing over a large area of the State. The yield from copper in all the copper-producing States was also responsible for a diminution in the totals. This was especially the case in regard to Queensland and South Australia, where decreases of £1,135,000 and £600,000 respectively were recorded, the production from copper in the former State shewing a decline from over £2,000,000 to about £952,000, and in the latter from £828,000 to £229,000. Production in South Australia was to some extent hampered by shortage of fuel, the result of industrial troubles in other States.

The table hereunder and the succeeding one shew respectively the quantity of the various minerals produced during 1919 in each State, and the values apportioned thereto in the form in which the items were reported to the Mines Departments. The quantities and values given represent the amounts which the Departments consider may fairly be taken as accruing to the mineral industry as such. Thus, the item pig iron in New South Wales represents metal produced from locally raised ore only and so reported to the Mines Department. South Australia, as the table shews,

receives credit for ironstone in the crude stage, but the quantity and value of the pig iron produced therefrom in New South Wales cannot be taken as a product of the New South Wales mineral industry. Similarly lead, silver-lead, and zinc are credited in the form reported to the State of origin—chiefly New South Wales—although the actual metal extraction is carried out to a large extent elsewhere. Information in regard to the quantity of metal extracted at the various smelting and refining works in the Commonwealth, together with that contained (estimated) in the ores, concentrates, &c., exported or sold for export, is given in §18 hereinafter.

Unenumerated ..	212,010	1,453	4,951	15,961	590	40,774	150	275,889
Total ..	9,652,101	1,151,980	2,575,225	774,764	4,191,973	1,307,692	71,697	19,725,432

(a) Included with metal. (b) Not available for publication. (c) Year ended 30th June, 1919.
 (d) Portion of the limestone raised was used in the manufacture of lime and cement. (e) See
 letterpress § 3.

It may be pointed out in connexion with the figures given in the above table that the totals are exclusive of returns relating to certain commodities, such as stone for building and industrial uses, sand, gravel, brick and pottery clays, lime, cement, and slates, which might rightly be included under the generic term "mineral." Valuations of the production of some of these may be obtained from the reports of the various Mines Departments, but in regard to others it is impossible to obtain adequate information. In some instances, moreover, the published information is of little value. By restricting the comparison to items in connexion with which properly comparable information can be obtained for each State, it is believed that a satisfactory estimate of the progress of the mineral industry can be more readily obtained. The items excluded from the total for New South Wales in 1919 consist of—lime, £57,411; marble, £3,151; Portland cement, £379,896, and brick and pottery clays in the "unenumerated" class. Sulphuric acid to the value of £190,249 was produced in New South Wales in 1919. For South Australia the principal items in the unenumerated class are flint pebbles, £4,809; and barytes, £5,264; while the sulphur contents of the copper ores were valued at £3,105. The unenumerated class in Tasmania includes osmiridium to the value of £39,614.

4. **Total Production to end of 1919.**—In the next table will be found the estimated value of the total mineral production in each State up to the end of 1919. The figures given in this table are also exclusive of the same items referred to in connexion with the preceding table. Thus the total for New South Wales falls short by £6,569,000 of that published by the State Department of Mines, the principal items excluded being cement, £4,657,000; lime, £591,000; and marble, £38,000.

COMMONWEALTH MINERAL PRODUCTION TO END OF 1919.

(a) To 30th June, 1919.

The "other" minerals in New South Wales include alunite, £190,981; antimony, £341,183; bismuth, £189,042; chrome, £108,211; coke, £5,000,555; diamonds, £133,987; limestone flux, £854,638; molybdenite, £205,565; opal, £1,474,584; scheelite, £188,570; and oil shale, £2,502,413. In the Victorian returns antimony ore was responsible for £534,927. Included in "other" in the Queensland production were opal, £179,195; gems, other, £389,771; bismuth, £303,442; molybdenite, £336,801; and limestone flux, £561,631. The chief items in South Australian "other" minerals were salt, £1,117,297; and limestone flux, £201,548. Considerable values from gypsum and rock phosphates are also included. In the Tasmanian returns limestone flux was responsible for £91,739, and osmiridium for £122,377, while the figures for recent years include values for iron pyrites.

It will be convenient in the succeeding pages to deal first with gold and the various metals, then with non-metallic minerals and precious stones, and finally to furnish some account of the extent of employment in mining generally.

(A) METALLIC MINERALS.

§ 2. Gold.

1. **Discovery of Gold in Various States.**—The discovery of gold in payable quantities was an epoch-making event in Australian history, for, as one writer aptly phrases it, this event "precipitated Australia into nationhood." A more or less detailed account of the finding of gold in the various States appears under this section in Official Year Books Nos. 1 to 4, but considerations of space preclude its repetition in the present issue.

2. **Production of Gold at Various Periods.**—In the following table will be found the value of the gold raised each year in the several States and in the Commonwealth from the dates when payable discoveries were first reported. Owing to defective information in the earlier years the figures fall considerably short of the actual totals, for during the first stages of mining development, large quantities of gold were taken out of Australia by successful diggers, who preferred to keep the amount of their wealth secret. For South Australia the records in the earlier years are somewhat irregular, and this remark applies to some extent also to the returns for Western Australia and Tasmania.

In New South Wales the yield for 1919 was about 21,000 ozs. lower than in 1918, and was the lowest recorded since 1851. In Victoria the yield for 1919 shewed a decrease of 23,000 ozs. fine on that for the preceding year. In Queensland the yield in 1919 was over 12,000 ozs. less than in the preceding year. As in the case in other States where there is a diminishing production, the decline is due to the gradual depletion of the mines in the principal fields. The returns for South Australia for 1919 shew a decrease of nearly 3,000 ozs. on the previous year's output. For Western Australia the figures shew a decrease of over 142,000 ozs. in 1919, as compared

with 1918, diminished returns being recorded in the outputs from all the fields except Kimberley, Peak Hill, Yalgoo, Mount Margaret, Broad Arrow, and North-East Coolgardie. For Tasmania there was a decline of nearly 3,000 ozs.

VALUE OF GOLD RAISED IN AUSTRALIA, 1851 TO 1919.

(a) Mines Department estimate of gold production to 1871. (b) Including gold dust to the value of £3,920 exported in 1850. (c) Not available. (d) Estimate prior to 17th August, 1880. (e) 17th August to 31st December, 1880. (f) 1st January to 30th June. (g) Year ended 30th June.

The amount of gold raised in the Commonwealth in any one year attained its maximum in 1903, in which year Western Australia also reached its highest point. For the other States of the Commonwealth the years in which the greatest yields were obtained were as follows:—New South Wales, 1852; Victoria, 1856; Queensland, 1900; South Australia, 1904, and Tasmania, 1899.

The following table shews the quantity in fine ounces of gold raised in each State and in the Commonwealth during each of the last ten years, the value of one ounce fine being taken at £4 4s. 11½d., except in 1919, when it was taken as £5 2s. 1½d.:—

(a) 1st January to 30th June.

(b) Year ended 30th June.

3. Changes in Relative Positions of States as Gold Producers.—A glance at the figures in the table shewing the value of gold raised will sufficiently explain the enormous increase in the population of Victoria during the period 1851 to 1861, when an average of over 40,000 persons reached the State each year. With the exception of the year 1889, when its output was surpassed by that of Queensland, Victoria maintained its position as the chief gold-producer for a period of forty-seven years, or up to 1898, when its production was outstripped by that of Western Australia, the latter State from this year onward contributing practically half, and so far as recent years are concerned more than half the entire yield of the Commonwealth. New South Wales occupied the second place on the list until 1874, when Queensland returns exceeded those of the parent State, a condition of things that has been maintained ever since. South Australia has occupied the position of lowest contributor to the total gold yield of the Commonwealth since the year 1871. Taking the average of the last ten years, the relative position of each State in regard to the gold production of the Commonwealth was as follows:—

RELATIVE POSITION OF STATES AS GOLD PRODUCERS, 1910 TO 1919.

State.	Annual Average of Gold Production, 1910 to 1919.	Percentage on Commonwealth.	State.	Annual Average of Gold Production, 1910 to 1919.	Percentage on Commonwealth.
	Ozs.			Ozs.	
Commonwealth ..	1,920,349	100·0	New South Wales ..	128,513	6·7
Western Australia ..	1,152,359	60·0	Tasmania ..	23,281	1·2
Victoria ..	348,450	18·2	South Australia ..	5,991	0·3
Queensland ..	258,949	13·5	Northern Territory	2,806	0·1

4. Methods of Gold Mining adopted in Each State.—(i) *New South Wales.* In New South Wales the earlier “rushes” were to surface alluvial or shallow-sinking grounds. Many of these were apparently soon worked out, but there is reason to believe that in some instances payable results would be obtained by treating the rejected wash-dirt on more scientific principles. With the exhaustion of the surface deposits discoveries were made by sinking to what are called deep alluvial leads, representing the beds of old drainage channels in Pliocene and Pleistocene times. The first of these deep alluvial leads

was discovered at Forbes, in New South Wales, in 1862. The Tertiary deep leads at Gulgong were discovered in 1871. Cretaceous leads occur at Tibooburra, and detrital gold has been found in permo-carboniferous conglomerates at Tallawang. The method of dredging is at present being extensively used for winning gold from the beds of running streams, and from loose river flats and other wet ground where sinking would be impracticable. The system was introduced from New Zealand, where it was originally applied with great success on the Clutha River, and practically all the auriferous rivers of New South Wales have been worked by dredges. Hydraulic sluicing is employed also in several places, the necessary machinery being fitted to a pontoon for convenience in moving from place to place. The quantity of alluvial gold obtained, other than by dredging, amounted to 1,899 ozs. in 1919, the chief yields being—Peak Hill, 248 ozs.; Hill End, 243 ozs.; Windeyer, 140 ozs.; Major's Creek, 122 ozs.; Sofala, 158 ozs.; Mudgee, 150 ozs.; and Mt. McDonald, 100 ozs. The quantity obtained by dredging was 21,050 ozs.; the largest returns being obtained at Araluen, 3,172 ozs.; Adelong, 8,023 ozs.; and Gundagai, 7,851 ozs. The dredges in operation during 1919 numbered 77, of which 16 were of the bucket type and 61 were suction plants. In the recovery of gold 14 bucket dredges and 1 pumping plant were employed, while 2 bucket dredges and 60 pumping plants were engaged in the winning of stream tin. The value of the plants in operation was estimated at £416,459. The quantity of gold won from quartz amounted to 23,086 ozs. At the present time the Cobar district is the chief centre of the production from quartz, the yields from the Cobar and Canbelego fields included therein being respectively 1,403 ozs. and 5,928 ozs. Next come the Hillgrove field with 4,345 ozs.; Hill End, 3,400 ozs.; and Gundagai, 1,567 ozs.

The table below shews as far as can be ascertained the yield from alluvial and quartz mining in each of the principal districts during 1919. Owing to the circumstance that it was impossible to obtain complete returns from all the mine and battery owners the total for the State necessarily falls short of that given in preceding pages.

GOLD WON IN NEW SOUTH WALES, ALLUVIAL AND QUARTZ, 1919.

District.	Alluvial.		Quartz.	Total.
	Other than by Dredging.	By Dredging.		
	Ozs.	Ozs.	Ozs.	Ozs.

Total	1,899	19,273	23,086	44,258

(ii) *Victoria.* Lode mining predominates in Victoria, although gold is also obtained from alluvial workings, both surface and deep leads. The deepest mines in Australia are found in the Bendigo district, where there are two shafts 4,614 and 4,318 feet deep respectively. Altogether there were some few years ago no less than fifty-three shafts in this district which had reached a depth of over 2,000 feet. A considerable amount of attention is given to dredging and hydraulic sluicing, particularly in the Beechworth, Maryborough, Castlemaine, Ararat, Stawell, Gippsland, and Ballarat districts, the number of plants in operation at the end of 1919 being 56, of which 16

were bucket dredges, 7 pumps, 27 jet elevators, and 6 sluicing by gravitation. The total quantity of gold won by dredging and sluicing in 1919 was 24,540 ozs. Tin to the value of £16,456 was also won. The yields from alluvial workings and quartz reefs, as returned (in crude ounces) from the chief mining districts of the State during last year, were as follows :—

GOLD WON IN VICTORIA, ALLUVIAL AND QUARTZ, 1919.

District.	Alluvial.	Quartz.	Total.
	Ozs.	Ozs.	Ozs.
Ararat and Stawell	3,864	5,174	9,038
Ballarat	4,356	3,583	7,939
Beechworth	22,983	7,962	30,945
Bendigo	826	63,823	64,649
Castlemaine	6,543	9,857	16,400
Gippsland	3,126	3,364	6,490
Maryborough	4,964	604	5,568
Total	46,662	94,367	141,029

The largest output from lode mines in 1919 was furnished by the Constellation (Bendigo) with 16,390 ozs., followed by the Carlisle and Great Northern in the same area, which yielded respectively 5,242 and 4,884 ozs. It was hoped that the consolidation of the mines in the "Central area" at Bendigo would result in a more extended treatment of the low-grade ore. No great development, has, however, taken place in this direction, and the success of the Bendigo Amalgamated Goldfields Co. which controls and works nearly all the mines has been due to the high-grade quartz raised from the Constellation mine, where 14,772 tons gave a yield of 16,390 ozs. Of the deep alluvial mines the Chiltern Valley (Beechworth) produced 4,158 ozs. In dredging, Cock's Pioneer, at Beechworth, was the most successful, with 7,593 ozs. Tin ore to the value of upwards of £15,000 was also won by this company.

(iii) *Queensland.* Operations in Queensland are at present chiefly confined to reefing, and to the production of gold in connexion with the smelting of copper and other ores, the yield from alluvial in 1919 being only 376 ozs., while the quantity produced from stone treated was 28,627 ozs.; from copper and other ores 90,981 ozs.; and from old tailings 1,046 ozs.; making a total production of 121,030 ozs. The yields from the principal fields are given below :—

GOLD WON IN QUEENSLAND, ALLUVIAL AND QUARTZ, 1919.

District.	Alluvial.	From Stone Treated.	From Copper and other Ores and old Tailings.	Total.
	Fine ozs.	Fine ozs.	Fine ozs.	Fine ozs.
Charters Towers	25	8,070	..	8,095
Gympie	14,204	335	14,539
Mount Morgan	23	104	89,778	89,905
Ravenswood	9	451	15	475
Croydon	670	670
Etheridge, Oaks and Woolgar	75	1,955	4	2,034
Cloncurry	969	969
Gladstone	58	65	202	325
Clermont	36	1,575	..	1,611
Chillagoe	1,638	..	1,638
Mount Peter	388	..	388
Other districts	150	177	54	381
Total	376	28,627	92,027	121,030

As shewn in the table the Mount Morgan field easily takes first place amongst Queensland gold-producing areas. During 1919 this field also produced copper to the value of over £506,000.

(iv) *South Australia.* In South Australia alluvial gold has been worked for many years in the gullies round Adelaide, while a fair amount of gold has been obtained by this method at Teetulpa, in the northern area. The battery and cyanide returns as published in the *Mining Review* shew that the chief producing centres in 1919 were Deloraine and Tarcoola.

(v) *Western Australia.* The auriferous deposits of Western Australia may be grouped under three headings—(1) superficial deposits, (2) deposits in beds of conglomerate, and (3) lode and vein deposits. The first class includes a number of deposits of alluvial type, either in the beds of existing watercourses or in deep leads, up to 100 feet or more below present surface level. Associated with these are deposits of crystalline gold in “pug,” oxide of iron, and soft weathered portions of underlying bed rock. Considerable areas of auriferous surface soil are also found, and these have apparently originated from the denudation by weathering of the bed rock and its associated veins. The shallow surface deposits have been worked by ground sluicing wherever water was available, but most of the ground has been worked by “dry-blowing.” The pug and clayey bedrock are usually treated in puddling machines. In regard to (2) it may be noted that in several localities on the Pilbara goldfield and in one on the Yalgoo, gold has been found in conglomerate of the Nullagine series of rocks, now tentatively accepted as of Cambrian age. The gold is crystalline and is confined to the interstitial cementing material. Occasional occurrences of gold are met with in laterite conglomerate of tertiary and post tertiary age, and at Kintore in conglomerate of the same age. Lode and vein deposits alluded to in (3) are found in great variety in Western Australia. The gold is always found associated with iron pyrites in the unoxidised portions of the lodes, and often also with copper pyrites, arsenical pyrites and galena. Tellurides of gold occur at times. The principal auriferous rocks are of very great geological age, most probably pre-Cambrian, and possibly Archæan, and have all been subjected to intense metamorphism. It is found that the rich veins are not restricted to any one particular description of rock—granite, quartz, porphyry, quartz dolerite, diorite, &c., and even metamorphic sedimentary country rock, have been found to carry them in various parts of the State. The total production of gold from all sources during 1919 was 734,066 ounces, of which only about 0.1 per cent. was alluvial. The yields in each district were as shewn below:—

GOLD WON IN WESTERN AUSTRALIA, ALLUVIAL, QUARTZ, ETC., 1919.

Goldfields.	Alluvial.	Dolled and Specimens.	Crushed.	Total.
	Fine ozs.	Fine ozs.	Fine ozs.	Fine ozs.

Kimberley	151	151
Other goldfields	46	..	46
Total	991	5,739	681,484	688,214

The figures in the previous table are compiled from returns from the individual mines, and are somewhat incomplete; the total is therefore less than that shewn on page 341, which represents mint and export returns.

(vi) *Tasmania.* The yield from Tasmania in gold mining is chiefly obtained from quartz reefing, and the returns from each district in 1919 are given below:—

GOLD WON IN TASMANIA, 1919.

District.	Total.	District.	Total.
	Ozs.		Ozs.
Beaconsfield	572	Lisle	110
Mathinna	1,529	Golconda	
Mt. Victoria	376	Mt. Claude	
Warrentinna		North-West and West Coasts	5,466
Mt. Cameron			
Lefroy	3	Total	8,157

The total production was equal to 7,686 ozs. fine. During 1919 the blister copper produced by the Mt. Lyell Mining and Railway Co. Ltd. contained approximately 5,251 ozs. of gold.

(vii) *Northern Territory.*—The principal yields in 1919 were returned from Bridge Creek, 545 ozs., and Ambrookville, 317 ozs. Small quantities were produced also at Fletcher's Gully and Tanami.

5. *Remarkable Masses of Gold.*—Allusion has already been made in preceding Year Books to the discovery of "nuggets" and other remarkable masses of gold, but it is not proposed to repeat this information in the present issue. (See Year Book No. 4, page 500.)

6. *Modes of Occurrence of Gold in Australia.*—This subject has been alluded to at some length in preceding issues of the Year Book, but considerations of space will not permit of repetition in the present issue.

7. *Place of the Commonwealth in the World's Gold Production.*—In the table given below will be found the estimated value of the world's gold production, and the share of the Commonwealth therein during the ten years 1910 to 1919. The figures given in the table have been compiled chiefly from returns obtained directly by the Commonwealth Bureau of Census and Statistics from the gold-producing countries of the world.

WORLD'S GOLD PRODUCTION, 1910 TO 1919.

Year.	World's Production of Gold.	Gold Produced in Commonwealth.	Percentage of Commonwealth on Total.
	£	£	%
1910	93,341,573	11,557,650	12.38
1911	95,541,042	10,551,624	11.04
1912	96,854,583	9,879,928	10.20
1913	93,102,674	9,376,573	10.07
1914	91,300,350	8,728,946	9.56
1915	95,711,619	8,269,938	8.64
1916	92,568,926	7,075,980	7.64
1917	88,526,271	6,185,410	6.99
1918	77,530,366	5,408,157	6.98
1919	93,804,949	5,454,806	5.82

While the production of gold in the Commonwealth shews a considerable decrease during the twenty years from 1897 to 1919, the world's total production increased by over 94 per cent. in the same period. The following table will be found interesting as shewing the various foreign countries where the chief increases have taken place during the interval in question:—

GOLD YIELD, VARIOUS COUNTRIES, 1897 TO 1919.

Country.	1897.	1900.	1917.	1918.	1919.
	£	£	£	£	£
United States ..	11,787,000	16,269,000	16,912,000	13,841,000	14,905,000
Canada ..	1,240,000	5,742,000	3,138,000	2,972,000	3,916,000
Costa Rica ..	2,000	31,000	200,000	161,000	179,000
Colombia ..	9.	..	1,031,000	958,000	4,021,000
Transvaal ..	11,654,000	1,481,000	38,306,000	35,759,000	42,548,000
Rhodesia ..	800	308,000	3,544,000	2,682,000	3,030,000
Gold Coast ..	85,000	38,000	1,549,000	1,338,000	1,508,000
Madagascar ..	8,500	142,000	126,000	88,000	92,000
India ..	1,571,000	1,893,000	2,222,000	2,060,000	1,504,000
Corea ..	208,000	371,000	691,000	604,000	604,000 ^a
Japan ..	142,000	290,000	1,185,000	1,159,000	1,159,000 ^a
Netherlands East Indies	24,000	112,000	529,000	431,000	392,000

(a) 1918 figures.

The largest increase amongst the more important producing countries was recorded in the Transvaal, where the production was nearly four times as great in 1919 as in 1897. During the last three years, however, as the table shews, there has been a general decline, except in Canada, Colombia, and Transvaal.

The next table shews the average yearly value in order of importance of the yield in the chief gold producing countries for the decennium 1910–19.

AVERAGE ANNUAL VALUE, GOLD YIELD, CHIEF PRODUCING COUNTRIES. 1910 TO 1919.

Country.	Value.	Country.	Value.
	£		£
Transvaal ..	37,346,000	Canada ..	3,128,000
United States ..	18,091,000	India ..	2,260,000
Australasia ..	9,584,000	Gold Coast ..	1,450,000
Commonwealth ..	8,249,000	Colombia ..	1,287,000
Russia ..	5,082,000	New Zealand ..	1,286,000
Mexico ..	3,499,000	Japan ..	1,098,000
Rhodesia ..	3,165,000		

The comparison has been restricted to countries where the average for the period is in excess of a million sterling.

8. Employment in Gold Mining.—The number of persons engaged in gold mining in each State in 1901 and during each of the last five years is shewn in the following table:—

PERSONS EMPLOYED IN GOLD MINING, 1901 AND 1915 TO 1919.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Nor. Ter.	C'wealth.
	No.	No.	No.	No.	No.	No.	No.	No.

1917 ..	1,823	6,069	1,375	150	8,752	155	92	18,416
1918 ..	2,540	3,547	929	100	7,790	125	84	15,115
1919 ..	1,656	3,065	792	100	7,242	73	60	12,988

§ 3. Platinum and the Platinoid Metals.

Platinum.—(i) *New South Wales.* The existence of platinum was first noted in New South Wales in 1851 by Mr. S. Stutchbury, who found a small quantity near Orange. Since the year 1878 small quantities of the metal have been obtained from beach sands in the northern coastal district. Platiniferous ore was noted in 1889 at Broken Hill. The principal deposits at present worked in the State are situated at Platina in the Fifield division, near Parkes, and the production in 1919 amounted to 213 ozs., valued at £3,150, while the total production recorded for the period 1894–1919 amounted to 14,893 ozs., valued at £47,734. The production in 1919 was only about a third of that in the preceding year, the falling-off being due to lack of water for treating the wash-dirt.

At Platina, gold is found in association with the platinum, and it is estimated that there are 200 acres of metalliferous country sufficiently rich to yield a satisfactory return, provided it were worked on a large scale with an abundant water supply. Small quantities of the metal are obtained in beach mining in the Ballina Division.

(ii) *Victoria.* In Gippsland, Victoria, the metal has been found in association with copper. The production of platinum in 1913 amounted to 127 ozs., and was contained in matte produced by the Gippsland Copper, Platinum, and Gold Mining and Smelting Company, from ores raised from the old mine at Cooper's Creek. There was no production during the last six years.

(iii) *Queensland.* Platinum associated with osmiridium has been found in the beach sands between Southport and Currumbin, in creeks on the Russell goldfield near Innisfail, and in alluvial deposits on the Gympie goldfield.

2. Osmium, Iridium, etc. (i) *New South Wales.* Small quantities of osmium, iridium, and rhodium are found in various localities. As far back as 1860, the Rev. W. B. Clarke stated that he found native iridium. Platinum, associated with iridium and osmium, has been found in the washings from the Aberfoil River, about 15 miles from Oban; on the beach sands of the northern coast; in the gem sand at Bingara, Mudgee, Bathurst, and other places. In some cases, as for example in the beach sands of Ballina, the osmiridium and other platinoid metals amount to as much as 40 per cent. of the platinum, or about 28 per cent. of the whole metallic content.

(ii) *Victoria.* In Victoria, iridosmine has been found near Foster, and at Waratah Range, South Gippsland.

(iii) *Tasmania.* For many years osmiridium has been known to exist in the bed of the Savage River, on the West Coast, and in rivulets and creeks in the serpentine country, but it was not until early in 1911 that efforts were made to work the deposits. During that year the price paid for the mineral reached £7 10s. per oz., and about 100 men were engaged in the search for it. The quantity produced amounted to 271 ozs., valued at £1,188. In 1912 the production was 779 ozs., valued at £5,742, or an average of £7 7s. 9d. per oz. The yield in 1918 amounted to 1,607 ozs., valued at £44,833, and in 1919 to 1,670 ozs., valued at £39,614. During 1919 the metal won was obtained from the Savage River, Mt. Stewart, and Wilson River districts. Small quantities also are being obtained in the Dundas district. Owing to the war the market in 1914 was for a time closed, but a parcel of 13 ozs. forwarded to America was sold at an average of £5 13s. 6d. per oz. The declining production in 1915 and 1916 was due to difficulty in disposing of the metal. In 1917 the price increased from £11 to £18 10s. per oz., and for selected parcels £22 10s. per oz. was paid, while in 1918 the remarkable price of £37 5s. per oz. was reached. The average price in 1919 was £23 14s. 5d. per oz. Besides a steady and increasing use in the manufacture of fountain pens there is a demand for iridium and osmiridium for hard platinum jewellery.

§ 4. Silver.

1. Occurrence in Each State.—Particulars regarding the occurrence of silver in each State will be found in preceding Year Books, Nos. 1 to 5, but considerations of space preclude the repetition of this matter in the present volume.

2. Development of Silver Mining.—In illustration of the development of silver mining in Australia the following table has been compiled, shewing the production of silver, silver-lead and ore, and lead from each State during the years 1881, 1891, 1901, and the five years ending 1919 :—

PRODUCTION OF SILVER AND LEAD, AUSTRALIA, 1881 TO 1919.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Nor. Ter.	C'wealth.
	£	£	£	£	£	£	£	£
1881 ..	14,651	5,021	13,494	1,182	11,224	50	..	45,622
1891 ..	3,621,614	6,277	50,000	1,787	250	52,284	4,140	3,736,352

1919 ..	1,647,878	1,607	28,511	180	107,508	189,967	(b) 132	1,975,783

(a) 1st January to 30th June.

(b) Year ended 30th June.

The heavy falling-off in the production for 1919 as compared with previous years was due to the suspension of operations owing to industrial troubles at the principal mines on the Broken Hill field.

It must be understood that the totals for New South Wales in the above table represent the *net* value of the product (excluding zinc) of the silver-lead mines of the State. In explanation of the values thus given, it may be noted that the metallic contents of the larger portion of the output from the silver-lead mines in the State are extracted outside New South Wales, and the Mines Department considered, therefore, that the State should not take full credit for the finished product. Hence the *net* value referred to above relates to that of the ore, concentrates, and bullion, as declared by the several companies to the Customs Department at date of export. The real importance of the State as a producer of silver, lead, and zinc is thus to some extent lost sight of. The next table, however, which indicates the quantity of these metals locally produced, and the contents by average assay of concentrates exported during the last five years, will shew, as regards New South Wales, the estimated total production and the value accruing to the Commonwealth from the three metals :—

TOTAL PRODUCTION FROM SILVER-LEAD MINES OF NEW SOUTH WALES, 1915 TO 1919.

Year.	Metal Produced within Australia.				Contents of Concentrates exported.			
	Silver.	Lead.	Zinc.	Value.	Silver.	Lead.	Zinc.	Value.
	ozs. fine.	tons.	tons.	£	ozs. fine.	tons.	tons.	£
1915 ..	5,302,199	101,090	5,308	3,267,736	1,710,058	9,819	71,049	1,051,849
1916 ..	6,382,518	128,438	5,277	5,238,276	1,725,374	10,428	69,141	1,139,607
1917 ..	7,562,236	138,006	4,694	5,765,094	983,693	6,181	43,912	668,934
1918 ..	8,724,018	155,306	5,622	6,744,034	536,943	3,178	21,926	232,210
1919 ..	5,886,947	80,175	(a) 7,119	4,109,466	417,871	2,425	18,146	253,751

(a) Including 169 tons of Zinc Oxide valued at £8,112.

The figures given above are quoted on the authority of the Mines Department of New South Wales, which in the year 1918 amended the totals for silver previously published for the years 1915–17, while in 1919 considerable modifications were made in the figures relating to quantity and value of concentrates exported.

3. **Chief Centres of Silver Production.**—Broken Hill, in New South Wales, is the great centre of silver production in Australia.

(i) *New South Wales.* (a) *Broken Hill.* A description of the silver-bearing area in this district is given in earlier issues of the Year Book. During 1913 the output of ore from the mines in this division amounted to 1,744,000 tons, the highest recorded in the history of the field, but owing to the dislocation caused by the war the quantity raised in 1914 decreased to 1,442,000 tons. For the four years 1915-8 the ore raised averaged over 1,200,000 tons, but, owing to the cessation of operations through industrial troubles the production in 1919 dwindled to 415,400 tons.

Although the returns are not complete in all cases, the following table relating to the mines at Broken Hill will give some idea of the richness of the field :—

RETURNS OF BROKEN HILL SILVER MINES TO END OF 1919.

Mine.	Authorised Capital.	Value of Output to end of 1919.	Dividends and Bonuses Paid to end of 1919.
	£	£	£
Broken Hill Proprietary Co. Ltd. ..	3,000,000	(a)48,194,848	11,865,887
Broken Hill Proprietary Block 14 Co. Ltd. ..	155,000	3,878,183	622,660
British Broken Hill Proprietary Co. Ltd. ..	339,000	4,779,254	821,280
Broken Hill Proprietary Block 10 Co. Ltd. ..	1,000,000	4,885,102	1,407,500
Sulphide Corporation Ltd. (Central Mine) ..	1,050,000	(b)20,608,024	2,709,375
Broken Hill South Silver Mining Co. ..	800,000	10,050,501	2,535,000
North Broken Hill Mining Co. Ltd. ..	600,000	6,495,775	1,978,940
Broken Hill Junction Lead Mining Co. ..	150,000	1,143,723	87,500
Junction North Broken Hill Mine ..	375,000	2,631,520	152,735
The Zinc Corporation Ltd. ..	(c)	2,973,102	10,000
Barrier South Ltd. ..	168,000	151,517	50,000
Totals	7,637,000	(b)105,791,549	22,240,877

(a) The value of the ores purchased during the years 1908 to 1914 is not included. understated owing to incomplete returns.

(b) Output (c) Not available.

The returns relating to dividends and bonuses paid are exclusive of £1,744,000 representing the nominal value of shares in Block 14, British, and Block 10 companies, allotted to shareholders of Broken Hill Proprietary Company.

(b) *Yerranderie.* The mines in the Yerranderie division in the Southern Mining District produced 286,955 ozs. of silver in 1919, besides 714 ozs. of gold, and 861 tons of lead, the total production being valued at £78,528.

(c) *Cobar.* A considerable quantity of silver is obtained from the Great Cobar Mine and attached properties, the production in 1914 amounting to 24,305 ozs. Owing to the dislocation of the industry caused by the war the yield in 1915 fell to 1,838 ozs., but it rose again in 1916 to nearly 48,000 ozs., and in 1918 to 98,000 ozs. In 1919, however, the return fell to 18,000 ozs.

(d) *Sunny Corner.* In this division of the Bathurst Mining District 60,000 ozs. of silver, valued at £12,050, were produced during 1919.

(e) *Orange Division.* From the Lewis Ponds mine in this division of the Bathurst Mining District ore containing about 29,000 ozs. of silver, valued at £6,000, was raised in 1919.

(f) *Other Areas.* Small quantities were produced during the year in the Condobolin division of the Lachlan District, in the Hillgrove and Tingha divisions of the Peel and Uralla Mining District, from Leadville in the Mudgee division, from the Tumbarumba area in the Tumut and Adelong District, and in the New England Mining District.

(ii) *Tasmania.* The silver produced in 1919 amounted to 525,343 ozs., valued at £125,564, and the lead to 2,357 tons, valued at £64,403. The principal producers of

silver were the Magnet Mines, with a yield of 98,625 ozs.; the Zeehan Mines, 73,919 ozs.; Mt. Claude, 51,994 ozs.; and Mt. Farrell, 42,960 ozs. Lead to the amount of 808 tons was produced by the Zeehan Mines; 528 tons by the Magnet Mines; 447 tons by the North Mt. Farrell, and 365 tons by the Mt. Claude Mines.

(iii) *Queensland.* The yield for the chief silver-producing centres in 1919 was as follows:—Cloncurry, silver £3,947; Etheridge, silver £1,258, lead £2,030; Mt. Morgan, silver £5,606; Herberton, silver £5,175; Stanthorpe, silver £1,176. Towards the end of the year 1918 a discovery of argentiferous lead ore was made at Indooroopilly, one of the suburbs of Brisbane. This deposit yielded 60 tons of lead, valued at £2,117, and 10,082 ozs. of silver, valued at £2,604.

(iv) *South Australia.* Rich specimens of silver ore have been discovered at Miltalie and Poonana, in the Franklin Harbour district, also at Mount Malvern and Olivaster, near Rapid Bay, and in the vicinity of Blinman and Farina. The surrounding district is highly mineralized, but, so far, has not been thoroughly prospected. The production of silver in 1919 was practically negligible.

(v) *Western Australia.* The quantity of silver obtained as a by-product and exported in 1919 was 223,332 ozs., valued at £55,342. In addition, lead and silver-lead to the value of £3,704, and 1,780 tons of pig lead, valued at £48,462, were exported.

(vi) *Northern Territory.* Silver-lead ores are found near Pine Creek, and at Mount Shoebridge near Brook's Creek railway station. Production in 1919 was small, amounting to a little over 12 tons, valued at £132.

4. *World's Production of Silver.*—The world's production of silver during the last ten years for which particulars are available is estimated to have been as follows:—

WORLD'S PRODUCTION OF SILVER, 1910 TO 1919.

Year	1910.	1911.	1912.	1913.	1914.	1915.	1916.	1917.	1918.	1919.
World's production in 1,000 fine ozs. (a)	240,223	254,214	250,979	214,391	171,429	185,443	163,693	174,188	197,394	174,517 (b)

(a) Add 000 to figures for fine ounces.

(b) Incomplete.

The Commonwealth's share in the world's silver production in 1919 was estimated at 7,000,000 ounces, or about 4 per cent. on the total production, as compared with 11,000,000 ounces, or about 6 per cent of the total in 1918, the falling-off being due to the lessened production from the Broken Hill field resultant on industrial disturbances. The figures, for the last three years which are given on the authority of *The Mineral Industry*, have been considerably amended since the last issue.

According to returns furnished by the secretary of the Australian Metal Exchange silver to the amount of 6,685,000 ozs. was extracted in Australia during 1919, while concentrates exported or sold for export were estimated to contain 1,162,000 ozs.

5. *Prices of Silver.*—As the production of silver is dependent to a very large extent on the price realised, a statement of the average price per standard ounce in the London market at various periods and during the last seven years is given below:—

PRICE OF SILVER, 1881 TO 1919.

Year	1881.	1891.	1901.	1911.	1914.	1915.	1916.	1917.	1918.	1919.
Pence per standard oz. ..	51 $\frac{1}{2}$	45 $\frac{1}{4}$	27 $\frac{1}{8}$	24 $\frac{1}{8}$	25 $\frac{1}{8}$	23 $\frac{1}{4}$	31 $\frac{1}{8}$	40 $\frac{1}{4}$	47 $\frac{1}{4}$	57 $\frac{1}{4}$

During the month of November, 1906, owing to the small sales in New York, and also to the fact that the Indian, American, and Mexican Governments were all buying silver, the price rose to 33½d., the highest realised since 1893, when the average stood at 36 $\frac{1}{8}$ d. The high average in 1917 was succeeded by a further rise to 47½d. in 1918, the monthly averages ranging from 43.2d. in March to 49½d. in September and October. Prices in 1919 shewed a sensational rise. Beginning with an average of about 48d. per ounce during each of the first four months of the year, prices rose rapidly until in September the high average of 61.7d. was reached, followed by 64d. in October, 70d. in November, and 76½d. in December.

6. **Employment in Silver Mining.**—The number of persons employed in silver mining in 1901 and during each of the last five years is given below :—

NUMBER OF PERSONS EMPLOYED IN SILVER MINING, 1901 AND 1915 TO 1919.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Nor. Terr.	C'wealth.
	No.	No.	No.	No.	No.	No.	No.	No.
1901 ..	6,298	..	40	150	..	2,414(a)	(b)	8,902(c)
1915 ..	5,564	..	49	25	70	519	86	6,313
1916 ..	6,461	..	62	25	(d)244	555	86	7,433
1917 ..	7,619	..	71	..	(d)328	646	33	8,697
1918 ..	7,585	..	98	..	(d)382	631	10	8,706
1919 ..	6,556	..	145	..	74	798	3	7,576

(a) Including copper miners. (b) Included in South Australia. (c) Including copper miners in Tasmania. (d) Lead ore.

As the table shews, the bulk of the employment was in New South Wales and Tasmania, the quantity of silver raised in the other States, excepting Queensland, being unimportant.

§ 5. Copper.

1. **Production of Copper.**—The production of copper in the various States of the Commonwealth has been influenced considerably by the ruling prices, which have undergone extraordinary fluctuations. The quantity and value of the local production as reported and credited to the mineral industry in earlier years and for 1915 to 1919 are shewn in the following tables :—

PRODUCTION OF COPPER, AUSTRALIA, 1881 TO 1919.

State.	1881.	1891.	1901.	1908.	1915.	1916.	1917.	1918.	1919.

(a) 1st January to 30th June. (b) Year ended 30th June.

A short account of the discovery of copper in the different States is given in earlier Year Books.

2. Sources of Production.—(i) *New South Wales.* The principal seat of the copper-mining industry at the present date is in the Cobar district, the value of the deposits there being first recognised in 1869. The value of the output from this district in 1919 was £127,000, out of a total for the State of £139,000. The yield from copper in 1919 was very small as compared with the previous year's total of nearly £697,000, the decline being due to the fall in price of the metal in the early part of 1919, coupled with shipping difficulties and shortage of water. Values of the more important yields furnished during the year were as follows:—Great Cobar Ltd., £69,300; C.S.A., £41,804; Cobar Gladstone, £10,557; Mount Royal Mines, Tottenham, £7,250.

(ii) *Queensland.* The yield in this State amounted in 1919 to 9,997 tons, valued at £952,501, to which the Mount Morgan field contributed 5,332 tons, valued at £506,540. Next in order were Cloncurry with 4,346 tons, valued at £415,653; Gladstone, 175 tons, valued at £16,672; and Herberton, 94 tons, £8,945.

The total production in 1919 was little more than half that of the preceding year, the fall being due to the decline in price of the metal.

The Cloncurry district—reckoned the richest and most extensive cupriferous area in Australia—under normal circumstances produces more than half the copper output of the State, and its yield far exceeds in value the total gold output.

(iii) *South Australia.* Taking the entire period over which production extended, the yield of copper in South Australia easily outstrips that of any other State in the Commonwealth. In recent years, however, Queensland, Tasmania, and New South Wales have come to the front as copper producers, as the table on the preceding page will shew. Deposits of copper ore are found over a large portion of South Australia. A short account of the discovery, etc., of some of the principal mining areas, such as Kapunda, Burra Burra, Wallaroo, and Moonta, is given in preceding issues of the Official Year Book. During 1919 the output amounted to 2,517 tons, valued at £228,930, the bulk of the production being from the Wallaroo and Moonta Company which in normal times employs over 1,900 hands. Owing to the fall in price of copper during the early months of 1919, and the difficulty in obtaining supplies of fuel, operations were considerably reduced. Recently a discovery of rich ore was made at Dome Rock near Boolcoomatta Station.

(iv) *Western Australia.* The value of copper and ore exported from this State in 1919 was £10,105. According to the returns, the production in the West Pilbara field was 1,031 tons, valued at £15,807, while the Phillips River field shewed a production of 215 tons, valued at £4,993. The Peak Hill and Murchison fields also produced small tonnages.

(v) *Tasmania.* The quantity of copper produced in Tasmania during 1919 was 5,027 tons, valued at £504,961, the bulk of the production being due to the Mount Lyell Mining and Railway Co. Ltd. This Company treated 178,972 tons of ore in 1919, and produced 5,071 tons of blister copper, containing copper, 5,014 tons; silver, 228,652 ozs.; and gold, 5,251 ozs., the whole being valued at £579,768. The employees in 1919 numbered 1,545, of whom 752 were miners, 644 were engaged in the reduction works, and 149 in the railway department.

(vi) *Northern Territory.* Copper has been found at various places, including Copperfield, 5 miles south-east of Pine Creek, Mount Diamond and Burns Wolfram, 45 miles east of Pine Creek, at Coronet Hill, Daly River, Maude Creek, Kilgour Creek, Woolagorang, and Borrooloola. The total production in 1919 was 159 tons of ore, valued at £2,349, raised chiefly at Mt. Diamond, Daly River, and Woolagorang.

3. **Prices of Copper.**—The great variation in price that the metal has undergone is shewn in the following table, which gives the average price in London and New York during 1901 and in each of the last five years. The figures are given on the authority of *The Mineral Industry*.

FLUCTUATION IN VALUE OF COPPER, 1901 AND 1915 TO 1919.

Year.				London Price per Ton Standard Copper.	New York Price in Cents per lb. Electrolytic Copper.
				£	Cents.
1901	66.79	16.11
1914	61.52	13.60
1915	72.53	17.28
1916	116.03	27.20
1917	124.89	27.18
1918	115.53	24.63
1919	90.80	18.69

4. **World's Production of Copper.**—The world's production of copper in 1901, and during the five years 1915–19, is estimated to have been as follows :—

WORLD'S PRODUCTION OF COPPER, 1901 AND 1915 TO 1919.

Year	1901.	1915.	1916.	1917.	1918.	1919.
World's production— (short tons)	583,517	1,206,793	1,552,347	1,582,595	1,537,884	1,085,000

The Australasian production is estimated at about 2 per cent. of the total.

5. **Employment in Copper Mining.**—The number of persons employed in copper mining during 1901 and in each of the last five years was as follows :—

PERSONS ENGAGED IN COPPER MINING, 1901 AND 1915 TO 1919.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Nor. Ter.	C'wealth.
	No.	No.	No.	No.	No.	No.	No.	No.
1901	2,964	4	814	4,000	321	(a)	(b)	8,103(c)
1915	914	..	2,149	2,000	144	1,758	97	7,062
1916	1,661	..	2,922	2,000	113	1,719	97	8,512
1917	2,074	..	3,154	2,000	154	1,671	92	9,145
1918	1,529	..	3,209	2,000	158	1,597	60	8,553
1919	1,148	..	2,521	400	72	1,571	12	5,724

(a) Included with silver miners. (b) No returns. (c) Excluding Tasmania and Northern Territory.

§ 6. Tin.

1. **Production of Tin.**—The development of tin mining is, of course, largely dependent on the price realised for the metal, and as in the case of copper, the production has been subjected to somewhat violent fluctuations. The tables below shew the quantity and value of the production as reported to the Mines Departments in each of the Commonwealth States during the years 1881, 1891, 1901, and 1915 to 1919 :—

TIN PRODUCED IN AUSTRALIA, 1881 TO 1919.

State.	1881.	1891.	1901.	1915.	1916.	1917.	1918.	1919.

(a) Dressed tin ore, about 70 % tin. (b) Included with ore. (c) Included with ingots.
(d) 1st January to 30th June. (e) Year ending 30th June.

2. **Sources of Production.**—(i) *New South Wales.* A large proportion of the output in New South Wales was obtained by dredging, the quantity so won in 1919 being valued at £174,013. In the Tingha division of the Peel and Uralla district the yield amounted to 627 tons, valued at £99,058. The Emmaville division in the new England district shewed a yield of 995 tons, valued at £166,754, the Vegetable Creek mine in this area being the chief producer of tin in the State with an output in 1919 of 360 tons, valued at £58,880. In the Wilson's Downfall division, 156 tons, valued at £24,182, were raised. The Glen Innes division, also in the New England district, returned a yield of 161 tons, valued at £25,325, and the Torrington division 95 tons, valued at £18,300. The Ardlethan field, in the Lachlan division, produced ore and concentrates to the value of £66,009.

(ii) *Victoria.* In Victoria lode tin has been discovered at Mt. Wills, Beechworth, Eldorado, Chiltern, Stanley, and other places in the north-eastern district; and stream tin has been found in a large number of places, including those just mentioned in the north-eastern district. The bulk of the production in 1919 was obtained by dredging and sluicing, the Cock's Pioneer Gold and Tin Co. in the Eldorado district contributing 98 tons, valued at £15,162. Small quantities were also won in the Beechworth District, and at Mount Cudgewa and Walwa.

(iii) *Queensland.* The chief producing districts in Queensland during 1919 were Herberton, 525 tons, valued at £71,994; Stanthorpe, 118 tons, £18,007; Cooktown, 127 tons, £19,329; Chillagoe, 124 tons, £16,353; and Kangaroo Hills, 92 tons, £16,299. The production of tin was adversely affected in 1919 by the prolonged dry weather, and also by a shortage of explosives during the latter half of the year.

(iv) *Western Australia.* The export of tin ore for the State during 1919 amounted to 318 tons, valued at £47,269. The production from the Greenbushes field amounted to 245 tons, valued at £34,959, and from the Pilbara field 37 tons, valued at £5,871. There was no production from the other fields in 1919.

(v) *Tasmania.* During 1919 the quantity of metallic tin won amounted to 1,580 tons, valued at £395,794. The bulk of the production in 1919 came from the North-Eastern Division with 679 tons, valued at £174,319. Of the total yield in this division, 324 tons were contributed by the Pioneer and Gladstone districts, 272 tons by the Ringarooma, Derby, and Branxholm districts, and small quantities from Moorina district and Straits Islands. The next highest output was returned from the North-Western division with 516 tons, to which the celebrated Mt. Bischoff contributed 351 tons, and the Mt. Bischoff Extended, 146 tons. In the Eastern division, the Avoca mines produced about 75 tons out of a total of 223 tons. The mines in the Western division produced 123 tons of metallic tin in 1919.

(vi) *Northern Territory.* The yield of tin ore in 1919 amounted to 162 tons, valued at £30,021, of which the Marranboy field contributed 75 tons, valued at £15,000, and Mt. Wells about 23 tons, valued at £3,700. Small yields were returned also from Crest of Wave, Horseshoe Creek, Hayes Creek, Umbrawarra, and other districts. Two batteries for the treatment of tin ore have been erected by the Government, one at Marranboy, costing £20,163, and one at Hayes Creek, at an expense of £3,294.

3. *World's Production of Tin.*—According to *The Mineral Industry* the world's production of tin during each of the last five years was as follows :—

WORLD'S TIN PRODUCTION, 1915 TO 1919.

1915.	1916.	1917.	1918.	1919.
Tons. 113,319	Tons. 114,108	Tons. 124,283	Tons. 121,524	Tons. 113,893

The yields from the chief producing countries in each of the last three years were as follows :—

	1917.	1918.	1919.
Malaya ..	39,800 ..	37,300 ..	36,900
Bolivia ..	27,800 ..	29,300 ..	27,500
Banka ..	13,200 ..	13,200 ..	11,600
Siam ..	8,800 ..	9,100 ..	8,800
Cornwall ..	3,900 ..	4,000 (a) ..	3,300 (a)
Billiton ..	5,500 (a) ..	6,900 (a) ..	6,900 (a)
Nigeria ..	6,500 ..	6,000 (a) ..	5,000 (a)
China ..	11,000 (b) ..	8,700 (b) ..	8,000 (b)
Australia ..	4,000 (a) ..	4,300 (a) ..	4,000 (a)
South Africa ..	1,600 ..	1,200 ..	1,000
India ..	1,200 ..	1,000 (a) ..	500 (a)

(a) Estimate. (According to returns furnished by the Australian Metal Exchange the figures for Australia for the three years were 4,000, 4,600, and 4,100 tons respectively.) (b) Shipments to Europe and U.S.A.

Based on the results for the last three years, Australia's share of the world's tin production would appear to be about $3\frac{1}{2}$ per cent.

4. Prices of Tin.—The average price of the metal in the London market for the years 1897 and 1907 and from 1910 to 1919 was as follows :—

PRICE PER TON OF TIN, 1897 TO 1919.

Year.			Price per Ton.	Year.			Price per Ton.
			£ s. d.				£ s. d.
1897	61 8 0	1914	156 12 7(a)
1907	172 12 9	1915	164 4 0
1910	155 6 2	1916	182 3 5
1911	192 7 0	1917	237 13 1
1912	209 8 5	1918	329 11 2
1913	206 5 7	1919	257 9 8

(a) Quotations incomplete.

According to *The Mineral Industry* the monthly average in December, 1917, reached £298 10s. 3d. per ton. Conditions in 1917 were, however, quite abnormal, and, instead of London prices ruling the market, each consuming country tended to fix its own rates, with the result that widely different quotations were recorded from London, New York, France, and Italy. Owing to various causes such as shortage of labour, plant, and supplies, increases in wages, difficulty of obtaining information as to the relative position in the producing centres, interference with the ordinary course of trade, &c., prices in 1918 mounted to phenomenal heights. Quotations in January averaged £293 6s. 1d. per ton and increased rapidly until May when the price reached £364 7s. 8d. A falling-off in the next two months was succeeded by a rise to the sensational figure of £380 16s. 8d. in August. Thenceforward a sharp decline was experienced, and for the closing month of the year the average was recorded as £267 14s. 3d. In January, 1919, the average price was given as £248 9s. 11d., but the market fell in the succeeding months until July, when there was a rise to £253 5s. 1d. An upward tendency was manifested in the latter months of the year, the average for December being £314 5s. 1d.

5. Employment in Tin Mining.—The number of persons employed in tin mining in 1901 and during the last five years is shewn below :—

PERSONS ENGAGED IN TIN MINING, COMMONWEALTH, 1901 AND 1915 TO 1919.

Year.		N.S.W.	Victoria.	Qld.	W. Aust.	Tas.	Nor. Ter.	C'wealth.
		No.	No.	No.	No.	No.	No.	No.
1901	..	1,428	..	1,148	413	1,065	..	4,054
1915	..	1,648	27	1,218	188	1,221	154	4,456
1916	..	1,938	135	1,093	235	1,217	154	4,772
1917	..	1,779	42	878	211	1,311	151	4,372
1918	..	2,352	52	1,110	292	1,260	190	5,256
1919	..	2,171	38	1,114	209	1,303	190	5,025

§ 7. Zinc.

1. Production of Zinc.—The production of zinciferous concentrates is practically confined to the Broken Hill district of New South Wales, where zincblende forms one of the chief constituents in the enormous deposits of sulphide ores. During the earlier years of mining activity on this field a considerable amount of zinc was left unrecovered in tailings, but from 1909 onwards improved methods of treatment resulted in the profitable extraction of the zinc contents of the accumulations at the various mines.

As the metallic contents of the bulk of the concentrates, etc., raised in the Broken Hill District are extracted outside New South Wales, the mineral industry of that State

cannot be credited with the value of the finished product. The figures given hereunder, therefore, refer to the quantity and value of the zinc concentrates actually exported during the years specified.

NEW SOUTH WALES.—EXPORTS OF ZINC CONCENTRATES, ETC., 1889 TO 1919.

Year.	Quantity of Zinc Concentrates, &c., Exported.	Value.	Year.	Quantity of Zinc Concentrates, &c., Exported.	Value.
	Tons.	£		Tons.	£
1889	97	988	1916	209,741	961,849
1891	219	2,622	1917	113,531	441,486
1899	49,879	49,207	1918	87,019	295,413
1915	190,916	1,111,569	1919	72,294	247,395

A statement of the quantity of zinc locally extracted, and the estimated zinc contents of concentrates exported or sold for export during the five years 1916–20, will be found in § 17 hereinafter.

At the Silver Spur mine at Texas, in the Stanthorpe division in Queensland, part of the ore is high in zinc and lead, but low in silver. Profitable extraction of the zinc and lead depends, however, on railway connexion with the mine. Zinc sulphide is produced by the Mount Garnet Mine in the Herberton district, and during 1916 several hundred tons of good quality ore were raised, but until a suitable treatment plant has been erected, it is stated that production cannot be economically undertaken.

During the year 1916, a small quantity of zinc, valued at £630, was produced in Western Australia, but there was no production in the years 1917 to 1919.

The Tasmanian mineral returns for 1919 included an item of 285 tons of zinc ore, valued at £13,110, raised at the Read Rosebery Mine.

Investigations in regard to the Read-Rosebery zinc-lead deposits in Tasmania have proved the existence of 1,680,000 tons of ore, which, added to an estimated quantity of 915,000 tons of “probable” ore, make a total supply of 2,595,000 tons. It is stated that the metallurgical treatment of the ore can be successfully carried out, and that the deposits are amongst the richest and most important in the world.

2. Prices of Zinc.—During the four years 1911 to 1914, the price of zinc averaged £23 15s. per ton, ranging from £21 in 1914 to £26 3s. 4d. in 1912. Owing to the heavy demand and other circumstances arising out of the war, the prices in 1915 and 1916 reached the very high average of £67 11s. 1d. and £72 1s. 5d. per ton respectively. For 1917 the average recorded was £52 8s. 3d., for 1918, £54 3s. 7d., and for 1919, £42 17s. 7d. per ton.

§ 8. Iron.

1. General.—The fact that iron-ore is widely distributed in the Commonwealth has long been known, and extensive deposits have been discovered from time to time at various places throughout the States. It will appear, however, from what is stated below, that until quite recently, little has been done in the way of converting these deposits into a marketable commodity.

(i) *The Manufactures Encouragement Act 1908–14.* It was hoped that the passing by the Commonwealth Parliament of the Manufactures Encouragement Act, which came into force on the 1st January, 1909, would assist in firmly establishing the iron industry in Australia on a remunerative basis, both in the smelting of pig iron and in the production of bar iron and steel from Australian ore. The Act referred to, together with its amendment in 1912, provided for the payment up to June, 1914, of bounties of 12s. per ton on Australian pig iron, puddled bar iron, and steel, and of 10 per cent. on the value of galvanised sheet or plate, wire netting, wire, and iron or steel pipes and tubes. During the period from 30th June, 1909, to 30th June, 1915, a sum of £173,671 was paid in connexion with these bounties. (For details see Official Year Book No. 11, p. 452.)

(ii) *The Iron Bounty Act 1914–15.* This Act repealed the Manufactures Encouragement Act 1908–14, and provided for a bounty on Australian pig iron up to the end of 1916. The rate of bounty was 8s. per ton, and the total amount authorised £60,000. Provision was made for transfer, if required, to the State, of lands, buildings, etc., used

in the manufacture of pig iron. During the three years 1915 to 1917 the respective bounties amounted to £19,808, £24,465, and £11,454, and the corresponding tonnages of pig iron to 49,520, 61,162, and 28,635 tons. New South Wales is the only State where bounty has been claimed.

2. *Production of Iron.*—(i) *New South Wales.* Reference to the extent of the deposits of iron ore in the State, and the events leading up to the establishment of iron-works at Lithgow, will be found in earlier issues of the Year Book (see No. 3., p. 508). During 1919 the following materials were received at the blast furnace at the Eskbank Iron Works, Lithgow:—Iron ore, 141,926 tons; limestone, 60,004 tons; and coke, 119,895 tons. The iron ore was raised from quarries at Tallawang, Breadalbane, Cadia, and Carcoar, and the output was 80,941 tons of pig iron.

The following table shews the quantity and value of pig iron, produced in New South Wales during the last seven years from locally-raised ores only:—

NEW SOUTH WALES.—PRODUCTION OF IRON (LOCAL ORE), 1913 TO 1919.

Particulars.		1913.	1914.	1915.	1916.	1917.	1918.	1919.
Quantity	.. Tons	46,563	75,150	76,318	52,556	45,025	68,072	80,941
Value	.. £	186,252	254,257	267,000	197,085	247,637	350,000	445,175

The figures quoted above refer to production from *local* ores only, and as such credited to the New South Wales mineral industry. They do not, of course, represent the total production of pig iron in New South Wales, since, as shewn in the succeeding paragraph, a considerable quantity of ore raised in South Australia and credited therefore to the mineral returns of that State is treated in New South Wales.

The Broken Hill Proprietary Company established works for the manufacture of iron and steel on a large scale at Newcastle, and operations were started early in 1915. The Company is utilising the immense deposit of iron ore at the Iron Knob quarries in South Australia, which are connected with the seaboard at Whyalla, a distance of about 36 miles, by the Company's tramway. The ore quarried for the year ending December, 1920, amounted to 413,150 tons. Extensive limestone works and loading bin at Devonport, Tasmania, as well as quarries in New South Wales for dolomite, magnesite, etc., are also owned by the Company. The steel works consist of two blast furnaces of a nominal daily producing capacity of 350 tons each, and a third furnace of 100 tons for the production of foundry iron. Another furnace with a capacity of 350 tons is in course of erection, and should be in operation during the latter part of 1921. The output of pig iron for the year from the two blast furnaces and small foundry furnace, which is now used extensively for the production of ferro-manganese, amounted to 251,416 tons. The seven 65-ton open-hearth steel furnaces already in operation are being extended by the addition of two others of equal capacity. With seven furnaces, the present output is over 3,400 tons weekly. The actual output of steel ingots during 1920 was 219,973 tons. The works are supplied with a 28-in. bloom and rail-rolling mill, able to deal with 500 tons of finished rails daily. There are also in operation an 18-in., 12-in., and 8-in. mill for merchant steel, as well as a rod mill for production of rods for wire drawing capable of an output of 350 to 400 tons of rods per week down to size No. 5 (.212 of an inch). The output from the mills during the twelve months ending 1920 was as follows:—

Rails	54,170 tons
Billets	8,723 "
Fishplates and Splice Bars	4,711 "
Structural Steel	19,502 "
Round and Octagon Steel	19,070 "
Flat Steel..	16,826 "
Plates	2,092 "
Square Steel	1,065 "
Rods	49,814 "
Total	175,973 tons

The Company is producing its own coke for the furnaces, having already 161 by-products ovens in operation and 63 in course of construction. The tar and sulphate of ammonia produced during 1920 amounted to 2,710,472 gallons and 3,589 tons respectively.

A quantity of iron oxide is purchased by the various gasworks for use in purifying gas, the output in New South Wales being drawn chiefly from the deposits at Port Macquarie, while smaller quantities are obtained in the Moss Vale and Goulburn Divisions. During 1919 the iron oxide raised amounted to 2,724 tons, valued at £3,406. Up to the end of 1912 a certain amount of ironstone was raised each year for fluxing purposes, but as the smelting companies obtained suitable ores for treatment there was no subsequent production till 1916, when 1,472 tons, valued at £1,083, were raised. In 1919 the quantity raised was 2,128 tons, valued at £2,072.

(ii) *Victoria.* Iron ore has been located at various places in Victoria, particularly at Nowa Nowa, in the Gippsland district, and at Dookie. A blast furnace was erected in 1881 near Lal Lal, on the Moorabool River, and some very fair quality iron was produced, which was used for truck wheels and stamper shoes at the Ballarat mines. The fall in the price of the metal, however, led to the closing of the works. In his report for 1905 the Secretary for Mines states that without special assistance to the industry there does not seem to be any prospect of the deposits being profitably worked.

(iii) *Queensland.* Queensland possesses some extensive deposits of iron ore, which are mined chiefly for fluxing purposes in connexion with the reduction of gold and copper ores. During the year 1919, 24,676 tons of ironstone flux, valued at £27,684, were raised, of which 23,200 tons, valued at £26,669, came from the Rockhampton district, and about 1,300 tons, valued at £900, from the Cloncurry field. In 1917 satisfactory tests were made in connexion with the smelting of ore from the extensive lode of magnetic iron at Biggenden, and the Government Geologist has recommended the establishment of a State ironworks to make pig iron from this ore.

(iv) *South Australia.* South Australia possesses some rich deposits of iron ore capable of being mined for an indefinite period. The best known deposit is the Iron Knob, a veritable hill of iron ore of high percentage, situated about 40 miles W.S.W. from Port Augusta. The estimated quantity of iron ore in sight at the Iron Knob and Iron Monarch has been set down at 21,000,000 tons. The Broken Hill Company utilises ore from this quarry at its ironworks at Newcastle, New South Wales, and the amount raised for the year 1919 was 268,530 tons, valued at £307,402.

(v) *Western Australia.* This State has some very rich deposits of iron ore, but owing to their geographical position, the most extensive fields at the present time are practically unexploited, the production in the State being confined chiefly to that needed for fluxing purposes. The Murchison field possesses some extensive deposits of high-grade ore. There are also deposits on Koolan Island at Yampi Sound. The production of pyritic ore reported in 1919 amounted to 4,136 tons, valued at £4,919.

(vi) *Tasmania.* The amount of ore available in the principal iron-ore deposits in Tasmania has been estimated as follows—

					Tons.
Blythe River Lode	17,000,000
Dial Range and Penguin	700,000
Beaconsfield and Anderson's Creek	1,300,000
Long Plain	20,000,000
Zeehan District	2,900,000
Nelson River	Unknown
Total	41,900,000

The total production of iron ore in 1908 was 3,600 tons, valued at £1,600, all raised by the Tasmanian iron mine at Penguin, but owing to the closing down of that mine in 1909 there has been no further production. Iron pyrites for the manufacture of sulphuric acid and of manures is produced on the West Coast, the quantity raised in 1919 being 3,457 tons, valued at £4,288.

(vii) *Northern Territory.* Large bodies of rich ironstone have been discovered in various parts of the Territory, particularly between the Adelaide River and Rum Jungle. Owing to the lack of local coal, however, the deposits possess no immediate value.

(viii) *World's Production of Iron, 1917.* The quantity of iron produced in Australia is but a very small proportion of the world's production, which in 1917, the latest year for which complete estimates are available, amounted to 72,382,000 metric tons (pig iron). The leading position for magnitude of production is held by the United States, which in 1917 produced 39,240,000 tons, compared with Germany's 13,142,000 tons, and the United Kingdom's 9,572,000 tons. The position of the three countries named is similar to what it has been for several years past. The world's production of steel for 1917 is given as 84,894,000 metric tons.

§ 9. Other Metallic Minerals.

1. *Antimony.*—This metal is widely distributed in the north-eastern portion of New South Wales, between the 148th meridian and the coast, and has been found native at Lucknow, near Orange. Dyscrasite, a silver antimonide, has been found in massive blocks in the Broken Hill lodes. The production of antimony (metal) in 1919 amounted to 87 tons, valued at £2,342. The ore is raised mainly in the Hillgrove division, where it is found in association with scheelite and gold, and the production in 1919 amounted to 161 tons, valued at £2,317. A portion of this was smelted on the field. A small quantity of stibnite, valued at £25, was produced at Burropine in the Kempsey division. Owing to the low price of the metal in 1919 there was no work done on the large deposits in the Drake division. The total quantity of antimony (metal and ore) raised in New South Wales up to the end of 1919 was 18,707 tons, valued at £341,183. The production of antimony concentrates in Victoria during 1919 amounted to 1,208 tons, valued at £24,160. The whole of the production came from ore raised by a company operating at Costerfield. In Queensland extensive deposits are found at Neerdee, in the Wide Bay district, at Wolfram Camp, on the Hodgkinson field, on the Palmer River, in the Ravenswood district, and at various places in the Herberton district. Ore has also been obtained in the Dividing Range near Herberton, and adjacent to some of the central tributaries of Emu Creek. Owing to the low price of the metal in 1919 production was practically negligible. In Western Australia lodes of stibnite carrying gold have been found in the Roeburne district. During 1917, 12 tons of antimony, valued at £258, were exported, but there was no production in 1918 and 1919.

2. *Arsenic.*—In New South Wales, deposits of arsenical ore have been located at various places, but production in 1919 was small, amounting to 6 tons, valued at £24, raised at Burrowa. Prospecting was in progress on a rich deposit at Brungle, and deposits were tested at Tyagong in the Young division, and at Rockdale near Armidale. During 1917 the high price ruling for arsenic, and the urgency of the need for supplies in connection with the destruction of prickly pear, led to the reservation by the Queensland Mines Department of an extensive area of arsenic-bearing deposits at Jibbinbar, in the Stanthorpe district. Operations have been commenced, and it is hoped to produce the article at pre-war prices. At the Beecroft mine at Sundown, in the Stanthorpe district, 23 tons were produced in 1919, while the State mine at Jibbinbar during the portion of the year when it was in operation returned an output of 33 tons. In South Australia attention is being devoted to arsenic-bearing minerals at Woodside, at Westward Ho, near Mannahill, and on Kangaroo Island. During 1918 Western Australia exported 697 tons of arsenical ore, valued at £2,564, but there was no production in 1919. In the form of arsenopyrite, arsenic is of wide distribution in Victoria, but the deposits are worked to a limited extent only. At Ballarat a small quantity of the oxide is obtained from the flues of roasting furnaces.

3. *Bismuth.*—This metal has been found in New South Wales, near Glen Innes, in the Deepwater division, and also at Whipstick, in the Pambula division, its discovery dating from 1877. The production at Kingsgate, in the former division, where bismuth occurs in association with molybdenite, was valued in 1919 at £3,914, while that at Whipstick was valued at £1,263. Deposits of bismuth ores are also found in the Oberon, Deepwater, Tenterfield, Young, and Gundaroo divisions. About 19 tons of metal and ore, valued at £20,215, were exported from New South Wales during 1919; the total quantity exported to the end of that year was 684 tons, valued at £189,042. In Queensland wolfram and bismuth have been found in various districts, but the chief

centres of production in 1919 were the Herberton and Chillagoe fields. The total production for the year was valued at £59,932, of which 229 tons, valued at £40,596, was returned as wolfram, 20 tons, valued at £655, as bismuth, and 140 tons, valued at £18,681, as bismuth and wolfram. In South Australia, deposits are found at Balhannah, at Mount Macdonald, and at Murninnie, on the shores of Spencer's Gulf. A small quantity of bismuth was exported from Western Australia in 1919. In Tasmania 2 tons, valued at £573, were raised in 1919, principally from the Shepherd and Murphy mine at Middlesex.

4. Chromium.—In New South Wales chromium is found at Bowling Alley Point, on the Peel River, at Barraba, at Manilla, at Gordon Brook, in the Clarence River district, at Bingara, Wallendbeen, and near Gundagai. The production during recent years has been small, the quantity raised in 1919 being 250 tons, valued at £616, of which 150 tons, valued at £340, were obtained in the Bingara division, and smaller quantities were raised at Cullinga and Braulin in the Cootamundra division. Chrome iron ore is found in Queensland in the Rockhampton district, but there was no production recorded in 1919.

5. Cobalt.—This metal was found at Carcoar in New South Wales in 1889, and subsequently at Bungonia, Port Macquarie, and various other places. There was no export of cobalt since 1911, and the total produced since 1860 amounted in value to only a little over £10,000. Deposits have been noted in Queensland at Selwyn in the Cloncurry area; in South Australia near Bimbourie and South Blinman; in Western Australia at Norseman and Kanowna; and at various places in Victoria.

6. Lead.—This metal was first noted in New South Wales in 1849, when small specimens of native metal were found by the Rev. W. B. Clarke. At present lead mining *per se* is not practised to any extent in the Commonwealth, the supply of the metal being chiefly obtained in conjunction with silver. In New South Wales, lead in the form of pig, carbonate, and chloride, exported in 1919, amounted to 11,497 tons, valued at £324,215. The total lead exported to the end of 1919 was 298,000 tons, valued at £5,775,000. As stated previously, the metallic contents of the major portion of the silver lead ores are extracted outside New South Wales, and these figures refer only to lead values assigned as the produce of the State. In Victoria, oxides, sulphides, and carbonates of lead are found in the reefs of most of the goldfields. The deposits are not, however, of sufficient extent to repay the cost of working. In Queensland the deposits are worked chiefly for the silver, copper or gold contents of the ore, the lead produced in 1919 amounting to 135 tons, valued at £4,739. At one time South Australia produced a fair amount of lead, £22,303 worth being raised in 1902, but the production rapidly decreased, and no output has been recorded since 1910. During 1919 pig lead exports from Western Australia amounted to 1,780 tons, valued at £48,462. Tasmanian lead production in 1919 was returned as 2,357 tons, valued at £64,403, of which the Zeehan mines contributed 808 tons, the Mt. Farrell mines, 447 tons, Magnet, 529 tons, and Mt. Claude mines, 365 tons.

7. Manganese.—Ores of this metal occur in widely separated districts in New South Wales, but the low price of the metal in past years precluded mining to any great extent, and the production to date has been small. During 1919, 4,651 tons, valued at £13,953, were raised chiefly in the Grenfell division. Small quantities were also raised in the Parkes, Rockley, Bathurst, Tamworth, Uralla, Bingara, Cootamundra, Fifield, and Cooma divisions. Manganiferous deposits were recorded in the Armidale and Molong divisions. In Queensland there are extensive deposits at Mount Miller, near Gladstone, in the country to the west and south-west of Gympie, and in the Stanthorpe district. Owing to lack of a market, production in 1919 was limited to 20 tons, valued at £103. Small quantities of manganese ore were raised in Victoria during 1916 from mines in the vicinity of Heathcote. Extensive deposits of the ore were mined at Boolcunda in South Australia some years ago. Deposits are being actively worked at the present time at Pernatty, Hawker, and Gordon. The production in 1919 was valued at £1,490. In Western Australia ores of the metal are found widely scattered, the black oxide being especially plentiful in the Kimberley district.

8. Mercury.—In New South Wales mercury was first recorded by the Rev. W. B. Clarke in 1841. Cinnabar has been found in lodes and impregnations at various places, such as Bingara, Clarence River, etc. Up to the present the production of quicksilver

has been small, the total being only about 3,000 lbs. During 1916 the Pulganbar Company raised 200 tons of ore from their mine at Ewengar in the Drake division. The mercury produced was valued at £180. There was no production recorded in the years 1917 to 1919. In Victoria native mercury and cinnabar have been found at Silver Creek, a tributary of the Jamieson River. Lodes of cinnabar have been found in Queensland at Kilkivan, and at Black Snake, in the Wide Bay district; about four tons were produced between 1874 and 1891. Between O.K. and Mungana several shows have been prospected with encouraging results. Small quantities have been found disseminated over a large area near Willunga in South Australia, and the metal is also found in New Guinea.

9. **Molybdenum.**—In New South Wales molybdenite (associated with bismuth) is obtained at Kingsgate, near Glen Innes, at Deepwater, at Rocky River in the Tenterfield division, in the Bathurst division, and at Whipstick in the Pambula division, the production in 1919 being 66 tons, valued at £30,308, as compared with 93 tons, valued at £41,850 in the previous year. In Victoria 78 tons of molybdenite, valued at £2,531, were raised in 1919 at Everton. The production in Queensland for 1919 was 118 tons, valued at £52,234, of which 73 tons, valued at £33,088, were produced by the Chillagoe field, and 43 tons, valued at £18,540, from the Mount Perry area. A small quantity was produced in 1914 from the mines in the Moonta district in South Australia, and the occurrence of the metal is reported from various other localities. At the Yelta mine bunches of the ore are scattered through the copper ore, and the molybdenite is picked out during the dressing of the copper ore. The yields for the last three years were, however, trifling. Molybdenite occurs in small quantities at various localities in Western Australia, the production in 1919 being valued at £100. In the Northern Territory, molybdenite is found at Yenberrie, where it is stated that the ore increases in richness as the workings become deeper. Production in 1919 was, however, very small.

10. **Radium.**—(i) *General.* It is reported that there have been several definite discoveries in Australia of the occurrence of minerals containing radium. A discovery of carnotite, which is an alteration product of pitchblende, the compound from which radium is obtained, was made in 1906, 20 miles E.S.E. of the Olary railway station, in South Australia. In 1910 pitchblende was identified in portion of the workings at Olary, and a specimen exhibiting a high degree of radio-activity was obtained. This is the first authentic discovery of the mineral pitchblende in Australia. The deposits of radio-active uranium ores found at Radium Hill were mined some years ago, and the concentrates forwarded to Sydney for treatment at the company's works at Woolwich. As noted in (ii) below, operations are at present at a standstill. Monazite from Pilbara, Western Australia, has been shown to give off radium emanations. The mineral has been called "pilbarite." Lastly, it is stated that the ores obtained at the Moonta mines, South Australia, contain from one-tenth to one-fifteenth of the amount of radium found in high-grade pitchblende, and that a product having a fairly high degree of radio-activity can be extracted therefrom with comparative ease. During 1918 radio-active ore to the value of £686 was raised in South Australia, but there was no production recorded in 1919.

(ii) *Production of Radium Bromide.* At the end of November, 1912, a small quantity of radium bromide was produced at the Radium Hill Co.'s works at Woolwich, Sydney, this being the first occasion on which a marketable amount of this salt has been obtained outside of Europe. It was estimated by the chemist in charge that the plant at the works was capable of providing £600 worth of radium weekly. From the 30th June, 1913, to the end of May, 1914, the works produced 239 milligrams of high-grade radium preparation. The industry, however, has since remained inactive.

11. **Tungsten.**—Wolfram and scheelite, the principal ores of tungsten, are both mined to some extent in New South Wales. During 1919 the production of wolfram was 135 tons, valued at £22,818, and of scheelite 80 tons, valued at £15,193. Wolfram was mined chiefly in the Torrington division of the New England District, and scheelite in the Hillgrove area. In Victoria the production of wolfram was returned in 1919 as 2½ tons, valued at £400, the bulk of the production coming from Thologolong, Marysville, and Barrakee. In Queensland, tungsten ores are found in several districts, the chief centres of production in 1919 being Chillagoe and Herberton. (See also "Bismuth.") A deposit of wolfram was discovered near Yankalilla, in South Australia, as far back as 1893, but the production up to date has been small. It is believed that careful examination will lead to increased production from the deposits at Callawonga Creek. In the Northern Territory wolfram

to the value of £34,805 was obtained in 1918-19, chiefly from Hatches Creek Wauchope Creek and Yenberrie. Numerous samples of good wolfram ore have been obtained at the Frew River in Central Australia.

In Western Australia, in addition to a small quantity of wolfram, 6 tons of scheelite, valued at £772, were exported in 1919. Wolfram is mined at various points in Tasmania, the production for 1919 being 121 tons, valued at £26,613, obtained chiefly at the Avoca mines, and from the Shepherd and Murphy mine at Middlesex. Scheelite has been discovered on King Island in Bass Strait, and as a result of operations 199 tons of concentrates of an estimated value of £43,181 were produced in 1919.

12. **Tantalum.**—Tantalite in small quantities has been found in the Greenbushes mineral field of Western Australia for some time past, but recently a lode of fairly extensive proportions was located at the Wodgina tinfield. Up to the end of 1905 the production of this mineral in Western Australia amounted to 73 tons, valued at about £10,000, but early in 1906 it was found that the supply exceeded the demand, and production was temporarily stopped; in 1908 a small quantity valued at £400 was exported. About £327 worth was reported as having been raised in the Greenbushes and Pilbara fields during 1909, but none was exported owing to the entire absence of any market. No further production was recorded until 1916, when 47 tons, valued at £9,375, were exported, consisting of ore which had been raised some years previously at Wodgina, in the Pilbara field. The export in 1917 amounted to 17 tons, valued at £2,513, but there was no record of production in 1918, while the export in 1919 was valued at £75. Small quantities of the mineral are also found in the Northern Territory.

13. **Uranium.**—This mineral has been discovered in South Australia in the country between Mount Painter and Mount Pitts, about 80 miles east from Farina. The uranium ores occur most frequently in the form of torbernite and autunite, and are found over a considerable area. The discovery is therefore of considerable importance, since ores of this mineral are found to a very limited extent in other parts of the world, and radium is regarded as one of the products of disintegration of uranium.

In addition to the metals enumerated above there is a large number of others occurring in greater or less degree, while fresh discoveries are being constantly reported.

(B) NON-METALLIC MINERALS.

§ 10. Coal.

1. **Production in each State.**—(i) *Historical.* A historical account of the discovery of coal in each State will be found in preceding issues of the Year Book. (See No. 3, pp. 515-6.)

(ii) *New South Wales.* The production in 1919 amounted to 8,631,554 tons, valued at £5,422,846, or a decrease of about 432,000 tons in quantity, but an increase of £481,000 in value, as compared with the output in 1918. From the collieries in the Northern district the output in 1919 was 5,629,703 tons; the Southern district supplied 1,826,574 tons; and the Western 1,175,727 tons. The quantities raised in each district in 1918 were 5,966,926, 1,984,578, and 1,111,672 tons respectively. The reduced output in the Northern and Southern districts was partly accounted for by lack of shipping facilities, through strikes, and partly by stoppages at several collieries due to industrial disputes. The increased yield in the Western district was mainly due to the fact that supplies of coal were sent by rail from Lithgow to Victoria during the period when sea carriage had ceased.

(iii) *Victoria.* During 1919 the production amounted to 423,945 tons of black coal, valued at £372,075, and 111,628 tons of brown coal, valued at £34,542. Of the total output, 361,872 tons, valued at £307,591, were raised by the State coal mine at Wonthaggi, and 110,183 tons, valued at £34,253, from the State brown coal mine at Morwell. The total production for 1919 was about 30,000 tons in excess of that in the preceding year.

(iv) *Queensland.* The quantity of coal raised in 1919 was 931,631 tons, valued at £614,307, this production being about 52,000 tons less than in the preceding year. The decrease was due to the lessened production in the Ipswich district. Twenty-six collieries were working in the Ipswich district, six on the Darling Downs, five in the Maryborough district, four in Rockhampton district, five at Clermont, one at Bowen, and one at Mount

Mulligan in the Chillagoe district. The industry is at present in a very satisfactory position in the northern State, and owing to the wide area over which the deposits stretch, practically no limit can be set to its possibilities of extension.

(v) *Western Australia.* Six collieries were in operation on the Collie field during 1919, and the output for the year was 401,713 tons, the largest on record, and about 65,000 tons more than in 1918.

(vi) *Tasmania.* The principal collieries in Tasmania are the Cornwall and Mount Nicholas, the former producing 31,000 and the latter 28,000 tons out of a total yield in 1919 of 66,000 tons.

The quantity and value of coal produced in each State and in the Commonwealth at various periods since 1881 are shewn in the following table :—

PRODUCTION OF COAL, AUSTRALIA, 1881 TO 1919.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	C'wealth.
QUANTITY.							
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.
1881	1,769,597	3	65,612	11,163	1,846,375

1919	8,631,554	535,573	931,631	..	401,713	66,253	10,566,724
VALUE.							
	£	£	£	£	£	£	£
1881	603,248	3	29,033	5,531	637,865
1891	1,742,796	21,404	128,198	21,622	1,914,026
1901	2,178,929	147,228	189,877	..	68,561	18,175	2,602,779
1915	3,424,830	275,343	409,342	..	137,859	30,418	4,277,592
1916	3,336,419	216,875	389,348	..	147,823	27,736	4,118,201
1917	4,422,740	345,830	597,860	..	191,822	38,673	5,586,425
1918	4,941,807	367,640	572,305	..	204,319	37,676	6,123,747
1919	5,422,846	406,617	614,307	..	270,355	47,004	6,761,129

The Victorian figures for 1919 include about 112,000 tons of brown coal, valued at £35,000, of which over 110,000 tons were produced at the State mine at Morwell.

2. *Distribution and Quantity of Coal in each State.*—(i) *New South Wales.* Estimates have from time to time been made as to the total quantity of coal available for working in the deposits in New South Wales, and while these naturally differ to some extent, they agree in placing the amount at well over a thousand million tons, without taking into consideration the deposits existing below a depth of 4,000 feet. According to Mr. E. F. Pittman, the coal-bearing rocks of New South Wales may be classified as follows :—

COAL-BEARING ROCKS OF NEW SOUTH WALES.

Geological Age.	Maximum Thickness of Coal-bearing Strata.	Locality.	Character of Coal.
I. Tertiary—Eocene to Pliocene ..	Approx. 100 ft.	Kiandra, Gulgong, and Chouta Bay	Brown coal or lignite
II. Mesozoic—Triassic or Trias-Jura	2,500 „	Clarence and Richmond Rivers	Coal suitable for local use only
III. Palæozoic—Permo-Carboniferous	13,000 „	Northern, Southern, and Western Coalfields	Good coal, suitable for gas, household and steaming
IV. Palæozoic—Carboniferous ..	10,000 „	Stroud, Bullah Delah	Very inferior coal, with bands; of no value

In regard to the Tertiary deposits, it may be noted that no serious attempt has been made to use the coal as fuel in New South Wales. At Kiandra a deposit of lignite was found to possess a maximum thickness of 30 feet, but as a general rule the seams vary from 3 to 4 feet in thickness. The Triassic or Trias-Jura deposits in the Clarence and Richmond districts contain numerous seams, but the coal is largely intersected by bands, while its large percentage of ash renders it unfit for use as fuel for industrial purposes. These beds extend under the great western plains, but the presence of artesian water precludes the possibility of their being worked. The Clarence basin extends into Queensland, and at Ipswich thick and valuable seams of coal are worked. It is in the Permo-Carboniferous division that the great productive coal seams of the State are found, the area which they cover being estimated at about 16,550 square miles. The deepest part of the basin is somewhere in the vicinity of Sydney, where the "Sydney Harbour Colliery" worked the top seam at a depth of 2,884 feet. Towards the north, south and west the seams rise towards the surface, and outcrop in the neighbourhood of Newcastle, Bulli and Lithgow. The coal from the various districts embraced in this division differs considerably in quality—that from the Newcastle district being especially suitable for gas-making and household purposes, while the product of the Southern (Illawarra) and Western (Lithgow) is an excellent steaming coal. At the present time the Greta coal seams are being extensively worked between West Maitland and Cessnock, and this stretch of country, covering a distance of 15 miles, is now the most important coal mining district in Australasia. The Permo-Carboniferous measures have in various places been disturbed by intrusions of volcanic rocks, which in some instances have completely cindered the seams in close proximity to the intrusive masses, while in other instances the coal has been turned into a natural coke, some of which has realised good prices as fuel.

The table hereunder gives the yields from the various divisions at intervals from 1881 to 1919:—

COAL RAISED IN NEW SOUTH WALES, 1881 TO 1919.

District.	1881.		1901.		1911.		1919.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.

Sydney Harbour Colliery. This colliery possesses considerable interest from the circumstance that its workings are amongst the deepest in the world. Extended reference to the history of its opening will be found in preceding Year Books. (See No. 6, p. 504.)

(ii) *Victoria.* The deposits of black coal in Victoria occur in the Jurassic system, the workable seams, of a thickness ranging from two feet three inches to six feet, being all in the Southern Gippsland district. Deposits of brown coal and lignite of immense extent occur in gravels, sands, and clays of the Cainozoic period throughout Gippsland, Mornington Peninsula, Werribee Plains, Gellibrand, and Barwon and Moorabool basins. In the Latrobe Valley, the beds reach a thickness of over 800 feet. When dried, the material makes good fuel, but owing to its excessive combustibility and friability requires to be consumed in specially constructed grates. Its steaming value is equal to about half that of the Wonthaggi coal. Some large factories already have adopted brown coal for firing boilers, and there is also a fair demand for the product by householders. In 1917 an Advisory Committee appointed to report on the brown coal deposits of Victoria recommended the establishment of an open-cut mine at Morwell in connexion with a comprehensive scheme for electrical power generation and transmission, as well as for the supply of brown coal for other requirements. The recommendations of this Committee were incorporated in the "Electricity Commissioners Act" of 1918.

The output of coal from the chief Victorian collieries during the last ten years was as follows :—

PRODUCTION OF COAL IN VICTORIA, 1910 TO 1919.

Year.	State Coal Mine.	Outtrim Howitt Company.	Jumbunna Coal Company.	Coal Creek.	Austral Coal.	Other.	Total Production.	Value.
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	£

1918 ..	389,794	..	16,533	2,378	15,419	81,651	505,775	367,640
1919 ..	361,871	..	21,716	1,465	11,824	138,697	535,573	406,617

Included in the total for "other" is an amount of 22,335 tons raised by the Powlett North Woolamai, and 4,734 tons raised by the Sunbeam Colliery. The figures also include 110,183 tons of brown coal raised by the State mine at Morwell, and 1,445 tons raised by the Altona Beach Estates.

(iii) *South Australia.* The coal from Leigh's Creek in South Australia is subject to similar disabilities to those of the Victorian brown coal, and until some means are devised of overcoming them, production will probably languish. The deposit is situated about 370 miles by rail from Adelaide, and 160 from Port Augusta, the total extent of coal-bearing country being set down as 42 square miles. The main seam has a thickness of over 45 feet. As the result of experiments made it would appear probable that profitable use might be made of the coal in a pulverized form.

(iv) *Queensland.* In Queensland the coal-bearing strata are of vast extent and wide distribution, being noted under the greater portion of the south-eastern districts, within 200 miles of the sea, as far north as Cooktown, and under portions of the far western interior. The Ipswich beds are estimated to occupy about 12,000 square miles of country, while the Burrum fields occupy a considerably larger area. At Callide, fifty miles west of Gladstone, a seam of coal free from bands has been struck in a shaft only 60 feet deep, and borings have proved the deposit to be of considerable magnitude. The beds in the Cook district are estimated to comprise rather more than 1,000 square miles, but coal measures extend to the south-west far beyond Laura and to the north of the railway. Extensive beds occur in the basin of the Fitzroy River, in the Broadsound district, and at the Bowen River. Amongst other places where the mineral is found may be enumerated Clermont, the Palmer River, Tambo, Winton, Mount Mulligan, and the Flinders River. Boring operations have proved the existence of seams of workable coal for some distance on both sides of the Dawson River. A bituminous coal is yielded by the Ipswich seams, those of the Darling Downs yield a cannel, while anthracite of good quality is furnished by the Dawson River beds.

The quantity and value of coal raised in Queensland at various periods since 1861 were as shewn below :—

PRODUCTION OF COAL IN QUEENSLAND, 1861 TO 1919.

Year	1861.	1871.	1881.	1891.	1901.	1919.
Quantity ..	Tons	14,212	17,000	65,612	271,603	539,472	931,631
Value..	£	9,922	9,407	29,033	128,198	189,877	614,307

The distribution of production during the last three years was as follows :—

QUEENSLAND COLLIERIES, 1917, 1918, AND 1919.

Districts.	1917.	1918.	1919.
	Tons Raised.	Tons Raised.	Tons Raised.
Ipswich	728,605	678,931	620,608
Darling Downs	97,797	94,242	97,454
Wide Bay and Maryborough	72,282	62,948	63,665
Rockhampton (central)	6,410	7,955	8,350
Clermont	132,664	122,812	121,250
Bowen (State Coal Mine)	306
Mount Mulligan (Chillagoe)	10,715	16,305	19,998
Total	1,048,473	983,193	931,631

Operations were commenced at the State Coal Mine on the Bowen field in March, 1919. The coal is of good quality and is well suited for coking. With the completion of the railway to the field, it is anticipated that supplies of coke will be forwarded to the smelters at Chillagoe, Irvinebank and Cloncurry, the coke for which has hitherto been brought from Newcastle.

(v) *Western Australia.* The coal seams in Western Australia belong to the Carboniferous, Mesozoic, and Post-tertiary ages. Most of the coal contains a large proportion of moisture, and belongs partly to the hydrous bituminous and partly to the lignite class. The only coalfield at present worked is at Collie, in the Permo-Carboniferous beds. The coal produced is bright and clean, but very fragile when free from moisture. About 271,000 tons of the total production in 1919 was taken by the railways and tramways, the balance being sold for bunkering and local trade. The production from this field since 1901 was as follows :—

PRODUCTION OF COAL IN WESTERN AUSTRALIA, 1901 TO 1919.

Year ..	1901.	1911.	1914.	1915.	1916.	1917.	1918.	1919.
Quantity Tons	117,836	249,899	319,210	286,666	301,526	326,550	337,039	401,713
Value £	68,561	111,154	148,684	137,859	147,823	191,822	204,319	270,355

In 1918 a discovery of coal was made near Wilga on the Donnybrook-Katanning railway.

(vi) *Tasmania.* In Tasmania, coal occurs in the following geological periods :—
 (1) Permo-Carboniferous : Lower Coal Measures. (2) Mesozoic : Upper Coal Measures.
 (3) Tertiary : Brown Coal and Lignite deposits. Permo-Carboniferous coal is found at Avoca, Mt. Nicholas and Fingal, Thomson's Marshes, Langloh, Seymour, York Plains, Mike Howe's Marsh, Longford, Colebrook, Schouten Island, Spring Bay and Prosser's Plains, Compton and Old Beach, Lawrenny, Longhole, Sandfly, Ida Bay, Hastings and Southport, Recherché and South Coast, Tasman's Peninsula. Deposits of lignite and brown coal are plentiful in beds of Tertiary age, but they have not been exploited to any extent. An estimate gives the approximate quantity of coal available as sixty-five

million tons, of which eleven millions are in the Lower Coal Measures and fifty-four millions in the Upper Measures, exclusive of an unknown quantity in strata fringing the Central Tiers.

PRODUCTION OF COAL IN TASMANIA, 1901 TO 1919.

District.	1901.	1911.	1914.	1915.	1916.	1917.	1918.	1919.
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.
North-western ..	2,952	1,496	1,074	270	873	350	1,353	2,836

Midland ..	1,536	635	847	691	598	399	1,161	2,899
South-eastern	640	130	68	20	753	1,188	1,009
South-western ..	3,711							
Total ..	45,438	57,067	60,794	64,536	55,575	63,412	60,163	66,253

The bulk of the output in 1919 was raised from the Cornwall and Mt. Nicholas mines in the North-eastern Division, which produced 31,456 and 28,053 tons respectively.

3. Production of Coal in Various Countries.—The total known coal production of the world in 1919 amounted to about 1,100 million tons towards which the Commonwealth contributed $10\frac{1}{2}$ million tons, or about 1 per cent. The following table shews the production of the British Empire and the chief foreign countries in units of 1,000 tons in 1901 and during each of the years from 1912 to 1919 where the returns are available :—

COAL PRODUCTION, BRITISH EMPIRE, 1901 AND 1912 TO 1919.

Year.	United Kingdom.	British India.	Canada.	Australian C'wealth.	New Zealand.	Union of S. Africa.
	1,000 tons.	1,000 tons.	1,000 tons.	1,000 tons.	1,000 tons.	1,000 tons.
1901	219,047	6,636	5,791	6,881	1,228	712
1912	260,416	14,706	15,237	11,730	2,178	7,248

1917	436	164,634	14,692	27,313	5,281	26,671	581,009
1918	398	157,940	13,605	24,542	6,403	28,487	605,546
1919	18,191	21,222	..	30,339	485,949

The United States returns include a large proportion of anthracite, the quantity averaging for the last five years about 82 million tons.

Including New Zealand the production from Australasia takes second place amongst the possessions of the British Empire, British India coming first in order.

4. Export of Coal.—The exports of coal from the Commonwealth are practically confined to New South Wales.

The total quantity of coal of Australian production (exclusive of bunker coal) exported from the Commonwealth to other countries in 1919 was 778,645 tons, valued at £615,621, of which amount 778,035 tons, valued at £614,981, were exported from New South Wales. Owing to disturbed conditions consequent on the war the figures are, of course, considerably below those of normal years.

In the following table will be found the quantity and value of the exports from New South Wales, at decennial intervals since 1881 and during the last five years. The figures are given on the authority of the Mines Department of that State, and include both bunker coal and coal exported from New South Wales to other States of the Commonwealth :—

EXPORTS OF NEW SOUTH WALES COAL, 1881 TO 1919.

Year	1881.	1891.	1901.	1911.	1915.	1916.	1917.	1918.	1919.
Quantity, 1,000 tons ..	1,030	2,514	3,471	5,024	4,668	3,434	3,264	3,422	3,503
Value, £1,000	417	1,307	1,682	2,664	2,485	1,873	2,384	2,525	2,919

The principal oversea countries to which coal was exported from New South Wales during the year 1919-20 are as shewn hereunder. The quantity and value refer strictly to exports, and exclude bunker coal :—

DESTINATION OF NEW SOUTH WALES OVERSEA EXPORTS OF COAL, 1919-20.

Country.	Quantity.	Value.	Country.	Quantity.	Value.
	Tons.	£		Tons.	£
Alaska	3,015	2,609	Java	83,727	73,303
Canada	5,017	3,763	Papua	4,879	4,309
Chile	31,314	26,773	New Caledonia ..	28,719	26,118
Straits Settlements	113,233	97,746	Gilbert and Ellice		
Fiji	40,088	33,929	Islands	4,932	3,943
New Zealand ..	506,552	392,705	Solomon Islands	1,290	1,320
India	14,480	12,270	Pleasant Island ..	5,454	4,615
Tonga	54,364	46,497	Ceylon	2,543	2,988
Peru	17,322	14,938	Japan	3,813	3,473
Philippine Islands	63,988	56,743	Guam	5,586	4,283
United States ..	21,826	18,840			

The quantity of bunker coal taken from New South Wales by oversea vessels was about 455,000 tons.

The distribution of the total output from New South Wales collieries during the last five years was as follows, the particulars given of quantity exported including coal shipped as bunker coal :—

DISTRIBUTION OF TOTAL OUTPUT OF NEW SOUTH WALES COAL, 1915 TO 1919.

Year.	Exports to Australasian Ports.	Exports to other Ports.	Local Consumption.	Total.
	Tons.	Tons.	Tons.	Tons.
1915	2,601,070	2,067,324	4,780,614	9,449,008
1916	2,203,659	1,230,439	4,693,063	8,127,161
1917	2,225,228	1,038,569	5,029,070	8,292,867
1918	2,697,033	724,643	5,641,500	9,063,176
1919	1,891,317	1,611,701	5,128,526	8,631,554

The figures quoted above are given on the authority of the New South Wales Mines Department. Owing to the abolition of the record of interstate trade it is impossible to give the quantities forwarded to each of the States of the Commonwealth.

5. **Consumption of Coal in Australia.**—An estimate of the consumption of coal in the Commonwealth may be arrived at by adding the imports to the home production, and deducting the exports (including bunker coal taken by oversea vessels). The following table shews the consumption of coal in Australia, computed in the manner specified, for the last five years :—

CONSUMPTION OF COAL IN AUSTRALIA, 1915 TO 1919.

Year.	Quantity of Coal Consumed.		
	Home Produce.	Produce of Other Countries.	Total.
	Tons.	Tons.	Tons.
1915	9,250,592	6,580	9,257,172
1916	8,266,215	11,068	8,277,283
1917	8,985,599	65,512	9,051,111
1918	9,866,323	23,777	9,890,100
1919	9,036,623	64,673	9,101,296

The bunker coal taken away in 1919 is estimated at 751,000 tons.

6. **Price of Coal.**—(i) *New South Wales.* The price of coal in New South Wales has been subject to considerable fluctuation since the date of first production. Up to the end of 1857 the average value of the total output was 11s. 10d. per ton. Next year the value had risen to nearly 15s., declining thereafter until in 1871 the price realised was 7s. From 1872 to 1879 there was a rise in value to 12s. Between 1882 and 1891 the price ranged between 8s. and 10s. From 1891 onwards there was a steady decline until 1898, when the average was 5s. 4d. Henceforward prices rose again until 1902, when 7s. 5d. was the average. A decline then set in until 1905, when the price stood at a little over 6s., followed by a rise of one penny in 1906, and a further rise of eightpence in 1907. In 1908 the average was 7s. 4d., in 1916, 8s. 2d., while in 1917 the price advanced to 10s. 8d. per ton, the highest recorded since 1879. In 1918 there was a further rise to 10s. 11d., and in 1919 to 12s. 7d. The price of New South Wales coal depends on the district from which it is obtained, the northern (Newcastle) coal always realising a much higher rate than the southern or western product. The average rate in each district during the last five years was as follows :—

PRICE OF COAL, NEW SOUTH WALES, 1915 TO 1919.

Year.	Northern District.		Southern District.		Western District.	
	Per ton. s. d.		Per ton. s. d.		Per ton. s. d.	
1915	7	7.24	6	11.23	5	6.08
1916	9	0.72	7	1.77	5	6.90
1917	11	5.14	9	11.89	7	11.92
1918	11	8.03	9	10.32	8	8.04
1919	13	5.81	11	9.64	9	4.19

(ii) *Victoria.* In Victoria the average price of coal up to the 31st December, 1890, was 19s. 3d. per ton. In 1895 the price was still as high as 12s. 2d., but in the following five years there was a serious decline, the value in 1900 being quoted at 9s. 7d. per ton. In 1901, however, there was an astonishing rise, the figure being as high as 14s. 7d. Since that year, however, the price again declined up to 1916, the average for 1905 being 10s. 2d.; for 1909, 12s.; for 1912, 8s. 9d.; for 1913, 9s. 3d.; for 1914 and 1915, 9s. 4d.; and for 1916, 10s. 4d. In 1917, however, the price rose to 14s. 5d., in 1918 to 15s. 11d., and in 1919 to 17s. 7d. per ton. These averages are exclusive of brown coal, the production of which in 1919 was valued at 6s. 2d. per ton.

(iii) *Queensland.* Prices in the principal coal-producing districts during the last five years were as follows :—

PRICE OF COAL, QUEENSLAND, 1915 TO 1919.

District.	Value at Pit's Mouth.				
	1915.	1916.	1917.	1918.	1919.
	Per ton. s. d.	Per ton. s. d.	Per ton. s. d.	Per ton. s. d.	Per ton. s. d.
Ipswich	7 3	7 11	10 8	11 0	12 7
Darling Downs	8 11	9 10	12 9	13 5	14 10
Wide Bay and Maryborough ..	11 10	12 2	15 10	16 9	19 2
Rockhampton	8 6	9 6	11 10	12 4	13 4
Clermont	7 8	7 9	11 5	10 5	11 2
Bowen	15 0
Mount Mulligan (Chillagoe) ..	12 7	13 4	15 6	16 6	17 8
Average for State	8 0	8 7	11 5	11 8	13 2

The readjustment of prices and wages in the industry was responsible for the high averages during the last three years.

(iv) *Western Australia.* The average price of the Collie (Western Australia) coal up to the end of 1901 was 9s. 4d. per ton, the price in 1901 being 11s. 7d. In 1902 the average stood at 12s. 3d., and from that time the price fell steadily until 1906, when it was 7s. 7½d. per ton. In 1907, the average price was 7s. 8½d.; in 1908, 8s. 7½d.; in 1909, 8s. 5½d.; in 1910, 8s. 8d.; in 1911, 8s. 10d.; in 1912, 9s. 2d.; in 1913, 9s. 9d.; in 1914, 9s. 4d.; in 1915, 9s. 8d.; in 1916, 9s. 9d.; in 1917, 11s. 9d.; in 1918, 12s. 1d.; and in 1919, 13s. 5d. per ton.

(v) *Tasmania.* The average price per ton of coal at the pit's mouth in Tasmania was 8s. in 1901. In 1902 it was 8s. 7d.; in 1903, 8s. 9d.; in 1904 and 1905, 9s. 8d.; in 1906, 9s. 9d.; in 1907, 1908, and 1909, 8s.; in 1910, 11s. 9d.; in 1911 and 1912, 9s. 2d.; in 1913, 9s. 3d.; in 1914, 9s. 2d.; in 1915, 9s. 5d.; in 1916, 9s. 9d.; in 1917, 12s. 2d.; in 1918, 12s. 6d.; and in 1919, 14s. 2d. per ton.

7. *Price of Coal in the United Kingdom.*—During the five years 1914–18 the average value of coal at the pit's mouth in the United Kingdom has risen rapidly, the price in 1914 being 10s.; in 1915, 12s. 6d.; in 1916, 15s. 7d.; in 1917, 16s. 9d.; and in 1918, 20s. 11d. per ton.

8. *Employment and Accidents in Coal Mining.*—The number of persons employed in coal mining in each of the States during the year 1919 is shown below. The table also shows the number of persons killed and injured, with the proportion per 1,000 employed, while further columns are added shewing the quantity of coal raised for each person killed and injured, this being a factor which must be reckoned with in any consideration of the degree of risk attending mining operations.

Returns published by the Board of Trade, England, some years ago, gave the total known number of persons engaged in coal mining in the principal countries of the world as 3½ millions, the number in the United Kingdom being 1,068,000; the United States, 723,000; Germany, 628,000; France, 199,000; Russia, 169,000; Belgium, 146,000; Austria, 75,000; India, 133,000; and Japan, 145,000.

The latest available returns shew the rate in the United Kingdom in respect of deaths through accidents in coal mines as 1.40, and for the British Empire 1.48 per 1,000 persons employed in coal mines. For France the rate is given as 1.17, for Germany 2.30, and the United States 3.35. For foreign countries generally the rate is stated at 2.48 per 1,000.

EMPLOYMENT AND ACCIDENTS IN COAL MINING, 1919.

State.	Persons Employed in Coal Mining.	No. of Persons. *		Proportion per 1,000 Employed.		Tons of Coal Raised for each Person.	
		Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
New South Wales	18,178	17	100	0.94	5.50	508,000	86,000
Victoria ..	2,192	5	13	2.28	5.93	107,000	41,000
Queensland ..	2,259	9	28	3.98	12.39	104,000	33,000
Western Australia	726	1	118	1.38	162.53	402,000	3,000
Tasmania ..	209	..	9	..	43.06	..	7,000
Commonwealth ..	23,564	32	268	1.36	11.37	330,000	39,000

The figures for New South Wales include a small number of shale miners.

§ 11. Coke.

1. **Production of Coke.**—Notwithstanding the large deposits of excellent coal in Australia, there was, prior to the war, a fairly considerable amount of coke imported from abroad. In 1918-19, however, the import was negligible. The table hereunder gives the production in New South Wales during the last five years :—

COKE MADE IN NEW SOUTH WALES, 1915 TO 1919.

Year		1915.	1916.	1917.	1918.	1919.
Quantity tons	417,753	437,587	455,587	608,492	424,773
Value, total	.. £	313,241	387,571	541,093	647,798	550,127
Value per ton	..	15s. 0d.	17s. 9d.	23s. 9d.	21s. 4d.	25s. 11d.

During the last five years the industry has made considerable progress. It provides a profitable means of disposal for the small coal which until recent years was allowed to go to waste.

A small quantity of coke is made in Queensland, the quantity returned in 1919 being 4,562 tons, but the bulk of that used in ore reduction is imported, mainly from New South Wales. The following table shews the amount manufactured locally during the last five years :—

QUEENSLAND.—COKE MANUFACTURED, 1915 TO 1919.

Year	1915.	1916.	1917.	1918.	1919.
Manufactured locally	tons			17,085	17,904	13,399	14,437	4,562

It is estimated that the total amount of coke consumed for smelting purposes in Queensland during 1918 was 74,000 tons, of which 14,000 tons were produced locally, and 60,000 tons were imported from New South Wales. Records of importation during 1919 are not available.

GRAPHS SHEWING VALUES OF THE PRINCIPAL MINERALS PRODUCED IN THE COMMONWEALTH, 1840 TO 1919.

(See pages—for gold, 340; silver, 348; iron, 358; zinc, 357; copper, 351.)

EXPLANATION OF GRAPHS.—The values shewn in the above diagrams are those of the total Commonwealth production of certain of the most important minerals in successive years from 1840 to 1919.

The base of each small square represents an interval of one year, and the vertical height represents in the case of gold £1,000,000, in the case of silver and lead, zinc, and copper £200,000, and in the case of iron £20,000.

GRAPHS SHEWING VALUES OF THE PRINCIPAL MINERALS PRODUCED IN THE
COMMONWEALTH, 1840 TO 1919—*continued.*

(See pages 364 for coal ; 354 for tin ; and 339 for total mineral production.)

EXPLANATION OF GRAPHS.—The values shewn in the above diagrams are those of the total Commonwealth production of certain of the most important minerals in successive years from 1840 to 1919.

The base of each small square represents an interval of one year, and the vertical height represents in the case of coal and tin £200,000, and in the case of total mineral production £1,000,000.

§ 12. Oil Shale and Mineral Oils.

1. **Production of Shale.**—(i) *New South Wales.* As pointed out by Mr. E. F. Pittman, the name kerosene shale has been rather inaptly applied to a variety of torbanite, cannel, or boghead mineral found at various geological horizons in New South Wales. The mineral does not, as a rule, split in parallel layers, the fracture being rather of a conchoidal type. Pure samples have been found to contain over 89 per cent. of volatile hydro-carbons. The discovery of the mineral in New South Wales dates probably as early as 1802. Its occurrence in the Hartley Vale district was noted by Count Strzelecki in 1845. The mineral has been found at several places in the Upper Coal Measures, and in at least two in the Lower Carboniferous. Production on anything like a large scale commenced in 1868, when about 17,000 tons, valued at £48,000, were raised. The production in 1919 amounted to 25,453 tons, valued at £37,968, as compared with 32,395 tons, valued at £39,676, in 1918. For 1919 the whole of the production came from the Western District.

(ii) *Victoria.* Up to the present no extensive deposit of oil shale has been located in Victoria.

(iii) *Queensland.* The discovery of natural gas and traces of oil in a deep bore at Roma has fostered the hope that energetic development will lead to the discovery of mineral oil in quantity in this locality. During 1919 the bore reached a depth of 3,705 feet, but at the latest available date further drilling operations were suspended owing to the tools getting fast in the bore. Oil-bearing shales are common in many parts of the State. The deposit at Duaringa on the Central railway line shewed a thickness of 6 feet, and contained about 30 gallons of oil to the ton. Inflammable gas and a little oil have been noted in bores put down for coal on the Dawson River. There are shale deposits at Munduran Creek, near Gladstone, Casuarina Island, Redbank Plains in the Ipswich District and Murphy's Creek, near Toowoomba. It is stated that the borings have not so far penetrated to a sufficient depth to properly test the strata.

(iv) *South Australia.* Bitumen is occasionally washed up on the Southern coasts of the continent from Port Davey in Tasmania to Cape Leeuwin in Western Australia. Specimens found on Kangaroo Island at one time led to the belief that they were the product of a terrestrial petroliferous area. Expert opinion now, however, inclines to the idea that the material is sea-borne, but the source of origin is unknown. Similar occurrences of this mineral have been reported from the coasts of California, South Africa, and New Zealand. A bore has been put down to a depth of over 4,000 feet, with negative results, by the South Australian Oil Wells Co. A large number of licenses to search for oil was taken out some years ago and bores were put down near Kingston and near Robe.

(v) *Western Australia.* A deposit of carbonaceous shale of considerable thickness is known to exist at Coolgardie, but the mineral has not yet been raised in any quantity. It is stated that small seepages of oil have been noted near Wonnerup, and indications have been reported from the neighbourhood of Albany and Esperance.

(vi) *Tasmania.* Tasmanite shale has been discovered in the basins of the Mersey, Don, and Minnow Rivers, and the Government Geologist estimates the probable capacity of the beds at 12,000,000 tons. The crude oil content of average quality shale has been estimated at 40 gallons to the ton. In July, 1912, the Railton-Latrobe Shale Oil Company acquired the leases and plant of the Tasmanian Shale and Oil Company, at Latrobe, and it was proposed to develop the deposits on a large scale. The production in 1914 was, however, small, amounting to 75 tons, valued at £75, while no returns from this source were included in the production records for 1915. In 1916, the Company raised 1,286 tons of shale, valued at £1,286, and in 1919, 600 tons valued at £900. Large pieces of asphaltum have been discovered in places along the sea coast and in several of the bays of Port Davey Harbour, but it is believed that the material originates in submarine beds. A bore was put down in 1916 by a private company on Bruni Island in search of petroleum, but after sinking about 429 feet, operations ceased for lack of funds.

In 1917 a deposit of tasmanite shale was located on the Cam River.

(vii) *Northern Territory.* The existence of oil shale has been reported in the Boroloola district, and several oil licenses were applied for some years ago in the Victoria River district. Results were, however, negative, and experts have pronounced unfavourably on the prospects.

(viii) *Papua.* Many indications suggest that oil-bearing strata exist over an extensive area in the Gulf Division of Papua. Seepages of oil and natural gas are known, and, in addition, light oil of excellent quality has been obtained from sandy strata encountered in most of the prospecting bores put down under the direction of the Commonwealth Government. Reconnaissance surveys have been made of the country where evidences are known to exist, while selected areas are being surveyed in greater detail. Several test bores have been sunk, the deepest being over 1,800 feet; in each case quantities of inflammable oil and gas have been met with, but so far not in sufficient bulk for commercial purposes. (See also Section XXIX., Papua.)

2. *Export of Shale.*—In 1916–17 New South Wales exported a small quantity of shale. There was no export in the succeeding year, and in 1919, 5 tons were exported valued at £21.

3. *Shale Oil Bounties.*—The Shale Oils Bounties Act 1910 provided for the payment of bounties on certain goods manufactured in Australia from Australian shale on or after the 1st July, 1910, and before the 1st July, 1913. The total amount made available for bounties under this Act was £50,000. During the year 1913, the bounties paid in New South Wales amounted to £985 on 118,000 gallons of kerosene, and £809 on 324 tons of refined paraffin wax. Under the Shale Oil Bounty Act of 1917 a sum of £270,000 was provided for bounty on crude shale oil at various rates. Bounty to the amount of £26,407 was paid on 2,816,718 gals. of crude shale oil in 1918–19.

On the 2nd January, 1920, the Commonwealth Government offered a reward of £10,000 for the discovery of petroleum oil in Australia, subject to the fulfilment of certain conditions. Under the Native Industries Encouragement Act of 1872, the Government of South Australia offered a bonus of £5,000 on the production within the State of 100,000 gals. of crude petroleum containing not less than 90 per cent. of products obtainable by distillation.

§ 13. Other Non-Metallic Minerals.

1. *Alunite.*—Probably the most remarkable deposit of alunite in the world occurs at Bullahdelah, in the county of Gloucester, New South Wales, a large proportion of a low bluff ridge in the district being composed of this mineral. The deposits are worked by quarrying, and from 1890 up to the end of 1919, 54,000 tons had been exported, valued at £191,000, the exports for the year 1919 being 2,485 tons, valued at £14,910.

Deposits of a high-class alunite are reported to have been discovered near Sunbury, in Victoria.

According to the Geologist's report, apart from its scientific interest, no commercial importance attaches to the presence of natural alum over the area examined near Boonmoo, on the Chillagoe Railway in Queensland.

In South Australia an extensive deposit of the mineral was located in 1913 at Carrickalinga Head, on the coast north of Normanville, and within a short distance of Adelaide. Fresh discoveries were recently reported on the western shores of St. Vincent's Gulf. It is stated that the specimens so far analyzed have proved richer in valuable constituents than any similar find yet recorded. The mineral returns for 1917 shew a small production, but none was recorded in 1918 and only 60 tons in 1919.

2. *Asbestos.*—This substance has been found in various parts of Australia, but up to the present has not been produced in any considerable quantity. In New South Wales 1,527 tons of fibrous rock, which on treatment yielded 123 tons of fibre valued at £1,500, were raised by a company from deposits in the Barraba division. A small quantity was also raised in 1919 at Lewis Ponds in the Orange division. In Queensland seams of asbestos have been found over a belt of country extending from Cawarral to Canoona, as well as in other districts. Samples of the fibre proved suitable for the manufacture of fibro-cement, sheeting, and tiles, but so far the deposits have not been commercially exploited. In Western Australia a deposit of the fibrous chrysotile variety was located at Soanesville, on the Pilbara goldfield, and £154 worth of this mineral was raised in 1909. The discovery of a deposit of commercial quality was reported from

the Nullagine district in 1917; about 50 tons, valued at £1,400, were produced in 1919. In 1899 Tasmania raised 200 tons, valued at £363, but there was no further production until 1916, when a small quantity was raised at Anderson's Creek, near Beaconsfield. In 1917, 271 tons, valued at £271; in 1918, 2,854 tons, valued at £5,008, and, in 1919, 51 tons, valued at £1,275, were produced. Deposits of asbestos of the mountain leather and mountain cork varieties have been discovered at Oodlawirra, while deposits of a good blue variety have been discovered near Hawker and about 23 miles from Eudunda, in South Australia.

3. Barytes.—In New South Wales during 1919 about 579 tons of barytes, valued at 1,851, were obtained, of which 400 tons were raised at Mandurama in the Cowra division, and 179 tons at Lue in the Mudgee division, while small quantities were raised in the Cooma and Braidwood divisions. The production in South Australia during 1919 was given as £5,264. In this State there are extensive deposits of the mineral in the Willunga and other districts. About 399 tons of barytes were produced in Tasmania in 1919.

4. Clays and Pigments.—Valuable deposits of clays and pigments of various sorts are found throughout the Commonwealth. There is a considerable local production of earthenware, bricks, and tiles, but the finer clays have not as yet been extensively used. In New South Wales the production of kaolin in 1919 amounted to 2,254 tons valued at £3,243, of which 500 tons, valued at £1,000, were raised at Morongla Creek in the Cowra division, and 373 tons, valued at £485 were raised in the Murrumburrah division. Production was also recorded from the Parkes, Gulgong, Gunning, Goulburn, Mudgee, and Sydney divisions. Deposits of steatite were worked during 1919 in the Murrumburrah division, the quantity raised during the year at Wallendbeen amounting to 200 tons, while 150 tons were produced in the parish of Wallendoon, County Harden. Near Morangaroo 5,000 tons of silica were raised by the Silica Fire Brick Company. Extensive deposits have been located in the parishes of Conyola and Uladulla in the Milton division. About 200 tons of ochre, valued at £300, were raised in the Dubbo division; 165 tons of red ochre were raised near Glen Innes, and 60 tons of red oxide of iron at Granville, near Sydney. In Victoria 950 tons of kaolin were obtained at Egerton, 240 tons at Stawell, 700 tons at Pyalong, and 101 tons at Carngham, the total value of the production being given at £2,255. A small quantity of pigments was raised from leases in the Balnarring and Knowsley areas. In Queensland, 8,368 tons of fireclay, valued at £2,051, were mined during the year 1919, the whole of which was obtained in the Mount Morgan district. On Kangaroo Island, South Australia, where, it is stated, the first pottery mill in the Commonwealth was erected, there are vast deposits of felspar, china-stone, silica, and firebrick clay. There are also very extensive deposits of fireclay near Ardrossan on the Yorke Peninsula. Ochre deposits suitable for making coloured tiles are found near Port Noarlunga. Porcelain and other clays of good quality have been found in Tasmania at Beaconsfield, Sorell, Hagley, etc. Deposits of ochre have been opened up at Dubbo, Wellington, and Marulan, in New South Wales, and ochres and pigments of excellent quality have been produced therefrom. Extensive deposits of iron oxide, giving a return of 80 per cent. ochre, have been discovered near Oodlawirra in South Australia. Oil and water paints of good quality have been made from coloured ochres from Sorell, in Tasmania, and a deposit of ochre of good quality has been located near Mowbray. A company is making paints from the latter deposits, and also from deposits on leases near Ilfracombe. At Kingston a valuable clay deposit has been opened up.

5. Coorongite.—This peculiar india-rubber like material was first noted many years ago near Salt Creek and in the vicinity of Coorong Inlet, in South Australia, as well as at various localities on Kangaroo Island. It was thought that the substance owed its origin to subterranean oil-bearing strata, but so far the search for petroleum has not been attended with success. (See also § 12, 1 (iv.)) While the origin of coorongite is still in doubt, it is held by some observers that it originates from the blue-green algae which frequently abound in swamps and shallow inland waters. Similar material has been found in Portuguese East Africa, and on the shores of lakes in Siberia.

6. Fuller's Earth.—Small quantities of this material were produced in 1917, from leases in the Narrabri division, New South Wales.

7. Graphite.—Graphite is found in New South Wales near Undercliff Station, in the county of Buller, and 100 tons raised during 1919 realised £100 per ton.

Owing to the low grade of the ore there is only a limited market for it. In Victoria the mineral occurs in Ordovician slates in several of the goldfields, but is not worked. In Queensland graphite was raised some years ago by the Graphite Plumbago Company at Mt. Bopple, near Netherby, on the Maryborough-Gympie line. In South Australia deposits are found at various places in Eyre's Peninsula. While a large proportion of the product is not suitable for commercial use, the work so far done shews that flake graphite containing as high as 80 per cent. carbon can be obtained. The Government is offering a bonus of £1 per ton for the production of a marketable graphite. In Western Australia deposits occur at Munghlinup Creek, near the Oldfield River, at Northampton, in the Murchison division, and on the Donnelly River, at Kendenup, about 40 miles from Albany. At the last-mentioned locality, where the ore is of good grade, a fair amount of developmental work has been done, but the export in 1918 was small, amounting to 5 tons, valued at £75, and none of the mineral was exported in 1919.

8. Gypsum.—This mineral is found in various places in the Commonwealth. It occurs in two forms, large crystals, and a floury earth consisting of minute crystals and known as "copi." Both forms are exceedingly pure. It is used largely as a natural manure and to some extent in the manufacture of Portland cement. Gypsum, or hydrous sulphate of lime, when burnt, forms plaster of Paris. In Victoria during 1919 there was a production of 820 tons, valued at £482, obtained chiefly at Lake Boga. Numerous deposits of gypsum are found in Southern Yorke's Peninsula in South Australia. The production in 1919 was valued at £18,725. A factory for the manufacture of plaster of Paris has been erected by the Permasite Co. on its lease at Dry Bone Lake. A deposit of gypsum sand containing practically an inexhaustible supply is found on the edge of Lake Austin in Western Australia.

9. Magnesite.—Deposits of this mineral have been discovered at several localities in New South Wales. During 1919, 3,435 tons, valued at £5,093, were raised in the Fifield division, and 5,829 tons, valued at £2,939, at Attunga, in the Tamworth division. The mineral is found at Heathcote in Victoria, where 77 tons, valued at £231, were produced in 1919. There are deposits in the neighbourhood of Rockhampton and Bowen in Queensland, and a deposit of exceptional purity has been located in the vicinity of Tumby Bay in South Australia, about five miles from the township of Tumby. The cost of transport is a drawback to the production from the Copley (Leigh Creek) district. The Broken Hill Co. is working a small deposit near the Beetaloo Waterworks. Production in 1919 amounted to 273 tons, valued at £508. During 1915, 688 tons of magnesite, valued at £1,196, were exported from Western Australia, but the export in 1916 amounted to 12 tons only, in 1917 to 42 tons, in 1918 to 62 tons, while none was exported in 1919. A large area of magnesite bearing country has been located at Bulong, about 20 miles east of Kalgoorlie.

10. Tripolite, or Diatomaceous Earth.—Although tripolite has been found at Barraba, Cooma, Wyrallah, and in the Warrumbungle Mountains in New South Wales, the deposits have not been worked commercially on any considerable scale. From the deposits at Middle Flat, in the Cooma division, 88 tons of diatomaceous earth, valued at £246, were produced in 1919, and small quantities were obtained in the Coonabarabran and Narrabri divisions. In Victoria there is a remarkably pure deposit at Lilliecur, near Talbot, while beds of the mineral are also met with at other places in the Loddon Valley, near Ballarat, at various places close to Melbourne, at Craigieburn, Lancefield, Portland, Swan Hill, Bacehus Marsh, etc. During 1919, a production of 140 tons, valued at £560, was recorded. Fairly extensive deposits of diatomite exist in Queensland, in the Nerang, Beaudesert and Canungar areas, but the various outcrops have as yet been only partially examined. In Tasmania a deposit of diatomaceous earth has been located at Oatlands, but its use for the manufacture of explosives is apparently prejudiced by the circumstance that the diatoms are pulverised and contaminated with clay.

11. Salt.—Salt is obtained from salt lakes in the Western and North-western Districts of Victoria, and from salterns in the neighbourhood of Geelong. Figures regarding production are, however, not available for publication. Large quantities are also obtained from the shallow salt lakes of South Australia, chiefly on Yorke Peninsula. Lake Hart, about 60 square miles in area, situated about 120 miles N.W. from Port Augusta, contains immense supplies of salt of good quality, which at present, however, owing to distance from market, possess no economic value. The salt is simply scraped from the beds of the lakes in summer time and carted to the refinery.

It is stated that care must be taken not to leave too thin a crust of salt over the underlying mud, as the resultant "crop" after the winter rains will in that case be smaller than usual. A bore put down near Kingscote, on Kangaroo Island, revealed brine from which salt can be profitably obtained by evaporation. About 69,000 tons of crude salt were produced during 1919. In Western Australia supplies are obtained from dried-up shallow lakes and consumed locally or exported. The chief centres of production were formerly Rottnest Island, near Fremantle, Middle Island, near Esperance, and Port Gregory; but during recent years the bulk of the demand has been supplied from imports.

Attention has recently been devoted to the occurrence of salt in Queensland, more especially to the deposits in the vicinity of the Mulligan River in Western.

12. Natural Manures.—Gypsum has already been referred to (see 8 *ante*). South Australia possesses deposits of rock phosphate near Port Clinton and Ardrossan on Yorke Peninsula, at Belvedere near Kapunda, and at Koorunga, and also at many other places which have only been prospected to a small extent. The production in 1919 was 5,950 tons, valued at £8,982. Phosphate of lime has been found in small quantities chiefly in the limestone caves of New South Wales. The production in 1919 amounted to 576 tons of phosphate rock, valued at £2,016, raised by the Canowindra Phosphate Co. in the Cowra division. In Victoria, about 2,500 tons of phosphate rock were raised in 1919 at Mansfield. Although it can hardly be considered a mineral product, mention may be made here of the large accumulations of guano on the Abrolhos Islands, off the coast of Western Australia, in the neighbourhood of Geraldton. The deposits vary in thickness from four to twenty-seven inches. During the years 1876–80 over 36,000 tons were raised; no figures are available shewing the quantity raised in recent years.

§ 14. Gems and Gemstones.

1. Diamonds.—Diamonds were first noted in New South Wales by E. J. Hargraves in 1851, and in October of the same year by Geological Surveyor Stutchbury. The Cudgong field was discovered in 1867, and shortly afterwards the Bingara diamondiferous deposits were located. Stones of small size are also found at Cope's Creek and other places in the Inverell district. The largest diamond won in New South Wales was reported to have been obtained in 1905 at Mt. Werong, near Oberon, and weighed 28 $\frac{1}{8}$ carats. It is difficult to secure accurate returns in connexion with the production of precious stones, but the yield of diamonds in 1919 was estimated at 1,774 carats, valued at £1,706, while the total production to the end of 1919 is given at 195,413 carats, valued at £133,987. The yield in 1919 was contributed by miners working in the vicinity of Copeton, in the Tingha division. Small quantities of diamonds are found in Victoria in the gravels of streams running through granite country in the Beechworth district, at Kongbool in the Western District, and near Benalla. The stones are generally small and the production up to date has been trifling. In 1912, eleven small diamonds, valued at £20, were picked out of the sluice boxes of the Great Southern alluvial mine at Rutherglen. A few small diamonds have been found in the Pilbara district in Western Australia. In South Australia diamonds have been found on the Echunga goldfield, the most notable gem being Glover's diamond, which was sold for £70. A few small diamonds have, from time to time, been found in Tasmania, chiefly while sluicing for gold in the Donaldson district.

2. Sapphires.—These gems were discovered in New South Wales in 1851, near Burrandong. They have also been found in small quantities near Inverell, and at a few other localities in the State. During 1919, 1,150 carats of sapphires were obtained at Swamp Oak in the Inverell division. Specimens of sapphire have been found in Victoria, but the stones of commercial size are generally of little value owing to flaws.

In Queensland sapphires are found in the gravel of creek beds, between Withersfield and Anakie on the Rockhampton-Winton railway line. The gems shew excellent fire and lustre, but the colour is darker blue than the Oriental sapphire. Hyacinths are occasionally found in association with the gems. The production of sapphires in Queensland in 1919 was valued at £42,883 as compared with £600 in 1915, and over £40,000 in 1913. The gem mining industry practically collapsed on the outbreak of the war, as the German buyers ceased business. With the opening up of markets in London and Paris,

however, matters assumed a more satisfactory footing and business remained fairly satisfactory in 1918. During 1919, owing to the keen demand for the gems, prices rose rapidly. It is stated that the increased demand was partly due to the circumstance that many persons in Europe were converting their assets into gems, in view of the international value possessed by the latter, and was partly brought about by development of the gem-cutting industry in France and England. The output of sapphires in 1919 was valued at £42,883, as compared with £16,591 in 1918.

Sapphires are plentifully found in the tin drifts of the Ringarooma and Portland districts in Tasmania, but the stones are, as a rule, small and not worth saving.

3. Precious Opal.—This stone was first discovered in New South Wales at Rocky Bridge Creek on the Abercrombie River, in the year 1877, and later a most important discovery was made at White Cliffs in the Wilcannia district, which, for a time, contributed the bulk of the production. In 1919, however, out of a total production valued at £27,552, the yield from the Lightning Ridge field, near Walgett, amounted to £25,000, while the output from the White Cliffs field was £1,900. A new field was opened up in 1919 in the Ballina division, and about £600 worth of opal was raised therefrom. Some very fine stones are at times obtained, one weighing 5 ozs. and valued at £300 being recovered in 1911. Occasionally, black opals of very fine quality are found, one specimen from the Wallangulla field, weighing $6\frac{1}{2}$ carats, being sold in 1910 for £102. It is stated that this locality is the only place in the world where the "black" variety of the gem has been found. The total value of opal won in New South Wales since the year 1890 is estimated at £1,475,000.

Small quantities of precious opal are also found in the Beechworth district in Victoria.

In Queensland, the first recorded discovery of the gem dates from about 1875. The opaliferous district stretches over a considerable area of the western interior of the State, from Kynuna and Opalton as far down as Cunnamulla. The yield in 1919 was estimated at £600, and up to the end of that year at about £179,000. These figures are, however, merely approximations, as large quantities of opal are disposed of privately to buyers on the fields, no record of which is obtained. At present, the industry suffers from the peculiar disability that in good seasons there is plenty of work available on the pastoral stations, and most men prefer this to the uncertain results obtainable by fossicking, while in dry seasons when constant work is not obtainable, the search for opal is limited by the difficulty in obtaining sufficient water.

Precious opal has been discovered in South Australia in a locality 144 miles N. by E. of Tarcoola. The specimens show similar characteristics to those obtained at White Cliffs in New South Wales. Production in 1919 amounted to about £20,000.

4. Other Gems.—Emeralds were found in New South Wales in the year 1890, near the township of Emmaville, the largest specimen found in the district weighing 23 carats in the rough. Altogether 2,225 carats were sent to London during that year, some of the gems bringing £4 a carat, but the production has since dwindled. The mine at the Glen in the Emmaville division was re-opened and worked for a short period during 1908, when about 1,000 carats of emeralds, valued at about £1,650, were obtained. The largest stone in the rough weighed 60 carats. Small emeralds of fine quality have been found at Poona, in Western Australia, and it is stated that prospecting at greater depths would possibly reveal the existence of larger specimens. Amongst other gems found in New South Wales at various times may be mentioned *turquoises*, discovered in 1894, near Bodalla; *topazes*, fine specimens of which have been obtained in the New England district; and *zircon*s and *garnets*. Zircons of small size are plentifully found in the vicinity of Table Cape in Tasmania. Topazes are common in the tin drifts of Tasmania, and some fine specimens have been found. Turquoises are also found in thin veins in Victoria. In Gascoigne's mine, situated near the King River, in the parish of Edi, samples of the gem have been found equal in colour to the best Persian stone, and a considerable quantity of turquoises from this mine has been sold in England and Germany. Fine *agates* are found in many places in Victoria, but have not been made use of to any extent. These gems also occur plentifully in the bed of Agate Creek, about four miles south of Forsayth, on the Etheridge field in Queensland. Garnets are found in Western Australia, and beautiful specimens of *crocidolite* have been obtained at Yarra Creek in the Murchison district. *Rubies* have been found at various places in New South

Wales and Queensland. *Tourmaline* has been found on Kangaroo Island, in South Australia, and *beryls* near Williamstown, Victoria, and at Poona in Western Australia. Very large but impure beryl crystals have been found at Ben Lomond in Tasmania. Some fine samples of *chiasolite* or luck stone have been found at Mt. Howden, near Bimbourie, in South Australia.

(C) GENERAL.

§ 15. Numbers Engaged, Wages Paid, and Accidents in Mining.

1. **Total Employment in Mining.**—The number of persons engaged in the mining industry in each State and in the Commonwealth fluctuates according to the season, the price of industrial metals, the state of the labour markets, and according also to the permanence of new finds, and the development of the established mines. During the year 1919 the number so employed was as follows:—

NUMBER OF PERSONS ENGAGED IN MINING, 1919.

State.	Number of Persons Engaged in Mining for						Total.
	Gold.	Silver, Lead, and Zinc.	Copper.	Tin.	Coal and Shale.	Other.	
New South Wales ..	1,656	6,556	1,148	2,171	18,178	2,750	32,459
Victoria ..	3,065	38	2,192	211	5,506
Queensland ..	792	145	2,521	1,114	2,259	1,190	8,021
South Australia ..	100	..	400	800	1,300
Western Australia ..	7,242	74	72	209	726	23	8,346
Tasmania ..	73	798	1,571	1,303	209	459	4,413
Northern Territory ..	60	3	12	190	..	257	522
Commonwealth ..	12,988	7,576	5,724	5,025	23,564	5,690	60,567

The following table shews the number of persons engaged in mining in the Commonwealth during each of the years 1891, 1901, and 1919, together with the proportion of the total population so engaged. The general falling-off since 1901 is due to the stagnation caused by the war, and largely also to the decline in the gold-mining industry:—

PROPORTION OF PERSONS ENGAGED IN MINING, 1891, 1901, AND 1919.

State.	1891.		1901.		1919.	
	Miners Employed.	No. per 100,000 of Popu- lation.	Miners Employed.	No. per 100,000 of Popu- lation.	Miners Employed.	No. per 100,000 of Popu- lation.
New South Wales ..	30,604	2,700	36,615	2,685	32,459	1,621
Victoria ..	24,649	2,151	28,670	2,381	5,506	368
Queensland ..	11,627	2,934	13,352	2,664	8,021	1,106
South Australia ..	2,683	834	7,007	1,931	1,300	278
Western Australia ..	1,269	2,496	20,895	11,087	8,346	2,516
Tasmania ..	3,988	2,695	6,923	4,017	4,413	2,036
Northern Territory	522	..
Commonwealth ..	74,820	2,341	113,462	2,992	60,567	1,154

2. **Wages Paid in Mining.**—Particulars regarding wages paid in the mining industry, which in earlier issues of the Year Book were given in this section, have now been transferred to the section dealing with Labour and Industrial Statistics.

3. **Accidents in Mining, 1919.**—The following table gives particulars of the number of men killed and injured in mining accidents during the year 1919:—

NUMBERS KILLED AND INJURED IN MINING ACCIDENTS, 1919.

Mining for—	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	N. T.	C'wealth.
KILLED.

§ 16. State Aid to Mining.

1. **Introduction.**—The terms and conditions under which the States granted aid in mining were alluded to at some length in previous issues (see Year Books 4 and 5), but owing to considerations of space they have been omitted from this issue. A résumé of what is being done in this direction at the present time is given hereunder.

2. **New South Wales.**—The chief aid given in this State is in the direction of assistance to prospectors. Up to the end of 1919 the total sum expended in this manner amounted to £498,127, of which £8,691 was advanced in 1919.

3. **Victoria.**—Since the inception of the Mining Development Act in 1897, the expenditure under its varying provisions has been £733,605, of which £339,635 was disbursed in connexion with advances for prospecting, £211,210 on boring, £69,603 on testing plants, £62,841 on roads and tracks, and £50,316 on purchase of cyanide plant, equipment of School of Mines, and miscellaneous. In 1920–21, £17,617 was expended as follows:—Construction and maintenance of State batteries, £4,611, boring, £11,180, advances to companies and private parties, £1,000, and £826 in geological and other surveys; in addition, £14,000 was lent to the Morning Star Gold Mine at Woods' Point, of which £3,000 has been repaid.

4. **Queensland.**—State assistance to the mining industry in 1919 amounted to £27,819, of which £8,808 consisted of loans in aid of deep sinking; £11,195 grants in aid of prospecting; £1,251 in aid of roads and bridges to gold and mineral fields; £3,452 advances under Mining Machinery Advances Acts; and £3,113 in connexion with boring for oil at Roma. At the State battery at Bamford 1,070 tons of tin ore and 253 tons of ore containing wolfram molybdenite were treated in 1919 for a recovery of 25 tons of tin, valued at £3,308, and 90 tons of wolfram, &c., concentrates, valued at £19,915. State assay offices are maintained at Cloncurry and Mareeba. During 1919 the Government acquired the smelters, railways, &c., of the Chillagoe Company.

5. **South Australia.**—Aid is given to the mining industry under the terms of the Mining Act of 1893, and previous measures. Up to the end of 1919 the total amount of subsidy paid was £65,109, of which £11,219 has been repaid, and £2,250 written off, leaving a debit of £51,640. Portion of this amount is represented by machinery that has fallen into the hands of the Government. Repayments are made from profits, but in only two instances have the profits enabled a full return to be made.

6. **Western Australia.**—Under the Mining Development Act of 1902 assistance was granted in 1919 in accordance with the subjoined statement :—Advances in aid of mining work and equipment of mines with machinery, £7,711; aid to prospectors, £2,323; advances in aid of boring, £352; subsidies paid on stone crushed for the public, £319; miscellaneous, £1,894; making a total of £12,604. The receipts under the Act exclusive of interest payments came to £2,835, of which £2,065 consisted of refunds of advances.

In 1919 there were 32 State batteries in operation. The amount expended thereon up to the end of 1919 was £91,981 from revenue and £286,233 from loan, giving a total of £378,214. During the year receipts amounted to £29,071, and working expenditure to £38,996.

The total value of gold and tin recovered to the end of 1919 at the State plants was £5,245,000, resulting from the treatment of 1,237,000 tons of gold ore and 79,000 tons of tin ore, together with a small amount from residues.

7. **Tasmania.**—Under the Mining Trust Fund Act of 1918 all balances existing at the end of 1918 were taken over from the Aid to Mining Act of 1912, and the various Appropriation Acts of 1913 and 1917. The fund was established for the purpose of assisting prospectors and of making the final payments in connexion with the closing of the State Argent Mine. During 1919 a sum of £2,066 was expended in aid to mining, of which £1,100 was advanced to the No. 6 Argent Prospecting Syndicate, while on the other hand £1,191 was received as royalties from tributers. The sum of £927 was expended on unwatering the State Argent Flat Mine in 1919, making the total expenditure £44,517. The total value of ore sold was £12,226, while royalties received amounted to £2,252, and revenue from sale of plant and stores to £859.

Tributers' surveys and assays are made free of charge by the Assay and Survey Office at Zeehan.

8. **Northern Territory.**—During the year 1919–20 the Government expenditure in aid of mining amounted to £4,976, of which £688 represented subsidies; £378 loss on crushing operations at Maranboy battery; £1,233 expenditure on driving and shaft sinking; £2,497 aid to Government prospecting party; and £180 cost of free assays. As it was considered that the method of assisting private prospectors was unsatisfactory the Government took over the control. The Government Prospecting Party was disbanded on the 30th June, 1920, and although no discovery of importance was made, useful information was obtained regarding the Central Tableland area and the headwater valleys and systems of the Katharine, Alligator, Mary, Waterhouse, Roper, and Ferguson rivers.

The Government maintains batteries at Maranboy and Hayes Creek.

§ 17. Commonwealth Government Control of Industrial Metals.

The proclamation under the Customs Act prohibiting the exportation of metals without the consent of the Minister for Trade and Customs is still in force, but consent is granted in every case where the contract relating to the sale of the metals has been registered with the Australian Metal Exchange.

§ 18. Estimated Metallic Contents of Ores, etc., Produced in Australia.

1. **Local Production.**—According to returns compiled by the Secretary of the Australian Metal Exchange from information obtained from mining companies and metal smelting and refining works, the quantities of the principal metals (exclusive of gold) extracted within the Commonwealth during the five years 1916 to 1920 were as follows:—

LOCAL EXTRACTION OF METALS, 1916 TO 1920.

Metal.		1916.	1917.	1918.	1919.	1920.
Silver ..	ozs.	5,251,604	6,437,079	9,920,406	6,684,888	712,651
Lead, pig ..	tons	107,635	125,100	166,754	82,732	4,077
Zinc ..	tons	5,227	4,131	6,221	6,544	9,665
Copper ..	tons	34,828	35,989	44,018	16,182	24,069
Tin ..	tons	3,879	3,990	4,582	4,102	4,108

2. **Metallic Contents of Ores, Concentrates, etc., Exported.**—The estimated metallic contents of ores, concentrates, etc., exported or sold for export during the five years 1916–20 are given in the following table:—

ESTIMATED METALLIC CONTENTS OF ORES, CONCENTRATES, ETC., EXPORTED OR SOLD FOR EXPORT, 1916 TO 1920.

Metal.	Contained in—	1916.	1917.	1918.	1919.	1920.
Silver	ozs. { Lead, Silver, Gold Bullion	2,520,563	1,977,603	141,263
	Lead Concentrates ..	324,189
	Zinc Concentrates ..	2,093,554	1,582,575	5,666,609	1,161,754	980,891
	Copper Ores ..	2,980
	Total ..	4,941,286	3,560,178	5,666,609	1,161,754	1,122,154
Lead	tons { Lead, Silver, Gold Bullion	30,699	22,766	1,939
	Lead Concentrates ..	7,352	4,122
	Zinc Concentrates ..	12,218	9,138	32,653	7,463	6,345
	Total ..	50,269	31,904	32,653	7,463	12,406
Zinc	tons { Lead Concentrates ..	1,020
	Zinc Concentrates ..	89,783	64,656	231,448	50,108	42,295
	Total ..	90,803	64,656	231,448	50,108	42,295
Copper	tons Ores, Matte, etc. ..	4,399	2,117
Tin	tons Concentrates ..	1,459	847	70

The quantities and values of the principal metals, ores, and concentrates of Australian produce exported overseas as recorded by the Customs Department for the year 1919–20 were as follows:—Antimony ore, 3,450 tons, £80,427 (to United Kingdom); zinc, bars, blocks, and rods, 2,015 tons, £97,589 (of which 1,974 tons went to United Kingdom); zinc concentrates, 29,669 tons, £166,303 (14,110 tons to United Kingdom, 4,895 tons to United States, and 7,880 tons to Japan); copper, ingots, 27,411 tons, £2,765,374 (20,223 tons to United Kingdom and 4,063 tons to Japan); tin, ingots, 3,432 tons, £957,205 (956 tons to United Kingdom and 1,985 tons to United States); lead, pig, 74,030 tons, £2,690,432 (53,264 tons to United Kingdom and 13,468 tons to Japan); lead, matte, 818 tons, £29,093 (to United Kingdom); silver and silver lead concentrates, 1,736 tons, £49,956 (1,578 tons to United Kingdom); molybdenite, 229 tons, £72,962 (136 tons to United Kingdom); scheelite, 327 tons, £58,839 (219 tons to United Kingdom); wolfram, 776 tons, £136,918 (648 tons to United Kingdom); platinum, osmium, iridium, etc., 1,397 ozs., £52,615 (201 ozs. to United Kingdom and 1,196 ozs. to United States); and pig iron, 19,229 tons, £164,419 (17,010 tons to Japan).

SECTION XIII.

MANUFACTURING INDUSTRIES.

§ 1. General.

1. **Industrial Progress.**—The statistics of manufactures in the Commonwealth shew that many industries have now been permanently established on a secure basis, and indicate a consistent progress both in regard to the extension of existing industries and the establishment of new ones. As will be seen from the following pages, this growth has been particularly rapid since the abolition of inter-colonial tariffs consequent upon the creation of the Commonwealth of Australia in 1901, the throwing open of the whole of the Australian markets to the industrial products of each State having facilitated the internal distribution of the products of Australian industry.

(i) *The Gold Discoveries, 1851.* Prior to the gold discoveries (1851) there was little development in the manufacturing industries of Australia. Reference to that period will be found in earlier issues of the Year Book (see No. 6, page 524.)

(ii) *Later Progress.* Soon after the discovery of gold, the construction of the first railways (1854) and the re-establishment of regular steamship communication with Europe (1856) helped to encourage the nascent industrial activity. The Colonies of New South Wales and Victoria, which had recently (1855) received the benefits of responsible government, soon turned their attention to the settlement of an agricultural population on the land. The Acts which were passed had a beneficial effect on the workers, giving them opportunities for employment not previously open to them, and fostering the manufacturing industries by increasing the measure of primary production. During the following years the various manufacturing industries prospered. The statistics of the States are not sufficiently complete or uniform to enable a statement of the progress of these industries to be given. The following table, however, shewing, so far as returns are available, the number of factories and the number of employees in each State at decennial periods from 1861 to 1911, and for each of the six years 1915 to 1919-20, will serve to indicate generally the progress which has been made. During recent years a change has been made in the period for which manufacturing returns are collected by several of the States, viz., New South Wales, Victoria, and South Australia, these States having adopted the financial year ending on the 30th June instead of the calendar year. Efforts were made to secure a uniform period of collection throughout the Commonwealth, and the financial year was favoured as being more suitable generally for statistical purposes, but the statisticians of those States which furnish information for the calendar year have so far failed to make the desired change. Owing to the late arrival of some of the returns, it was necessary, in 1917 and 1918, to combine the statistics of New South Wales, Victoria, and South Australia to 30th June with those of Queensland, Western Australia, and Tasmania to the 31st December, of the same year. This arrangement was not satisfactory on account of the late presentation of the figures for three of the more important States.

In order to bring the statistics more up to date, the returns for New South Wales, Victoria, and South Australia were carried forward a year, and from 1918-19 onwards the returns as presented will consist of Queensland, Western Australia, and Tasmania to 31st December, and New South Wales, Victoria, and South Australia to 30th June, six months later. To permit of this alteration it was necessary in this issue to furnish particulars of manufacturing for both of the years 1918-19 and 1919-20.

NUMBER OF FACTORIES AND EMPLOYEES IN EACH STATE, 1861 TO 1919-20.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	C'wealth.

(a) New South Wales for year ended 30th June, 1916; Victoria and South Australia, calendar year 1915; Queensland, Western Australia, and Tasmania, calendar year 1916. (b) New South Wales, Victoria, and South Australia for year ended 30th June; the remaining States for year ended 31st December. (c) New South Wales, Victoria, and South Australia for year ended 30th June; the remaining States for year ended 31st December, six months earlier. See last paragraph above. (d) For year ended 30th June, 1915. (e) Not on same basis as other States. (f) For 1902.

NOTE.—In this and all subsequent tables, except where specially mentioned, "Number of Employees," includes working proprietors.

2. Defects in Industrial Statistics.—A complete statistical account of the growth of the manufacturing industries in Australia unfortunately cannot be given for any lengthy period, owing to the fact that the necessary statistics have not been collected in past years by the several States upon a definite and identical basis. Even in respect of the definition of a "factory" or (so far as they might be included in related returns) the statistics of persons employed therein, there was formerly no common agreement. The relatively minor place that manufacturing industry held in relation to the total activity of Australia was, perhaps, responsible for the fact that the necessity for uniform method was not earlier recognised.

In 1896 it was agreed, as between Victoria and New South Wales, to adopt a common definition of the term "factory," viz., "any factory, workshop, or mill where four or more persons are employed or power is used." This agreement was adopted for the States generally at the Conference of State Statisticians in 1902, when it was decided, however, that the term "factory," should include also "all establishments, whether making for the trade, wholesale or retail, or for export." It was further agreed that industries should be arranged, as far as possible, under a uniform classification which was drawn up by the conference. As a result of the conference of 1902 a higher degree of uniformity in the collection and presentation of industrial statistics was attained in the several States, so that returns upon which anything like a proper comparative study of the development and progress of various manufacturing industries in the Commonwealth may be based date back only as far as the year 1903, when the resolution of the conference first came to be put into force. All the States did not, however, fall completely into line, and, as may be seen in the succeeding parts of this section, the comparisons afforded by the returns for the years 1903 to 1906 inclusive are in some cases subject to various

limitations. At the Conference of Statisticians held in Melbourne in 1906 special consideration was given to the methods to be adopted for the collection of statistical information regarding primary and secondary production and industry. The classification of industries prepared by the conference of 1902 was adopted, and a set of forms for the collection and compilation of industrial statistics on a definite and uniform basis in each State was agreed upon. The States have not, even yet, fallen entirely into line in collecting and classifying the returns. The particulars for the past twelve years are, however, in more complete co-ordination than formerly, and it is now possible to give particulars for the several States in greater detail and with greater uniformity throughout.

3. Classification of Manufacturing Industries.—Under the classification prepared by the Conference of Statisticians held in 1902, and adopted at that held in 1906, factories were placed under nineteen different categories, according to the nature of the industry carried on therein, most of the categories being further subdivided. Where two or more industries are carried on by one proprietor in one building, each industry is, when possible, treated as a separate establishment. The statement given hereafter shows the classification which has been adopted; it must be understood however, that this classification does not pretend to be exhaustive, but merely serves as a guide for the collection and presentation of statistics in the several States on a definite and uniform basis:—

CLASSIFICATION OF MANUFACTURING INDUSTRIES.

CLASS I.—TREATING RAW MATERIALS, ETC. Boiling-down, Tallow Refining, etc. Tanneries Woolscouring and Fellmongering Chaff-cutting, etc.	Confectionery Corn-flour, Oatmeal, etc. Flour Mills Jam and Fruit Canning Pickles, Sauces and Vinegar Sugar Mills Sugar Refining Aerated Waters, Cordials, etc. Breweries Condiments, Coffee, Spices, etc. Distilleries Ice and Refrigerating Malting Tobacco, Cigars, etc.	CLASS XII.—SHIP AND BOAT BUILDING AND REPAIRING. Docks and Slips Ship and Boat Building and Repairing
CLASS II.—OILS AND FAT, ETC. Oil and Grease Soap and Candles	CLASS VII.—CLOTHING AND TEXTILE FABRICS. Woollen and Tweed Mills Boots and Shoes Slop Clothing Clothing (Tailoring) Dressmaking and Millinery— Makers' material Customers' material Dyeworks and Cleaning Furriers Hats and Caps Waterproof and Oilskin Shirts, Ties, and Scarfs Rope and Cordage Tents and Tarpaulins Sailmaking	CLASS XIII.—FURNITURE, BEDDING, ETC. Bedding, Flock, and Upholstery Billiard Tables Furniture and Cabinet Making Picture Frames Window Blinds
CLASS III.—STONE, CLAY, GLASS, ETC. Bricks and Tiles Glass (including Bottles) Glass (Ornamental) Lime, Plaster, Cement and Asphalt Marble, Slate, etc. Modelling, etc. Pottery and Earthenware	CLASS IV.—WORKING IN WOOD. Boxes and Cases Cooperage Joinery Saw Mills Wood-turning, etc.	CLASS XIV.—DRUGS AND CHEMICALS, ETC. Chemicals, Drugs, and Medicines Fertilizers Paints, Varnishes, and By-products
CLASS V.—METAL WORKS, MACHINERY, ETC. Agricultural Implements Brass and Copper Cutlery Engineering Galvanised Iron-working Ironworks and Foundries Lead Mills Railway Carriages Railway and Tramway Work-shops Smelting Stoves and Ovens Tinsmithing Wireworking Other Metal Works	CLASS VIII.—BOOKS, PAPER, PRINTING, ETC. Electrotyping and Stereotyping Paper-making, Paper Boxes, Bags, etc. Photo-engraving Printing and Binding	CLASS XV.—SURGICAL AND OTHER SCIENTIFIC INSTRUMENTS. Surgical, Optical, and other Scientific Instruments
CLASS VI.—FOOD AND DRINK, ETC. Bacon Curing Butter Factories Butterine and Margarine Cheese Factories Condensed Milk Meat and Fish Preserving Biscuits	CLASS IX.—MUSICAL INSTRUMENTS, ETC. Musical Instruments and Sewing Machines	CLASS XVI.—TIMEPIECES, JEWELLERY, AND PLATED WARE. Electro-plating Manufacturing Jewellery, etc.
	CLASS X.—ARMS AND EXPLOSIVES. Arms and Explosives	CLASS XVII.—HEAT, LIGHT, AND POWER. Coke Works Electric Apparatus Electric Light and Power Gas Works and Kerosene Lamps and Fittings, etc. Hydraulic Power
	CLASS XI.—VEHICLES, SADDLERY, HARNESS, ETC. Coach and Wagon Building Cycles and Motors Perambulators Saddlery, Harness, etc. Spokes, etc.	CLASS XVIII.—LEATHERWARE (N.E.I.). Leather Belting, Fancy Leather, Portmanteaux and Bags
		CLASS XIX.—MINOR WARES. Basket and Wickerware, Matting, etc. Brooms and Brushware Rubber Goods Toys Umbrellas Other Industries

§ 2. Number of Factories.

1. **General.**—The presentation of the number of factories in each State does not furnish a clear indication of the extent or progress of the manufacturing industry throughout Australia.

Experience has shewn that the smaller establishments in many branches of industry tend to disappear before the superior competitive facilities of larger enterprises.

On the other hand, new factories are constantly under construction in districts advantageously located for manufacturing purposes, and small plants are as numerous as large ones.

(i) *Total Number of Factories in each State 1915 to 1919-20.* The following table presents, for the years 1915 to 1919-20, the total number of factories in each State of the Commonwealth:—

FACTORIES IN THE COMMONWEALTH, 1915 TO 1919-20.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	C'wealth.
1915 ..	5,269d	5,413	1,775	1,266	780	589	15,092
1916a ..	5,210	5,413	1,782	1,266	771	568	15,010
1917b ..	5,356	5,445	1,793	1,286	759	540	15,179
1918b ..	5,414	5,627	1,778	1,285	764	553	15,421
1918-19c	5,460	5,720	1,778	1,313	764	553	15,588
1919-20c	5,662	6,038	1,754	1,368	817	652	16,291

(a) See note (a) first table this section.

(b) See note (b) first table this section.

(c) See note (c) first table this section.

(d) For year ended 30th June, 1915.

(ii) *Classification of Factories in Commonwealth, 1915 to 1919-20.* The following table shows the total number of factories in the Commonwealth for each year from 1915 to 1919-20, classified on the basis indicated in § 1, 3 hereof:—

CLASSIFICATION OF FACTORIES IN THE COMMONWEALTH, 1915 TO 1919-20.

Class of Industry.	1915.(a)	1916.(b)	1917.(c)	1918.(c)	1918-19 (d)	1919-20 (d)
	No.	No.	No.	No.	No.	No.
I. Treating raw material, product of agricultural and pastoral pursuits, etc. ..	889	817	797	798	789	799
II. Treating oils and fats, animal, vegetable, etc. ..	99	96	92	90	88	92
III. Processes in stone, clay, glass, etc. ..	654	626	606	616	643	670
IV. Working in wood ..	1,702	1,661	1,646	1,713	1,762	1,912
V. Metal works, machinery, etc. ..	1,814	1,832	1,802	1,836	1,872	1,974
VI. Connected with food and drink, etc. ..	2,328	2,372	2,408	2,402	2,420	2,427
VII. Clothing and textile fabrics, etc. ..	3,117	3,085	3,176	3,177	3,155	3,311
VIII. Books, paper, printing and engraving ..	1,225	1,225	1,232	1,256	1,220	1,247
IX. Musical instruments, etc. ..	19	20	25	27	31	37
X. Arms and explosives ..	20	21	17	18	17	17
XI. Vehicles and fittings, saddlery and harness, etc. ..	1,337	1,334	1,374	1,423	1,449	1,514
XII. Ship and boat building and repairing ..	88	72	74	75	76	80
XIII. Furniture, bedding, and upholstery ..	693	697	704	722	743	817
XIV. Drugs, chemicals, and by-products ..	206	207	238	260	273	293
XV. Surgical and other scientific instruments ..	51	51	63	67	72	71
XVI. Jewellery, timepieces, and platedware ..	199	195	190	187	194	215
XVII. Heat, light, and power ..	474	466	479	489	505	515
XVIII. Leatherware, n.e.l. ..	67	69	74	81	83	93
XIX. Minor wares, n.e.l. ..	160	164	187	184	196	207
Total ..	15,092	15,010	15,179	15,421	15,588	16,291

(a) New South Wales figures for year ended 30th June, 1915. (b) See note (a) first table this section.

(c) See note (b) first table this section.

(d) See note (c) first table this section.

For the purpose of the returns in the above table the definition of a factory adopted at the Conference of Statisticians in 1902 (see § 1, 2 hereof) is used, viz., "Any factory, workshop or mill where four or more persons are employed or power is used." The total

number of factories has increased by 1,199 since 1915. A temporary depression occurred in the manufacturing industry during the war period, but since the signing of the Armistice the natural expansion of industry has been responsible for the large increase of 703 factories during 1919-20. As previously pointed out, any increase or decrease in the number of factories from year to year does not necessarily indicate a change in the position of the industry.

(iii) *Classification of Factories in each State, 1918-19 and 1919-20.* The following tables shew the number of factories in each State of the Commonwealth during 1918-19 and 1919-20, classified according to the nature of the industry. (See classification given in § 1, 3 hereof).—

CLASSIFICATION OF FACTORIES IN EACH STATE, 1918-19.

Class of Industry.	N.S.W. 1918-19.	Vic. 1918-19.	Q'land. 1918.	S. Aust. 1918-19.	W. Aust. 1918.	Tas. 1918.	C'with.

§ 3. Factories Classified by Number of Employees.

1. **General.**—A more scientific method of measuring the size of the manufacturing establishments in Australia is furnished by an analysis of the factories grouped according to the average number of employees in each.

The following tables shew, for each State, the number of factories classified according to number of hands employed, and the average number of hands employed therein, during 1918-19 and 1919-20 :—

CLASSIFICATION OF FACTORIES IN EACH STATE ACCORDING TO NUMBER OF HANDS EMPLOYED, 1918-19.

No. of Persons Employed in each Factory.	N.S.W. 1918-19.	Victoria. 1918-19.	Q'land. 1918.	S. Aust. 1918-19.	W. Aust. 1918.	Tasmania. 1918.	C'wealth.
NUMBER OF FACTORIES.

CLASSIFICATION OF FACTORIES IN EACH STATE ACCORDING TO NUMBER OF HANDS EMPLOYED, 1919-20—*continued.*

No. of Persons Employed in each Factory.	N.S.W. 1919-20.	Victoria. 1919-20.	Q'land. 1919.	S. Aust. 1919-20.	W. Aust. 1919.	Tasmania. 1919.	C'wealth.
AVERAGE NUMBER OF HANDS EMPLOYED.							
Under 4 ..	2,091	2,632	687	438	350	289	6,487
4 ..	1,996	2,404	664	512	292	268	6,136
5 to 10 ..	13,113	13,717	3,815	3,545	1,978	1,731	37,899
11 to 20 ..	15,186	15,147	4,545	3,565	1,901	1,144	41,488
21 to 50 ..	25,198	24,415	8,104	5,912	3,483	2,676	69,788
51 to 100 ..	19,048	18,672	5,091	4,942	2,117	1,730	51,600
Over 100 ..	67,822	59,535	17,985	10,528	5,288	2,178	163,336
Total ..	144,454	136,522	40,891	29,442	15,409	10,016	376,734

Reference to the following table will shew a tendency for the proportionate number of hands employed in the larger establishments to still further increase and for that of the smaller factories to diminish. During the quinquennial period under discussion, the ratio of hands in factories employing under 21 hands to total number of employees in all factories shews a decline from 26.33 per cent. in 1915 to 24.42 in 1919-20. The larger establishments with 101 hands and upwards during the same period exhibit an increase from 41.99 to 43.36 per cent. of total employed. The average number of hands per establishment in 1915 was 21.27, and in 1919-20, 23.13.

CLASSIFICATION OF FACTORIES IN THE COMMONWEALTH ACCORDING TO NUMBER OF HANDS EMPLOYED DURING THE YEARS 1915 TO 1919-20.

Year.	Establishments Employing on the Average—							
	20 hands and under.		21 to 100 hands.		101 hands and upwards.		Total.

§ 4. Factories Using Mechanical Power.

1. **Use of Mechanical Power.**—The statistics relating to the utilization of mechanical power in factories bring into relief another phase of industrial development in Australia.

The following tables reveal a gradual increase in the number of factories using mechanical power, and a more striking increase in the amount of power used, while a marked decline is noticeable in the number of factories using no power, thus affording definite statistical evidence of the growth of power-driven machinery in Australia, and of its increasing ascendancy over hand labour.

The principal motive power is steam, but the chief towns possess electric power stations owned either by the Government, or by public bodies or private companies, from which many factories find it convenient to derive their motive power.

(i) *Utilization of Mechanical Power in Factories in each State.* The following tables shew the number of factories in which machinery was worked by steam, gas, oil, electricity, or water and the horse-power of engines or motors used, in each State and in the Commonwealth during 1918-19 and 1919-20:—

UTILIZATION OF MECHANICAL POWER IN FACTORIES IN EACH STATE, 1918-19.

Tas., 1919 ..	551	101	652	6,615	208	253	13,910	10,725	31,711
Commonwealth	13,146	3,145	16,291	402,152	58,349	11,372	176,476	11,167	660,016

The preponderance of horse-power employed in the New South Wales factories is the result of the location in that State of the largest number of industries demanding a considerable amount of power; Victoria, on the other hand, has the largest number of establishments, such as those connected with clothing and textile fabrics, wherein much less mechanical power is utilized.

The number of establishments in the Commonwealth during 1919-20 using machinery worked by steam, gas, oil, electricity, or water was 13,146, or 80.70 per cent. of the total; 3,145 establishments, representing 19.30 per cent., used no mechanical power. The total actual horse-power in use was 660,016, distributed in the following proportions:—Steam, 60.93 per cent.; gas, 8.84 per cent.; oil, 1.80 per cent.; electricity, 26.74 per cent.; and water, 1.69 per cent.

(ii) *Utilization of Mechanical Power used in Factories in the Commonwealth, 1915 to 1919-20.* The following table shews the horse-power of engines used in connexion with factories in the Commonwealth during each of the last six years :—

UTILIZATION OF MECHANICAL POWER IN FACTORIES IN COMMONWEALTH,
1915 TO 1919-20.

Year.	Number of Establishments.			Actual Horse-power of Engines used.					
	Using Machinery worked by Steam, Gas, Oil, Electricity or Water.	Others.	Total.	Steam.	Gas.	Oil.	Electricity.	Water.	Total.
1915(a)	No. 11,438	No. 3,654	No. 15,092	H.P. 333,494	H.P. 54,994	H.P. 8,558	H.P. 107,788	H.P. ..	H.P. 504,834
1916(b)	11,550	3,460	15,010	349,157	53,921	8,541	118,149	..	529,768

(a) New South Wales figures for year ended 30th June, 1915. (b) See note (a) first table this section.
(c) See note (b) first table this section. (d) See Note (c), first table this Section.

From this table it appears that the number of manufacturing establishments using power increased from 11,438 in 1915 to 13,146 in 1919-20, an increase of 1,708, or 11½ per cent. During the same period the number of establishments using no power decreased from 3,654 to 3,145, a decrease of 509, or 13.93 per cent. The corresponding increase in the actual horse-power of engines used was 155,182, or 30.74 per cent.

(iii) *Classification of Mechanical Power Used in Factories in each State.* The following tables give a classification of the actual horse-power of engines used in factories of different descriptions in each State during 1918-19 and 1919-20 :—

ACTUAL HORSE-POWER OF ENGINES USED IN VARIOUS FACTORIES
IN EACH STATE, 1918-19.

Class of Industry.	N.S.W. 1918-19.	Victoria. 1918-19.	Q'land. 1918.	S. Aust. 1918-19.	W. Aust. 1918.	Tas. 1918.	C'wealth.

Total	504,834	529,768	560,261	610,326	629,946	660,016

(a) New South Wales figures for year ended 30th June, 1915. (b) See note (a) first table this section.
(c) See note (b) first table this section. (d) See note (c) first table this section.

From the above table it will be seen that the actual horse-power of engines used increased in practically all of the various branches of industry during the last five years. The industries using the greatest amount of power were Class XVII. Heat, light, and power; Class VI. Connected with food and drink; and Class V. Metal works, machinery, etc. These three classes, which together accounted for 71 per cent. of the total power used in 1919-20, increased their horse-power from 356,127 to 469,093 during the five years under review, and are mainly responsible for the development of mechanical power in factories since 1915.

§ 5. Numbers Employed in Australian Factories.

1. **Total Number Employed.**—Each person employed in and about a factory, in whatever capacity, is now included as a factory employee, consequently every proprietor who works in his business is counted as an employee, and all "outworkers" (see paragraph 5 hereinafter) are also included. The individuals embraced may be classed under the following heads, viz.:—(i) Working proprietors; (ii) managers and overseers; (iii) accountants and clerks; (iv) engine-drivers and firemen; (v) skilled and unskilled workers in the factories, mills, or workshops; (vi) carters and messengers; and (vii) others.

(i) *Average Numbers Employed, 1915 to 1919-20.* The following table shews, for each year from 1915 to 1919-20 inclusive, (a) the average numbers of persons (including both sexes and all ages) employed in manufacturing industries in each State; (b) the percentage of the numbers employed in each State on the total numbers employed in the Commonwealth; and (c) the numbers employed per ten thousand of the mean population in each State and the Commonwealth:—

AVERAGE NUMBER OF PERSONS EMPLOYED IN MANUFACTURING INDUSTRIES, 1915 TO 1919-20.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	C'wealth.
AVERAGE NUMBER.

XVII. Heat, light, and power	9,939	10,018	10,329	10,714	10,912	11,991
XVIII. Leatherware, n.e.l.	1,292	1,376	1,488	1,647	1,799	2,233
XIX. Minor wares, n.e.l.	4,120	4,400	4,613	4,703	4,853	5,828
Total	321,071	316,752	321,670	323,049	340,475	376,734

(a) New South Wales figures for year ended 30th June, 1915. (b) See note (a) first table this section.

(c) See note (b) first table this section. (d) See Note (c) first Table this Section.

The number of persons employed in factories increased by 55,663 since 1915. During the war period, considerable numbers of the male population were withdrawn for military purposes, but the 1919-20 figures shew that the manufacturing industry has not only regained its numerical strength, but has largely added to its pre-war totals of the number of employees.

3. Classification of Numbers Employed in each State, according to Class of Industry.—The following tables shew a similar classification of employees in manufacturing industries in each State during 1918-19 and 1919-20:—

AVERAGE NUMBER OF PERSONS EMPLOYED IN VARIOUS FACTORIES
IN EACH STATE, 1918-19.

Class of Industry.	N.S.W. 1918-19.	Vic. 1918-19	Q'land. 1918.	S.A. 1918-19	W.A. 1918.	Tas. 1918.	C'wlth.
I. Treating raw material, product of agricul. and pastoral pursuits, etc.	4,145	4,204	746	976	365a	339a	10,775
II. Treating oils and fats, animal, vegetable, etc.	1,385	807	173	230	(b)	(b)	2,604
III. Processes in stone, clay, glass, etc.	6,531	4,438	823	1,322	409	240	13,761
IV. Working in wood	8,374	7,669	4,385	1,264	2,544	1,589	25,825
V. Metal works, machinery, etc.	28,129	16,523	5,770	8,261	2,518	1,478	62,679
VI. Connected with food and drink, etc.	17,955	19,185	15,001	3,989	1,906	1,855	59,891
VII. Clothing and textile fabrics, etc.	26,266	39,739	6,994	5,012	2,132	1,293	81,441
VIII. Books, paper, printing, and engraving	9,812	8,708	2,916	1,788	1,085	691	25,000
IX. Musical instruments, etc.	445	255	..	14	714
X. Arms and explosives	1,119	864	..	3	1,986
XI. Vehicles and fittings, saddlery, and harness, etc.	4,697	4,974	1,302	1,718	544	395	13,630
XII. Ship and boat building & repairing	5,097	692	115	145	20	50	6,119
XIII. Furniture, bedding, and upholstery	3,844	3,023	1,240	952	447	321	9,827
XIV. Drugs, chemicals, and by-products	2,274	2,329	91	783	343	21	5,861

Total	144,454	136,522	40,391	29,442	15,409	10,016	376,734

(a) Includes Class II.

(b) Included in Class I.

The largest number employed in any particular class in the Commonwealth during 1919-20 was in Class VII., in which there were 89,424 employees, or 24 per cent. of the whole number. The class affording employment to the smallest number of hands was

Class XV., in which there were 495 hands, or 0.13 per cent. of the total number of employees. Classes VI., VII., and VIII. comprise those industries in which female labour is largely employed. (See § 6, 5 hereof.)

4. Classification of Numbers Employed in each State according to Nature of Employment.—In the following tables the average numbers of persons employed in each State during 1918-19 and 1919-20 are classified according to the nature of their employment:—

AVERAGE NUMBER OF PERSONS EMPLOYED IN EACH STATE, CLASSIFIED
ACCORDING TO NATURE OF EMPLOYMENT, 1918-19.

State.	Average Number of Persons Employed.						Total.
	Working Proprietors.	Managers and Overseers.	Accountants and Clerks.	Engine-drivers and Firemen.	Workers, Skilled & Unskilled, in Factory Mill or Workshop (a)	Carters, Messengers, and Others.	
N.S. Wales, 1918-19	4,105	4,571	5,600	2,913	108,727	1,675	127,591
Victoria, 1918-19 ..	5,471	3,793	4,919	1,914	102,630	3,622	122,349

(a) Including outworkers.

5. **Outworkers.**—The term “outworker” or “homeworker” has acquired a special meaning in connexion with manufacturing industries, and technically embraces only those to whom work is given out by factory owners to be wrought upon in the employees' own homes. Individuals working for themselves are not included. The following table gives particulars of the average number of outworkers connected with factories in each State during each year from 1915 to 1919–20 inclusive :—

NUMBER OF OUTWORKERS^(a) CONNECTED WITH FACTORIES, 1915 TO 1919–20.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	C'wealth.
1915	582 ^b	1,473	92	44	6	70	2,267
1916 ^(c)	577	1,473	99	44	6	35	2,234
1917 ^(d)	677	1,814	89	41	5	32	2,658
1918 ^(d)	637	1,406	30	25	4	20	2,122
1918–1919 ^(e) ..	582	1,022	30	57	4	20	1,715
1919–1920 ^(e) ..	733	1,492	19	50	8	28	2,330

(a) In all tables relating to number of hands employed in factories, outworkers are included.

(b) Year ended 30th June, 1915.

(c) See note (a) first table this section.

(d) See note (b) first table this section.

(e) See note (c) first table this section.

The Factories Acts in each State contain provisions regulating the employment of outworkers. Generally, records of out-work must be kept by factory proprietors, specifying the names and remuneration of workers, and stating the places where the work is done. Further particulars are given in a later part of this book. (See Section relating to *Industrial Unionism and Industrial Legislation*.)

§ 6. Sex Distribution in Factories.

1. **Employment of Females in Factories.**—In all the States the employment of female labour in factories is now regulated by Act of Parliament. In Victoria the first Act dealing with the subject was passed in the year 1873, and provided that no female should be employed for more than eight hours a day without the permission of the Chief Secretary. The number of working hours for women is now limited to forty-eight per week in all the States, overtime being allowed only with the permission of the Departments, and then to a limited extent. The maximum periods of continuous labour, and the intervals of cessation therefrom, are also prescribed by the several Acts. Further reference is made to the restrictions regarding the employment of females in a later part of this book. (See Section relating to *Industrial Unionism and Industrial Legislation*.)

2. **Distribution of Employees according to Sex.**—In New South Wales the ratio of the number of females employed in factories to the number of males during 1886 was about one to seven; in 1891 one to six; in 1903 it became about one to four; and is now slightly less than one to three. In Victoria the ratio of females to males during the year 1886 was about one to five. Five years later (1891) it was somewhat less, but in 1896 had increased to about one woman to three men, and at present is less than one to two. In South Australia the ratio at the latest date was one female employed to every four males, while Queensland and Western Australia were less than one to four, and Tasmania less than one to five. The ratio for the whole of the Commonwealth was more than one to three. The employment of women is, however, largely confined to a few trades.

The great prosperity in clothing and textile industries is one of the main causes of increase in female employment. Certain trades are specifically known as women's trades, such as clothing and textile trades, preparation of food, book-binding, and lighter work connected with the drug trade, as, for example, wrapping. In common also with commercial establishments, a considerable number of factories employ women as clerks and typists.

(i) *Average Number of Males and Females Employed, 1915 to 1919-20.* The following table shews the average number of male and female employees in factories in each State from 1915 to 1919-20:—

AVERAGE NUMBER OF MALES AND FEMALES EMPLOYED IN MANUFACTURING INDUSTRIES, 1915 TO 1919-20.

§ 7. Child Labour in Factories.

1. **Conditions of Child Labour.**—The employment of young persons in factories in each State of the Commonwealth is regulated by Acts of Parliament in a similar manner to the employment of female labour. Excepting under special circumstances, children under a certain age may not be employed in factories. The minimum age in all the States is 14, with the exception of South Australia, where it is 13 years, and Victoria, where the minimum for females is 15 years. Other restrictions on the employment of young persons in factories are more particularly referred to in a later part of this book. (See Section relating to *Industrial Unionism and Industrial Legislation*.) The general object of the restrictions imposed is to assure that a proper period shall be devoted to primary education and that the early years of toil shall not exhaust the worker before the attainment of full growth.

2. **Average Number of Children Employed in Factories, 1915 to 1919-20.**—In the statistical compilations of the various States the term "child" may be taken to denote any person under sixteen years of age. The following table shews the average number of children of each sex employed in manufacturing industries in each State during the years 1915 to 1919-20 :—

AVERAGE NUMBER OF CHILDREN EMPLOYED IN FACTORIES, 1915 TO 1919-20.

3. **Percentage of Children on Total Persons Employed.**—The foregoing table shews a general increase in the number of children employed in factories during the past quinquennial period. This increase is more marked among the females than the males, the respective gains being 2,182 and 1,616. Examined in conjunction with the total number of persons employed, the following table reveals a gradual increase in the percentage of children employed in factories since 1915 :—

PERCENTAGE OF CHILDREN IN FACTORIES ON TOTAL NUMBER OF EMPLOYEES, 1915 TO 1919-20.

5. **Apprenticeship.**—It is obvious that the age of apprenticeship in each State must be limited by the conditions governing the employment of child labour in factories. The early Apprentices Acts in some of the States are apparently in conflict on this point with the Factories Acts. The statutes limiting the age at which children may begin to work may be regarded as applicable by way of preventing too early apprenticeship, as may also those directing that education be continued up to a certain age or standard.

Indentures must be entered into specifying the conditions of the employment. Apprenticeships may not exceed seven years in duration, and usually become inoperative at twenty-one years of age, or in the case of women, on marriage. In Tasmania, however, the section of the Wages Boards Act 1920 which deals with apprentices provides for the issue of licenses by the Minister to enable persons to complete their term of apprenticeship after the age of twenty-one if necessary.

The Arbitration Courts and Wages Boards have power to limit the number of apprentices which may be taken into a factory and specify the term of apprenticeship. No general statistics of the number of apprentices in Australia have been collected up to the present time.

§ 8. Amount of Wages Paid and Value of Production.

1. **Introduction.**—The importance of the manufacturing industries of the Commonwealth is indicated by the fact that the total value of the output for 1919–20 was £292,536,608, of which amount the sum of £187,722,877 represents the value of the raw materials used. The difference between these two amounts, viz., £104,813,731, represents the amount by which the value of the raw materials was enhanced in the process of manufacture. The total amount of salaries and wages paid in factories during 1919–20 was £52,115,558.

2. **Amount of Salaries and Wages Paid.**—The total amounts of salaries and wages paid during the years 1918–19 and 1919–20 in various classes of factories in the Commonwealth (excluding all sums drawn by working proprietors) are shewn in the following tables:—

AMOUNT OF SALARIES AND WAGES PAID IN FACTORIES
IN COMMONWEALTH, 1918–19.(a)

(a) Excluding all amounts drawn by working proprietors.

(b) Includes Class II.

(c) Included with Class I.

The maximum amount of salaries and wages paid in any particular class during 1919-20 was in Class V., the amount being £11,776,768, or 22.60 per cent. on the total amount; the minimum amount was in Class XV., £62,710, or 0.12 per cent. on the total amount. The State in which the largest amount was paid was New South Wales. The following statement shews the total amount of salaries and wages paid, and the average amount paid per employee in each State, during each of the years 1915 to 1919-20. The figures are exclusive of working proprietors and of the amounts drawn from the business by them.

AMOUNT OF SALARIES AND WAGES PAID AND AVERAGE AMOUNT PER ANNUM PAID PER EMPLOYEE, 1915 TO 1919-20.

(a) New South Wales figures for year ended 30th June, 1915. (b) See note (a) first table this section.
(c) See note (b) first table this section. (d) See note (c) first table this section.

In comparing the figures in the preceding table, regard should be paid to the nature of certain industries which are carried on to a greater extent in some States than in others. In Victoria, for instance, there is a large number of hands employed in Class VII., comprising a heavy percentage of women and children. New South Wales pays the argest amount in salaries, and the average per employee in that State is considerably higher than in any other part of the Commonwealth.

It will be noted that there has been a persistent increase in the average wage paid per employee in each of the States during the period under review. Taking the Commonwealth as a whole, during the period 1915-1919-20 there has been an increase of 57 per cent. on the total amount of wages paid, and 33 per cent. on the average paid per employee.

The following tables shew the approximate amount paid in salaries and wages to males and females in each class of industry in each State during 1918-19 and 1919-20, and the total amounts paid to employees of each sex during the last six years:—

AMOUNT(a) OF SALARIES AND WAGES PAID TO MALE AND FEMALE HANDS EMPLOYED IN EACH CLASS OF INDUSTRY IN THE SEVERAL STATES OF THE COMMONWEALTH DURING 1918-19.

Class of Industry.	N.S.W. 1918-19.	Victoria. 1918-19.	Q'land. 1918.	S. Aust. 1918-19.	W. Aust. 1918.	Tas. 1918.	C'wealth.

(a) See note (c) first table this section.

3. Value of Fuel and Light used in Factories.—The amount expended in factories on fuel and light is of considerable importance; in 1919-20 it amounted to £5,141,293. The classes of industry in which fuel was most extensively used were Class V., Metal Works, Machinery, etc., £1,385,545; Class VI., Connected with Food, Drink, etc., £1,190,521; Class XVII., Heat, Light, Power, etc., £1,005,826, of which amount £898,954 was expended on generating electric light and power; and Class III., £570,078. The following tables shew the value of fuel and light used in the different classes of industry in the several States of the Commonwealth during 1918-19 and 1919-20, and of the total used for each of the last six years:—

VALUE OF FUEL AND LIGHT USED IN FACTORIES IN COMMONWEALTH,
1918-19.

4. Value of Raw Materials used in Factories.—The total value of raw materials worked up (i.e., exclusive of fuel, lubricants, etc.) in factories in the Commonwealth during 1919-20 was £187,722,877, which represents 64.17 per cent. of the total value of the finished products. (See next paragraph.) The following tables shew the value of the raw materials worked up in various classes of industry in each State.

**VALUE OF RAW MATERIALS WORKED UP IN FACTORIES IN COMMONWEALTH,
1918-19.**

(a) Includes Class II. (b) Included in Class I.

The class in which the maximum value of raw materials was used was Class VI., "Connected with Food and Drink, etc.," the value being £77,747,905. The next important class in order of value was Class V., "Metal Works, Machinery, etc.," in which raw materials to the value of £24,943,270 were used. The class in which the minimum value appears is Class XV., "Surgical and other Scientific Instruments," the value being only £63,762. The following table gives particulars for the six years ended 1919-20 :—

VALUE OF RAW MATERIALS WORKED UP IN FACTORIES IN COMMONWEALTH DURING THE YEARS 1915 TO 1919-20.

5. Total Value of Output of Manufacturing Industries.—The values of the output of new goods manufactured and repairs effected in factories of various classes in each State during 1918-19 and 1919-20 are shewn in the following tables. The figures given represent not only the increase in value due to the process of manufacture, but also include the value of the raw materials used. The difference between the value of the materials used and the total output (see paragraph 6 hereof) is the real value of production from manufactories :—

TOTAL VALUE OF OUTPUT OF FACTORIES IN COMMONWEALTH, 1918-19.

Class of Industry.	N.S.W. 1918-19.	Victoria. 1918-19.	Q'land. 1918.	S. Aust. 1918-19.	W. Aust. 1918.	Tas. 1918.	C'wealth.

(a) Includes Class II.

(b) Included in Class I.

It will be seen that the State of New South Wales far outstrips the other States in the total value of the output of her factories, the value being £123,213,480, or 42.28 per cent. on the total for the Commonwealth. The next State in order of value is Victoria, which produced 34.69 per cent.; the value of the output of Queensland was 11.09 per cent.; of South Australia 6.99 per cent.; of Western Australia 2.98 per cent.; and of Tasmania 2.13 per cent. The two most important classes in order of value of output (Classes VI. and V.) are the same as in order of value of raw materials used. The following statement shews the value of output of factories, value per employee, and value per head of mean population in each State during the six years ended 1919-20:—

TOTAL VALUE OF OUTPUT OF FACTORIES IN COMMONWEALTH DURING THE YEARS 1915 TO 1919-20.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	C'wealth.

6. Value of Production of Manufacturing Industries.—The difference between the figures given in paragraph 5 and the corresponding figures in paragraph 4 represents the amount added to the value of the raw materials by the process of manufacture. This is the real measure of the value of production of manufacturing industries. The following tables shew the values added in this manner during 1918-19 and 1919-20 in each State for the various classes of factories :—

VALUE OF PRODUCTION OF MANUFACTURING INDUSTRIES IN COMMONWEALTH,
1918-19.

Class of Industry.	N.S.W. 1918-19.	Victoria. 1918-19.	Q'land. 1918.	S. Aust. 1918-19.	W. Aust. 1918.	Tas. 1918.	C'wealth.
I. Treating raw material, product of agricultural and pastoral pursuits, etc. ..	£ 1,721,286	£ 1,553,955	£ 554,548	£ 249,031	£ 109,241	£ 59,943	£ 4,248,004
II. Treating oils and fats, animal, vegetable, etc. ..	778,742	402,648	96,507	81,262	(b)	(b)	1,359,159

As the total value of the output for the Commonwealth for 1919-20 was estimated at £292,536,608, there remained, after payment of £187,722,877, the value of the raw materials used, of £52,115,558 for salaries and wages, and of £5,859,189 for fuel, the sum of £46,838,984 to provide for all other expenditure and profits. The following tables give corresponding particulars for each State, expressed absolutely, and as percentages on the total value of the output for the years 1918-19 and 1919-20:—

VALUE OF OUTPUT AND COST OF PRODUCTION IN COMMONWEALTH

§ 9. Land, Buildings, Plant and Machinery.

1. **General.**—As an indication of the permanent character and stability of the industries which have been established in the Commonwealth, it may be noted that the values of land and buildings and of plant and machinery used in the factories are rapidly increasing. Thus, for the whole Commonwealth the total value of land and buildings and plant and machinery has increased from 1915 to 1919-20 by £31,524,748, i.e., from £81,492,417 to £113,017,165, or at the rate of £6,304,950 per annum.

The following statements shew the values of land and buildings and of plant and machinery used in connexion with manufacturing industries in each State during the past two years:—

VALUE OF LAND, BUILDINGS, PLANT AND MACHINERY IN CONNEXION WITH MANUFACTURING INDUSTRIES, 1918-19.

Value of—	N.S.W. 1918-19.	Victoria. 1918-19.	Q'land. 1918.	S. Aust. 1918-19.	W. Aust. 1918.	Tasmania. 1918.	C'wealth.
	£	£	£	£	£	£	£
Land and buildings	22,081,877	13,673,515	5,519,316	3,672,831	2,487,967	843,399	48,278,905
Plant and machinery	23,651,152	13,645,220	8,391,480	3,551,386	2,742,386	1,916,184	53,897,808
Total ..	45,733,029	27,318,735	13,910,796	7,224,217	5,230,353	2,759,583	102,176,713

VALUE OF LAND, BUILDINGS, PLANT AND MACHINERY IN CONNEXION WITH MANUFACTURING INDUSTRIES, 1919-20.

Value of—	N.S.W. 1919-20.	Victoria. 1919-20.	Q'land. 1919.	S. Aust. 1919-20.	W. Aust. 1919.	Tasmania. 1919.	C'wealth.
	£	£	£	£	£	£	£
Land and buildings	24,108,890	14,957,585	5,886,215	3,977,099	3,132,014	955,768	53,017,571
Plant and machinery	26,366,083	15,846,935	8,867,803	3,931,562	2,938,889	2,048,322	59,999,594
Total ..	50,474,973	30,804,520	14,754,018	7,908,661	6,070,903	3,004,090	113,017,165

The total capital invested in land, buildings, plant and machinery in manufacturing industries in the Commonwealth during the year 1919-20 was approximately £113,017,165 (or £21 12s. 10d. per head of population); of that sum £53,017,571 was invested in land and buildings occupied as manufactories, the remaining £59,999,594 being the value of the plant and machinery used in connexion therewith.

2. Value of Land and Buildings.—The value of the land and buildings occupied in connexion with manufacturing industries may be conveniently classified according to the nature of the industry concerned.

(i) *Total Value in Commonwealth, 1915 to 1919-20.* The following table shews for the whole Commonwealth the approximate values of land and buildings occupied in connexion with manufacturing industries of various classes during each year from 1915 to 1919-20 inclusive:—

VALUE OF LAND AND BUILDINGS OCCUPIED AS FACTORIES IN COMMONWEALTH, 1915 TO 1919-20.

Class of Industry.	1915. <i>a</i>	1916. <i>b</i>	1917. <i>c</i>	1918. <i>c</i>	1918-19. <i>d</i>	1919-20. <i>d</i>
	£	£	£	£	£	£
I. Treating raw material, product of agricultural and pastoral pursuits, etc.	1,069,890	1,002,686	1,126,504	1,237,117	1,415,725	1,588,513
II. Treating oils and fats, animal, vegetable, etc.	465,757	518,932	524,349	573,005	610,573	614,877
III. Processes in stone, clay, glass, etc.	1,666,097	1,620,520	1,657,760	1,739,247	1,943,848	2,216,901
IV. Working in wood	2,146,909	2,036,786	2,083,755	2,283,985	2,349,500	2,622,071
V. Metal works, machinery, etc.	6,587,199	6,800,296	7,137,251	7,961,012	8,163,051	8,997,496

Total ..	39,535,540	40,913,199	43,212,437	45,795,704	48,278,905	53,017,571

(a) New South Wales figures for year ended 30th June, 1915. (b) See note (a) first table this section.
(c) See note (b) first table this section. (d) See note (c) first table this section.

As shewn in the above table, the total net increase during the five years was £13,482,031, or an annual average of £2,696,406. The largest increases were in Classes VI., V., VII., and XVII., and amounted to £3,559,073, £2,410,297, £1,632,014, and £1,567,765 respectively.

(ii) *Value in each State.* The following tables give similar information for each State for the past two years:—

VALUE OF LAND AND BUILDINGS OCCUPIED AS FACTORIES IN EACH STATE, 1918-19.

(a) Includes Class II.

(b) Included in Class I.

The maximum value for the Commonwealth of land and buildings in any particular class was in Class VI., amounting to £13,411,552, or 25.30 per cent. on the total value. The next in order of importance were Classes V., VII., XVII., and VIII., in which the values were £8,997,496, £6,876,671, £4,342,913, and £4,270,008 respectively. The sum of the values for the five classes mentioned amounted to £37,898,640, or 71.48 per cent. on the total value for all classes.

(iii) *Value in each State, 1915 to 1919-20.* The following table shews the total value of land and buildings occupied as manufactories in each State at the end of each year from 1915 to 1919-20 inclusive:—

**VALUE OF LAND AND BUILDINGS OCCUPIED AS FACTORIES IN EACH STATE,
1915 TO 1919-20.**

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	C'wealth.
	£	£	£	£	£	£	£
1915	16,843,698a	11,460,123	4,446,405	3,289,628	2,363,262	1,132,424	39,535,540
1916b	17,770,517	11,460,123	5,014,824	3,289,628	2,247,505	1,130,602	40,913,199
1917c	18,920,057	12,052,227	5,251,877	3,462,296	2,308,264	1,127,716	43,212,437

1918-19d ..	22,081,877	13,673,515	5,519,316	3,672,831	2,487,967	843,399	48,278,905
1919-20d ..	24,108,890	14,957,585	5,886,215	3,977,099	3,132,014	955,768	53,017,571

(a) Year ended 30th June, 1915.

(b) See note (a) first table this section.

(c) See note (b) first table this section.

(d) See note (c) first table this section.

It will be seen that since 1915 there has been a general increase throughout the Commonwealth, with the exception of Tasmania, where a gradual decline has been in evidence. The States shewing the largest growth were New South Wales, Victoria, and Queensland, with annual average increases of £1,453,038, £699,492, and £287,962 respectively.

3. *Value of Plant and Machinery.*—(i) *Total Value in Commonwealth, 1915 to 1919-20.* The following table shews for the whole Commonwealth the approximate value of plant and machinery used in factories during each year from 1915 to 1919-20 inclusive:—

**VALUE OF PLANT AND MACHINERY USED IN FACTORIES IN COMMONWEALTH,
1915 TO 1919-20.**

Total	41,956,877	44,006,302	47,315,863	50,792,305	53,897,808	59,999,594

(a) New South Wales figures for year ended 30th June, 1915. (b) See note (a) first table this section.

(c) See note (b) first table this section. (d) See note (c) first table this section.

It will be seen that during the period in question there has been a steady and substantial net increase amounting in all to £18,042,717, or an annual average of £3,608,543. Development has occurred in all classes of industry, the largest increase being in Class V., "Metal Works, Machinery, etc.," where it amounted to £4,197,822, while the two next were in Class VI., "Connected with Food and Drink, etc.," with an increase of £3,617,846, and Class XVII., "Heat, Light, and Power," £3,594,558.

(ii) *Value in each State, 1915 to 1919-20.* The figures which were given in the above table referred to the Commonwealth as a whole. In the following table they are shewn for each State, and it will be seen that the increase referred to above is general throughout the States. New South Wales shews by far the largest increase, viz., £9,499,101; while Victoria comes next with £4,777,986. The establishment of the Electrolytic Zinc Works at Risdon, and a further extension of the State Hydro-electric Works to cope with the demand for increased power, were mainly responsible for the substantial increase noted in Tasmania during 1918.

Total . .	26,366,083	15,846,935	8,867,803	3,931,562	2,938,889	2,048,322	59,999,594

(a) Includes Class II.

(b) Included in Class I.

The greatest value for any particular class of industry is for Class VI., "Connected with Food and Drink, etc.," and amounts to £14,532,708, or 24.22 per cent. on the total for all classes. The next in order of importance is Class XVII., "Heat, Light, and Power," which amounts to £13,127,358, or 21.88 per cent. on the total; followed by Class V., "Metal Works, Machinery, etc.," amounting to £11,959,693, or 19.93 per cent. on the total value. The total for these three classes amounts to £39,619,759, or 66.03 per cent. on the total value for all classes.

§ 10. Individual Industries.

1. **General.**—The preceding remarks and tables furnish a general view of the recent development of particular classes of industries in Australia treated under the nineteen categories referred to in § 1, 3 hereof. In order to make the information complete, it is necessary to furnish details of the development of individual industries. While it is not possible, within the limits of this section, to give a full and detailed account of all the manufacturing industries of the Commonwealth, it is proposed to deal herein with such particular industries as are of special importance by reason of the number of persons employed, the number of factories, the amount of capital invested therein, the value of the production, or other features of special interest. In cases where there are only one or two establishments of a particular class in any State, returns relative to output are not published, in order to avoid disclosing information as to the operations of individual factories.

2. **Tanning Industry.**—(i) *Details for each State.* In Class I. (see § 1, 3 hereof) the most important industry is tanning. Until recent years, the production of tanneries in Australia was confined to the coarser class of leathers, but lately the tanning of the finer skins has been undertaken with satisfactory results. The position of the industry in the several States is as follows :—

TANNERIES, 1918-19.

Item.	N.S.W. 1918-19.	Vic. 1918-19.	Q'land. 1918.	S.A. 1918-19.	W.A. 1918.	Tas. 1918.	C'with.

Approx. value of land and buildings £	389,924	387,706	412,311	441,737	459,163	552,521
Approx. value of plant and machinery £	287,856	285,956	307,483	328,927	360,682	422,976
Total amount of wages paid £	418,363	422,014	466,071	493,880	577,043	777,368
Value of fuel used	26,140	27,292	34,102	40,558	45,957	60,981
Value of raw materials worked up £	3,188,817	3,283,787	3,951,266	3,831,180	4,423,092	6,837,835
Value of final output	4,088,140	4,233,427	4,979,988	4,990,412	5,762,741	8,772,336
Value added in process of manufacture £	899,323	949,640	1,028,722	1,159,232	1,339,649	1,934,501

(a) Including one wool-scouring and fellmongering establishment in Western Australia.

(b) Including fellmongering in Tasmania.

It will be seen from the above table that during the last five years the number of factories has decreased by 5, while the number of hands employed has increased by 771. The approximate amount of permanently invested capital shews a substantial increase, amounting to 41½ per cent. in the value of land and buildings, and 47 per cent. in that of plant and machinery. The amount of wages paid, value of materials used, and of final output, shew the large increases of 86, 114, and 115 per cent. respectively during the same period, while the value added in process of manufacture increased by 115 per cent. The relatively high increases which have taken place in the values of raw materials, added value, and final output in tanneries during the last five years, are not a reflection of any correspondingly large increase in the volume of business, but rather serve as an indication of the enhanced value of commodities since 1915.

3. *Fellmongering and Wool-scouring.*—(i) *Details for each State.* The next industry in importance in Class I. is that of fellmongering and wool-scouring, one of the earliest industries established in Australia. The following tables give particulars of the industry in each State during the past two years:—

FELLMONGERING AND WOOL-SCOURING, 1918-19.

Items.	N.S.W. 1918-19.	Vic. 1918-19.	Q'land. 1918.	S. Aust. 1918-19.	W.A. 1918.	Tas. 1918.	C'wealth.

Value added in process of manufacture £	696,459	1,085,973	1,230,941	1,815,798	1,912,833	2,466,517

(a) Excluding one establishment in Western Australia, particulars of which are included in tanneries.

Though the number of establishments has only increased by 4, this industry has been considerably extended during the last five years. The number of hands employed has risen from 2,337 to 3,610, and the amount of salaries and wages paid from £245,362 to £652,842, or more than 166 per cent. Though an augmentation of values has materially assisted, the progress of this industry may be gauged from the fact that the values of raw materials used and of final output have been more than doubled, while the added value has increased by no less than 254 per cent.

4. *Soap and Candle Factories.*—(i) *Details for each State.* In Class II. (see § 1, 3 hereof) soap and candle factories are the most important establishments. The manufacture of these two products is frequently carried on in the same factory, so that separate returns cannot be obtained; it may, however, be said generally that the manufacture of soap is the more important of the two. The following tables give particulars of soap and candle factories in each State during the years 1918-19 and 1919-20 :—

SOAP AND CANDLE FACTORIES, 1918-19.

Items.	N.S.W. 1918-19.	Victoria. 1918-19.	Q'land. 1918.	S. Aust. 1918-19.	W.A. 1918.a	Tas. 1918.a	C'wealth.
Number of factories	26	15	13	6	60
Number of employees	849	681	173	199	1,902

Value added in process of manufacture £ ..	685,563	647,776	629,547	788,154	788,389	988,077

(a) Including three oil establishments in Western Australia. (b) Excluding three soap and candle establishments in Western Australia, and one in Tasmania. (c) Excluding three soap and candle establishments in Western Australia.

(iii) *Production of Soap and Candles, 1915 to 1919-20.* The subjoined statement furnishes particulars of the output of soap and candles during the past six years :—

PRODUCTION OF SOAP AND CANDLES IN THE COMMONWEALTH, 1915 TO 1919-20.

Particulars.	1915.a	1916.a	1917.a	1918.a	1918-19.a	1919-20.a
Soap cwt.	729,984	727,349	671,326	746,166	694,456	788,478
Candles "	104,986	102,775	100,497	101,098	97,692	104,676

(a) Exclusive of Western Australia.

(iv) *Raw Materials Used, 1915 to 1919-20.* The following statement shows the quantity of certain raw materials used in soap and candle factories in the Commonwealth during the years 1915 to 1919-20 :—

RAW MATERIALS USED IN SOAP AND CANDLE FACTORIES, 1915 TO 1919-20.

Particulars.	1915.a	1916.a	1917.a	1918.a	1918-19.a	1919-20.a
Tallow cwt.	439,402	416,649	382,188	423,021	431,638	390,267
Alkali gal.	159,344	154,348	143,683	144,112	126,981	123,101
Cocoanut oil	485,851	630,298	524,918	533,685	624,802	460,549

(a) Exclusive of Western Australia.

5. **Saw Mills, etc.**—The most important industry in Class IV. is that of saw-milling. As separate particulars of forest saw mills are not available for some of the States, both forest and other saw mills, as well as joinery, moulding, and box factories have been combined in the following tables :—

SAW MILLS, FOREST AND OTHER, JOINERY, ETC., 1918-19.

Items.	N.S.W. 1918-19.	Victoria. 1918-19.	Q'land. 1918.	S. Aust. 1918-19.	W. Aust. 1918.	Tas. 1918.	C'wealth.

Value of final output ..	£ 8,892,082	8,297,110	8,443,255	9,829,872	10,890,530	14,276,983
Value added in process of manufacture ..	£ 4,289,219	3,809,909	3,979,259	4,670,181	5,116,531	6,652,873

The pre-war development in the building and other trades in Australia using timber received a temporary set-back during the war years, but the all-round increases since 1918 in wages, value of materials used, and final output, as well as in capital invested in land and buildings and plant and machinery, shew that the trade has practically regained its normal rate of progression.

6. **Agricultural Implement Factories.**—The manufacture of agricultural implements is an important industry in Australia, and is of particular interest owing to the fact that it was one of the first industries to which it was sought to apply the so-called "New Protection" system. The articles manufactured include stripper harvesters, strippers, stump-jump and other ploughs, harrows, disc and other cultivators, winnowers, corn-shellers and baggers, drills, and other implements usually employed in agriculture. The stripper-harvester, which combines the stripper with a mechanism for winnowing and bagging grain, is an Australian invention, and is exported to many countries.

The following tables give particulars of the agricultural implement works of Australia for the years 1918-19 and 1919-20:—

AGRICULTURAL IMPLEMENT WORKS, 1918-19.

Items.	N.S.W. 1918-19.	Vic. 1918-19.	Q'land. 1918.	S.A. 1918-19.	W.A. 1918.a	Tas. 1918.	C'wealth. c
Number of factories	25	60	6	46	..	1	138
Number of employees	455	1,689	68	699	..	3	2,914

Value added in process of manufacture £	134,143	407,507	b	143,215	..	b	696,883

(a) Western Australia has three agricultural implement establishments, but separate details are not available for publication. (b) Information not available for publication. (c) Excluding Western Australia.

A glance at the following table will shew that the Agricultural Implement industry has failed to progress during the last five years. There are fewer factories, fewer hands, less power used, and the total output is smaller than it was in 1915:—

DEVELOPMENT OF AGRICULTURAL IMPLEMENT WORKS IN THE COMMONWEALTH, FROM 1915 TO 1919-20.

Items.	1915.	1916.	1917.a	1918.b	1918-19.b	1919-20.b

Value added in process of manufacture £	634,896	700,414	667,845	652,406	617,355	696,883

(a) Excluding three establishments in Western Australia and one in Tasmania.
(b) Excluding three establishments in Western Australia.

7. **Engineering Works, Ironworks, and Foundries.**—The classification in these industries is not very satisfactory. Generally, engineering shops, ironworks, and foundries are included, as also are factories for making nails, safes, patterns, meters, and springs. Railway workshops, agricultural implement factories, cyanide, smelting, pyrites, and metallurgical works, galvanised iron, stoves and ovens, and wire working establishments are not included. The combination of industries is rendered necessary owing to the limited classification still adopted by some of the States.

ENGINEERING WORKS, IRONWORKS, AND FOUNDRIES, 1918-19.

Items.	N.S.W. 1918-19.	Victoria. 1918-19.	Q'land. 1918.	S. Aust. 1918-19.	W. Aust. 1918-19.	Tas. 1918.	C'wealth.

(a) Including three agricultural implement establishments.

In addition to engineering works which supply ordinary requirements, there is now a number of large and important establishments which engage in the manufacture of special classes of machinery and implements. The manufacture of mining and smelting machinery and apparatus forms an important section of this industry.

The development of engineering works, ironworks, and foundries in the Commonwealth since 1915 is shewn in the following table:—

**DEVELOPMENT OF ENGINEERING WORKS, IRONWORKS, AND FOUNDRIES,
FROM 1915 TO 1919-20.**

Items.	1915.	1916.	1917. <i>a</i>	1918. <i>a</i>	1918-19 <i>a</i> .	1919-20 <i>a</i> .
Number of factories	950	956	962	1,012	1,058	1,141
Number of employees	25,219	25,718	23,543	23,783	25,834	31,050
Actual horse-power of engines used	34,049	39,658	42,502	44,317	47,078	53,410
Approx. value of land and buildings £	2,315,984	2,424,759	2,581,605	2,910,881	3,139,984	3,527,933
Approx. value of plant and machinery £	2,988,650	3,655,662	4,274,067	4,744,750	5,120,625	6,339,285
Total amount of wages paid £	3,134,873	3,468,260	3,265,738	3,365,045	3,821,623	5,161,441
Value of fuel used	369,170	420,139	431,448	493,116	649,119	1,037,012
Value of raw material worked up £	4,005,914	4,718,516	5,932,214	7,520,930	9,942,386	11,928,660
Value of final output	8,944,601	10,205,424	11,096,741	13,322,795	16,291,175	20,209,329
Value added in process of manufacture £	4,938,687	5,486,908	5,164,527	5,801,865	6,348,789	8,280,669

(a) Including three agricultural implement establishments in Western Australia.

The progress in these industries during late years has been very marked. Since 1915 the number of establishments has increased by more than 20 per cent., the amount of wages paid 64½ per cent., the amount of capital invested in land, buildings, plant and machinery 86 per cent., and the output nearly 126 per cent.

8. Railway and Tramway Workshops.—(i) *Details for each State.* The railway workshops of Australia form an important item in the metal and machinery class, and are chiefly State institutions. The following tables give the details concerning them, but include also private and municipal establishments for manufacturing and repairing rolling stock:—

RAILWAY AND TRAMWAY WORKSHOPS, 1918-19.

Items.	N.S.W. 1918-19.	Victoria. 1918-19.	Q'land. 1918.	S. Aust. 1918-19.	W. Aust. 1918.	Tas. 1918.	C'wealth.
Number of factories	39	19	12	9	8	7	94
Number of employees	8,443	3,696	2,522	2,637	1,410	328	19,036
Actual horse-power of engines employed	5,516	1,648	2,866	776	2,446	182	13,434
Approximate value of land and buildings	1,177,081	684,510	357,464	275,979	442,517	7,075	2,944,626

RAILWAY AND TRAMWAY WORKSHOPS, 1919-20.

Items.	N.S.W. 1919-20.	Victoria. 1919-20.	Q'land. 1919.	S. Aust. 1919-20.	W. Aust. 1919.	Tas. 1919.	C'wealth.
Number of factories	39	19	12	9	8	7	94
Number of employees	9,832	4,373	2,748	2,593	1,576	366	21,488
Actual horse-power of engines employed	6,864	2,312	2,937	934	2,396	183	15,626
Approximate value of land and buildings	1,190,066	691,230	357,444	280,188	450,835	7,075	2,976,838
Approximate value of plant and machinery	1,233,946	542,835	255,264	218,392	275,316	90,248	2,616,001
Total amount of wages paid during year	1,967,849	791,753	480,874	432,202	246,746	58,278	3,977,702
Value of fuel used	40,002	26,152	7,316	17,680	11,399	1,947	104,496
Value of raw material worked up £	1,391,788	804,061	227,930	213,243	169,422	23,463	2,829,907
Total value of output	3,458,750	1,784,163	628,199	734,729	423,601	87,542	7,116,984
Value added in process of manufacture	2,066,962	980,102	400,269	521,486	254,179	64,079	4,287,077

(ii) *Northern Territory Railway Workshop.* In addition to the above, a railway workshop is in operation in the Northern Territory. The work is confined almost exclusively to repairs to rolling stock, etc., no new goods being manufactured. For the sake of convenience this establishment is not included in any of the tables in this section.

(iii) *Development of Railway and Tramway Workshops, 1915 to 1919-20.* The following table shows the development of railway and tramway workshops in the Commonwealth since 1915:—

**DEVELOPMENT OF RAILWAY AND TRAMWAY WORKSHOPS, ETC., FROM
1915 TO 1919-20.**

Items.	1915.	1916.	1917.	1918.	1918-19.	1919-20.
Number of factories	77	92	94	95	94	94
Number of employees	22,224	22,995	20,566	18,071	19,036	21,488
Actual horse-power of engines used ..	12,571	14,350	13,363	12,874	13,434	15,626
Approximate value of land and buildings	£ 2,471,731	2,548,223	2,609,432	2,904,419	2,944,626	2,976,838
Approximate value of plant and machinery	£ 2,236,578	2,389,065	2,480,239	2,614,127	2,636,591	2,616,001
Total amount of wages paid	£ 3,174,946	3,409,265	3,270,817	2,839,827	3,106,829	3,977,702
Value of fuel used	£ 90,490	92,200	87,701	81,487	90,848	104,496
Value of raw material worked up	£ 2,363,785	2,234,063	2,010,288	1,934,645	2,082,557	2,829,907
Value of final output	£ 6,046,521	6,298,338	5,566,940	5,037,255	5,418,996	7,116,984
Value added in process of manufacture ..	£ 3,682,736	3,974,275	3,556,652	3,102,610	3,336,439	4,287,077

The growth of the railway and tramway systems, conjointly with heavy increases in passenger and goods traffic throughout the Commonwealth, has resulted in corresponding activity in workshops engaged in the manufacture or repair of rolling stock, etc. Since the war, however, the operations of these establishments have been restricted, on the score of economy, to necessary works, and consequently the value of output only increased from £6,046,521 in 1915 to £7,116,984 in 1919-20.

9. *Smelting Works, etc.*—The subjoined tables give particulars of metal smelting, cyanide, pyrites, and metallurgical works. The classification of these works does not appear to be carried out on an uniform basis in the several States, and the combination of industries is, therefore, somewhat unsatisfactory. The returns do not include particulars of plants used on mines.

SMELTING, CYANIDE, PYRITES, ETC., WORKS, 1918-19.

Items.	N.S.W. 1918-19.	Victoria. 1918-19.	Q'land. 1918.	S. Aust. 1918-19.	W.A.a 1918.	Tasmania. 1918.	C'wealth.

Total value of output £	3,711,485	159,790	1,506,421	b	..	b	c7,908,611
Value added in process of manufacture £	393,733	54,894	968,026	b	..	b	c2,525,054

(a) See third paragraph below.

(b) Information not available for publication.

(c) Including South Australia and Tasmania.

In New South Wales the above figures represent ten smelting works and one metallurgical establishment; those for Victoria include five cyanide works, four metallurgical, two pyrites, and three smelting works; Queensland smelting and cyaniding; and South Australia and Tasmania smelting works.

A serious depression has taken place in the metal and ore reduction industries owing to the fall in the prices of metals. Since 1918 the number of establishments has dropped from 63 to 46, and the number of hands from 7,085 to 4,194. Corresponding decreases have occurred in wages paid and fuel used, while the value of output has fallen from £18,409,027 to £7,908,611.

In Western Australia all the plants are worked on the mines, and are therefore not included.

10. Bacon-curing Factories.—(i) *Details for each State.* The following tables give particulars of factories engaged in bacon-curing in each State during the past two years:—

BACON-CURING FACTORIES, 1918-19.

Items.	N.S.W. 1918-19.	Victoria. 1918-19.	Q'land. 1918.	S. Aust. 1918-19.	W. Aust. 1918.	Tas. 1918.	C'wealth.

Condensed milk factories .. "	3,619	10,615	2,229	16,463

The butter, cheese, and condensed milk industries are dealt with more fully in Section IX., *Farmyard and Dairy Production.*

12. Meat and Fish Preserving, Ice and Refrigerating Works.—These industries are now of considerable importance in Australia. Large freezing works have been installed at many ports in the Commonwealth for the purpose of freezing produce chiefly for export, while insulated space for the carriage of frozen produce is provided by a number of steamship companies trading between Australia and other parts of the world.

Particulars regarding the export of frozen beef and mutton may be found on pages 222 and 225 hereof respectively.

The particulars given in the subjoined tables include ice-making and freezing works, also meat-canning factories, separate particulars for each item for all the States not being available.

MEAT AND FISH PRESERVING, ICE AND REFRIGERATING WORKS, 1918-19.

Items.	N.S.W. 1918-19.	Vic. 1918-19.	Q'land. 1918.	S.A. 1918-19.	W.A. 1918.	Tas. 1918.	C'wealth.

(a) Information not available for publication.

(b) Including South Australia and Tasmania.

The following tables give particulars, so far as available, of meat tinned during the years 1918-19 and 1919-20:—

MEAT PRESERVING WORKS—OUTPUT, 1918-19.

Output.	N.S.W. 1918-19.	Victoria. 1918-19.	Q'land. 1918.	S. Aust. 1918-19.	W. Aust. 1918.	Tas. 1918.	C'wealth.
Tinned meat .. cwt.	215,971a	204,160b	308,730c	11,576d	740,437

(a) Also 33,226 cwt. tinned rabbits. (b) Also 9,625 cwt. tinned rabbits. (c) Also 1,940 cwt. salted meat. (d) Large numbers of rabbits are tinned in South Australia, but particulars are not available for publication.

MEAT PRESERVING WORKS—OUTPUT, 1919-20.

Output.	N.S.W. 1919-20.	Victoria. 1919-20.	Q'land. 1919.	S. Aust. 1919-20.	W. Aust. 1919.	Tas. 1919.	C'wealth.
Tinned meat .. cwt.	167,589	a167,435	b247,572	c7,772	590,368

(a) Also 7,580 cwt. tinned rabbits. (b) Also 113 cwt. salted meat. (c) Large numbers of rabbits are tinned in South Australia, but particulars are not available for publication.

Large quantities of rabbits, hares, and poultry, for which, however, complete returns are not available, were treated in freezing works. Exclusive of Victoria, for which State particulars are not available, the returns shew that 118,207 tons of ice, valued at £263,606, were manufactured in the Commonwealth in 1919-20.

Full particulars of quantities and value of beef, mutton, and lamb preserved by cold process, exported from the Commonwealth during a series of years, will be found in Section VII., *Pastoral Production*.

13. Biscuit Factories.—The following tables give particulars regarding establishments at which the manufacture of biscuits, cakes, etc., was carried on in each State during the years 1918-19 and 1919-20:—

BISCUIT, ETC., FACTORIES, 1918-19.

Items.	N.S.W. 1918-19.	Victoria. 1918-19.	Q'land. 1918.	S. Aust. 1918-19.	W. Aust. 1918.c	Tas. 1918.	C'wealth.
Number of factories	9	7	22	3	6	3	50

Total value of output £	1,246,915	1,034,400	345,702	103,474	135,620	60,501	2,926,672
Value added in process of manufacture £	429,787	351,928	151,944	31,376	46,769	24,019	1,035,823

(a) Information not available for publication.

(b) Including South Australia and Tasmania.

(c) Including one butterine and margarine establishment.

14. Jam and Fruit Preserving, Pickles, Sauces, and Vinegar.—(i) *Details for each State.* The jam and fruit preserving industry has increased in importance of late years, consequent on the extension of fruit-growing. As an exporting industry it is comparatively recent, but is of increasing value, and has shewn considerable expansion during

the past five years. During the year ended 30th June, 1920, 44,793,409 lbs. of jams and jellies, valued at £1,218,997, were exported from the Commonwealth. The subjoined tables give particulars of factories at which these industries were carried on in each State during the years 1918-19 and 1919-20. Separate returns for the different branches of the industry are not available for most of the States.

JAM AND FRUIT PRESERVING, PICKLES, SAUCES, AND VINEGAR FACTORIES, 1918-19.

Items.	N.S.W. 1918-19.	Victoria. 1918-19.	Q'land. 1918.	S. Aust. 1918-19.	W. Aust. 1918.	Tas. 1918.	C'wealth.

Value added in process of manufacture £	814,646	856,533	1,012,878	1,117,509	1,336,480	1,730,349

The progression of the jam and fruit preserving industry has been very marked during the past five years. Since 1915, the number of factories has been considerably enlarged, necessitating a 50 per cent. increase in the number of employees with a corresponding increase in the amount of wages paid, while the value of the output and the added value have been more than doubled.

15. Confectionery.—(i) *Details for each State.* The following tables reveal the position of the confectionery industry. Its growth will be apparent when it is stated that at the close of 1900 there were in New South Wales only 16 establishments, with 706 employees, and in Victoria 16 establishments, employing 731 persons, the plant and machinery in the former State being valued at £2,815, and in the latter at £19,070.

The embargo placed on the importation of luxuries during the war period was responsible for a considerable expansion of the confectionery industry in Australia.

During the past five years the number of factories increased by 57 per cent., the number of employees by 66 per cent., and the actual horse-power of engines used by 79 per cent., while the values of the salaries and wages paid, and of the final output shewed increases amounting to 118 and 132 per cent. respectively.

16. *Flour Mills.*—The following tables shew the position of the flour-milling industry:—

FLOUR MILLS, 1918-19.

Items.	N.S.W. 1918-19.	Victoria. 1918-19.	Q'land. 1918-19.	S. Aust. 1918-19. a	W. Aust. 1918.	Tas. 1918.	C'wealth.

(a) Tons of 2,000 lbs. (b) Year ended 30th June, 1915. (c) See note (a) first table this section.

(d) See note (b) first table this section.

(e) See note (c) first table this section.

The total production of flour for the Commonwealth for the last year, viz., 1,050,228 tons, was valued at £14,076,083; in addition 443,573 tons of bran and pollard, valued at £3,247,685, were made. The total quantity of wheat ground was 50,881,516 bushels.

17. Sugar Mills.—The following tables shew the position of the cane-crushing branch of the sugar-making industry. This industry is carried on in Queensland and New South Wales, the only States of the Commonwealth in which sugar-cane is grown.

SUGAR MILLS, 1918-19.

Items.	N.S.W. 1918-19.	Queensland. 1918.	Total.
Number of factories	3	42	45
Number of employees	432	5,214	5,646

Approximate value of plant and machinery £	423,632	2,894,823	3,318,455
Total amount of wages paid during year .. £	42,743	497,319	540,062
Value of fuel used £	5,263	46,045	51,308
Value of raw material worked up £	163,858	2,342,072	2,505,930
Total value of output £	238,414	3,705,593	3,944,007
Value added in course of manufacture .. £	74,556	1,363,521	1,438,077

The product of the sugar mill is raw sugar and molasses, the former being sent to the refineries in different parts of Australia for further treatment. Part of the molasses produced is used in distillation, part is prepared for human consumption, part is turned into food cake for cattle, and part is used for manuring land, but a considerable quantity is run to waste. The following tables shew the progress of this industry in each State from the dates at which information is first obtainable :—

SUGAR MILLS, NEW SOUTH WALES, 1870 TO 1919-20.

Items.	1870.	1877.	1886.	1896.	1901.	1915-16.	1916-17.	1917-18	1918-19.	1919-20.
No. of factories	27	50	64	23	12	3	3	3	3	3
No. of employees ..	1,065	2,259	1,475	695	463	427	367	432	419

(a) Not available.

The reduction in the number of New South Wales mills is due chiefly to the tendency towards concentration of cane-crushing in mills fitted with modern machinery, and the consequent closing of the small home mill. On the north coast of New South Wales some land formerly devoted to sugar-growing has been turned into pasture in connexion with the dairying industry.

SUGAR MILLS, QUEENSLAND, 1868 TO 1919.

Items.	1868.	1876.	1886.	1896.	1901.	1911.	1917.	1918.	1919.

(a) Quantity recorded; large quantities run to waste of which no record is kept. (b) No record.
(c) Acres crushed.

Information regarding the cultivation of sugar-cane may be found in the section of this book dealing with *Agricultural Production*. (See pages 283 to 286.)

18. Sugar Refineries.—The establishment of the sugar-refining industry considerably antedates the establishment of the sugar-milling industry, the raw material operated upon being originally brought chiefly from Mauritius and the East. In 1919-20 there were two sugar refineries in each of the States of Victoria and Queensland, and one in each of the States of New South Wales and South Australia. The returns for the individual States cannot be disclosed.

In the six refineries in the Commonwealth, an average number of 1,705 hands was employed during the year. The approximate value of land and buildings was £530,612, of plant and machinery, £1,163,675; and the total amount of wages paid during the year was £284,013. The value of all materials used in sugar refineries was £6,346,660, while the total output reached £7,498,643. The amount of crude sugar used was 247,763 tons, and of refined sugar produced 238,428 tons, valued at £7,435,245.

19. Breweries.—(i) *Details for each State.* The following tables give particulars of breweries in each State for the past two years :—

BREWERIES, 1918-19.

(iii) *Development of Breweries, 1915 to 1919-20.* The following table shows the progress of this industry during the past five years :—

DEVELOPMENT OF BREWERIES FROM 1915 TO 1919-20.

Items.	1915.	1916.	1917.	1918.	1918-19.	1919-20.
Number of breweries	90	86	77	72	68	68
Number of employees	3,295	3,179	3,191	3,268	3,355	3,710
Actual horse-power of engines used ..	8,430	8,882	8,955	9,602	9,922	18,091
Approx. value of land and buildings £	1,872,535	1,864,712	1,901,488	1,676,567	1,692,220	1,109,813
Approx. value of plant and machinery £	1,452,639	1,518,846	1,565,914	1,600,734	1,654,600	1,243,272
Total amount of wages paid	548,632	560,004	594,687	632,076	668,579	831,779
Value of fuel used	81,252	87,375	104,629	120,381	128,650	160,609
Value of raw material worked up	1,494,974	1,548,615	1,637,568	1,959,232	2,215,487	2,700,601
Value of final output	3,869,786	3,872,044	3,952,647	4,741,744	5,184,649	6,631,409
Value added in process of manufacture £	2,374,812	2,323,429	2,315,079	2,782,512	2,969,162	3,870,808

The main feature in the history of the brewing industry, which was established at an early date in Australia, has been the change from the small local brewery in every township of moderate size to the large centralised city brewery. This, however, has not been so much in evidence during the period embraced in the above table, the reduction of the number of establishments during recent years being mainly due to several large amalgamations. The total value of output of breweries in the Commonwealth increased from £3,869,786 in 1915 to £6,631,409 in 1919-20, while the quantity of ale and stout brewed during the same period increased from 61,550,491 to 71,630,608 gallons. The average production per head of mean population likewise increased from 12.43 gallons per head for 1915 to 13.72 gallons for 1919-20.

20. *Distilleries.*—The subjoined tables give particulars of distilleries in four States. There are no distilleries in Western Australia or Tasmania.

DISTILLERIES, 1918-19.

Items.	N.S.W. 1918-19.	Victoria. 1918-19.	Q'land. 1918.	S. Aust. 1918-19.	W. Aust. 1918.	Tas. 1918.	C'wealth.

Total value of output	66,331	219,341	48,546	210,333	544,561
Value added in process of manufacture £	26,768	96,609	34,042	66,809	224,228

The total quantity of rum distilled during the year was 50,854, of whisky 278,152, of brandy 174,270, of gin 63,534, and of other spirits, including rum distilled in Queensland, separate particulars for which are not available, 2,431,307 proof gallons. The materials used comprised 422,207 cwt. of molasses, and 4,154,025 gallons of wine.

21. Tobacco, Cigars, and Cigarettes.—(i) *Details for each State.* During the years 1918-19 and 1920 there were thirty-seven establishments in which the manufacture of tobacco, cigars, and cigarettes was carried on. There were no factories engaged in this industry in Tasmania.

TOBACCO, CIGAR, AND CIGARETTE FACTORIES, 1918-19.

(a) Not available for publication. (b) Including particulars of New South Wales, Queensland, South Australia and Western Australia.

(iii) *Development of Industry.* This industry was among the first to be established in Australia. In 1861 New South Wales had eleven factories, producing 177,744 lbs. of manufactured tobacco; in the same year there was one factory in Victoria, but the quantity of tobacco manufactured is not available. The Australian market has for many years been largely supplied with local manufactures. The quantities imported into Australia during 1919-20 were—manufactured tobacco 682,639 lbs., cigars 123,389 lbs., and cigarettes 133,667 lbs., while the quantities manufactured in Australian factories were respectively 13,157,977 lbs., 552,121 lbs., and 4,836,602 lbs. The following tables shew the development of the tobacco manufacturing industry in the Commonwealth during recent years:—

DEVELOPMENT OF TOBACCO, CIGAR, AND CIGARETTE FACTORIES IN THE COMMONWEALTH, 1915 TO 1919-20.

(a) Including four condiment establishments in Western Australia. (b) Including one condiment and two malting establishments in Queensland, and excluding two cigar factories in South Australia. (c) Exclusive of two factories in South Australia. (d) Incomplete.

22. *Woollen, Cotton, and Tweed Mills.*—(i) *Details for each State.* The manufacture of woollens and tweeds was established in Australia at an early period in its history, and was under Government control, the first record in New South Wales dating back to

1801, when a few blankets were made by the convicts; the first record in Victoria was in 1867. The following tables, which give particulars of the mills in each State, shew that the industry is now well established :—

(iii) *Quantity and Value of Production.* The production of the woollen mills of Australia consists chiefly of tweed cloths, flannels, and blankets, all of which have acquired a reputation for purity and durability. Detailed particulars for the several States are not available for publication. The total length of tweed and cloth manufactured in the Commonwealth during 1919-20 was 5,388,177 yards. In New South Wales 2,208,846 yards of tweed and cloth, and in Victoria 2,212,202 yards were manufactured. The production of flannel in the Commonwealth amounted to 4,741,621 yards, while blankets, shawls, and rugs to the number of 632,942 were manufactured.

No cotton spinning or weaving, or linen weaving is carried on in Australia. Cotton ginning has been carried on intermittently in the northern States, and a mill was lately reopened at Ipswich in Queensland.

23. *Boots and Shoes.*—(i) *Details for each State.* Among the manufactories of Australia the boot and shoe industry holds an important place both in respect to the employment afforded and the extent of its output. The following tables shew the particulars of this industry for each State during 1918-19 and 1919-20:—

BOOT AND SHOE FACTORIES, 1918-19.

Value of raw material worked up	£ 2,673,016	2,793,391	3,784,338	3,913,893	4,451,458	6,661,483
Value of final output	£ 4,486,885	4,617,322	6,143,038	6,410,464	7,120,164	10,206,965
Value added in process of manufacture	£ 1,813,869	1,823,931	2,358,710	2,496,571	2,668,706	3,545,482

The above table furnishes evidence of substantial and consistent development in the manufacture of boots and shoes in the Commonwealth during the period under review. Since 1915, the amount of wages paid increased from £1,220,987 to £2,232,746; the value of materials used from £2,673,016 to £6,661,483; and the final output from £4,486,885 to £10,206,965. During the same period the production of boots and shoes increased by 1,771,273 pairs, and slippers by 597,182 pairs.

(iii) *Quantity and Value of Production.* The numbers and values of boots, shoes, and slippers made at factories in each State are shewn in the following tables:—

The considerable increases which have taken place in the prices of raw materials were mainly responsible for the decline of the tailoring and slop branch of the clothing industry during the past five years.

As will be seen from the following table, the number of factories decreased by 78, and the number of employees by 2,426 since 1915. The total output shews an increase of £3,832,400, but this increase merely indicates the advance which has taken place in the price of clothing during recent years :—

DEVELOPMENT OF CLOTHING (TAILORING AND SLOP) FACTORIES IN THE COMMONWEALTH FROM 1915 TO 1919-20.

The development of dressmaking and millinery establishments in the Commonwealth during the past five years is shewn in the following table :—

DEVELOPMENT OF DRESSMAKING AND MILLINERY ESTABLISHMENTS IN THE COMMONWEALTH FROM 1915 TO 1919-20.

Items.	1915.	1916.	1917.	1918.	1918-19.	1919-20.
Number of factories	892	890	932	920	876	854
Number of employees	15,616	16,383	18,211	18,575	17,683	17,954
Actual horse-power of engines used	428	509	602	648	623	636
Approx. value of land and buildings £	917,895	974,766	1,036,251	1,087,567	1,159,550	1,167,568
Approx. value of plant and machinery £	70,357	82,057	99,552	111,622	116,093	128,646
Total amount of wages paid £	714,131	749,377	873,269	986,440	1,044,263	1,237,811
Value of fuel used £	9,440	10,746	13,341	14,227	14,125	15,070
Value of raw material worked up £	1,224,687	1,266,755	1,595,495	1,884,886	2,051,177	2,685,382
Value of final output £	2,364,862	2,481,266	2,976,725	3,405,574	3,634,695	4,882,988
Value added in process of manufacture £	1,140,175	1,214,511	1,381,230	1,520,688	1,585,518	2,197,606

Despite the high prices, the dressmaking and millinery establishments in the Commonwealth continued to progress during the past five years.

The number of employees, the actual horse-power of engines used, and the capital invested have all shewn increases since 1915, while the amount of salaries and wages paid advanced from £714,131 to £1,237,811, and the value of the final output from £2,364,862 to £4,882,988.

26. **Electrotyping, Stereotyping, Printing, and Binding.**—The printing industry ranks high in importance among the manufactories of the Commonwealth. It affords employment for some 20,000 employees, and pays £3,000,000 in salaries and wages. During 1919–20 the total value of the output amounted to £10,906,244.

The following table gives particulars of these industries in each State for the years 1918–19 and 1919–20 :—

**ELECTROTYPING, STEREOTYPING, PRINTING, AND BINDING ESTABLISHMENTS,
1918–19.**

Items.	N.S.W. 1918–19.	Victoria. 1918–19.	Q'land. 1918.	S. Aust. 1918–19.	W. Aust. 1918.	Tas. 1918.	C'wealth.

Value added in process of manufacture ..	£ 4,252,330	4,454,670	4,663,160	4,847,396	4,995,170	5,902,563

The latter table furnishes evidence of the activities of the printing establishments during the last five years. Since 1915 considerable increases have taken place in practically all of the items enumerated above, the value of the final output advancing from £6,404,426 to £10,906,244, or more than 70 per cent., and the added value from £4,252,330 to £5,902,563 or more than 38 per cent.

27. **Coach and Wagon Building Works.**—This industry forms the principal branch of manufacture in Class XI. (see § 1, 3 above). The subjoined tables give particulars of factories in this branch of industry in each State. The returns include establishments for the manufacture of wheels, spokes, etc.

COACH AND WAGON BUILDING WORKS, 1918-19.

30. Gas and Coke Works.—There are gas works in operation in nearly all the chief towns in the Commonwealth. In New South Wales there are fourteen and in Queensland two coke factories which are worked as separate industries. The subjoined tables give particulars of gas and coke works in each State for the years 1918-19 and 1919-20:—

GAS AND COKE WORKS, 1918-19.

SECTION XIV.

WATER CONSERVATION AND IRRIGATION.

§ 1. Artesian Water.

1. General.—In every country in which droughts are recurrent, there are few problems the solution of which is of greater importance than that of an adequate system of water conservation. Much has been done in the Commonwealth so far as the supply of water to centres of population is concerned, and a description of several of the metropolitan water works will be found herein, viz., in the section dealing with *Local Government*. In May, 1912, an Interstate Conference on artesian water was held in Sydney, at which it was agreed that combined Governmental action should be taken with reference to delimitation of the artesian basin, hydrographic survey, analyses and utilisation of artesian water, &c. (See map on page 471.)

(i) *The Great Australian Artesian Basin.* In speaking of the "Great Australian Artesian Basin," the area is understood which includes (a) considerably more than one-half of Queensland, taking in practically all that State lying west of the Great Dividing Range, with the exception of an area in the north-west contiguous to the Northern Territory; (b) a considerable strip of New South Wales along its northern boundary and west of the Great Dividing Range; and (c) the north-eastern part of South Australia proper, together with the extreme south-eastern corner of the Northern Territory. This basin (shewn approximately by the map on page 471) is said to be the largest yet discovered, and measures about 569,000 square miles, of which 376,000 square miles are in Queensland, 90,000 square miles in South Australia, 83,000 square miles in New South Wales, and 20,000 square miles in the Northern Territory. The area of the intake beds is estimated at 60,010 square miles, viz., 50,000 square miles in Queensland and 10,010 square miles in New South Wales. A description of the basin and its geological formation will be found in previous issues of the Year Book (see No. 6, p. 569).

(ii) *The Western Australian Basins.* The Western Australian Basins fall naturally within five distinct groups, viz., the Eucla Basin, in the extreme south-east of the State, extending well into South Australia along the shores of the Great Australian Bight; the Coastal Plain Basin, west of the Darling Range; the North-West Basin, between the Murchison and Ashburton Rivers; the Gulf Basin, between Cambridge Gulf and Queen's Channel; and the Desert Basin, between the De Grey and Fitzroy Rivers. The boring operations in these basins are referred to hereinafter (see page 468.)

The Recent and Tertiary strata which enter Western Australia at its eastern border, and which have a prevailing dip towards the Great Australian Bight, form the Eucla artesian water area. But where boring operations have been undertaken, the water has been found to be salt or brackish, and there are other conditions affecting the supply, such as local variations in the thickness of the beds, their relative porosity, and the unevenness of the floor upon which they rest, which, so far, have not been examined with sufficient thoroughness to enable many particulars to be given in regard to this basin.

In the Coastal Plain Basin to the west of the Darling Ranges artesian boring has, on the other hand, been carried on successfully for many years.

(iii) *The Murray River Basin.* The Murray River basin extends over south-western New South Wales, north-western Victoria, and south-eastern South Australia. It is bounded on the west by the azoic and palæozoic rocks of the Mount Lofty and other ranges, extending northwards from near the mouth of the Murray to the Barrier Ranges, and on the east and north-east by the ranges of Victoria and New South Wales. This tertiary water-basin is occupied by a succession of sedimentary formations, both porous and impervious. It is of interest to note that the waters of the Murray River are partly supplied by influx from the water-bearing beds of this basin; this is proved by the fact that, at low water, springs are observed at certain places flowing into it from beneath the limestone cliffs from Pyap Bend downwards. Similar springs exist along the courses of other branches of the River Murray system, where they cut through the tertiary formation. On the Victorian side several bores have been put down, and water has been struck at various levels.

(iv) *Plutonic or Meteoric Waters.* In previous Year Books will be found the theory of Professor Gregory* as to the origin of the water in the Australian artesian basin, together with the objections held thereto by a former Government Geologist of New South Wales.† (See Year Book No. 6, p. 570.)

(v) *Particulars of Artesian and Sub-artesian Bores.* The following table gives particulars of artesian and sub-artesian bores in each State and in the Northern Territory :—

COMMONWEALTH AND STATES.(a)—PARTICULARS OF ARTESIAN AND SUB-ARTESIAN BORES, 1919-20.

(a) There are no artesian bores in Tasmania. (b) Not available. (c) Incomplete. (d) Government bores only. (e) Exclusive of flow from pumping bores. (f) There is only one artesian bore in Northern Territory; water struck at 1,250 feet.

2. *New South Wales.*—(i) *Artesian Water Supply.* The New South Wales portion of the great Australian basin, comprising approximately 70,000 square miles, is situated in the north-western portion of the State. Artesian boring in New South Wales dates from 1879, when a private bore was put down on the Kallara pastoral holding, between Bourke and Wilcannia. The first Government bore was that at Goonery, on the Bourke-Wanaaring road, completed in 1884.

The following statement shews the extent of the work which has been successfully effected by the Government and by private owners up to 30th June, 1920 :—

NEW SOUTH WALES ARTESIAN BORES, 1920.

Bores.	Flowing.	Pumping.	Total.	Total Depth.
For Public Watering-places, Artesian Wells, etc.	121	35	156	323,044
For Country Towns Water Supply	2	1	3	4,354
For Improvement Leases	36	4	40	63,212
Total Government Bores	159	40	199	390,610
Private Bores	219	83	302	439,393

The average depth is 1,963 feet in the case of Government bores, and of private bores 1,454 feet, and it ranges from 89 to 4,338 feet. The two deepest wells in New South Wales are those at Boronga, in the County of Stapylton, with a depth of 4,338 feet and a present outflow of 924,990 gallons; and at Dolgelly, in the Parish of Carennaga, in County

* See J. W. Gregory, F.R.S., D.Sc.: "The Dead Heart of Australia," London, John Murray, 1906; "The Flowing Wells of Central Australia," Geogr. Journ., July and August, 1911.

† E. F. Pittman, A.R.S.M., formerly Government Geologist of New South Wales: "Problems of the Artesian Water Supply of Australia, with special reference to Professor Gregory's Theory." (Clarke Memorial Lecture, delivered before the Royal Society of New South Wales, 31st October, 1907); "The Great Australian Artesian Basin," Sydney, 1914; "The Composition and Porosity of the Intake Beds of the Great Australian Artesian Basin," Sydney, 1915.

Stapylton, with a depth of 4,086 feet, and a present discharge of 534,406 gallons per day. The largest flow at the present time is that at the Wirrah bore, in the County of Benarba, which yields 1,079,776 gallons a day, and has a depth of 3,578 feet.

Of the 549 bores which have been sunk, 378 are flowing, and give an aggregate discharge of 86,532,254 gallons per day; 123 bores give a pumping supply, the balance of 48 being failures; the total depth bored represents 890,945 feet.

The flow from 74 bores is utilised for supplying water for stock on holdings served in connexion with Bore Water Trusts or Artesian Districts under the Water Act of 1912. The total flow from these bores amounts to 34,467,209 gallons per day, watering an area of 4,498,249 acres by means of 2,671 miles of distributing channels. The average rating by the Bore Trusts to repay the capital cost with 4 per cent. interest in twenty-eight years, is 1.5d. per acre, including the cost of maintenance and administration.

In the majority of cases the remaining bores are used by pastoralists for stock watering purposes only, but in a few instances the supply is utilised in connexion with country towns.

The watering of the north-western country by means of bore water has largely increased the carrying capacity of the land; and, what is of perhaps greater importance, it has made comparatively small pastoral holdings practicable in country previously confined almost entirely to the operations of companies holding immense areas.

It having been determined that multiplicity of bores is the chief factor governing the annual decrease in bore flows, and also that limiting the discharge from a bore will prolong its flowing life, action has been taken to prevent any waste by controlling the bore flow to actual requirements. It is confidently anticipated that this action will materially reduce the rate of decrease in the future.

(ii) *Shallow Boring.* The scheme described in Official Year Book No. 9 (p. 520) for assisting settlers by sinking shallow bores has met with considerable success.

Operations commenced with one plant only, but the number has been increased gradually until 28 plants are at work.

A large number of applications from settlers wishing to take advantage of the liberal conditions offered under the regulations has been received, and further applications are coming to hand daily, consequently the plants now in use will probably be insufficient to cope with the demand. Out of 531 bores put in hand up to 30th June, 1920, 94 have proved failures.

There can be no question that the added value of the holdings represented by the bores already put down is considerably in excess of their cost, and as fairly conclusive evidence of this, it might be stated that in several instances the Government Savings Bank has, on completion of a bore, made the settler a sufficient advance to enable him to pay the total cost in cash.

In addition to the work carried out under the Shallow Boring Regulations outlined above, shallow boring plants have sunk 20 bores in the Pilliga scrub and on Crown lands for the Lands and Forestry Departments.

The fact that of the bores put down in the Pilliga scrub, 46 are giving a flowing supply, adds much to their value, and is of special interest as indicating the possibility of tapping a small and hitherto unknown artesian basin.

(iii) *Private Artesian Bores.* Much has been done in the way of artesian boring by private enterprise. As far as can be ascertained, 326 private bores have been undertaken in New South Wales, of which 24 were failures. The yield of the flowing bores is estimated at 38 million gallons per day. No data are available regarding the pumping bores.

3. *Victoria.*—Victoria lies altogether outside the Great Australian Artesian Basin, and as water is generally available from surface or shallow underground supplies, there has not been much occasion for artesian boring. As early as 1880, however, an artesian well was bored at Sale, which gave a large supply of water of fair quality before it failed through corrosion of the casing. In 1905 a new bore was put down, which at a depth of 277 feet yielded sufficient water to fill Lake Guthridge, a local depression. But as the water was impure, and contained an excess of sulphuretted hydrogen, boring operations

were continued to 520 feet, when the lowering of the casing shut off the supply of water. A further bore was then put down at some distance from the first, and this, at a depth of 238 feet, yielded a fresh and clear water supply of about 145,000 gallons per day. Corrosion troubles occurred here also, and at the end of 1912 another bore was put down to a depth of 235 feet, artesian flows being struck at 187 feet and 235 feet. Towards the end of 1915 a flow of 200,000 gallons per day was struck at a depth of 125 feet on the Powerscourt Estate, near Maffra. Other bores are being put down in the locality.

Largely due to the failure of surface supplies in the drought of 1878 to 1886, no less than 499 bores were, before the end of 1888, put down by shire councils aided by the Government. The total depth bored was 40,000 feet; fresh water was struck in 78 instances; 47 yielded brackish but usable water; 229 were salt, while the balance were dry. The bores covered practically the whole of the settled portions of Northern and North-western Victoria and parts of Gippsland.

In the late eighties a number of bores were put down in the north-western part of the State, varying from 200 to over 2,000 feet in depth, but without any notable success. In 1897 a Board reported on boring for artesian water supply in the Mallee country, but this report was adverse, except as regards the extreme northern portion thereof. In 1906 eight bores were put down on the Overnewton Estate, Maribyrnong, to depths varying from 147 to 272 feet; small supplies of good and medium water for stock purposes were obtained, but only one of the wells yielded water fit for domestic purposes. In 1908 boring was commenced in the Mallee country near the border east of Pinnaroo in South Australia, and a line of bores from the Border to Kow Plains has proved the existence of a large sheet of underground water. Altogether, 89 bores have been successful in striking fresh water, and their depths vary from 155 to 752 feet, the water rising to within from 207 to 6 feet of the surface. In three instances the bores flow, the water rising from 4 to 17 feet above the surface. The fresh water extends nearly as far east as the 142nd meridian, and its northern limit is approximately the 35th parallel.

At 30th June, 1920, the number of existing bores in use in the north-western portion of Victoria was 310, from which supplies are obtained by pumping. The total depth bored amounted to 85,322 feet, while the maximum and minimum depths at which water was struck were 700 and 150 feet respectively. The figures include also about 206 existing private bores, with a total depth of about 41,800 feet.

4. Queensland.—A return relating to the 30th June, 1920, classifies the Queensland artesian bores under the following headings:—

QUEENSLAND ARTESIAN BORES, 30th JUNE, 1920.

Sunk by—				Artesian Flows.	Sub- Artesian or Pumped Supplies.	In Progress, Abandoned, or Uncertain.	Total.
Government	67	79	121	267
Local governing authorities	16	21	17	54
Private owners	1,153	1,263	964	3,380
Total	1,236	1,363	1,102	3,701

The estimated yield of water from 1,236 flowing bores on 30th June, 1920, was 318,300,000 gallons per diem. The deepest well was about 40 miles west of Blackall, lying east of the Barcoo River; this had a depth of 6,938 feet, and was stated to yield 107,300 gallons daily. Further sinking is in progress. The flow is, of course, a comparatively small one, many wells yielding, when uncontrolled, from one to three million gallons a day. The waters of many of the wells have been analysed, and some found suitable for wool-scouring only, others are suitable for watering stock but not for irrigation, owing to

the presence of alkali; others again serve for both stock and irrigation, while some, such as those containing sulphuretted hydrogen, are not of any use. Water fit for stock may generally be said to be "safe" for domestic purposes in spite of its slightly mineral taste. The wells yielding the mineral waters known as "Helidon Spa," "Boonah Spa," and "Junot Spa," which are much in use in Queensland and New South Wales, are shallow wells from 60 to 200 feet in depth.

The following table shews particulars as to Queensland bores at the end of June, 1920 :—

QUEENSLAND ARTESIAN AND SUB-ARTESIAN BORES, 30th JUNE, 1920.

Particulars.				State and Local Authorities.	Private.	Total.
Bores existing	No.	321	3,380	3,701

Minimum	"	354	10	..
Temperature of flow—						
Maximum	°Fahr.	198	210	..
Minimum	°Fahr.	85	81	..

5. South Australia.—There were in South Australia 143 Government bores existing at 30th June, 1920, of which 35 were artesian and 108 sub-artesian. Of these, 106 were under 1,000 feet in depth; 23 from 1,000 to 2,000 feet; 6 from 2,000 to 3,000 feet; 5 from 3,000 to 4,000 feet; and 3 over 4,000 feet. The deepest flowing bore was at Patchawarra, on the Farina to Haddon, via Innamincka, route, measuring 5,458 feet, but now yielding only 50 gallons per day. The maximum flow, viz., 1,250,000 gallons, is obtained at Coonie Creek, east of Lake Frome.

The following table shews particulars as to South Australian bores at 30th June, 1920 :—

SOUTH AUSTRALIAN BORES, 1920.

Particulars.							Artesian and Sub-artesian.
Bores existing	143
Total depth bored	feet	110,418
Daily flow	gallons	(a)
Depth at which water was struck—							
Maximum	feet	4,850
Minimum	feet	55
Temperature of flow—							
Maximum	°Fahr.	208
Minimum	°Fahr.	82
Total cost of construction of bores up to 30th June, 1920							£317,527
Expenditure during year on boring operations							£3,363

(a) Not available.

(i) *Bores between the Murray and the Eastern Boundary of the State.* The sinking of bores across the Ninety-mile Desert between the Murray and the Victorian boundary was commenced in 1886 at Coonalpyn; with the exception, however, of salt water at 55 feet, no success was met with. Ki Ki bore was sunk in 1887, and at 361 feet a good supply of water fit for stock was struck. Tintinarra bore was sunk in 1887; it was artesian when first tapped. The water was found to be fit for locomotive engines and is still used for that purpose. The bore at Emu Flat was also sunk in 1887. In 1904 a

bore was sunk at Cotton, and numerous successful bores have since been put down by the Public Works Department, and subsequently by residents of the district. The water rises to a distance from the surface of from 15 to 320 feet, and the maximum quantity obtained per diem is 48,000 gallons at the Gosden bore. Several wells, ranging in depth from 55 to 221 feet, have also been sunk in this district. The latest Government bores are Kumara in the Hundred of Kingsford, and Perponda in the Hundred of Vincent. The former has a depth of 240 feet, and the water, which is in large supply, rises to within about 96 feet of the surface. The latter is 300 feet in depth, and the water rises to within 56 feet of the surface. The water is fresh, containing about $\frac{3}{8}$ oz. salts and other solid matter per gallon.

(ii) *Bores West of Oodnadatta.* A series of bores has been sunk, beginning with Breadden bore, 20 miles west of Oodnadatta, which was put down in 1911. The others since put down in this district are at Gypsum, Imbitcha, Mirackina, Raspberry Creek, Appreittinna, Wintinna, and Marla. Of these, the only artesian supply is at Raspberry Creek, where 1,000,000 gallons per day of good water are obtained. The depths of these bores range from 280 feet at Mirackina to 1,122 feet at Breadden, and the water from all of them is good.

(iii) *Other New Bores.* New bores are being sunk at Montecollina on the Innamincka track, about 6 miles north of Box Flat; Stuart's Range, about 90 miles west of William Creek; and Mount Sarah on the Marree to Charlotte Waters route.

(iv) *Eyre Peninsula.* From time to time bores have been sunk on Eyre Peninsula, but with little success. In some instances, stock water ($1\frac{1}{2}$ ozs. salts to the gallon) was obtained, but this only occurred on the Nullarbor plains. In all other cases the water struck was far too salt to be used. Consequently the supply of water is now principally from catchments. A number of reservoirs have been constructed to hold from 1,000,000 to 9,000,000 gallons each. Many underground tanks have been built to contain from 40,000 up to 500,000 gallons each.

6. **Western Australia.**—The work by which the Government of Western Australia provides a permanent supply of water to Kalgoorlie, Boulder and adjacent districts on the eastern goldfields comes properly under the heading of "Water Supply Works." A description of this undertaking is fully given in previous issues of the Year Book. (See No. 6, p. 576.)

The statistics in connexion with the Goldfields Water Supply undertaking and the Mines Water Supplies will be found in the section of this book dealing with *Local Government*.

The following table shews particulars as to Western Australian artesian bores at 30th June, 1920 :—

WESTERN AUSTRALIAN ARTESIAN BORES, 30th JUNE, 1920.

Particulars.					State.	Private.	Total.
Bores existing	92	73	165
Total depth	feet	90,127	58,361	148,488
Daily flow..	gallons	20,700,300	25,863,500	46,563,800
Depth at which artesian water was struck—							
Maximum	feet	2,275	(a)	..
Minimum	feet	39	(a)	..
Temperature of flow—							
Maximum	°Fahr.	140	(a)	..
Minimum	°Fahr.	80	(a)	..

(a) Not available.

To 30th June, 1920, the total number of Government bores was 92, and there were approximately 73 private bores recorded in addition.

The boring operations which have been carried out in the artesian basins along the West Australian Coast are as follows:—

(i) *The Coastal Plain Basin or Perth Area*, which, generally speaking, extends from Cape Leeuwin to Dongarra, and from which the Metropolitan Water Supply is largely drawn, yields a supply of water mostly fresh and suitable for domestic purposes, though towards the north it becomes brackish and is only suitable for stock.

There are 38 bores in the Metropolitan area, several of which have been put down to augment the hills supply and the domestic supply of the suburbs, and Fremantle is largely dependent upon this source.

(ii) *The North-west Basin or Carnarvon Area* may be said to extend from Ghantheaume Bay in the south to Onslow in the north, and embraces a very large tract of ideal sheep country.

Many private bores have been put down on sites which permit of the gravitation of the water for miles, and, by this means, a very considerable area has been put under stock. Some remarkable flows have been obtained and, in one case, at a depth of 300 feet a flow reputed to be 3,000,000 gallons per day was struck, the water being suitable for stock. In all, about 55 bores have been put down.

(iii) *The Gulf Basin or Broome Area*. So far very little development work has been done. Artesian bores have been put down in the town site, and the domestic requirements of the town are entirely supplied from this source. The area extends from Condon in the south-west to the Meda River beyond Derby in the north, and for a considerable distance inland. So far only 7 bores have been sunk, 3 being at Broome and 2 at Derby, and 2 on the telegraph line on the road between Derby and Hall's Creek, about 67 and 80 miles inland.

(iv) *Eucla Area*. This area extends from Eucla, on the South Australian border, to west of Israelite Bay. So far, beyond the bores put down on the route of the Trans-Australian Railway, very little has been done in proving the resources of this area. In 1902 the first bore was sunk, about 35 miles north of Madura, and sub-artesian water struck at 430 feet, at an elevation of 400 feet above sea level. Following upon this, a deep bore was put down at Madura, below the cliff and nearer the coast, when an artesian supply of stock water was obtained at a depth of 2,041 feet, yielding 5,700 gallons per day. This was followed later with about 20 bores along the survey line of the proposed railway, which runs east and west about 90 miles inland. These bores were put in at intervals between the 205 mile peg and the South Australian border, and ranged in depth between 323 and 1,344 feet. In most instances only stock water was struck at depths varying between 300 and 1,300 feet, and the largest estimated supply was about 10,000 gallons per day.

7. **Northern Territory.**—In the Northern Territory, bores to the number of 159 were put down up to 30th June, 1921, 51 belonging to the Commonwealth Government. This number does not include bores put down by hand-boring plants for test purposes. One bore is artesian, and 158 give a pumping supply. The cost of construction and equipment of the Government bores exceeded £20,000. The total depth bored in State and private bores was 47,158 feet. Maximum depths were 1,474 feet in State, and 1,760 feet in private bores, and minimum depths were 110 feet and 60 feet respectively.

§ 2. Irrigation Schemes.

1. **General.**—Australia's first experiments in irrigation were made with the object of bringing under cultivation areas in which an inadequate rainfall rendered agricultural and even pastoral occupations precarious and intermittent, and, although these original settlements have for the most part proved fairly successful, most of the States, instead of promoting new settlement in unoccupied regions, are adopting the policy of making existing settlement closer, by repurchasing big estates and large farms, subdividing them into holdings of suitable sizes for cultivation, and selling the land upon easy terms of payment. It is in connexion with this Closer Settlement policy that the special value of irrigation is recognised.

2. *New South Wales.*—(i) *Water Conservation and Irrigation Works.* The provision of an adequate water supply for other than domestic purposes is essential to the well-being of all primary industries, and particularly in a country liable to dry seasons which affect extensive areas. A large portion of the State receives an adequate and regular rainfall, but there is a considerable extent of country where all the factors exist which are requisite for success in agricultural pursuits excepting only a constant water supply. The recognition of the fact that the area suitable for cultivation might be extended largely by a comprehensive system of water conservation and irrigation has induced the Government to undertake various detached works and schemes, which will constitute portion of the ultimate irrigation system necessary to serve the whole State.

The system, and the works necessary to its maintenance and development, within the State of New South Wales, are under the control of the Water Conservation and Irrigation Commission, which consists of the Minister for Agriculture for the time being as Chairman, and two other Commissioners. The works controlled by the Commission include the great Murrumbidgee Irrigation Scheme, the small irrigation settlements at Hay and Wentworth, natural works of water conservation, shallow boring for settlers, and water trusts and artesian bore trusts operating under the Water Act. The Commission has control also of storages and diversions of water by private persons for purposes of conservation and irrigation.

(ii) *Murrumbidgee Irrigation Scheme.* The main features of the scheme include the storage dam across the Murrumbidgee to retain the floodwaters, which will be released for use lower down the river during the dry summer months; a movable diversion weir, about 240 miles below the dam, to turn the required amount of water from the river into the main canal; a main canal, leaving the river near the weir; four main branch canals; and a series of subsidiary canals and distributing channels through the area to be irrigated; bridges, checks, regulators and other structures throughout the entire system, and meters for measuring the volume allowed to each farm. Towns and villages, also roadways to serve each farm, and a general surface drainage system, are also included in this scheme.

The site of the storage dam is at Burrinjuck, three miles below the confluence of the Murrumbidgee and Goodradigbee Rivers. The dam wall is being constructed of cyclopean masonry and concrete, and when completed will have a maximum height of 240 feet, and will impound the waters in a lake covering 12,740 acres. Ample water is being stored to meet the requirements of the farms already occupied, and to allow of water being drawn off during the summer months to augment the natural flow of the river for the benefit of riparian holders down stream. The reservoir will have a capacity of 33,612 million cubic feet, or 771,641 acre feet, the catchment area being about 5,000 square miles, drained by three principal streams—the Murrumbidgee, Goodradigbee, and Yass Rivers—up which the water will be backed, when the dam is full, to distances of 41 miles, 15 miles, and 22 miles respectively. Direct communication between Burrinjuck and the Main Southern railway has been provided by the construction of a 2-ft. gauge line from Goondah, a distance of 26 miles.

The diversion weir is situated at Berembé, about 40 miles by river and 19 miles in a direct line above the town of Narrandera. It is founded on a solid granite bar extending across the river, and has a length over all of 270 feet between abutments, divided into a sluiceway 40 feet wide in the clear; a lock chamber, 40 feet wide, capable of taking barges up to 100 feet in length; and 55 channoiné wickets, manipulated from a punt moored up-stream. During the winter freshets the wickets are lowered, thus affording a clear water-way in the river channel.

The main canal branches from the river just above the weir, and, after passing through Narrandera, continues in a north-westerly direction, skirting the hills abutting on the plains. A scheme for enlarging the main canal to double its present capacity (1,000 cubic feet per second) has been approved by Parliament and the work is now in progress. The principal canals are the Gogeldrie canal, which off-takes at 47 miles from Berembé, and runs approximately parallel to the Narrandera-Hay railway through the Yanco area; the Mirrool branch canal, which off-takes at 78 miles from Berembé and supplies portion of the Mirrool area; and the Northern branch canal, which off-takes at 76 miles from Berembé.

MAP SHEWING THE POSITION AND EXTENT OF THE "AUSTRALIAN ARTESIAN BASINS."

This map was prepared by the Interstate Conference on Artesian Water, held in Sydney during May, 1912. It contains the latest facts relative to the various artesian basins of the Australian continent. Of these basins the most important is the Great Australian Basin, which is about 569,000 square miles in extent, viz.:—About 376,000 square miles in Queensland, 90,000 square miles in South Australia, 83,000 square miles in New South Wales, and 20,000 square miles in the Northern Territory. The Murray River Basin extends over South-Western New South Wales, North-Western Victoria, and South-Eastern South Australia. The Western Australian Basins fall naturally within five groups, viz.:—The Eucla Basin, the Coastal Plains Basin, the North-West Basin, the Desert Basin, and the Gulf Basin. (See also pages 463 to 469.)

The irrigation area is situated on the northern side of the Murrumbidgee River, where it is anticipated that there will ultimately be upwards of 200,000 acres under irrigation in blocks devoted to fruit and vegetable growing, dairying, stock-raising, etc. With the aid of irrigation the soil and climate of these areas are suitable for the production of apricots, peaches, nectarines, prunes, pears, plums, almonds, melons, cantaloups, and citrus fruits, also wine and table grapes, raisins, sultanas, figs, olives, and most varieties of vegetables and fodder crops. Dairying and pig-raising are already being successfully undertaken by settlers in the areas, and the canning and drying of fruit is becoming an industry of large dimensions.

The first area made available for settlement was in the vicinity of Yanco Siding on the Hay railway line. The second, which is situated on the northern side of the Mirrool Creek, is served by the branch railway from Cootamundra, which now terminates at Griffith, but which it is proposed to extend to Hillston.

Further areas are being thrown open for settlement as the construction works are completed. Farms varying in size from 2 acres to over 200 acres have been made available. The "water right" or number of "acre feet" of water allotted to each holding is specified when the holding is notified as available for application. An "acre foot" of water means such a quantity, 12 inches deep, as would cover an area of one acre. The cost of water supplied by gravitation ranges from five shillings to ten shillings per acre foot. The charge for water is reduced during the early years, and the full rate does not become payable until the fourth year. The average horticultural farm is from 15 to 25 acres, but to suit the requirements of dairymen and other stock farmers, blocks of larger areas have been made available. These comprise non-irrigable or "dry" areas, in addition to the irrigable portion. Some of these larger farms are 200 acres or upwards in extent, but the maximum water right allowed in respect of any of these larger farms is 80 acre feet. Additional water may be obtained, if available, by arrangement.

The conditions for the disposal of irrigation blocks are contained in the Crown Lands Consolidation Act of 1913, and Amending Acts. Any person of or over the age of sixteen years, if a male, or eighteen years if a female (other than a married woman not living apart from her husband under decree of judicial separation), or two or more such persons jointly, may apply for a farm or block. A married woman, not judicially separated from her husband, may, however, if she be not subject to any other statutory disqualification, (a) acquire by way of transfer, with the consent of the Minister, out of her own moneys, a lease within an irrigation area; (b) continue to hold a lease which she held before her marriage; (c) hold a lease which may devolve on her by will or intestacy of a deceased person. The tenure is perpetual leasehold.

The improvement conditions attached to the farm holdings include fencing, planting trees for windbreaks, construction of dwellings, and destruction of noxious plants.

Subject to such conditions as to security and terms of repayment as the Commission may think fit to impose, settlers may obtain an advance, or have payment of amounts owing suspended. Such advances are limited to the total amount of funds made available by Parliament for this purpose.

The Government Savings Bank Commissioners have statutory power to make loans upon mortgage of irrigation farm leases, and many settlers have already obtained help from the Bank. Concessions in railway fares and freights are made on New South Wales railways to bona fide applicants for land.

A large area of land on both the Yanco and Mirrool sections of the areas has been specially reserved for discharged soldiers. Selected applicants are required to work for a probationary period of three months, during which they are employed upon clearing and other work under supervision in connexion with the development of the soldiers' blocks, and are paid award rates while so engaged. Upon taking up residence on their farms these settlers will, subject to their intelligent and energetic use of the advances made, as well as their own labour, in the improvement of their farms,

be provided with funds up to £625 to enable them to develop their holdings, and in addition thereto such further advances may be made from time to time as found necessary to bring the farms to a proper stage of productiveness. All payments for rent, etc., and repayments of advances will be suspended in the case of fruit farms for five years and in the case of dairy farms for two years from the date of granting of the farm. The total indebtedness including interest will then become payable by instalments extending over a period of twenty years.

Towns and villages have been established at centres of the Yanco and Mirrool Irrigation Areas. The Commission is empowered to construct streets, and to provide water supply, sanitary, and other services.

An up-to-date butter factory is in operation at Leeton. The output for the year under review was approximately 156 tons, from between 130 and 140 suppliers. The factory also supplies ice to town residents and settlers. A fruit and vegetable canning factory has also been provided, which purchases vegetables and fruits grown by the settlers, and the output is rapidly increasing. A bacon factory and abattoirs have been erected at Yanco, where the settlers' pigs are treated, and where stock for butchers is slaughtered for local consumption.

One of the most important departmental undertakings on the irrigation areas is undoubtedly the State Nursery. For some years past the Leeton Nursery has been supplying trees to settlers, and in 1916 a second nursery was established at Griffith. Every effort is made to supply only the very best trees, free from disease, and to ensure this, as much use as possible is being made of budding wood from proven trees in the Leeton Nursery, and at the Yanco Experiment Farm.

The Department of Agriculture, which controls the Yanco Experiment Farm, has also established at Griffith (Mirrool irrigation area), a Viticultural Nursery for the propagation of vines on phylloxera resistant stocks. These stocks are intended not only for the supply of settlers on the areas, but for vigneron in all parts of the State.

An electric power station has been erected near Yanco Siding; electric light and power are supplied to the various factories, business people, and residents of Leeton and Yanco, and the supply is also available for settlers when the number of applicants in any centre warrants the connections being made.

On the 31st December, 1920, 1,296 farms were held, representing a total area of 71,777 acres, and the number of town blocks held was 532.

In the matter of cultivation, the following particulars indicate the extent of the work performed by the settlers:—There are approximately 4,524 acres under deciduous fruit, 2,164 under citrus fruits, 1,130 under vines. The estimated population of the areas is about 8,000.

(iii) *Other Irrigation Settlements.* Irrigation settlements have been established at Curlwaa near Wentworth, and at Hay. These were in 1913 placed under the control of the Water Conservation and Irrigation Commission.

(a) *Curlwaa Irrigation Area.* The Curlwaa Irrigation area embraces 10,600 acres, of which 1,430 acres have been subdivided into 102 irrigable blocks. On 30th June, 1920, 99 blocks, comprising 1,426 acres, had been taken up, in areas of $1\frac{1}{2}$ to 40 acres. There are also 98 non-irrigable holdings of from $\frac{1}{4}$ to 336 acres, comprising 7,148 acres, of which 93 blocks, representing an area of 7,028 acres, were in occupation on the above date. An area of 1,140 acres has been reserved as a common. The balance of the area is made up of road, channel and other reserves. During 1919–20 approximately 1,100 acres were under cultivation, the greater part being devoted to fruit, including oranges, peaches, apricots, nectarines, pears, grapes, sultanas, and currants. It has been proved beyond doubt that the Curlwaa soil is eminently suited to the growth of citrus and other kinds of fruit. Some of the finest oranges grown in New South Wales are produced on this area.

The estimated weight of dried fruits produced on the Curlwaa area in the year 1919–20 was 8,038 cwt., the principal yields being sultanas, 2,522 cwt.; peaches,

1,775 cwt.; currants, 1,629 cwt. In the previous year the product was 7,992 cwt.; in 1917-18, 6,580 cwt.; in 1916-17, 4,865 cwt.; in 1915-16 it was 5,955 cwt.; in 1914-15 it was 3,178 cwt.; in 1913-14, 5,118 cwt.; and in 1912-13, 4,247 cwt. The heaviest crops have been sultanas and currants. The value of the dried fruit production for the twelve months ending 30th June, 1920, is estimated at £41,623; in addition to which the area produced fresh fruit, crops, and other produce of the value of £13,756.

The pumping machinery consists of a suction-gas plant, supplying two engines of about 55 brake horse-power each, working two centrifugal pumps, with an average combined capacity of about 4,600 gallons per minute. Additional pumping machinery with capacity of 6,000 gallons per minute is being installed. With six pumpings during the 1919-20 season, 190,105,300 cubic feet of water were supplied. The length of the main channels is about 9 miles 10 chains. The land may be leased for periods not exceeding 30 years, the annual rent at present varying from 1s. to 24s. per acre. The rate for water is fixed from time to time by the Commission, and is at present, except in a few special cases, 20s. per acre per annum. Each lessee is entitled to receive a quantity of water equivalent to a depth of 30 inches per annum, limited to 4 inches in any one month.

(b) *Hay Irrigation Area.* The Hay irrigation area consists of about 4,500 acres, and previous to 1913 was controlled by a Trust appointed in 1897. On 30th June, 1920, the area held and used for irrigation purposes was 1,026 acres, in 107 blocks of from 3 to 34 acres. The term of lease is generally 30 years, and the annual rental from 5s. to 12s. per acre. In addition, there was at that date an area of 2,698 acres of non-irrigated land taken up in 48 blocks. The water rate is fixed from time to time, and during 1919-20 was £1 5s. per acre per annum. The pumping machinery is of similar type to that at Curlwaa, the capacity of the pumps being 4,000 gallons per minute. During the 1919-20 season 167,445,007 cubic feet of water were pumped. Dairying is the principal industry, the cultivation of fruit being limited.

(iv) *Projected Irrigation Schemes.* The Water Conservation and Irrigation Commission are investigating schemes for storing water for the purpose of irrigation on the Darling, Lachlan, Macquarie, Hunter, Namoi, Peel and Warragamba Rivers.

(a) *Murray River.* The effect of constructing the Upper Murray storage will be to ensure at all times sufficient flow below Albury to permit of diversions for irrigation and stock and domestic supplies, and also to make good the losses in the river due to seepage, evaporation, and lockages. The Act provides that, subject to certain conditions, New South Wales and Victoria shall share the regulated flow of the river at Albury, and shall each have the full use of all tributaries of the River Murray within its territory below Albury, with the right to divert, store, and use the flows thereof.

It is estimated that the New South Wales regulated river flow after the construction of the Upper Murray storage will amount to at least 120,000 acre feet per month at Albury during the irrigating season, and this will permit of a considerable amount of irrigation development along the river.

An investigation is being made into the manner in which the New South Wales proportion of the Murray waters can be most profitably applied, but as yet no conclusion has been reached.

(b) *Darling River.* A preliminary investigation has been made of the Darling River, which shows that the most suitable site for the storage of large volumes of water when available is in the lake system to the east of the river, comprising Lakes Boolaboolka, Ratcatcher, and Victoria, and a number of other lakes (seventeen in all) fed from the river in high floods from the Talyawalka Creek, which takes off from the river about 260 miles above Menindie. Further investigation is required to determine the area which can be commanded from the storage, and the use to which the water will be put.

(c) *Lachlan River.* The construction of a storage reservoir at Wyangala, below the confluence of the Abercrombie River, is being investigated with the intention of affording water in the river channel for pastoral purposes and for the irrigation of limited areas along the river banks. A proposal is also being investigated for the increase of the storage in Lake Cudgellico, which is fed from the Lachlan River, and for the pumping thence of the water for the irrigation of an area of about 5,000 acres adjacent

to the lake. The possibility of regulating the amount of water diverted into numerous effluent creeks is being considered, so that the best use may be made of the Lachlan River water.

(d) *Macquarie River.* The construction of a storage reservoir on the river at Burrendong, below the confluence of the Cudgegong River, for the purpose of affording water by gravitation for the irrigation of certain lands to the west of Narronine is now being considered. Smaller schemes for the construction of storage dams at White Rock, and on Campbell's River, at Bathurst, have also received consideration. The run-off from this catchment is somewhat uncertain, and before giving consideration to the construction of any State irrigation scheme, further investigation is necessary.

(e) *Hunter, Namoi, and Peel Rivers.* Pumping by private irrigators under license under the Water Act is increasing at such a rapid rate that in the case of some of the rivers, such as the Peel and the Hunter, it will not be possible to adequately supply the pumps in dry seasons until head storage works have been constructed. Surveys have been completed for storage dams on the Hunter and Peel Rivers and for a dam on the Namoi River above Manilla.

(f) *Warragamba River.* The Warragamba project will serve the dual purpose of amplifying the Sydney Water Supply and irrigating the best lands in the Nepean Valley. The rate of increase in the population of the metropolitan area during recent years, if maintained, will in a short space of time cause the consumption of water to overtake the capacity of the present catchment area of the Sydney water supply, and the next available source of supply will then be the Warragamba River, where a scheme for the storage of water has been investigated. It is proposed to construct a large storage dam capable of supplying about 200,000,000 gallons daily for water supply, irrigation and trade purposes, and for compensation water. Surveys have been made and details are being prepared of this scheme.

(v) *Water Rights.* By Part II. of the Water Act 1912, the right to the use and flow and to the control of the water in all rivers and lakes which flow through, or past, or are situate within the land of two or more occupiers is vested in the Crown. Private rights are abolished, riparian law is simplified, and a system of licenses is established for the protection of private works of water conservation, irrigation, water supply, drainage, and the prevention of inundation of land. The enactment prevents litigation and determines the rights of riparian owners, and it also enables such owners to obtain licenses to supply water to other occupiers of land not adjoining a river or lake.

During the year ending 30th June, 1920, 287 applications were received for fresh licenses, comprising 227 in respect of pumps, or pumps in conjunction with dams or other works, 54 in regard to dams, and 6 respecting races. The number of applications received for the renewal of existing licenses was 158 ; 92 of the applications were in respect of pumps, in some cases used in conjunction with dams or other works, 55 respecting dams, and 11 race and other works. Approximately, 1,278 licenses were in force on the 30th June, 1919, and in the succeeding twelve months 90 new licenses were issued and 25 were allowed to lapse, so that there were about 1,343 licenses current on the 30th June, 1920.

(vi) *Water Trusts and Bore Trusts.* Part III. of the Water Act 1912 provides for the supply of water either for irrigation, stock, or domestic purposes, and for drainage, the liabilities on which are repaid to the Crown, with interest spread over a period of years, and the works are administered by trustees appointed from among the beneficiaries under the Act ; except in the case of trusts in the Western Division, where the Western Land Board is appointed as trustee. For the supply of water, trusts have been constituted in connexion with (a) seventy-four artesian wells ; (b) eight schemes for the improvement of natural off-takes of effluent channels, for the purpose of diverting supplies from the main rivers ; (c) in three instances for the construction of weirs across stream channels ; and (d) two pumping schemes, one from natural watercourses, and one from a well. The total area included within these trusts amounts to 6,627,024 acres.

3. *Victoria.*—(i) *Classification of Works.* The Water Conservation Works in Victoria divide themselves into irrigation works proper, and those providing mainly a domestic supply, such as the works for the supply of Melbourne, controlled by the Melbourne and Metropolitan Board of Works ; the Coliban, Wonthaggi, Broken River, Kerang Lakes, Naval Base and Mornington Peninsula, and Mallee Supply Works,

administered by the State Rivers and Water Supply Commission, and other works for domestic supply controlled by Water Works Trusts or Municipal Corporations. With the exception of the works administered by the Commission, particulars as to these works will be found in the section on *Local Government* in this volume.

(ii) *Works Controlled by the Commission.* With the exception of that of the First Mildura Irrigation and Water Supply Trust, all the irrigation schemes, and the more important domestic and stock water-supply works in rural districts, are vested in and controlled by the State Rivers and Water Supply Commission, a body composed of three members, which was created by the Water Act 1905, now incorporated in the Water Act 1915.

(a) IRRIGATION SCHEMES. This division comprises the schemes constructed and under construction for the supply of water to some twenty irrigation districts. Up to 1906 these schemes were controlled by local Trusts, which had obtained the moneys for their construction on loan from the State. By the Water Act 1905 all local control was abolished except in the case of Mildura, and the districts were transferred to the State Rivers and Water Supply Commission. Since that date the Government has adopted a vigorous irrigation policy, and the capital expenditure at 30th June, 1920, on water supply in the irrigation and water supply districts under the control of the Commission, and at Mildura, exclusive of the amount (£166,000) expended by it on River Murray Agreement Works, was £1,847,000. The irrigation works draw their supplies mainly from headworks constructed on the Murray, Goulburn, and Loddon Rivers. The cost of these headworks which now stands at £1,126,000 is not debited to any particular districts but is borne by the State. The extent of land under irrigated culture, for all kinds of crop, is 371,000 acres, being an increase of 89,000 acres over the area irrigated in the previous year and more than 120,000 acres above the average of the last four years.

The following particulars of the principal schemes will be of interest, and will convey some idea of the extent to which the one-time arid northern portion of this State is now insured against droughts like that of 1902, when the combined capacities of its storages for irrigation by gravitation were only 75,000 acre feet, and of its pumping plants, 400 acre feet per day.

(a) *Goulburn Scheme.* The Goulburn River Gravitation Scheme (see Official Year Book No. 13, map on page 561) is the largest of Victoria's irrigation enterprises. It serves, either for irrigation or domestic and stock purposes, 868,000 acres of land in the valleys of the Goulburn, Campaspe and Loddon Rivers. The present headwork of the system is a diversion weir on the Goulburn River, near Nagambie. It is constructed of concrete masonry, with 21 flood gates, which raise the up-stream water level 10 feet above the concrete crest. These gates are lowered, during high stages of river flow, to provide a clear waterway for the discharge of floods. The weir has a total length, including channel regulators, of 925 feet, and a height of 50 feet. The water is diverted by two main channels, the eastern carrying 330 cubic feet per second (660 acre feet per day) a distance of 33 miles to the country north of the Broken River, while the western, which has a capacity of 1,700 cusecs,* and a length of 23 miles, is used to feed distributaries of the Rodney District and to fill Waranga Reservoir, the present principal storage basin of the scheme. This reservoir, formed by an earthen embankment $4\frac{1}{2}$ miles long across a natural depression, covers an area of 20 square miles to an average depth of 22 feet, and stores 281,000 acre feet. Works nearing completion will raise the full supply level of this reservoir by four feet, and increase the storage capacity to 330,000 acre feet. Two main channels issue from this reservoir, the Waranga-Rodney, of 250 cusecs* capacity, which feeds Rodney distributary channels, and the Waranga-Campaspe-Serpentine, which leaves the reservoir with a capacity of 1,000 cusecs, and ends at the Serpentine Creek, 92 miles westward, with a capacity of 200 cusecs. The total length of distributary channels is 1,600 miles.

With a view of meeting the increasing demand for water in dry seasons, and providing an irrigation supply for other suitable lands, the Commission is constructing a storage

* Cusecs = Cubic feet per second.

reservoir on the Upper Goulburn, just below its junction with the Delatite River, at what is known as the Sugarloaf site. The dam, which is 2,550 feet in length, consists of a diaphragm wall of reinforced concrete, built from bed rock (in some places 75 feet below natural surface) to crest level 135 feet above the river bed; a wall of clayey material on the upstream side of the diaphragm; and supporting masses of rock. This reservoir will submerge an area of 7,600 acres, and store about 300,000 acre feet of water, bringing the total capacity of the Goulburn storages to 654,000 acre feet. The foundations of the Sugarloaf structure will permit of the dam being raised, if necessary, to a height of 190 feet above the river bed. This would add 8,600 acres to the area submerged, and would increase the storage capacity from 300,000 to 900,000 acre feet.

The portion of the State served by this system comprises 19,000 acres east of the Goulburn, 565,000 acres between the Goulburn and the Campaspe, and 284,000 acres between the Campaspe and the Loddon. These areas include the irrigated Closer Settlements at Shepparton, Stanhope, Tongala, Rochester, and Dingee (see "Closer Settlement in Irrigation Districts," page 185), in which annual water rights are allotted of not less than one acre foot of water to each acre of irrigable land. They include also the districts formerly controlled by the Rodney and Tragowel Plains Irrigation Trusts, in which districts, generally, the holdings are larger than in Closer Settlement areas. The water rights in these districts are, for lands under intense culture, one acre foot of water to each irrigable acre, and for other irrigable lands, one acre foot to four irrigable acres in the former district, and one to five in the latter. The balance of the area, including Deakin district, while not subject to a compulsory irrigation charge, is provided with a domestic and stock supply, and water is sold for occasional irrigation on application. The amount of the compulsory charge for irrigation water allotted as a "right" is at present 6s. per acre foot in the two districts—Tragowel Plains and Dingee—farthest removed from the sources of supply, and 5s. per acre foot elsewhere.

(b) *Loddon River Scheme.* This also is wholly a gravitation system. The headwork is a regulating weir on the Loddon at Laanecoorie, about 22 miles westerly from Bendigo. This weir is constructed of concrete masonry with "Chaubart" automatic floodgates five feet high for a length of 320 feet, combined with an earthen embankment, the length over all being 940 feet. Its storage capacity is 14,000 acre feet. Other works of the scheme are timber diversion weirs at Serpentine and Kinypanial, 80 and 120 miles downstream respectively, also 160 miles of channels (taken over from several irrigation Trusts in the Boort district) which supply an area of 74,000 acres for domestic and stock purposes and partial irrigation.

(c) *Murray River Schemes.* These comprise both gravitation and pumping schemes. The only wholly gravitation system is that known as the Kow Swamp scheme, which supplies the Kerang irrigation district of some 85,000 acres. The off-take is at Torrumbarry headworks, from which the Gunbower channel diverts water, when the Murray River is five feet above summer level, to the Kow Swamp storage, a natural depression improved so as to hold a volume of 41,000 acre feet. From this reservoir the water is distributed by the Macorna channel (40 miles in length) and about 200 miles of distributaries.

The Cohuna, Gannawarra, Koondrook and Swan Hill Schemes are combined gravitation and pumping schemes. The Cohuna-Gannawarra plant consists of two 36 inch and four 39 inch centrifugal pumps—total capacity 280 cusecs*; those at Koondrook and Swan Hill, each of 100 cusecs capacity, consist each of two 39 inch centrifugal pumps. The pumped supplies are supplemented at varying stages of river level by the gravitation water.

The Cohuna, Koondrook and Swan Hill Districts, comprising 106,000 acres, embrace the irrigated Closer Settlements of the same names. In these districts and that of Gannawarra (comprising 44,000 acres) the quantity of water allotted as a "right" is one acre foot per irrigable acre. The compulsory charge is at present 5s. per acre foot of such water right. In Kerang district—not under a compulsory irrigation charge—water is sold to irrigators on application at a charge not exceeding 3s. per acre foot of water supplied.

* Cusecs = Cubic feet per second.

The Nyah Irrigation Area was occupied in 1894 under village settlement conditions, settlers being allowed up to 50 acres each. Individual attempts at irrigation having proved unsuccessful, a Government scheme was prepared for the whole settlement. A number of settlers surrendered portions of their holdings, which were too large for effective working, and these portions, with adjacent Crown lands, were re-subdivided and made available, under the Murray Settlements Act 1907, on easy terms. Water is diverted from the Murray by a high lift pumping plant—capacity 25 cusecs*—consisting of two coupled 24 inch turbine centrifugal pumps. The settlement now contains 193 holdings, of an average area of 17 acres, of which 183 are settled. Water rights are apportioned to these holdings on the basis of $2\frac{1}{2}$ acre feet of water for each irrigable acre, and the compulsory charge is at present 14s. per acre foot of such water rights. The land is devoted mainly to vineyards and orchards, and the settlers, taken as a whole, are making good progress. The value of irrigation to the district is reflected in the selling price of the land, fully planted blocks bringing remarkably high prices.

The Merbein Irrigation Area comprises 7,700 acres of what, eleven years ago, were Crown lands. This settlement now contains 354 holdings, averaging 22 acres each. These holdings also, when fully improved, sell at very high prices. The water is pumped from the Murray by a plant of four turbine centrifugal pumps—lift 96 feet, capacity 50 cusecs*—and one 36 inch high lift centrifugal pump, capacity 50 cusecs.* The land settlement conditions and water rights apportioned are the same as at Nyah, but the compulsory charge is at present 17s. per acre foot.

(d) *Werribee River Schemes.—Bacchus Marsh.* The headwork of this gravitation scheme is a reservoir of 15,000 acre feet capacity on Pyke's Creek, a tributary of the Werribee, the in-take from the creek catchment being supplemented by a tunnel through a dividing spur, which taps the Werribee River near Ballan. The dam, 1,000 feet in length and 100 feet in height, is built of earth, with dwarf concrete core. The area of the district is 6,600 acres—half of which is irrigable—and includes some of the richest lucerne land in the State. The annual water right is one acre foot per irrigable acre, and the present compulsory charge is £1 per acre foot of such right. The higher portion of the district receives a supply for domestic and stock purposes.

Werribee. This is another gravitation scheme on the same river. The headwork is a reservoir at Melton, immediately below the Bacchus Marsh district. The dam is of earth, with dwarf concrete core. Its length is 600 feet, height 100 feet, and the storage capacity of the reservoir 17,000 acre feet. A diversion weir at Werribee, 17 miles downstream from the reservoir, a main channel therefrom, and the usual distributaries and appurtenant works, complete the scheme. The irrigation district comprises some 8,000 acres of first-class land, being the irrigable portion of the Werribee Closer Settlement Estate, which is within 20 miles southwesterly of Melbourne. The water right allotment is one acre foot per irrigable acre, and the charge at present is 10s. per acre foot. The non-irrigable portion of the estate, containing about 13,000 acres, is supplied with water for domestic and stock purposes.

(B) DOMESTIC AND STOCK SCHEMES. (a) *General.* The second division takes into account the schemes constructed and under construction for the supply of water for domestic and stock purposes, the capital expenditure on which at 30th June, 1920, was £5,372,000. The area of country lands artificially supplied with water for these purposes is nearly 21,000 square miles. The number of towns supplied, exclusive of the City of Melbourne and its suburbs, is 160, serving an estimated population of 297,000. In addition to the Commission's districts, some large areas are still administered by local authorities.

(b) *Wimmera-Mallee System.* The principal scheme in this division is that known as the *Wimmera-Mallee Gravitation Channel System*. This comprehensive scheme of works will compare favourably, it is believed, with any similar individual scheme, for domestic and stock service, in any part of the world. The main supply is drawn from three reservoirs in the catchment area of the Wimmera River, at the foot of the Grampians Ranges, viz.:—Lake Lonsdale, Wartook, and Fyans Lake. A fourth—Taylor's Lake—now under construction, is nearing completion. The reservoirs in use, including some minor works, have a combined storage capacity of 113,000 acre feet. The completion of the works in progress will bring this total to 200,000 acre feet. The water

*Cusecs=Cubic feet per second.

is conveyed, partly by natural water-courses, but chiefly by artificial channels, aggregating over 4,000 miles in length, over farming districts comprising about 8,500 square miles, approximately one-tenth of the whole State (see Official Year Book No. 13, map on page 562).

(c) *Naval Base and Mornington Peninsula Scheme.* Another scheme in this division which calls for mention here is the *Naval Base and Mornington Peninsula Scheme*. This comprehensive scheme—prepared at the request of the Naval Authorities—is for the supply of water to the Flinders Naval Base, and for the service of fifteen townships en route, including Berwick, Beaconsfield, Pakenham, Aspendale, Chelsea, Carrum, Frankston, Mornington, and Hastings. An ample supply of water is obtainable from the headwaters of the Bunyip River, which drains some 30 square miles of forest country above the point of off-take. The works are so far advanced that water is already being delivered at the Naval Base, and to the townships of Mornington, Frankston, Aspendale, and the intervening seaside towns.

The scheme is being extended to supplement the supply to the township of Dandenong, hitherto controlled by a local Trust, the works of which were recently transferred to the Commission, which will administer them as part of the general scheme.

(d) *Flood Protection.* The Water Acts of Victoria provide for the constitution of Flood Protection Districts, in which the residents are rated for schemes carried out for their benefit. The works are constructed, and Districts administered by the State Rivers and Water Supply Commission. Under these provisions the Commission is carrying out extensive schemes at Koo-wee-rup and Cardinia, in the south-eastern portion of the State, and works, on a smaller scale, at EchUCA.

(iii) *Mildura.* The creation of an irrigation colony at Mildura was the outcome of a visit by Mr. Deakin to California in 1885, when Messrs. Chaffey Bros. were invited to visit Victoria, with the object of founding a similar settlement to those which they had been largely instrumental in establishing in California.

Active operations were commenced in 1887, since which date marvellous progress has been made, instanced in the fact that, originally used as a sheep run and carrying one sheep to every thirty acres, the dried fruit harvested from 13,000 acres in 1920 was valued at £1,238,373 gross.

Water is pumped and supplied under Act of Parliament by the first Mildura Irrigation Trust from the river Murray from two pumping stations:—(1) into a billabong, and thence to pumps lifting to various levels, and (2) to a comparatively small area adjacent to the town.

The length of the Trust's main and subsidiary channels is 280 miles. For the year ending 30th June, 1920, the Trust's receipts aggregated £38,707, and its expenditure £50,752. For the same period the number of water acres supplied was 41,808.

Loans (balance) advanced to the Trust by the Government for the purpose of improving the plants and channels, etc., amounted at 30th June, 1920, to £87,177, exclusive of the sum of £9,087 (balance) arrears of interest.

The area of the settlement is 45,000 acres, of which 13,000 acres are under intense culture, vines predominating.

4. *Queensland.*—The main irrigation works in Queensland are as follows:—(a) those at Ayr, which utilise the waters of the Burdekin River, and shallow wells on its banks; (b) those at Bingera, near Bundaberg, which utilise water pumped from the Burnett River just above the point of meeting of the salt and fresh waters, and (c) those at Fairymead, which utilise water pumped from a number of shallow spear wells sunk on the alluvial flats on the north side of the Burnett River and about six miles from Bundaberg. There were 701 irrigators in the State in 1919, chiefly farmers and graziers, and the area irrigated was 9,267 acres.

5. *South Australia.*—(i) *The Renmark Irrigation Trust.* The Renmark Irrigation Trust was established in 1893 on similar lines to Mildura, but on a smaller scale. The area of settlement is 21,000 acres, the area under irrigation being 5,364 acres. There are also 1,000 acres under crop for hay. The dried fruit pack for 1920 was 2,500 tons, green fruit 5,000 tons, and the gross value of the production for the year exceeded £235,000. The population of the town and settlement is 4,000. The chief products are sultanas,

currants, raisins, oranges, apricots, peaches, pears, prunes, olive oil, and grape spirit. There are two distilleries for the manufacture of grape spirit, and several packing sheds for dried fruits.

(ii) *Other Waterworks.* A number of country water works are under the control of the Public Works Department. As, however, they are not irrigation works properly so called, but are used for supplying water for domestic purposes, etc., to several towns, no further reference will be made to them in this chapter. (See Section xxvi., *Local Government.*)

(iii) *Area under Irrigation.* The Irrigation Areas on the River Murray above Morgan under Government control, up to the end of March, 1921, contained 13,535 acres of irrigable land allotted to 732 settlers, about 1,200 acres reserved by the Department for fodder cultivation, etc., 4,200 acres ready for allotment, and about 14,000 acres in course of preparation. The pumping plants at present installed on these areas aggregate 4,428 brake horse-power, with a pumping capacity of $4\frac{1}{2}$ million gallons per hour.

The *Cadell Irrigation Area* is 7 miles by river above Morgan. Total area of settlement, 2,726 acres, of which 1,184 are irrigable. Blocks have been allotted to 71 soldier settlers and the balance is ready for allotment in 14 blocks. This area is suitable for fruit-growing. The first allotment was on 30th September, 1919. The pumping plant is a 190 b.h.p. steam plant with centrifugal pump; capacity, 4,200 gallons per minute against a head of 90 feet.

The *Waikerie Irrigation Area* is 39 miles above Morgan by river. This area includes the old Waikerie and Ramco Settlements. The total area of settlement is 9,276 acres, of which 2,759 acres is first class irrigable land growing fruit trees and vines. This area is divided between 136 settlers, and the first allotment took place on the 5th July, 1910. The pumping plant consists of four units—three suction-gas and one steam unit—with a total of 1,110 b.h.p. Capacity of plant, 13,500 gallons per minute against a total head of 150 feet. A fifth unit is being installed with a capacity of 4,200 gallons per minute.

The *Holder Irrigation Area* adjoins the *Waikerie Irrigation Area* and has been incorporated as a portion of that area. It contains 358 acres of irrigable land and 2,017 acres of dry land. Blocks have been allotted to 22 settlers, including eleven soldier settlers, and a further three settlers can be accommodated. The pumping plant consists of two steam units, total b.h.p., 338; capacity, 4,750 gallons per minute. One hundred and ten acres of irrigable land adjoining, held by Holder Ltd., is irrigated by this plant.

The *Kingston Irrigation Area* is situated 75 miles above Morgan by river, and comprises the old village settlement of that name. It has a total area of 3,748 acres, of which 493 acres are irrigable. This area was allotted to 30 settlers in July, 1914, and is used for fruit and vine culture. Pumping plant, 118 b.h.p. steam plant; capacity of pump, 2,000 gallons per minute; total head, 118 feet.

The *Moorook Irrigation Area*, adjoining the Kingston Area, contains 5,959 acres of land, of which 1,074 acres are good land suitable for vines and fruit trees. One thousand and twenty-eight acres of irrigable land has been allotted to 53 settlers, of whom 34 are soldier settlers. First allotment of area, March, 1916. The area is irrigated by a 250 b.h.p. steam plant, with a capacity of 4,160 gallons per minute against a total head of 142 feet. A second steam unit, with a capacity of 3,000 gallons per minute is being installed.

The *Cobdogla Irrigation Area* is on the opposite side of the river to Kingston and Moorook Areas. It was formerly a sheep station, and was resumed by the Government for irrigation purposes. The total area of the station was 160,000 acres, of which 23,100 acres has been set apart as the Berri Area, and the remainder—137,000 acres—as the Cobdogla Area. The latter area includes Lake Bonney, 4,000 acres in extent. This lake is situated 3 miles inland from the Murray, and is filled at high rivers by Chamber's Creek, a winding waterway. The water is retained in the lake by a weir, with movable shutters, erected at the junction of the lake and creek.

The Cobdogla Area contains about 30,000 acres of first class land, capable of intense culture. A portion of this area, 1,834 acres, has been developed as a low lift area, the pumping head being about 40 feet. This land is suitable for vine culture or fodder for dairy farming. Six hundred and twenty-one acres have been allotted to fifteen settlers,

and 1,210 acres are being used by the Department for nursery fodder-growing, and other purposes. The remainder of the proposed irrigable land, about 28,000 acres, will be utilized for fruit, vines, and fodders. About 3,000 acres are ready for allotment at the south end of Lake Bonney, and a further 7,000 acres are now in course of preparation. Pumping plant at present installed is a 340 b.h.p. steam plant: capacity, 16,700 gallons per minute against a total head of 40 feet. A second pumping plant has been installed at the south end of Lake Bonney. This is a 390 b.h.p. steam plant with a capacity of 9,000 gallons per minute against a head of 100 feet. A second lift plant is being installed, with a capacity of 3,300 gallons per minute. The completed area of Cobdogla will have five pumping stations, two on the lake at the north end and south end, two on the River Murray, and one intermediate from the low lift.

The *Berri Irrigation Area* is 120 miles above Morgan by river, and contains a total area of 23,100 acres, of which 8,100 acres is first class land for fruit and vine culture. Seven thousand one hundred and thirty acres of irrigable land has been allotted to 405 settlers, of whom 222 are soldier settlers, and 970 acres are ready for allotment in 76 blocks. The first allotment of the older portion of this area took place in January, 1911. The pumping plant consists of five units—three suction-gas and two steam units—with a total of 1,702 b.h.p. and a capacity of 24,700 gallons per minute against total heads varying from 50 feet to 120 feet. Another steam unit is being installed with a capacity of 9,000 gallons per minute.

The proposed *Chaffey Irrigation Area* will comprise a large area of country adjacent to Renmark, at present known as Ral Ral. Survey work is proceeding over 7,000 acres, which can be watered with a lift of approximately 45 feet, and the construction of channels, &c., will be commenced shortly. This area will be prepared for early allotment. A pumping plant will shortly be installed with a capacity of 12,500 gallons per minute. The future extension of this area may approximate 100,000 acres, with lifts not exceeding 100 feet above low river.

The *Irrigation and Reclaimed Swamp Areas* under Government control on the River Murray below Morgan contain 6,100 acres of high irrigable and reclaimed swamp land, allotted to 243 settlers. The former land is irrigable by pumping, and the latter by gravitation. There are also 2,300 acres ready for allotment to 133 settlers, and 4,800 acres under preparation, which will accommodate 274 additional soldier settlers. Pumping plants installed total 1,500 b.h.p.; capacity, 3,500,000 gallons per hour.

Mobilong and Burdett Areas adjoin Murray Bridge, and contain 575 acres of reclaimed fodder land, with 46 settlers.

Long Flat and Monteith Flat, below Murray Bridge, have between them a reclaimed area of 1,342 acres, divided between 57 settlers.

Swanport Area, below Murray Bridge, has 191 acres of fruit and fodder land, and has fourteen soldier settlers.

The *Jervois Irrigation Area* is in course of construction. It is 15 miles below Murray bridge, and includes 1,224 acres of irrigable and reclaimed land. It will accommodate 62 settlers when completed.

The *Wood's Point Area* is 12 miles below Murray Bridge, and contains in its total area of 3,170 acres about 978 acres of reclaimed land, and 250 acres of high irrigable land. The area is in course of preparation, and will accommodate 65 soldier settlers.

The *Wellington Area* is 18 miles below Murray Bridge, and has an area of over 12,000 acres. Of this area about 1,820 acres is reclaimed land. This area will provide for 121 soldier settlers, and is at present in course of preparation for settlement.

The *Mypolonga Area* is 9 miles above Murray Bridge. This area has a river frontage of 7 miles. The total area of this settlement is 5,800 acres, of which 1,074 acres are irrigable and 1,627 acres reclaimed land. The area has 84 settlers.

The *Pompoota Area*, situated 13 miles above Murray Bridge was, up till recently, used as a training farm for prospective soldier settlers, and will now be allotted amongst 38 of the trainees. The area contains 674 acres of fruit and fodder land.

The *Wall Area*, 16 miles above Murray Bridge, has 779 acres of irrigable and reclaimed land. Twenty soldier settlers are settled on the area, and blocks are available for ten more.

The *Neeta and Cowirra Irrigation Areas* are 20 miles above Murray Bridge, and include in their areas 410 acres of high irrigable land and 1,702 acres of reclaimed fodder land. These areas are in course of preparation, and at present 22 soldier settlers have been placed on blocks. A further 85 settlers can be accommodated when areas are complete.

The *Mannum Area* is about 21 miles above Murray Bridge, and has an area of 1,350 acres. Five hundred and twenty-eight acres will be reclaimed and allotted to 26 soldier settlers in the near future.

Lake Albert. There is a possibility of this lake being reclaimed in the near future, which will give an area of about 40,000 acres suitable for dairying. The total area, including afore-mentioned areas, adjacent to the River Murray, possible of reclamation, or of being brought under irrigation, including 75,000 acres of Lake Alexandrina, is 282,556 acres.

The reclaimed lands consist of peaty soils composed of rich river silt, and are eminently suited for lucerne and other fodders, and for onions, potatoes, etc. The soils of the irrigable lands have already proved their suitability for the production of peaches, apricots, nectarines, oranges, lemons, figs, and grapes.

All lands are allotted under perpetual lease, and blocks are surveyed into areas varying up to 50 acres of irrigable or reclaimed land. No lessee is permitted to hold more than 50 acres of irrigable or reclaimed land, or of both irrigable and reclaimed, except that in the case of a partnership 50 acres may be allotted for each member of the partnership up to a maximum of 150 acres.

In addition, areas of non-irrigable land are allotted to lessees of irrigation and reclaimed blocks for dry farming. The rentals of the blocks are fixed by the Land Board immediately prior to the land being offered for application. For the reclaimed land an amount is charged sufficient to cover interest on cost of land and reclamation, while for the irrigable land the rent is based on the unimproved value of Crown lands, or to cover interest on cost of repurchased lands.

On the irrigable land, the water rate has been fixed at 40s. per acre per annum for the first four years, after which an amount will be charged sufficient to cover actual cost of supplying water, and interest on pumping plant, channels, etc. On the reclaimed lands an amount is charged to meet the annual management, drainage, and maintenance expenses. A sliding scale covers the rent on all land and water rates on the irrigable land for the first four years, *i.e.*, first year, one quarter of the rent and water rates; second year, one-half; third, three-quarters; fourth and afterwards, full amount per acre. On the irrigable lands, each lessee is entitled for the water rate to 24 acre-inches per annum, supplied in four irrigations. Special irrigations and domestic supplies are supplied at times other than during the general irrigations at a nominal cost. On the reclaimed lands, water is supplied regularly by reticulation from the river.

The Department assists settlers by fencing, clearing, grading, and constructing irrigation channels and tanks. Such improvements are undertaken up to a value not exceeding £15 per acre of the irrigable area in each lessee's block, but before the work is commenced a deposit must be paid equal to 15 per cent. of the Department's estimated value of such improvements. The total cost of the work, less deposit, is treated as a loan to the lessee, and is repayable in twenty equal annual instalments after the expiration of five years, or at any shorter period if desired by the lessee, current rate of interest being charged. Any lessee is permitted to accept the contract for carrying out his own improvements according to the specifications and estimates of the Department, up to the maximum amount per acre, as mentioned above. Advances can be obtained from the Advances to Settlers Board for the purchase of stock, discharging mortgages, erecting permanent buildings and other improvements, the first £400 being advanced on the fair estimated aggregate value of the settler's lease, and any improvements already made on the holding, and those in course of being made thereon. Any loan beyond £400 would not exceed 15s. in the £1 of the fair estimated value of the improvements already made.

6. Western Australia.—An Irrigation Act has been brought into force providing for the constitution of irrigation districts. At Harvey, works for irrigating about 4,000 acres devoted to fruit growing, principally oranges, were opened on the 21st June, 1916. A scheme is now in preparation for irrigating a further area in the same district.

Numerous small private irrigation schemes are in full operation on many of the south-west rivers, in connection with fruit, fodder, and potato growing.

7. *Murray Waters.*—(i) *Water Rights of States.* The relative rights of the States of New South Wales, Victoria, and South Australia to the waters of the Murray River being undetermined, negotiations which had been in progress for some considerable time resulted in the passing of the River Murray Waters Act 1915. Territorially the south bank of the Murray River was the boundary between New South Wales and Victoria. The region of the river itself, up to the point of its entry into South Australia, was wholly within the former State. At the Federal conventions which preceded the establishment of the Commonwealth, the South Australian delegates expressed their fear lest too much irrigation on the Murray and its tributary, the Darling, might impair the navigability of the lower waters of the river. The result was the insertion of a provision in the Commonwealth Constitution, which reads as follows (Section 100):—

“The Commonwealth shall not by any law or regulation of trade or commerce abridge the right of a State or of the residents therein to the reasonable use of the waters of rivers for conservation or irrigation.”

(ii) *Conferences.* After considerable controversy, a conference was held in Melbourne in January, 1911, between the Premiers of New South Wales, Victoria, and South Australia, on the Murray Waters question. The main results of the conference were that Lake Victoria and certain lands adjacent thereto situated within New South Wales territory should be handed over by New South Wales to South Australia for purposes of a storage basin, and that South Australia might lock her own portion of the Murray at her own expense; no rights of navigation were conceded by New South Wales and Victoria, who would not bind themselves to deliver any quantity of water at the point of intake into South Australia; the upper portions of the river were left free for irrigation.

In 1913 the three States appointed a Board of engineers to carry out investigations, with a view to ascertain means which would lead to a settlement of the whole question of the waters of the Murray and its tributaries. The Board in its report recorded its belief that the interests of irrigation are more important than those of navigation, and that the heavy expense of maintaining the latter is not warranted; suggestions relative to the apportionment between the three States concerned of the river waters and of the works contemplated for their conservation were also made. (See Official Year Book, No. 7, page 510.)

In April, 1914, further discussion took place at the Premiers' Conference in Melbourne, certain resolutions being agreed to by the Prime Minister of the Commonwealth and the Premiers of New South Wales, Victoria, and South Australia. (See Official Year Book, No. 8, page 507.)

(iii) *Legislation.* The necessary authority having been given by the Parliaments of the three States concerned, the Commonwealth River Murray Waters Act was passed in 1915, and on 31st January, 1917, was brought into operation. The procedure to be followed in the construction of works is set out. All works under the agreement will be constructed by the Constructing Authorities of the States concerned (New South Wales, Victoria, and South Australia). Each of these bodies is to prepare and to submit to the Commission a general scheme of the works to be constructed by it, with designs and estimates. The approval of the Commission is to be given before the commencement of any work embodied in the scheme. The Constructing Authority is then authorised to proceed with the work in accordance with the approved designs and estimates.

(iv) *Constitution of the Commission and its Activities.* The Commission was constituted on 31st January, 1917, and consisted of four members, representing respectively the Governments of the Commonwealth, New South Wales, Victoria, and South Australia. Steps were immediately taken to obtain information regarding investigations, surveys, works, gaugings, diversions, etc., theretofore made. The contracting State Governments were requested to expedite the submission of their general schemes and proposals in connexion with the various works embodied therein, particularly with a view to providing employment to returned soldiers, and making available suitable areas for soldier settlements on the banks of the Murray.

The general schemes of works to be constructed by the Governments of New South Wales and Victoria above Wentworth (including the Upper Murray storage and seventeen weirs and locks), and by the Government of South Australia below Wentworth (including the Lake Victoria storage and nine weirs and locks), have been approved.

Designs and estimates for the following works have been submitted to the Commission, and with certain reservations, have been approved :—

To be constructed jointly by the Governments of New South Wales and Victoria.—

Upper Murray storage (to be known as the Hume Reservoir), estimated cost £1,629,000. This reservoir, which will be created by the construction of a dam immediately below the junction of the Mitta Mitta and Murray rivers, will have a storage capacity of one million acre feet. The site for this work was decided upon only after the most exhaustive investigations, 28 possible sites on the River Murray above Albury having been thoroughly examined. The ceremony of turning the first sod in connexion with this important work was performed by His Excellency the Governor-General on the 18th November, 1919.

Weir and lock at Torrumbarry below Echuca (estimated cost £120,000).

To be constructed by the Government of South Australia.—Lake Victoria storage, providing for the storage of about 500,000 acre feet, estimated cost £320,000.

Weir and lock No. 2, estimated cost £162,758; weir and lock No. 3, estimated cost £126,328; weir and lock No. 9, estimated cost £186,898.

Prior to the appointment of the River Murray Commission, the Government of South Australia had commenced the construction of lock No. 1 at Blanchetown. Despite delays due to floods and other causes, this work is proceeding steadily. Work on the lock and on the navigable pass is practically completed, and the Constructing Authority is now proceeding with the construction of the weir.

The Constructing Authorities for New South Wales and Victoria are proceeding with surveys and investigations along the river with a view to the location of the sites of further weirs and locks below Echuca, and it is anticipated that at an early date proposals regarding two of such weirs and locks, viz., those in the vicinity of Wentworth and Mildura, will be submitted to the Commission.

The River Murray Agreement also provides for the construction by the Government of New South Wales of nine weirs and locks in the Murrumbidgee River from its junction with the Murray River to Hay.

The cost of the River Murray Scheme, based on an estimate prepared prior to the signing of the Agreement, was set down at £4,663,000. Towards this sum the Commonwealth will contribute £1,000,000. Each of the three contracting State Governments will provide the sum of £1,221,000. Owing to the increased cost of labour and materials it is anticipated that this estimate will be considerably exceeded.

The effect of constructing the Upper Murray storage will be to insure at all times sufficient flow below Albury to permit of diversions for irrigation, and stock and domestic supplies, and also to make good the losses in the river due to seepage, evaporation, and lockages. The Act provides that, subject to certain conditions, New South Wales and Victoria shall share the regulated flow of the river at Albury, and shall each have the full use of all the tributaries of the River Murray within its territory below Albury, with the right to divert, store, and use the flows thereof. It is estimated that the New South Wales regulated river flow after the construction of the Upper Murray storage will amount to at least 120,000 acre feet per month at Albury during the irrigation season, except in a period of phenomenal drought, such as 1902–3 and 1914–15.

Finance. The total expenditure on works incurred by the three Constructing Authorities up to the 30th June, 1920, was—

New South Wales	£45,555	17	1
Victoria	74,331	4	9
South Australia	271,477	0	9
Total	£391,364	2	7

The estimated expenditure during the financial year 1920–1921 is £618,000

Plant. Plant necessary for the construction of works pursuant to the River Murray Agreement will be provided by each of the contracting State Governments at its own cost. A Conference of representatives of the Commission and the Constructing Authorities is now considering the question of the charges for the use of such plant, with a view to the adoption of uniform procedure.

Gaugings. The Conference of representatives of the three contracting State Governments appointed by the Commission furnished its report on 27th October, 1919.

In connection with gauges, the Commission resolved that the zeros of all gauges required by the River Murray be placed "rather below" the cease-to-flow level of the streams; also that the suggestion that other gauges in the River Murray Basin under State control be treated in a similar manner be referred to the State Authorities for consideration.

The procedure to be adopted in connexion with estimated losses in the streams will receive further consideration when the work of construction on the River Murray is further advanced.

Regarding diversions, the Commission is to be furnished with returns in respect of—

(a) Irrigation of areas over 3 acres.

(b) Stock, domestic, and town supplies other than to occupiers of land on either bank of the stream.

Recommendations of the Conference in regard to the method of gauging locked rivers will receive consideration at a later date.

SECTION XV.

COMMERCE.

§ 1. Introductory.

NOTE.—From the 1st July, 1914, the Trade Year, which was formerly the Calendar Year, was altered to coincide with the Fiscal Year (July to June).

1. **Constitutional Powers of the Commonwealth in regard to Commerce.**—The powers vested in the Commonwealth Parliament by the Commonwealth Constitution Act with respect to overseas trade and commerce will be found on page 15 (sub-section 51 (i)) and pp. 21 and 22 (sub-sections 86–95) of this volume.

§ 2. Commonwealth Legislation affecting Foreign Trade.

1. **Customs Act 1901 (No. 6 of 1901).**—“An Act relating to the Customs,” assented to on the 3rd October, 1901, came into operation by proclamation on the 4th October, 1901. This provided for the establishment of the necessary administrative machinery for all matters pertaining to the Customs, and prescribed, *inter alia*, the manner in which Customs duties shall be computed and paid. It did not, however, determine the rates thereof.

During the interval between the inception of the Commonwealth, viz., on 1st January, 1901, and the coming into operation of the Customs Act 1901, the Customs Acts of the several States were administered by the Executive Government of the Commonwealth, under section 86 of the Constitution.

2. **Customs Tariff Act 1902 (No. 14 of 1902).**—The first Commonwealth Customs Tariff imposing uniform rates of Customs duty in all the States was introduced in the House of Representatives on the 8th October, 1901. “An Act relating to Duties of Customs,” assented to on the 16th September, 1902, made provision that uniform duties of Customs specified in the tariff schedule should be imposed from the 8th October, 1901. From this date trade between the States became free, with, however, the exception, under section 95 of the Constitution Act, of the right of Western Australia to levy duty on the goods from other States for five years. [Repealed by the Customs Tariff Act 1908 (No. 7 of 1908).]

3. **Sea Carriage of Goods Act 1904 (No. 14 of 1904).**—“An Act relating to the Sea Carriage of Goods,” assented to on the 15th December, 1904, to commence on the 1st January, 1905, defines the responsibility of shipowners, charterers, masters, or agents in regard to goods carried.

4. **Secret Commissions Act 1905 (No. 10 of 1905).**—“An Act relating to Secret Commissions, Rebates, and Profits,” assented to on the 16th November, 1905, provides that “Any person who, without the full knowledge and consent of the principals directly or indirectly (a) being an agent of the principal, accepts or obtains, or agrees or offers to accept or obtain, from any person, for himself, or for any person other than the principal; or (b) gives or agrees to give or offers to the agent of a principal, or to any person at the request of an agent of the principal, any gift or consideration as an inducement or reward for any act done or to be done, or any forbearance observed or to be observed, or any favour or disavour shewn or to be shewn in relation to the principal's affairs or business or on the principal's behalf, or for obtaining or having obtained, or aiding or having aided to obtain for any person an agency or contract for or with the principal, shall be guilty of an indictable offence.”

5. **Commerce (Trade Descriptions) Act 1905 (No. 16 of 1905).**—“An Act relating to Commerce with other Countries,” assented to on the 8th December, 1905, and brought into operation by proclamation on the 8th June, 1906, gives power to compel the placing of a proper description on certain prescribed goods, or on packages containing the same, being imports or exports of the Commonwealth.

6. **Australian Industries Preservation Act 1906 (No. 9 of 1906).**—“An Act for the Preservation of Australian Industries and for the Repression of Destructive Monopolies,” assented to 24th September, 1906, provides that any person or any corporation making

or engaging or continuing in any combination "with intent to restrain trade or commerce to the detriment of the public or with intent to destroy or injure by means of unfair competition any Australian industry the preservation of which is advantageous to the Commonwealth, having due regard to the interests of producers, workers, or consumers." or any person or corporation monopolising or attempting or conspiring to monopolise any part of the trade of the Commonwealth with intent to control, to the detriment of the public, the supply or price of any service, merchandise, or commodity, is guilty of an offence. (Amended, see Acts No. 5 of 1908, No. 26 of 1909, and No. 29 of 1910.)

7. Customs Tariff 1906 (No. 14 of 1906).—"An Act relating to Duties of Customs" amended the Customs Tariff of 1902 in relation to the duties on harvesters and agricultural implements and machinery and prescribed the prices which were not to be exceeded of Australian harvesters and drills delivered to the purchaser at the railway station or port nearest to the factory where they are made. [Repealed by Customs Tariff Act 1908 (No. 7 of 1908).]

8. Customs Tariff (South African Preference) 1906 (No. 17 of 1906).—"An Act relating to Preferential Duties of Customs on certain goods the produce or manufacture of the British Colonies or Protectorates in South Africa which are included within the South African Customs Union," assented to 12th October, 1906, to operate from 1st October, 1906, provides for special preferential rates of duty on certain goods imported from and being the produce of any of the Colonies or Protectorates included within the South African Customs Union.

9. Australian Industries Preservation Act 1907 (No. 5 of 1908).—"An Act to amend the Australian Industries Preservation Act 1907," assented to 14th April, 1908, provides additional machinery for procuring evidence of offences against the principal Act.

10. Customs Tariff 1908 (No. 7 of 1908).—"An Act relating to Duties of Customs," assented to 3rd June, 1908, repeals section 5 of the Customs Tariff 1902 (No. 14 of 1902) and the schedule of that Act and the whole of the Customs Tariff 1906 (No. 14 of 1906) as from 8th August, 1907, and imposes new rates of Customs duties. This Act provides preference rates of Customs duties on certain "goods the produce or manufacture of the United Kingdom."

11. Customs Tariff Amendment Act 1908 (No. 13 of 1908).—"An Act to amend the Tariff Act of 1908," assented to 10th June, 1908. The purpose of this Act is merely to remove possible doubt as to the intention of the original Acts.

12. Australian Industries Preservation Act 1909 (No. 26 of 1909).—"An Act to amend the Australian Industries Preservation Acts 1906-1907" formally repeals sections 5 and 8 of the parent Act, which were declared by the High Court to be *ultra vires*. It also provides that, in relation to trade and commerce with other countries or among the States, the payment of rebates, or the refusal to sell, "either absolutely or except upon disadvantageous conditions," with the purpose of promoting exclusive dealing, shall be an offence.

13. Customs (Interstate Accounts) Act 1910 (No. 9 of 1910).—Repeals Sections 272 and 273 of the Customs Act 1901. These sections relate to the passing of dutiable goods from one State to another State of the Commonwealth, and their repeal was consequent on the termination of the book-keeping system of accounts between the Commonwealth Government and the Governments of the States, in favour of a system of payments based on population.

14. Australian Industries Preservation Act 1910 (No. 29 of 1910).—"An Act to amend the Australian Industries Preservation Act 1906-1909." This Act removes from the principal Act the obligation to prove intent to restrain trade and detriment to the public.

15. Customs Act 1910 (No. 36 of 1910).—"An Act to amend the Customs Act 1901" gives the Customs control of all goods for export, the exportation of which is subject to compliance with any condition or restriction under any Act or regulation, extends the machinery provisions for the prevention of the importation or exportation of goods which are prohibited imports or exports respectively, amends the provisions for the payment of

duty under protest, gives the Governor-General power to prescribe the nature, size, and material of the coverings for packages, and the maximum or minimum weight or quantity to be contained in any one package of goods imported or exported, or transported coastwise from one State to another; the condition of preparation or manufacture for export of any articles used for, or in the manufacture of, food or drink by man; the conditions as to purity, soundness, and freedom from disease to be conformed to by the goods for export.

16. Customs Tariff 1910 (No. 39 of 1910).—"An Act relating to Duties of Customs," amends the Customs Tariff of 1908 by more explicit definition of certain tariff items, and by alteration of some rates of duty.

17. Customs Tariff 1911 (No. 19 of 1911).—"An Act relating to Duties of Customs," amends the Customs Tariff 1908-10 by alteration of some rates of duty.

18. Interstate Commission Act 1912 (No. 33 of 1912).—In accordance with the provisions of the Commonwealth Constitution Act—sections 101 to 104 (see page 23 *ante*)—an Act relating to the Interstate Commission was assented to on the 24th December, 1912. This Act provides for the appointment of the Commission, and cognate matters.

19. Trading with the Enemy Act 1914 (No. 9 of 1914).—"An Act relating to the control of trade during the war with Germany and Austria-Hungary." This Act was amended by Act No. 17 of 1914.

20. Customs Act 1914 (No. 19 of 1914).—Amends the Customs Act 1901-10 by extending the powers of the Governor-General to prohibit the exportation of goods in time of war.

21. The Income Tax Assessment Act 1915 (No. 34 of 1915) and Amendment thereto (No. 47 of 1915).—Provide that "In the case of a person selling goods in Australia on account of a person not resident in Australia, or on account of a company not registered in Australia, the principal shall be deemed to have derived from such sale a taxable income equal to five pounds per cent. upon the price at which the goods were sold. The person selling the goods shall be assessable on the taxable income as the agent for the principal, and shall be personally liable for the payment of the tax to the extent of the tax payable on goods sold by him after the 30th June, 1915. Goods shall be deemed to be sold in Australia on account of a person not resident in Australia, if any person in Australia receives a commission in respect of the sale of the goods or is paid a salary for obtaining orders for or for influencing the sale of the goods."

22. Customs Tariff Validation Act (No. 6 of 1917).—"An Act to provide for the validation of—(1) Collections of Customs duties under tariff proposals introduced into the House of Representatives on the 3rd December, 1914; (2) the remission of Customs duty on wheat as from the 12th December, 1914; (3) the remission of Customs duty on oats as from the 27th February, 1915; and (4) the restoration of the Customs duties on wheat and oats from the 12th November, 1915."

23. Apple Bounty Act (No. 21 of 1918).—This Act appropriates from the Consolidated Revenue Fund the sum of £12,000, for the payment, to the grower, of a bounty of 3d. per pound upon the export of apples grown and evaporated in Australia under certain prescribed conditions, and sold to the Imperial Government for delivery between the 1st April and 31st August, 1918.

24. Customs Tariff Validation Act 1919 (No. 17 of 1919).—Provides for the validation of collections of Duties of Customs under Tariff proposals introduced into the House of Representatives on the following dates, namely:—10th August, 1917; 26th September, 1917; and 25th September, 1918.

25. Customs Tariff of 1920.—The Tariff Schedule which was submitted to Parliament on the 25th March, 1920, provides a British Preferential Tariff, an Intermediate Tariff, and a General Tariff. The Tariff Act will provide that the Preferential Tariff or the Intermediate Tariff may, under reciprocal arrangements, be extended to other British Dominions, and that the Intermediate Tariff may in certain circumstances apply to foreign countries.

26 Customs Act of 1920 (No. 41 of 1920).—"An Act to amend the Customs Act 1901-16," assented to 10th November, 1920. This Act indicates the rates of exchange, which shall be used under various circumstances in computing the value for duty of imported goods.

27. Tariff Board Bill.—On the 6th July, 1921, the Minister for Trade and Customs brought in a Bill for an Act to establish a Tariff Board. The Bill passed the House of Representatives, and with recommendations for some minor amendments, passed its third reading in the Senate. The Bill provides that—(1) The Minister shall refer to the Board for inquiry and report the following matters:—(a) the classification of goods under all Tariff Items which provide for classification under by-laws; (b) the determination of the value of goods for duty under section 160 of the *Customs Act* 1901-1920; (c) any dispute arising out of the interpretation of any Customs Tariff or Excise Tariff, or the classification of articles in any Tariff, in which an appeal is made to the Minister from the decision of the Comptroller-General; (d) the necessity for new, increased, or reduced duties, and the deferment of existing or proposed deferred duties; (e) the necessity for granting bounties for the encouragement of any primary or secondary industry in Australia; (f) the effect of existing bounties or of bounties subsequently granted; (g) any proposal for the application of the British Preferential Tariff or the Intermediate Tariff to any part of the British Dominions or any foreign country, together with any requests received from Australian producers or exporters in relation to the export of their goods to any such part or country; (h) any complaint that a manufacturer is taking undue advantage of the protection afforded him by the Tariff, and in particular in regard to his (i) charging unnecessarily high prices for his goods; or (ii) acting in restraint of trade to the detriment of the public, and shall not take any action in respect of any of those matters until he has received the report of the Board. (2) The Minister may refer to the Board for their inquiry and report the following matters:—(a) the general effect of the working of the Customs Tariff and the Excise Tariff, in relation to the primary and secondary industries of the Commonwealth; (b) the fiscal and industrial effects of the Customs laws of the Commonwealth; (c) the incidence between the rates of duty on raw materials and on finished or partly finished products; and (d) any other matter in any way affecting the encouragement of primary or secondary industries in relation to the Tariff. (3) If the Board finds on inquiry that any complaint referred to it under paragraph (h) of subsection (1) of this section is justified, it may recommend—(a) that the amount of duty payable on the goods the subject of the complaint be reduced or abolished; or (b) that such other action as the Board thinks desirable be taken—but shall, before it makes any such recommendation, consider carefully the conditions obtaining in the industry as a whole.

28. Customs Tariff (Industries Preservation) Bill—(Anti-dumping.)—On the 6th July 1921, the Minister for Trade and Customs moved a resolution that after inquiry and report by the Tariff Board, special duties should be collected in the following cases, when the importation of the goods referred to might be detrimental to an Australian industry: In the case of goods sold for export to Australia at a price less than the fair market price for home consumption or at a price which is less than a reasonable price (reasonable price being defined as the cost of production plus 20 per cent. plus free on board charges) a special dumping duty shall be collected equal to the difference between the price at which the goods were sold and a fair market price. Similar provision is made for goods consigned to Australia for sale. With regard to goods exported to Australia at rates of freight less than the rates prevailing at the time of shipment, there shall be collected a dumping freight duty equal to 5 per cent. of the fair market value of the goods at the time of shipment. Special duties are also proposed in the case of goods imported from countries whose currency is depreciated.

§ 3. Commonwealth Trade Commissioners.

The first permanent Trade Commissioner appointed to represent the Commonwealth of Australia in a foreign country was Mr. (now Sir) Henry Yule Braddon, who was appointed in September, 1918, to represent Australia in the United States of America. In July, 1919, Mr. Braddon was succeeded by Mr. Mark Sheldon. The Commissioner's office is at 61 Broadway, New York.

Early in 1921, Mr. Edward S. Little was appointed as Commonwealth Trade Commissioner in China, with offices at Shanghai and Hong Kong.

§ 4. Regulation of Trade during the War.

In Official Year Book No. 11 (page 559) a statement was given shewing the authority for the regulation of trade during the war. Reference was also made to the appointment of a Luxuries Board to control the imports of goods of a luxurious nature, and to the establishment of the Commonwealth Board of Trade.

§ 5. Method of Recording Imports and Exports.

1. **Value of Imports.**—The recorded value of goods imported from countries beyond the Commonwealth represents the amount on which duty is payable or would be payable if the duty were charged *ad valorem*. The value of goods is taken to be 10 per cent.* in advance of the fair market value in the principal markets of the country whence the goods were exported, the increase being intended to represent roughly the insurance, freight and other charges to the place of landing. Section 157 of the Customs Act provides that when the invoice value of imported goods is shown in any currency other than British currency, the equivalent value in British currency shall be ascertained according to a fair rate of exchange. Under this section it was the practice of the Department of Trade and Customs, until the 8th December, 1920, to convert on the basis of the mint par of exchange. Since the date mentioned, in consequence of a ruling of the High Court, all conversions have been based on the commercial rates of exchange. As the values for statistical purposes, as well as those for duty purposes, were based on the mint par, it follows that the recorded values of imports, during the past five years, from countries such as France and Italy, where the pound sterling has been at a premium, have been in excess of their commercial value, whereas imports from Japan, the United States of America and other countries where sterling was at a discount, have not been given their full commercial value. Further reference will be made to this matter in the following sections.

2. **Value of Exports.**—The recorded value of goods exported is taken to represent the value in the principal markets of the Commonwealth in the ordinary commercial acceptation of the term. Some modification of this practice has, however, been necessary in respect of products affected by the policy of price-fixing arising from the war.

3. **Records of Past Years.**—In the years preceding federation each State independently recorded its trade, and in so doing did not distinguish other Australian States from foreign countries. As the aggregation of the records of the several States is, necessarily, the only available means of ascertaining the trade of Australia for comparison with later years, it is unfortunate that past records of values and the direction of imports were not on uniform lines, admitting of the preparation of a record for Australia as a whole. On the introduction of the Customs Act 1901, the methods of recording values were made uniform throughout the States, but it was not until September, 1903, that a fundamental defect in the system of recording transhipped goods was remedied. Up to this date goods arriving in any Australian port for transshipment to a port in another Australian State were recorded at the latter port only, where they were ordinarily recorded as from the transshipping State, and not as an import from the oversea country.

In recording exports an analogous defect also existed in most of the States, since goods despatched from one Australian State for transshipment in another State to an oversea country were simply recorded in the former as an export to the transshipping State; thus no proper record of the export oversea was made. Owing to this defect the oversea trade prior to September 1903 is understated by an amount which it is impossible to estimate accurately, since it varies with the development of the shipping facilities of the States concerned. To discover the direction of the transhipped trade is not possible. The figures presented in the tables hereinafter are therefore the values as recorded, and must be taken as subject to the defects explained.

Prior to 1905 the value of ships imported or exported was not included in the returns of trade.

* Although cost of freight and insurance has risen materially in consequence of the war, no further addition has been made to the value of imports, and cognisance should be taken of this fact in regard to imports during 1914-15 and subsequent years referred to throughout this section.

4. **Ships' Stores.**—Prior to 1906 goods shipped in Australian ports on board oversea ships as ships' stores were included in the general exports. From 1906, ships' stores have been specially recorded as such, and omitted from the return of exports.

The value of these stores shipped each year, distinguishing bunker coal, is shewn below :—

VALUE OF STORES SHIPPED IN AUSTRALIAN PORTS BY OVERSEA VESSELS.

Period.	Bunker Coal.	All Stores (including Coal).	Period.	Bunker Coal.	All Stores (including Coal).
	£	£		£	£
1906	575,471	875,966	1914		
1907	663,724	998,897	(1st six months) }	533,283	771,581
1908	867,707	1,196,106	1914-15 ..	829,875	1,587,757
1909	781,113	1,071,677	1915-16 ..	719,510	1,544,872
1910	740,567	1,080,133	1916-17 ..	743,852	1,676,116
1911	858,783	1,238,446	1917-18 ..	632,910	1,389,291
1912	1,008,259	1,431,985	1918-19 ..	857,507	1,765,367
1913	1,018,595	1,458,702	1919-20 ..	1,487,872	2,688,371

§ 6. Oversea Trade.

1. **Total Oversea Trade.**—The following table shews the total trade of the Commonwealth with oversea countries from the earliest date for which records are available.* In consequence of the defects of record referred to in the preceding section, the results can be only approximate to the actual figures. The very marked rise and sudden fall in the value of imports during the period 1837 to 1842 were contemporaneous with heavy land speculation and a subsequent severe financial crisis. The great increase of trade in the early fifties was due to the discovery of gold. In the State of Victoria the value of imports from oversea countries increased from £500,000 in 1851 to nearly £11,000,000 in 1853, and to £13,000,000 in 1854; while in New South Wales similar imports rose from £1,390,000 in 1851 to £5,500,000 in 1854, when the total imports into the Commonwealth reached the sum of £34 13s. 10d. per head, and the total trade £56 3s. 10d. per head of the population. The rapid influx of persons anxious to share the good fortunes of these times, however, soon reduced the value of the trade per head, till, in 1858, it had declined to £31 19s. 6d. per head. The period 1867-1872 shewed a marked reduction in the value of trade per head. For some years prior to this period New South Wales had experienced a succession of indifferent seasons, and Victoria was suffering from a congested labour market consequent on the decline of alluvial gold-mining in that State. This congestion of the labour market during the years 1862 to 1866 gave rise to the agitation for a protective tariff to provide employment in manufactures, and in April 1866, the Tariff Act, which expressed the protective policy thenceforward adhered to in Victoria, was assented to.

OVERSEA TRADE OF THE COMMONWEALTH, 1826 TO 1920-21.

(a) Reckoned on mean population of the year. (b) Preliminary figures subject to alteration.

The graphs illustrating the movement of the oversea trade of Australia (see pages 505 and 506) show that periods of depressed trade have been recurrent at more or less regular intervals of from seven to nine years, and, measured by population, each succeeding depression since 1855 carried the trade per head lower than the preceding one, until the lowest point was reached in 1894.

The year 1892 marked the beginning of a period of acute financial stress, culminating in the commercial crisis of 1893. The collapse of these years is plainly reflected in the trade records of that period, the trade of 1894 falling to £54,028,227, a decline of no less than 26.75 per cent. in three years. In 1895 there was a slight recovery, and a continuous upward movement until 1901, when the total reached £92,130,183, or £24 6s. 1d. per head. A decline, due to drought, in the exports of agricultural, pastoral, and dairy produce, reduced the trade of 1902 to £84,591,037, but although in the next year there was a further shrinkage in the exports of agricultural produce, the increase in the value of the exports of metals, specie, butter, and wool was so large as to effect an increase in the total. From 1902 the increase in the value of trade continued, till in 1907 it reached the amount of £124,633,280, equal to £30 4s. 5d. per inhabitant.

The imports during 1907 were, doubtless, to some extent inflated by the importation of goods in anticipation of the tariff revision of that year. The trade of 1908 shews a decline of £10,523,000 as compared with 1907, of which £3,513,000 was in the value of exports, notwithstanding an increase of £3,447,767 in the export of gold and specie. This decline in the value of exports was largely due to reduced prices ruling for wool and metals in consequence of the financial crisis in the United States during the previous year, and in lesser degree to the smaller exports of agricultural and pastoral produce, due to the unfavourable season experienced in some of the States.

The trade of 1909 per head of population was slightly more than in 1908, notwithstanding that the gold exports were less by £5,193,587. In 1910 the value of imports per head was higher than in any year since 1885, and the value of exports was—excepting in the years 1906 and 1907—the highest since 1857. The high value of exports is particularly striking when considered in conjunction with the exceptionally small exports of gold. The exports of gold, already much reduced in 1909 as compared with 1908, were in 1910 still further reduced by £4,264,368 to £4,108,783, the smallest recorded since 1892. During 1911 the exports of gold bullion and specie again increased to £11,540,782. The continued increase in the value of imports during 1912 and 1913, while the value of exports remained stationary, is referred to on page 496.

The trade of 1914–15, and subsequent years, was seriously disturbed by conditions arising from the war such as the dislocation of shipping and increased prices. The shortage of shipping was particularly marked in 1917–18, when, in order to conserve space for more essential requirements, the importation of goods which were considered to be in the nature of luxuries was prohibited or restricted.

The effect of prices on the value of exports is shewn in the "Price Levels" given in § ii., from which it will be seen that on the basis of uniform prices the exports during the years 1914–15 to 1918–19 were less than for the years immediately preceding the war. The exports of 1919–20, notwithstanding that they include accumulations of wool and wheat, which could not be shipped earlier, represent a volume or quantitative mass only about 11 per cent. greater than those of 1913; the recorded values are 91 per cent. higher.

The value of the exports during 1919–20, however, was sufficient to establish a very substantial balance in favour of the Commonwealth, though this balance was not actually

so large as the official records would make it appear to be. This is due to the understatement of the value of imports as a result of the conversion of values on the par of exchange, whereas, their commercial values, i.e., the value of exports which would be required to effect a settlement of exchange would be determined by the current commercial rates of exchange. The net result of converting values on the par of exchange is that the value of imports during 1919-20 is understated by about 7 per cent. The figures for 1920-21 are similarly defective, though in a lesser degree, as from the 8th December, 1920, values have been converted on the basis of the current rates of exchange.

During the year 1920-21, the value of imports increased in a very marked degree. This was due, in a large measure, to the fulfilment of long standing orders which it had been impossible to execute earlier. In their anxiety to replenish stocks which had become depleted during the war, and to take advantage of the free spending of soldiers' gratuities and repatriation moneys, Australian importers ordered freely, in the belief that their orders could not be satisfied immediately, but hoping to get a percentage thereof. The trade depression in Great Britain and the cancellation of foreign orders, however, enabled manufacturers there to devote their attention to Australian orders, with the result that shipments, which it had been expected would be spread over a long period were received in quick succession. The rapidity with which the goods arrived created some difficulty in providing exchange, and the banks found it necessary to restrict credit for import business.

The decline in the value of exports as compared with 1919-20 was mainly due to reduced exports of wool, at lower prices, and to smaller exports of meats, flour, hides and skins, tallow, copper, and lead. As a set-off against these items there was an increase in the exports of wheat of nearly £12,000,000, and in butter of nearly £8,000,000.

The variations in the composition of the trade will be seen from the tables in § 9 following.

2. Alteration of Trade Year.—The desirability had long been felt of bringing the trade year into conformity with the seasons for the export of agricultural and pastoral products, but a disinclination to break the continuity of records had, hitherto, prevented the change. As it was obvious that trade itself, and not merely the records, would be seriously disturbed by the war, the time appeared to be peculiarly opportune for making the alteration. The trade returns were, therefore, closed as on the 30th June, 1914, and the new year started from the 1st July. The year 1914-15 thus includes nearly eleven months under war conditions.

3. Ratio between Exports and Imports.—The foregoing table shews the percentage of exports on imports for each year.* From this it will be seen that, with few exceptions, due to temporary dislocations of trade, prior to 1892 the balance of trade has been on the side of imports, but from 1891 to 1912 the reverse has been the case. The excess of imports in the earlier years represents the introduction of capital in the form of Government loans and for investment in private undertakings, and the excess of exports represents mainly the interest and profit on the earlier investments, repayment of loans to foreign bondholders, and also freight on trade, which is carried mainly by ships of the United Kingdom and foreign countries. As the introduction of new capital and the payments for interest on existing investments and for shipping and other services are continually operating in opposite directions at the same time in the statistics of trade, it follows that it is the balance only of these transactions which is reflected in the excess of imports or exports.

* For individual years 1826 to 1870 see Official Year Book, No. 7, and previous issues.

The marked diminution of the excess of exports is a striking feature of the trade returns for 1912. The decline in the ratio of exports to imports has been due, mainly, to loans raised in London by the Governments of the various States of the Commonwealth. The proceeds of these loans, of course, swell the import returns, but, as no immediate payment beyond an instalment of interest has to be made in return, the export figures are affected to a very minor degree, until such time as the principal of the debt is repaid. The larger number of immigrants had, also, to some extent affected the balance of trade by the introduction of capital. The following table presents the balance of trade of the Commonwealth as shewn by the records of imports and exports for each year from 1902, and, also, the modification of these figures as affected by loans raised in London by the Governments of the States and the Commonwealth. Owing to the circumstances of the case, the figures given must be taken as only broadly approximate to the truth.

**EFFECT OF LOANS ON THE RECORDED BALANCE OF COMMONWEALTH
TRADE, 1902 TO 1920-21.**

Year.	Excess of Exports as Recorded.		Net Amount of Debt Raised or Redeemed (—) in London. (b)	Excess of Exports Modified by Elimination of Loans to Commonwealth and States' Governments.

1914 (January to June)	— 1,847	a	a	— 1,847	a
1914-15	— 3,839	— 119	5,151	1,312	16
1915-16	— 2,966	— 91	2,827	— 139	— 2
1916-17	21,726	670	11,695	33,421	405
1917-18	19,095	590	17,373	36,468	442
1918-19	11,629	359	— 2,908	8,721	106
1919-20	50,849	1,570	5,212	c56,061	679
1920-21d	— 31,395	966	3,852	— 27,453	— 333

(a) Prior to June, 1914, the figures relating to debt were six months in advance of the trade figures since that date the periods to which the figures relate are identical.

(b) See note to the following table.

(c) This amount should be reduced on account of conversion methods to about £49,000,000, and the corresponding percentage to about 590.

(d) Preliminary figures subject to amendment.

The trade balances would be further modified by the loans of local governing bodies, by the imports of capital for private enterprises, and by the addition to or absorption of bank balances held in London on Australian account. Particulars of such transactions are, however, not available.

Since the outbreak of war the trade balances for single years have been completely upset by the difficulties of transport. Consequently, it is necessary for proper observation to take the total transactions during the six years from the 1st July, 1914, to the 30th June, 1920.

The figures for the decade before the war shew that an annual excess of exports of about £16,000,000 was required to meet the obligations of this community on account of interest and for shipping and other services performed for it by persons outside the Commonwealth. Loans since raised in London by the States, and the loans and advances made by the Imperial Government to the Commonwealth Government, have increased this annual liability by between six and seven millions sterling in 1920-21; the average increase on account of each of the seven years ending June, 1921, being about £4,000,000 over the pre-war liability, which added to the pre-war liability, represents an annual liability throughout the period mentioned of about £20,000,000. Up to the end of the year 1919-20 this liability had been fully met and there was at that time some accumulation of Australian funds in London. The excessive imports during 1920-21, after allowing for new loans, left an adverse balance on the trade of that year, of £27,453,000, whereas the liabilities for the year required an excess of exports of over £22,000,000; consequently the value of exports for the year was about £50,000,000 short of the amount required to pay for the imports and to meet the standing obligations on account of interest, etc. The position with regard to exchange arising from this adverse balance of trade is indicated by the selling price of "On demand" drafts on London, which since December, 1920, has been 37s. 6d. per £100. At no time since the establishment of the Commonwealth in 1901 has the price for similar drafts been so high. In 1916, as a result of drought, and the general dislocation due to the war, the price for some months was 25s. From 1905 to the outbreak of war the price never exceeded 15s. for more than a very brief period.

The general relationship between the balance of trade of the Commonwealth and the borrowing of money abroad is demonstrated by the following figures:—

COMMONWEALTH BALANCE OF TRADE AND PUBLIC DEBT, 1867 TO 1921.

Period.	Annual Average.					
	Imports.	Exports.	Recorded Excess of		New Debt. (a)	Excess of Exports modified by elimi- nation of Loans.

1916-17-1920-21 (5 years) ..	100.6	115.0	..	14.4	7.0	21.4(b)

(a) Subsequent to 1897 these figures relate to moneys raised outside of Australia only. Prior to 1893 the amounts raised locally were insignificant, but it is probable that the amount of new debt raised during 1892-6 is somewhat overstated. Loans raised by Local Government Bodies are not included. Loans for redemption purposes are not included, nor are loans from the Imperial Government for war purposes, the proceeds of which were spent abroad, and consequently did not affect Australian imports.

(b) Adjusted to eliminate defects of conversion of import values this figure would be 20.0.

§ 7. Direction of Trade.

1. Country of Shipment and Country of Origin.—The following table shews, for the years 1910 and 1919-20, the value of imports recorded as direct from the principal countries, and also the disposition of the value of imports against the countries where they were produced or manufactured. A similar comparison for earlier years will be found in previous issues of this work.

COMMONWEALTH IMPORTS FROM COUNTRIES OF SHIPMENT AND COUNTRIES OF ORIGIN, 1910 AND 1919-20.

The only country from which the value of direct imports exceeds by any large amount the value of the imports of goods which were manufactured or produced therein, that is to say, the only country which shews a balance of any magnitude as a distributor of the goods of other countries to Australia, is the United Kingdom. The records of imports therefrom during the year 1919-20 shew that while the total direct imports from that country amounted to £43,112,670, the value of the manufactures or produce of the United Kingdom itself, imported from all countries whatsoever during the same year, was £38,516,436. From the foregoing figures it appears that goods to the value of at least £4,596,234 were received from other countries through the United Kingdom. There is reason to believe, however, that in some instances goods shipped at intermediate ports, on a through voyage, between the United Kingdom and Australia are recorded as from the United Kingdom, instead of from the actual country of shipment.

Other countries which prior to the war shewed balances as distributors to Australia, though absolutely of much less amount, were Belgium, Canada, Hong Kong, New Zealand, Straits Settlements, and Ceylon. The countries mentioned were, of course,

not the only countries through which goods were indirectly imported into Australia, for the direct imports from other countries included considerable values which were not the produce of those countries. Prior to the war large quantities of goods not manufactured in France or Germany were shipped to Australia from those countries. Such transactions were, however, more than balanced by French and German goods received through the United Kingdom and other countries.

2. **Direct Imports according to Country of Shipment.**—The following table shews the average yearly value of imports from each of the principal countries during each succeeding quinquennial period from 1899 to 1919, and for the year 1919-20. The countries mentioned in this table are those in which the goods were shipped or whence they were directly consigned to Australia.

3. Imports from the United Kingdom.—The foregoing table shews broadly the effect on the export trade of the United Kingdom to this country of the concentration of British industry on the war, and it also shews the increased value of imports from the United States of America and from Japan. It must be pointed out, also, that the values given in the foregoing table for the year 1919-20 of the imports from the United States and from Japan, by reason of the conversion of the dollar and the yen at the par of exchange (see § 6, par. 1 of this chapter), are much below their actual commercial values in sterling. The value of the imports from the United States is probably understated by as much as 24 per cent. and that from Japan by 25 per cent. The

diversion of Australian trade from Great Britain is more fully dealt with in paragraph 13 of this section. The values of the principal imports of United Kingdom origin during the year 1919-20 are as follows:—

Alc and beer, £118,627; apparel and textiles—apparel—blouses, skirts, &c., £135,486, boots and shoes, £55,179, corsets, £122,984, gloves, £69,197, hats and caps, £71,671, shirts, collars, etc., £101,683, socks and stockings, £495,669, trimmings, £171,507, other apparel, £617,633, textiles—piece goods—canvas and duck, £949,703, cotton—grey, unbleached, £470,217, white, bleached, £1,902,547, dyed or printed n.e.i., £3,646,031, lace for attire, £400,851, linen n.e.i., £218,235, silk, £167,663, velvets, £136,722, woollens, £3,331,081, other piece goods, £750,134, sewing and embroidery silks, £660,062, other textiles, £1,152,162; arms, ammunition, and explosives, £544,169; bags, baskets, etc., £49,286; books and periodicals, £603,446; brushware, £85,191; cocoa and chocolate, £200,664; cordage, £171,715; drugs and chemicals—alkalis (soda), £279,159, cyanide of potassium, £52,112, dyes, £126,563, insecticides, etc., £64,636, medicines, £131,604, other drugs, etc., £703,355, earthenware, £273,707, electrical materials, £644,683; fancy goods, £194,107; fish, fresh and preserved, £248,340; glass, etc., £147,748; glue, gelatine, £21,501; indiarubber and manufactures, £308,875; instruments—musical, £54,345; surgical and dental, £94,190; jewellery and precious stones, £296,080; leather and manufactures, £151,074; machines and machinery—electrical, £371,559; machine tools, £262,761, motive power, £331,891, other, £1,041,033, metals, manufactures of—cutlery, £345,853, electrical and gas appliances, £327,993, iron and steel—pig iron, £19,818, bar, hoop, ingot, etc., £491,582, girders, beams, etc., £119,667, plate and sheet—corrugated, galvanized, £1,519,091, galvanized, not corrugated, £743,776, plain, not galvanized, £451,359, pipes and tubes, £854,013, rails, fishplates, etc., £36,094, tinned plates, plain, £1,548,064, tools of trade, £431,533, wire, £227,356, wire rope, hawsers, etc., £341,692, vehicles—bicycles, £143,929, motors, £330,470, other vehicles, £414,853, other metal manufactures, £2,064,320; mustard, £82,263; oils (not essential), £158,477, paints and varnishes, £282,263; paper, £435,652; photographic materials, £27,157; pickles, sauces, etc., £94,480; pipes, smoking, £124,720; soap, £52,369; spirits, £807,847; stationery, £260,649; tobacco, £101,435; wax matches, £39,092; yarns, £805,092.

4. Imports Shipped from British Possessions.—The growth of the value of imports from other British possessions during the past twenty years has been such as to increase the proportion to total imports from 12.12 per cent. in the years 1899-1903 to 16.46 per cent. in 1919-20, the actual values being respectively £4,766,160 in the earlier period and £16,294,792 in 1919-20. Of the total imports from British possessions during 1919-20, 14.68 per cent., or 2.41 per cent. of all imports, was from New Zealand; 27.66 per cent., or 4.55 per cent. of all imports, from India; 16.20 per cent., or 2.68 per cent. of all imports, from Canada; and 10.28 per cent., or 1.69 per cent. of all imports, from Ceylon. The imports from Canada shew an increase of £1,481,550, or 127.85 per cent. over those of 1913, and an increase of £1,783,250, or 208.04 per cent., over the average of the period 1909-13. The relatively large imports from the South African Union during the five years ending with 1918-19 were due to a shipment of gold (£4,943,296) to Western Australia to be minted.

5. Principal Imports, the Produce of British Possessions, 1919-20.—These are as follows:—

(i) *Canada.* Apparel and textiles—corsets, £50,106, other, £90,207; boots and shoes, £75,087; carbide of calcium, £14,071; cutlery, £29,587; fish, £197,217; indiarubber and manufactures, £311,380; iron and steel—bar, rod, etc., £19,800; agricultural implements and machinery, £223,259; other machines and machinery, £38,044; metal manufactures, £76,177; musical instruments, £21,151; paints and varnishes, £6,894; paper—printing, £503,157; wrapping, £91,208; other paper, £46,707; pipes and tubes, wrought, £66,266; timber, £111,602; motor chassis, £447,562; other vehicles, £73,826; whisky, £3,982; wire, £30,331.

(ii) *Ceylon.* Cocoa and chocolate, £19,027; coir fibre, £11,217; nuts, £153,530; rubber and manufactures, £31,514; tea, £1,422,273.

For some years past the greater part of the tea imported into Australia was from Ceylon, but, during 1919-20, Java was the principal source of supply.

(iii) *Egypt*. Cigarettes, £3,954; fruits, dried, £1,177; gums and resins, £24,204; hides and skins, £14,821.

(iv) *Fiji*. Bananas, £64,220; copra, £1,194; fancy goods, £19,531; hides—cattle and horse, £11,730; sugar—produce of cane, £160,538; molasses, £17,124.

(v) *Hong Kong*. Ginger, £6,004; oils (in bulk), £3,561; tea, £6,843.

(vi) *India*. Bags and sacks, £1,924,147; hessians, £445,019; cameos, precious stones unset, £31,733; carpets, mats, etc., £25,459; coffee and chicory, £46,560; cordage and twine, £19,190; cotton, raw, £21,292; jute, £38,801; other unmanufactured fibres, £39,270; gums and resins, £48,336; grain—beans and peas, £25,995; linseed, £345,637; oils—castor, £8,864; linseed, £16,845; rice, £456,561; skins and hides, £294,805; spices, £38,155; tea, £642,744; wax, paraffin, £166,348; yarns, £19,653.

(vii) *New Zealand*. Apparel and textiles, £13,117; animals—cattle, £13,203, horses, £20,723, sheep, £1,197; beans and peas, £26,974; coal, £25,605; flax and hemp fibre, £164,266; fish, £34,823; gold bullion, matte, and ore, £37,138; implements and machinery (agricultural), £3,006; machines and machinery, £9,551; meats, £6,598; milk and cream, £31,281; oats, £41,758; seeds, £120,428; skins and hides, £467,445; timber, £673,943; twine, reaper and binder, £6,697; vegetables, £43,517.

(viii) *Papua*. Copra, £136,476; gold bullion, £17,904; fibres, flax and hemp, £12,399; copper ore, £1,859; india-rubber, £34,154.

(ix) *South African Union*. Bark, tanning, £31,031; brandy, £457; coal, £18,988; explosives, £201,198; fibres, £40,624; hides and skins, £91,757; maize, £149,287; precious stones, £380,990.

(x) *Straits Settlements*. Bamboo, clouded, £10,142; pitch and tar, £11,572; precious stones, £7,926; rubber and rubber manufactures, £49,458; spices, £59,022; sago and tapioca, £102,090.

6. Imports Shipped from Foreign Countries.—The imports direct from foreign countries during the year 1919–20 represented 39.98 per cent. of the total imports, as compared with 29.12 per cent. during the years 1899–1903. Of the total imports into Australia shipped from foreign countries during 1919–20, 60.07 per cent.—24.02 per cent. of all imports—was from the United States, and 10.77 per cent.—4.31 per cent. of all imports—was from Japan, and 16.68 per cent.—6.47 per cent. of all imports was from Java. The large increase in the imports from Java was mainly due to heavy imports of sugar and tea. Further reference to the increased trade with the United States and Japan will be found hereinafter.

7. Principal Imports the Produce of Foreign Countries, 1919–20.—(i) *Austria*. Trade with Austria was suspended on the outbreak of war, and has not since been resumed.

(ii) *Belgium*. Apparel, £8,706; textiles, £45,610; arms, £7,347; cameos and precious stones, £49,843; drugs and chemicals, £640; glass and glassware, £117,040; paper, £1,849; wire—iron and steel, £24,137.

(iii) *Brazil*. Cocoa beans, £20,651; india-rubber, £67,637; nuts, £6,184; waxes, £6,598.

(iv) *Chile*. Soda nitrate, £84,396; sulphur—brimstone, £7,296.

(v) *China*. Alcoholic liquors, £15,600; apparel and textiles, £345,643; bamboo, cane, etc., £13,789; cotton, raw, £21,303; drugs and chemicals, £37,411; fireworks, £14,371; fish, £22,721; fruit, £12,674; ginger, £38,258; grass straw for hats, £58,608; rice, £190,510; nuts, £59,833; oils, £56,668; tea, £67,242; tobacco, £13,918.

(vi) *Denmark*. Ale, beer, and spirits, £2,946. Rennet, £7,838; whiting, £3,007.

(vii) *France*. Apparel and textiles, £1,315,034; cream of tartar, £156,807; tartaric acid, £1,831; other drugs and chemicals, £81,050; fancy goods, £41,154; fertilizers, £72,403; jewellery, £41,870; liquorice, £5,116; musical instruments, £9,742; oils, essential, £13,486; olive oil, £42,729; pipes, smoking, etc., £96,917; paper and stationery, £70,760; perfumery, £25,838; perfumed spirits and bay rum, £26,103; rubber tyres, £72,819; leather, £1,013; machinery and manufactures of metal, £34,029; seeds, £4,919; spirits, £95,449; wine, £123,749.

(viii) *Germany*. Trade with Germany was suspended on the outbreak of war, and has not since been fully resumed. Goods can be imported from Germany only under permits granted by the Minister for Trade and Customs.

(ix) *Italy*. Apparel and textiles—buttons, buckles, etc., £22,635, gloves, £25,696, hats and caps, £30,433, piece goods—silk, £60,004, other £5,655, other apparel and textiles, £10,337; chassis for motor cars, £42,649; flax and hemp, £27,068; liquorice, £15,249; marble and stone, £55,049; oils—essential, £36,463; olive oil, £23,140; nuts, £38,422; rubber tyres, £2,462; cream of tartar, £36,000; tartaric acid, £45,446; wines, £3,979.

(x) *Japan*. Apparel—hats and caps, £31,131, gloves, £7,065, socks and stockings, £79,082, shirts, collars, £40,183, other, £164,801, textiles—carpets, matting, £51,410, piece goods—canvas and duck, £64,884, cotton and linen, £522,040, silk, £1,444,058, quilts, etc., £23,625, other textiles, £139,474; bags, baskets, etc., £18,656; brushware, £56,828; cable and wire, covered, £51,065; carbide of calcium, £9,218; chinaware, £132,104; earthenware, £21,405; fancy goods, £113,250; fibres—cotton waste, £20,019; fish, £2,298; furniture, £4,073; glass and glassware, £173,298; grass straw for hats, £72,498, isinglass, £11,244; linseed, £27,599; ores and metal manufactures—electrical appliances; £23,885, enamelled ware, £4,826, wire rope, hawsers, £8,325, other, £107,517; matches, £46,779; nuts, £19,367; oils and waxes, £68,583; paper, £57,844; seeds, £14,597; stationery, £27,595; rice, £772; spices, £15,509; sulphate of copper, £913; sulphur, £52,083; tea, £16,663; wood and wicker, etc., £224,064; yarns, £676; vegetables, £33,717.

Further reference is made on a later page to the imports from Japan.

(xi) *Netherlands*. Cocoa and chocolate, £22,585; cameos and precious stones, £21,830; drugs and chemicals, £7,083; electrical appliances, £28,882; paper, £7,158; spirits, £77,597.

(xii) *Netherlands East Indies*. Bananas, £11,770; coffee and chicory, £81,249; drugs and chemicals, £22,742; fibres—kapok, £315,234, other, £15,254; hides, cattle, £60,015; nuts, £14,576; oils—kerosene, £153,226, lubricating mineral, £14,727, petroleum spirit, £1,517,155, residual oil, £121,950, other oils, £43,795, waxes, £39,991; rubber, crude, £30,533; sago and tapioca, £61,495; seeds, £31,539; tobacco, £41,422; tea, £1,548,628; sugar, £4,024,407; spices, unground, £78,268.

(xiii) *New Caledonia*. Copra, £2,652; fancy goods, £8,532; maize, £1,356; meats, preserved in tins, £5,626; manganese ore, £11,848; skins, £45,760; tallow, £18,513; timber, £5,194.

(xiv) *Norway*. Drugs and Chemicals, £88,380; meats, £268,530; machinery and manufactures of metals, £5,596; matches, £2,565; paper, £239,562; timber, £202,437; wood pulp, £14,543.

(xv) *Peru*. Rubber, crude, £3,010; sugar, £174,078.

(xvi) *Philippine Islands.* Flax and hemp, £150,904; cigars, £35,987; tobacco, unmanufactured, £9,576.

(xvii) *Russia.* Drugs and chemicals, £1,717; furs, £4,021; paper, £1,644.

(xviii) *Spain.* Corks, etc., £62,383; nuts, £11,738; olive oil, £62,443; quicksilver, £4,591; wine, £10,001.

(xix) *Sweden.* Calcium carbide, £23,727; cream separators, £63,339; other machines and machinery, £49,312; horseshoe nails, £3,128; primus stoves, £5,780; manufactures of metals, £13,880; matches and vestas, £49,592; timber, £90,348; paper, £437,310; wood manufactures, £9,418; wood pulp, £35,488; rennet, £745.

(xx) *Switzerland.* Apparel and textiles—trimmings, £168,813, piece goods—silk, £259,536, lace for attire, £72,708, other, £127,786; drugs and chemicals, £20,083; electrical articles, £24,224; grass straw for hats, £22,435; machinery and metal manufactures, £79,836; surgical instruments, £2,108; talking machines, £5,116; watches, £164,890.

(xxi) *United States of America.* Apparel—boots, shoes, etc., £83,338, corsets, £134,455, furs, dressed, £34,623, gloves, £150,618, hats and caps, £80,747, hosiery and knitted articles, £92,533, shirts, collars, etc., £49,646, socks and stockings, £669,569; trimmings, £57,837, other apparel, £174,522; textiles—floor coverings, £68,418, piece goods—canvas and duck, £259,621, cotton and linen, £621,338, other, £249,370, sewing silks, £148,898, other textiles, £30,681; arms, £99,530; ammunition and explosives, £231,315; bags, baskets, etc., £50,388; brushware, £39,694; cameras, £79,786; caramel, £27,472; clocks and watches, £125,252; cocoa and chocolate, £8,554; drugs and chemicals—cream of tartar, £52,058, drugs and medicinal preparations, £99,161, dyes, £11,983, medicines, £144,826, other, £401,061; electrical materials—accumulators, £81,022, arc lamps and carbons, £51,207, cable and wire, covered, £33,985; fancy goods, £76,915; fish, £283,889; fruit, £100,442; furniture, £37,133; glass and glassware, £193,176; india-rubber manufactures, £519,300; jewellery and precious stones, £36,832; kinematograph films, £211,544; leather, £546,566; meats, £126,838; machines and machinery—agricultural, £155,896, engines, £194,368, electrical, £463,215, machine tools, £178,131, sewing, £178,527, typewriters, £93,104, other, £1,027,074; metals and manufactures—bolts, nuts, £78,093, copper, plate and sheet, etc., £20,694, cutlery, £50,318, iron and steel—bars, ingots, hoops, etc., £219,916, girders, beams, £80,865, plate and sheet—corrugated, galvanized, £223,338, galvanized, not corrugated, £147,873, plain, not galvanized, £255,465, lampware, £101,980, nails, £84,588, pipes and tubes, £257,007, telephones, £59,296, tools of trade, £403,634, wire, £516,489, other, £1,051,477; musical instruments, £329,641; oils, fats, and waxes—benzine and gasoline, £819,302, kerosene, £638,308, lubricating oils and greases, £312,547, waxes, £45,986, turpentine, £182,031; paints and varnishes, £150,682; paper—printing, £303,624, wrapping, £96,424, writing and typewriting, £217,467, other, £333,613; perfumery, £136,520; resin, £194,983; soap, £62,286; soda—carbonate, £18,739, caustic, £12,583, stationery, £336,810; surgical and dental instruments, £108,452; talking machines, £134,413; timber, £1,129,510; tobacco, cigars, etc., £2,459,191; vehicles—motors and parts, £2,078,929, other vehicles and parts, £401,632; wood and wicker manufactures, £168,373.

The imports from America are again referred to on a later page.

8. *Direction of Exports.*—The following tables shew that, prior to the war, a constantly decreasing proportion of Australian exports was being consigned to the United Kingdom. This was not entirely due to the relatively smaller purchases of Australian produce by the United Kingdom, but was in some measure the effect of an increasing tendency towards direct shipment of wool, skins, etc., to the consuming countries—notably to Belgium, France, and Germany—instead of distributing the trade through London as formerly. The figures given below, however, do not, even for the later pre-war years, denote the total purchases by European countries of Australian produce, as large quantities were still distributed from London. The reservation to the United Kingdom of the first call on our primary products increased the proportion

GRAPHS SHEWING VALUES OF TOTAL TRADE, EXPORTS, AND IMPORTS OF
COMMONWEALTH, 1826 TO 1919-20.

(See pages 492 and 493.)

EXPLANATION OF GRAPHS.—The base of each square represents an interval of five years, and the vertical height five million pounds sterling for Imports and Exports, and ten million pounds sterling for Total Trade.

GRAPHS SHEWING THE VALUES PER HEAD OF POPULATION OF TOTAL TRADE, EXPORTS
AND IMPORTS OF COMMONWEALTH, 1826 TO 1919-20.

(See pages 492 and 493.)

EXPLANATION OF GRAPHS.—The base of each square represents an interval of five years, and the vertical height five pounds per head of the population.

of our exports which was shipped to that country during the war period, and, to a greater extent, the proportion shipped to other parts of the Empire, notably to Egypt and to India.

9. Exports to the United Kingdom.—The principal exports to the United Kingdom during the year 1919-20 were as follows:—Apparel and textiles, £103,475; butter, £2,120,691; cheese, £254,014; coconut oil, £105,233; copra, £470,999; eucalyptus oil, £37,023; other drugs, £36,636; fibres—rags, £42,897; fruits—apples, £395,075; dried, £149,093; preserved in liquid, £361,353; gold specie, £2,297; grain and pulse—beans and peas, £70,489; wheat, £13,321,763; flour, £858,575; hair, £47,595; honey, £6,642; jams and jellies, £452,074; jewellery and precious stones, £134,488; lard, etc., £218,714; leather, £1,329,931; meat—frozen beef, £2,130,527; mutton, £3,668,824; lamb, 1,623,718; rabbits and hares, £756,298; other frozen meat, £269,919; potted meat, £163,937; meat,

preserved in tins, £2,571,574; milk, £222,780; minerals and metals—copper—ingots, £2,030,984, lead—pig, £2,033,695, tin—ingots, £286,544, zinc—concentrates, £68,790, bars, blocks, etc., £95,145, antimony, £80,383, molybdenite, £60,269, scheelite, £39,783, wolfram, £114,523; pearl shell, £196,693; silver, £347,501; skins—cattle, hides, £396,767, rabbit and hare, £764,303, sheep, £2,055,612, other skins, £556,694; spirits, £77,232; stearine, £45,019; tallow, £949,403; vessels, £432,500; wine, £104,498; wool—greasy, £28,337,660, scoured, £7,463,005, tops, £1,456,250.

10. Principal Exports to British Possessions, 1919–20.—(i) *Canada*. Coconut oil, £14,138; dried fruits, £40,022; hides and skins—rabbit and hare, £6,848, other, £118,253; jams and jellies, £6,162; meats—sausage casings, £9,644, other, £11,367; tin—ingots, £9,344; wool, £63,520; tallow, £2,025.

(ii) *Ceylon*. Butter, £31,866; flour, £165,555; lard, £4,632, meats, £42,171; milk, £19,277; cameos and precious stones, £7,033; timber, £10,448; wheat, £12,783.

(iii) *Egypt*. Apparel and attire, £30,212; biscuits, £2,120; butter, £3,341; flour, £1,539,224; fruits preserved in liquid, £8,494; jams and jellies, £193,715; leather, £45,002; meats—frozen—beef, £133,583, preserved in tins, £9,240, other, £8,440; milk, £1,921; tallow, £3,351; timber—undressed, £14,472; wheat, £684,160.

(iv) *Fiji*. Apparel and textiles—apparel, £40,752, textiles, £65,319, bags, sacks, and cordage, £28,244; beverages, £26,352; biscuits £42,814; coal, £33,929; drugs and chemicals—fertilizers, £37,260, other, £11,561; grain, prepared—bran and pollard, £48,537, flour, £43,823, rice, £2,531; machines and machinery, £26,361; metal manufactures, £36,987; meat, preserved in tins, £1,563; oils, fats, and waxes, £12,319; silver specie, £3,800; spirits and alcoholic liquors, £38,993; soap, £4,766; timber, undressed, £11,236; tobacco, £21,330; vehicles, £3,967.

(v) *Hong Kong*. Biscuits, £5,106; butter, £66,197; precious stones, £11,012; fish, £71,305; flour, £591,734; gold specie, £1,153,118; lead, pig, £120,427; leather, £55,623; meats, £49,966; milk and cream, £61,190; sandalwood, £174,659; soap, £15,694; silver, £39,715; vessels, £120,000.

(vi) *India*. Biscuits, £18,603; boots and shoes, £9,884; precious stones, £12,643; cheese, £21,028; coal, £12,270; copper ingots, £276,840; fruits preserved in liquid, £2,578; gold, £708,658, silver, £514,202; horses, £84,651; hay and chaff, £7,084; grain and pulse—wheat, £281,119; oatmeal, £9,797, flour, £9,007; jams and jellies, £37,431; leather, £28,742; meats, £31,358; milk, £63,408; tallow, £165,657.

(vii) *New Zealand*. Apparel and textiles, etc.—boots and shoes, £583,713, other apparel, £365,098, textiles, £411,592, bags, baskets, £44,475; bags and sacks, £62,106; cordage, £15,880; arms, ammunition, etc., £36,026; bark, tanning, £37,616; biscuits, £11,708; books and periodicals, £66,003; cameras, kinematographs and films, talking machines, etc., £2,535; photographic goods, £50,029; coal, £392,718; confectionery, £109,572; drugs and chemicals—fertilizers, £153,501, medicines, £99,116, other drugs, etc., £170,150; egg albumen, £17,798; electrical materials, £21,229; fibres, £22,050; fodders, £2,640; fruit—fresh, £33,303, dried, £331,405; preserved in liquid, £114,938; furniture, £12,929; glass and glassware, £64,651; grain—barley, £68,224; flour, £3,543; oats, £17,865, rice, £57,544, wheat, £681,233; hides and skins, £6,850; horses, £35,725; india-rubber manufactures, £250,312; iron, bar, £70,029; jewellery, £70,055; cameos and precious stones, £41,229; lead, pig, £27,266; leather and leather manufactures, £278,751; matches, £9,366; agricultural implements and machinery, £17,311; other machines and machinery, £188,696; other manufactures of metals, £364,743; motor vehicles and parts, £12,788; milk, £41,538; oils, etc., £194,194; onions, £12,692; paints, varnishes, £192,963; plants, trees and bulbs, £4,517; paper, £57,878; peel, £18,626; salt, £36,924; seeds, £43,697; soap, £75,907; specie, silver, £2,100; spirits, £91,474; stationery, £33,142; sugar, £28,503; tea, £348,136; timber, £178,982; tin, ingots, £77,112; tobacco, £237,169; wine, £68,934; wood and wicker articles, £29,171.

(viii) *Papua*. Ale and beer, £5,775; apparel and textiles, £22,787; beans and peas, £13,172; biscuits, £9,157; butter, £2,790; coal, £4,309; fish, £6,505; flour, £13,458; machinery and manufactures of metal, £51,362; meats, £16,616; oils, etc., £15,944; rice, £5,444; sugar, £6,452; timber, £5,662; tobacco, £31,894.

(ix) *South African Union*.—Animals—sheep, breeding, £40,014; butter, £38,411; cheese, £47,517; boots and shoes, £107,673; copper—bars and ingots, £1,266; cordage and twine, reaper and binder, £20,709; other, £45,743; drugs and chemicals—eucalyptus

oil, £3,257, glycerine, etc., £1,720, other, £7,901; fruits—dried, currants, £47,352; raisins, £26,760; grain—wheat, £485,811, flour, £713,011; hops, £1,705; infants' food, £24,597; jams and jellies, £67,756; lard, £54,493; leather, £170,276; machinery and manufactures of metal, £22,943; meats, preserved, in tins, £39,407; milk and cream, £266,854; pickles and sauces, £3,444; rails, fishplates, etc., £67,646; seeds, £4,326; soap, £19,497; tallow, unrefined, £175,781; timber, £234,657.

(x) *Straits Settlements*. Biscuits, £33,135; butter, £162,044; cheese, £12,953; coal, £98,368; gold, specie, £3,433,586; grain, flour, £1,319,493; iron and steel, bar, etc., £3,695; jams and jellies, £44,962; leather, £45,497; living animals, £3,3501; machines and machinery—mining, £24,880, other, £19,759; meats, £186,331; milk and cream, £478,420; rails, fishplates, £60,404; sandalwood, £71,522; soap, £21,773.

11. Principal Exports to Foreign Countries, 1919-20.—These are as follows:—

(i) *Argentine Republic*. Agricultural implements and machinery, £3,374; seeds, £996.

(ii) *Bismarck Archipelago*. Ale, beer, £34,568; apparel, £17,108; biscuits, £11,615; textiles, £60,322; fibres, £5,895; fish, £24,847; machinery and manufactures of metals, £60,241; meats, £29,882; oils, £31,391; rice, £15,597; silver, specie, £34,920; tobacco, £53,651.

(iii) *China*. Butter, £89,217; copper ingots, £59,981; flour, £20,183; jams and jellies, £11,341; lead—pig, £30,698; leather, £29,940; meats, £14,972; sandalwood, £18,307; stearine, £25,977; silver, bar, ingot, etc., £136,515; tin, ingots, £28,105.

(iv) *Dutch East Indies. Java*. Apparel, textiles, etc., £47,330; butter, £469,670; biscuits, £68,691; coal, £73,303; coke, £6,253; confectionery, £5,767; grain, etc., barley, £3,445; flour, £581,274; oats, £50,972, other, £69,187; fertilizers, £155,650; fruits, fresh, £12,083; gold, specie, £245,118; lard, £7,542; horses, £14,264; jams and jellies, £12,162; leather and manufactures, £191,502; milk and cream, £186,337; machinery, mining, £1,403, other, £18,154; metal manufactures,—bolts, nuts, etc., £4,629; iron—bar and ingots, £65,012, nails, £7,097, rails, fishplates, £20,137, vehicles, £9,099, other, £45,179; meats, £64,334; wine, £6,625.

(v) *Other East Indies*. Biscuits, £27,323; butter, £94,302; flour, £221,396; machines and metal manufactures, £31,069; meats, £10,491; milk and cream, £11,460; soap, £33,435; stearine, £4,300.

(vi) *France*. Precious stones, £87,126; copra, £4,020; flour, £445,553; fruits, preserved in liquid, £7,202; jams and jellies, £82,994; leather, £36,903; ores, £54,144; tallow, unrefined, £2,792; wheat, £3,532,235; wool, £2,352,749.

(vii) *Italy*. Hides and skins, £57,903; tallow, £412,773; milk and cream, £53,977; tallow, wheat, £378,984; wool, £2,832,951.

(viii) *Japan*. Bones, £32,988; butter, £55,126; concentrates, zinc, £37,310; copper ingots, £390,372; hoofs, £15,165; glue pieces and sinews, £13,073; grain—barley, £25,156, flour, £464,922, wheat, £1,924,723; other, £81,343; hair, £15,413; hides and skins, cattle, £22,471, rabbit and hare, £56,462, fur, hatters', £31,797, other skins, £3,893; lead, pig, £428,796; leather, £2,953; manures, £153,892; milk and cream, £75,178; oils, £8,397; pearl shell, £4,576; trochus shell, £204,963; tin—ingots, £19,436; pig iron, £147,538; rags, £18,177; tallow, £623,106; wool, £2,010,732.

(ix) *New Caledonia*. Apparel, £26,925; textiles, £26,377; coal, £26,118; coke, £39,622; flour, £78,890; leather, £8,700; machinery and manufactures of metal, £41,225; oils, greases, etc., £16,331; potatoes, £8,234; rice, £4,425; sugar, £35,475; wine, £14,440; tobacco, £19,391.

(x) *Peru*. Coal, £14,938; wheat, £45,514.

(xi) *Philippine Islands*. Biscuits, £1,032; butter, £91,040; coal, £56,743; flour, £683,698; fodder, £12,601; jams and jellies, £7,983; leather, £15,293; meats—bacon and hams, £32,071, beef, £65,331, other meats, £23,797; vessels, £17,000.

(xii) *United States of America*. Copra, £71,895; hair, £9,260; hides, £1,077,790; jams and jellies, £208,338; leather, £95,630; sausage casings, £299,236; oils—coconut, £7,089, eucalyptus, £29,838; pearlshell, £265,353; skins—rabbit and hare, £2,777,774, opossum, £1,068,702, other, £1,460,210; tallow, £106,247; timber, £6,588; tin—ingots, £534,975; vessels, £123,378; wheat, £24,554; wool, £2,516,142.

§ 8. Development of Export Trade to Eastern Countries.

1. **Trade with Eastern Countries.**—The following tables shew the expansion in the value of exports from the Commonwealth to eastern countries since the inception of the Commonwealth in 1901. The principal countries concerned in this trade are China, India, Ceylon, Japan, East Indies, Philippine Islands, Straits Settlements, and Hong Kong, and the particulars given in the tables apply to these countries only :—

VALUE OF PRINCIPAL ITEMS OF MERCHANDISE EXPORTED FROM THE COMMONWEALTH TO EASTERN COUNTRIES, 1901-1920.

The wool exported to the East by the several States during 1919-20 was shipped as follows :—New South Wales, £1,347,137; Victoria, £229,993; Queensland, £437,690.

* Annual average for the quinquennial period.

§ 9. Trade of Commonwealth since Federation.

1. Classified Summary of Australian Trade.—The following tables present the trade of the Commonwealth arranged in classes according to the nature of the goods since the inauguration of the Commonwealth :—

STATISTICAL CLASSIFICATION OF IMPORTS AND EXPORTS.

Class.	Articles.
I.	FOODSTUFFS of animal origin but excluding living animals.
II.	FOODSTUFFS of vegetable origin.
III.	BEVERAGES (non-alcoholic), and substances used in making.
IV.	SPIRITUOUS AND ALCOHOLIC LIQUORS.
V.	TOBACCO, and preparations thereof.
VI.	LIVE ANIMALS.
VII.	ANIMAL SUBSTANCES (mainly unmanufactured), not foodstuffs.
VIII.	VEGETABLE SUBSTANCES and fibres.
IX.	(a) APPAREL; (b) TEXTILES; AND (c) MANUFACTURED FIBRES.
X.	OILS, FATS, AND WAXES.
XI.	PAINTS AND VARNISHES.
XII.	STONES AND MINERALS, used industrially.
XIII.	ORES AND METALS, unmanufactured or partly manufactured.
XIV.	(a) MACHINES AND MACHINERY; (b) OTHER MANUFACTURES OF METAL.
XV.	(a) INDIARUBBER AND INDIARUBBER MANUFACTURES; (b) LEATHER AND MANUFACTURES OF LEATHER, and substitutes therefor.
XVI.	WOOD AND WICKER, raw and manufactured.
XVII.	EARTHENWARE, CEMENTS, CHINA, GLASS, AND STONEWARE.
XVIII.	(a) PAPER; (b) STATIONERY.
XIX.	JEWELLERY, TIMEPIECES, AND FANCY GOODS.
XX.	OPTICAL, SURGICAL, AND SCIENTIFIC INSTRUMENTS.
XXI.	DRUGS, CHEMICALS, AND FERTILIZERS.
XXII.	MISCELLANEOUS.
XXIII.	GOLD AND SILVER; and BRONZE SPECIE.

COMMONWEALTH IMPORTS ARRANGED IN CLASSES, 1901 TO 1919-20.

Classes.	Annual Average.

§ 11. Effects of Prices on the Values of Exports.

1. **Significance of Price in Totals.**—In comparing the value of exports from, and also imports into, any country for a series of years, the question naturally arises as to how much any variation in the aggregate value is due to fluctuations in prices, and how much to increase or decrease of actual quantities, for, in aggregates expressed only in value—the only possible method when the commodities differ—the two sources of variation are confused.

The scheme of comparison adopted has been to take an annual average, for an extended period, of the quantities of all such articles of export as are recorded by quantity, and to apply to the average quantities so obtained the average prices in each year. The quantities used to produce the following results are the averages for 19½ years, viz., from 1st January, 1897, to 30th June, 1916, which it is considered may be taken as representing

the general quantitative composition or norm of the exports from the Commonwealth. The results published in issues of this work prior to No. 12, 1919, were ascertained by applying to the quantities exported during each year the average price per unit ruling in some year arbitrarily taken for the purposes of comparison as the basic year. The advantage of the method now adopted is that the results are comparable throughout, whereas under the method previously followed each year was comparable with the basic year only.

2. Effect of Prices.—The following table shews the values of exports as actually recorded in each year, together with the values computed on the assumption that the prices of 1901 were maintained. The table also shews the yearly "price-levels" based upon the results so ascertained.

This table obviously furnishes a measure of the influence of prices on the value of exports of each year since 1901. Column IV.—values computed on 1901 prices—represents the volume of exports (less specie and gold bullion), expressed in the common denomination of value, and from the figures therein it will be seen that, had the prices of 1901 remained constant, the value of the exports of merchandise during the year 1919–20 for example, would have been £64,103,424 only, instead of £144,168,600—the value actually recorded. The difference between these amounts (£80,065,176) results from a rise of 124.9 per cent. (i.e., from 1,000 to 2,249) in the price of commodities for the period intervening between 1901 and 1919–20.

It will be seen from the column of "Price-Levels" that prices as indicated by the Commonwealth exports rose steadily from the beginning of the decade to the year 1907. The financial crisis in the United States of America caused a pronounced fall in the prices of 1908. Owing to the large proportion of the aggregate value of exports represented by wool and wheat, any change in the price of these commodities has a marked effect on the index-numbers for the total group of exports, and it is to their influence that the fall of prices in 1911 is mainly due.

EFFECT OF PRICES ON THE VALUE OF COMMONWEALTH EXPORTS, AND EXPORT PRICE LEVELS FOR THE PERIOD 1901 TO 1920-21.

1920–21c ..	5,395,006b	126,634,000	56,182,000	132,029,000	60,264,000	2254

(a) These are index-numbers for the total group of exports, excluding specie and gold bullion.

(b) Including premium on gold exported 1919–20, £1,241,954, or 28.8 per cent. on standard price; 1920–21, £1,313,024, or 32.7 per cent.

(c) Preliminary figures, subject to alteration.

The following table of index-numbers shows the variations in price of the different classes of goods exported grouped according to their industrial origin :—

PRICE-LEVELS OF COMMONWEALTH EXPORTS, 1901-20.

Year.	Agricultural Produce.	Pastoral Produce.	Dairy Produce.	Mineral Produce.(a)	Miscellaneous.	All Classes.(a)
1901 ..	1,000	1,000	1,000	1,000	1,000	1,000
1902 ..	1,161	1,117	1,165	842	1,108	1,089
1903 ..	1,201	1,200	944	819	1,167	1,153
1904 ..	1,127	1,232	906	851	946	1,139
1905 ..	1,193	1,291	995	920	920	1,200
1906 ..	1,155	1,344	1,021	1,113	991	1,258
1907 ..	1,184	1,403	1,044	1,148	1,035	1,308
1908 ..	1,445	1,212	1,115	896	1,002	1,190
1909 ..	1,461	1,219	1,031	891	1,079	1,193
1910 ..	1,436	1,266	1,072	900	1,195	1,226
1911 ..	1,243	1,193	1,085	944	1,227	1,161
1912 ..	1,388	1,268	1,198	1,133	1,254	1,263
1913 ..	1,324	1,334	1,124	1,114	1,329	1,290
1914-15	1,480	1,323	1,176	1,066	1,221	1,299
1915-16	1,927	1,589	1,488	1,393	1,106	1,591
1916-17	1,726	2,131	1,690	1,650	1,357	1,965
1917-18	1,954	2,250	1,624	1,760	1,401	2,084
1918-19	1,864	2,166	1,855	1,692	1,775	2,033
1919-20	2,145	2,393	2,023	1,787	2,150	2,249
1920-21	3,177	2,093	2,854	1,813	2,179	2,254

(a) Excluding gold which, since February, 1919, has been exported at a premium. During the year 1919-20 the premium realized was 28.8 per cent., and during 1920-21, 32.7 per cent.

The high index-numbers for mineral produce during 1906 and 1907 reflect the world's prices for that period, when prices registered for all the principal industrial metals touched a point higher than any previously recorded for many years.

The lower index for agricultural produce exported during 1916-17 is due to the lower price registered for wheat, viz., 4s. 10d. per bushel as against 5s. 6d. per bushel for 1915-16.

§ 12. External Trade of Australia and other Countries.

1. Essentials of Comparisons.—Direct comparisons of the external trade of any two countries are possible only when the general conditions prevailing therein, and the scheme of record, are sensibly identical. For example, in regard to the mere matter of record, it may be observed that in one country the value of imports may be the value at the port of shipment, while in another the cost of freight, insurance, and charges may be added thereto. Or again, the values of imports and exports in the one may be declared by merchants, whereas in the other they may be the official prices, fixed from time to time by a commission constituted for the purpose. In later years, too, a very substantial difference in the value of imports would arise from the different methods of converting the moneys of foreign countries, i.e., from the application of current rates of exchange or of the mint par. The figures relating to the external trade of any country are also affected in varying degree by the extent to which they include transit or re-export trade. Including bullion and specie, the transit trade of Belgium, for example, represented, prior to the war, approximately 40 per cent. of the gross trade recorded; of Switzerland, 45 per cent.; of France, 20 per cent.; and of the United Kingdom, 15 per cent.; whereas in Australia the same element represents, normally, about 4 per cent., and in New Zealand even less.

2. "Special Trade" of Various Countries.—Special trade may be defined, agreeably to the practice of the British Board of Trade, as (a) imports entered for consumption in the country (as distinguished from imports for transshipment or re-export) and (b) exports of domestic products.

TRADE OF VARIOUS COUNTRIES (IMPORTS FOR HOME CONSUMPTION AND EXPORTS OF DOMESTIC PRODUCTS, INCLUDING BULLION AND SPECIE) FOR LATEST AVAILABLE YEAR.

(a) Excluding Bullion and Specie.

In the above table the figures relate, as nearly as is possible, to imports entered for consumption in the various countries quoted, and to exports of their domestic products. It is to be noted, however, that these figures do not unequivocally denote the same thing throughout, since, in the United Kingdom and other manufacturing countries, raw or partly manufactured materials are imported as for home consumption, and, after undergoing some process of manufacture or further modification, are re-exported as domestic production, and further, the statistical records of many countries do not distinguish between bullion and specie imported for the use of the particular country (home consumption) and the amount in transit, nor between the exports of that produced within the country and that re-exported. Nevertheless, a comparison of this character reveals approximately the extent of the external trade which otherwise would not be manifest. The figures relating to foreign countries have been converted on the average of the commercial rates of exchange for the years subsequent to the war.

3. External Trade as a Measure of Prosperity.—External trade is not necessarily a measure of the prosperity of a country. It is, for example, obvious that the external trade of a community depends not only upon the aggregate of its requirements, but also upon the extent to which it fails to supply requirements from its own resources. A community largely self-contained, for example, may have but a small external trade per head, and yet, by virtue of its capacity to produce and manufacture its own raw material, may

actually enjoy greater prosperity and a higher standard of living than another country whose external trade per head is much greater. The same observation applies equally to comparisons of the trade of the same country at different periods. A young country, the industries and export trade of which are mainly connected with raw or natural products, may, for example, through internal development, find the growth of its external trade diminishing per head of population without necessarily suffering any real diminution in the well-being of its people. In this regard it is interesting to contrast the trade per head of say, Belgium, New Zealand, and the United States of America. Prior to the war trade per unit of population for any year was greatest in Belgium (£48 18s. 1d. in 1912), with New Zealand next (£41 14s. 3d.), whereas for the United States the trade was only £9 0s. 8d. per inhabitant. Belgium and New Zealand represent conditions almost directly opposite to one another in the scheme of industrial development, yet the trade per head of each was abnormally high in comparison with that of most other countries. The large trade of Belgium was attained by the export of the products of highly organized manufacturing industries, based on the supplies of coal and iron within the country, in exchange for the raw materials for those industries and for food. In New Zealand the circumstances are reversed, inasmuch as in that country the energies of the people are mainly applied to primary industries, the produce of which, being largely in excess of local requirements, is exported in exchange for manufactured goods. The relatively small trade per head of population of the United States, as compared with Belgium or New Zealand, does not indicate that the people of the United States are in an inferior condition, but rather that their industries are more nearly balanced, with the result that a large proportion of the requirements of the nation is supplied from within its own territory, and consequently a smaller foreign trade is sufficient to supply the fewer remaining wants of the people, or, in other words, it indicates that as a nation the United States is more nearly self-contained.

The small foreign trade per inhabitant of Japan, Spain, and Portugal is, undoubtedly, due in some measure to a lower standard of living, but to what extent this factor is responsible, and how much is due to the capacity to supply all kinds of material wants from their own resources, could be ascertained only from a consideration of the general social and industrial conditions prevailing in each country. It is further obvious that circumstances may arise when enlargement of both imports and exports is actually a consequence of temporary economic difficulties. For example, in 1903, owing to shortage in the local supply, it became necessary to import wheat and flour into Australia to the value of £2,556,968, and to meet the charges for this by equivalent *exports*, the effect, considered *per se*, being to enlarge both. In this case the increase is not an evidence of prosperity. Even more pronounced instances of the same nature are furnished by the post-war trade figures for the United Kingdom and some European countries as shewn in the foregoing table. The depletion of stocks during the war period made it necessary to import larger quantities of essential goods. The effect of the larger imports was accentuated by the higher prices due to the combined effects of the scarcity of goods and inflated currency. The resultant large increases in the recorded value of the trade cannot, under such circumstances, be taken as an indication of greater prosperity.

§ 13. Trade of the United Kingdom with Australia, compared with Competing Countries.

1. Proportion of Trade from United Kingdom and Competing Countries.—The failure of the United Kingdom to maintain the position formerly held in the import trade of Australia has been a matter of more than ordinary interest for some years. Since 1908, a permanent resident Commissioner, appointed by the British Board of Trade, has been established in Australia for the purpose of advising manufacturers and merchants in the United Kingdom with regard to Australian trade affairs. From the 8th August, 1907, the Commonwealth Customs Tariffs have provided special rates in

favour of goods from the United Kingdom, with the object of assisting the British manufacturer to retain or improve his position in this market. The percentages given in the following table shew the proportions of the imports into Australia from the United Kingdom, and from other countries mentioned, during each of the years 1886 to 1919-20:—

**PROPORTION OF COMMONWEALTH IMPORT TRADE FROM VARIOUS COUNTRIES.
1886 TO 1919-20.**

Year.	Percentage Proportions from—					Year.	Percentage Proportions from—				
	United K'dom.	British Poss'ns.	Germ'y.	United States.	Total Foreign C'tries.		United K'dom.	British Poss'ns.	Germ'y.	United States.	Total Foreign C'tries.

1896 ..	68.28	10.74	5.31	8.59	20.98	1913 ..	59.70	12.42	6.22	11.94	27.88
1897 ..	66.22	10.72	5.75	10.10	23.06	1914-15	58.82	14.64	2.02	14.89	26.54
1898 ..	66.62	10.88	5.86	10.16	22.50	1915-16	51.10	16.46	0.05	19.76	32.44
1899 ..	61.85	11.75	6.07	13.00	26.40	1916-17	52.47	16.03	0.06	20.37	31.50
1900 ..	61.23	11.28	6.54	12.16	27.44	1917-18	39.90	21.26	0.02	24.38	38.84
1901 ..	59.47	11.22	6.59	13.80	29.31	1918-19	37.10	22.15	0.00	27.29	40.75
1902 ..	58.64	13.22	6.53	12.27	28.14	1919-20	43.56	16.46	0.00	24.02	39.98

In order to draw accurate conclusions from the above table, however, special attention must be given to the nature of imports from the United States, since the imports from that country have in some years been increased by imports of breadstuffs, a trade in which the United Kingdom could not participate. The years affected by the imports of breadstuffs were 1886, 1889, 1896, 1897, 1903 and 1914-15. Increased imports of such items as kerosene oil and timber also tend to increase the proportion of imports from the United States without any prejudicial effect on the trade of the United Kingdom. Similar modification is not necessary in regard to Germany, as the nature of the imports from that country was substantially the same as from the United Kingdom. The inclusion of specie and bullion, which have been received mainly from New Zealand and other British possessions, also obscures to some extent the essential facts. Nevertheless the figures presented indicate general tendencies. It will be noticed that although in the earlier years under review the proportion of imports which were shipped from the United Kingdom declined in a very marked degree from 73.37 per cent. in 1886 to 61.85 per cent. in 1899, from the latter year to the outbreak of war the proportion has been well sustained at about 60 per cent. of the whole.

It has already been pointed out in this chapter that, prior to the year 1905, imports into the Commonwealth were recorded only against the country whence they were directly imported. Although the values of direct imports do not afford satisfactory data, it is necessary for any comparison extending further back than 1905 to use such figures. These figures are unsatisfactory on account of the varying proportions of indirect trade.

In order to furnish a comparison free from such trade as, from its nature, is not open to the United Kingdom, the following table, shewing the direct imports during the years 1886, 1906, 1913, and 1919-20 of the principal classes of goods which enter largely into the trade of the countries named, has been prepared. It may be mentioned that the imports for the year 1886 were extracted from the "Statistical Registers" of the several States for a comparison—published in a previous issue—with the year 1906, and as their compilation involved a large amount of labour they are again utilised for comparison with the later years.

PRINCIPAL DIRECT IMPORTS INTO THE COMMONWEALTH FROM THE UNITED KINGDOM, GERMANY, AND THE UNITED STATES, 1886, 1906, 1913, AND 1919-20.

Nature of Imports.	Year.	United Kingdom.	Germany.	United States.	All Countries.

	1919-20	43.58	0.00	24.03	100

The foregoing table shows that the share of the United Kingdom, as indicated by the records according to "Country of Shipment," in the trade of those classes of goods enumerated—representing about 90 per cent. of the total imports from that country—has declined from 89.31 per cent. of the whole in 1886 to 57.74 per cent. in 1919-20. The value of these imports from the United Kingdom has increased from £20,489,153 in 1886 to

only £37,669,300 in 1919-20, or by 83.85 per cent., while the total value of similar imports had increased from £22,937,818 to £65,235,003, or by 184.40 per cent. The figures given in this table for the year 1919-20 require some modification on account of the method used in converting exchange. The result would be to materially reduce the per centage share of the United Kingdom. This matter is more fully dealt with in connexion with the following table which gives an analysis of the imports from 1908-12 to 1919-20, according to the countries of origin of the goods.

IMPORTS INTO THE COMMONWEALTH OF PRODUCTS OR MANUFACTURES OF THE UNITED KINGDOM, FRANCE, GERMANY, JAPAN, AND THE UNITED STATES OF AMERICA DURING THE YEARS 1908-12 TO 1919-20.

Apart from the decline of imports from the United Kingdom and the collapse of the trade with Belgium and Germany in consequence of the war, the most striking feature of the figures given above, perhaps, is the increased proportion of the trade which has fallen to the United States and to Japan. It may be mentioned here that the value of the imports from the United States and from Japan during the later years are somewhat understated, inasmuch as the values have been converted from the currencies of those countries on the basis of a par of exchange, whereas the actual exchange rates were considerably in their favour. The effect of this method of conversion, except in the case of Italy, did not reach serious dimensions until the year 1919-20. This method of conversion, which was applied to values for Customs duty also, was an advantage to Japan and to the United States in the Australian market by reducing the amount of duty to be paid on goods subject to *ad valorem* rates. In consequence of using the par of exchange, the figures given in the foregoing tables, though taken from the official records, are misleading. The commercial values of the imports referred to may be ascertained by multiplying the values given by the following co-efficients:—France, 0.58; Japan, 1.25; United States, 1.24; and from all countries by 1.07. The values of the imports from the United Kingdom, of course, require no alteration. Modified accordingly, the proportion of the competitive groups supplied by the United Kingdom during 1919-20 would be 48.47 per cent. instead of 51.87 per cent., and the share of France would be reduced from 3.50 per cent. to 1.89 per cent. On the other hand, the proportion from Japan would be raised from 5.19 to 6.06 per cent. and the proportion from the United States from 23.65 to 27.40 per cent. These proportions show an improvement in the position of the United Kingdom as compared with 1918-19 from 44.22 per cent. to 48.47 per cent., and also a small improvement on the part of the United States, while the position of Japan has fallen from 9.59 per cent. to 6.06; and that of France from 2.23 per cent. to 1.89 per cent. In the latest pre-war year (1913), the share of the United States in the "competitive" groups was £5,946,441, or 10.99 per cent., whereas in 1919-20 it was £15,425,282, or 23.65 per cent. The following are some of the principal lines in which United States' sales to Australia during 1919-20 were increased over those of 1913, and the amount of such increases:—Apparel and textiles, £2,278,000; iron and steel unmanufactured or partly manufactured, £121,442; manufactured metals and machinery (including vehicles), £4,425,612; glass and glassware, £159,530; indiarubber and manufactures thereof, £393,761; leather and manufactures of (excluding boots and shoes), £239,901; paper and stationery, £884,259; fancy goods, £42,958; jewellery, £28,504; drugs and chemicals, £678,922; ammunition and explosives, £179,382; brushware, £27,313; electrical materials, £134,426; pianos and parts thereof, £270,202; paints and varnishes, £69,696; talking machines, £103,475; yarns, £26,631.

Although the value of the imports of competitive goods from Japan is much less than from America, the rate of increase has been far greater—from £683,437 in 1913 to £3,387,867 in 1919-20, equal to 400 per cent. The classes of goods chiefly responsible for this increase and the amount of the increase due to each are as follows:—Apparel and textiles, £2,092,590; metal manufactures and machinery, £136,952; china and porcelain ware, £122,203; earthenware, £18,627; glass and glassware, £165,033; paper, £54,212; stationery, £20,571; fancy goods, £99,275; optical, surgical, and scientific instruments, £11,330; brushware, £38,451; matches, £46,409; electric cable and wire, covered, £51,065; leather and rubber manufactures, £5,569.

2. Preferential Tariff.—The Tariff Act of 1908 provided preferential tariff rates in favour of goods produced or manufactured in the United Kingdom. Subsequent amendments of the Tariff have extended the list of articles to which the preferential rates apply. In the schedule submitted to Parliament on the 3rd December, 1914, the extension of the number of preferential rates was very material, and was accompanied in many instances by an increase of the margin in favour of the United Kingdom.

This favorable treatment of the United Kingdom was again extended in both directions by the Tariff of the 25th March, 1920, which also included a new feature of Australian

Tariffs in the form of an Intermediate Tariff. In submitting the schedule to Parliament, the Minister for Trade and Customs made the following statement of the object of the Intermediate Tariff:—" . . . the Minister is empowered under the Bill to enter into reciprocal arrangements with other Dominions of the British Crown. The Minister will be able, if we can arrange a satisfactory reciprocal agreement, to extend to other Dominions on individual items the British preference rate, or the intermediate rate, or, it may be, the general rate. Such agreements will be subject to the ratification of Parliament. The provision simply means that if any of our sister self-governing Dominions desires to enter into reciprocal trade relationships with us, the Minister, with the British Preference Tariff, the Intermediate Tariff, and the General Tariff before him, may bargain with the sister Dominion and come to an agreement, which, as I say, must subsequently be ratified by Parliament. . . . There is a provision of a somewhat similar character in regard to other countries than the Dominions, the only difference being that the Minister is empowered to extend to countries other than the Dominions only the Intermediate Tariff; that is to say, in entering into such negotiations, he is precluded from offering to those countries what we might term, for the purposes of this Bill, the Empire rate. He is confined in his negotiations with these other countries to the Intermediate Tariff."

Hitherto the Union of South Africa has been the only British Dominion with which the Commonwealth has had a reciprocal tariff arrangement. The Commonwealth Customs Tariff (South African Preference) Act, No. 17 of 1906, and subsequent amending Acts have provided preferential rates of duty to be applied to certain imported goods "when those goods are imported from and are the produce or manufacture of any of the British South African Colonies or Protectorates which are included within the South African Customs Union."

On the introduction of the preferential treatment of British goods, it was required that British material or labour should represent not less than one-fourth the value of such goods. From the 1st September, 1911, it has been required, in regard to goods only partially manufactured in the United Kingdom, that the final process or processes of manufacture shall have been performed in the United Kingdom, and that the expenditure in material of British production and/or British labour shall have been not less than one-fourth of the factory or works' cost of the goods in the finished state.

Number 8 and previous editions of this Year Book contained exhaustive analyses of the imports into the Commonwealth, for the purpose of measuring the effect of the preferential treatment of British goods. The method adopted was to contrast the relative proportion of the trade supplied by the United Kingdom in respect to goods subject to Preferential Tariff rates with the proportion of goods of the same class supplied in unrestricted competition under the General Tariff. The most satisfactory data for the purpose were furnished by two classes of goods, viz., "Apparel and Textiles" and "Machinery and Manufactures of Metals." Under the existing Tariff, preferential treatment has been so extended as to cover practically all goods of these classes, and consequently the basis of comparison no longer exists. Prior to the Tariff of 1914, approximately one-half of all imports and about 60 per cent. of imports from the United Kingdom were affected by the Preferential Tariff, whereas under the Tariff of 1914 nearly 80 per cent. of all imports, and about 90 per cent. of imports of United Kingdom origin were so affected.

3. **Preferential Tariffs of the British Empire.**—In the Official Year Book No. 11, pages 601-3, will be found an outline of the systems of Preferential Tariffs within the British Empire and the Tariff arrangements between British Dominions or Colonies and Foreign Countries, together with a list of countries with whom Great Britain had concluded commercial treaties for "Most-Favoured-Nation" treatment.

§ 14. Rates of Duty in Australia and other Countries.

The following table shews the proportion of the total imports of merchandise entered for "home consumption" free of duty, in the undermentioned countries, and also the equivalent *ad valorem* rates of duty charged :—

PROPORTION OF FREE GOODS AND RATES OF IMPORT DUTY.

Particulars.	Australia.			Canada. (a)	New Zealand. (c)	U.S. of America.
	31/12/06	31/12/13	30/6/20	31/3/20	31/12/20	30/12/19
Year ended	35.18	42.30	37.24	34.84	48.60	70.84
Percentage of free merchandise ..						
Equivalent <i>ad val.</i> rates of duty on—	%	%	%	%	%	%
Spirits, wines and malt liquors ..	153.23	136.62	89.51	52.91	54.13	50.79
Tobacco, and preparations thereof ..	168.65	133.70	58.26	5.54b	57.39	47.05d
Other dutiable merchandise ..	17.04	20.92	18.31	22.02	18.97	19.65
Other merchandise dutiable and free ..	10.75	11.72	11.15	14.46	9.16	5.54
Total dutiable merchandise ..	27.14	28.47	22.43	22.51	23.33	21.27
Total merchandise dutiable and free ..	17.59	16.12	14.03	14.67	11.99	6.20
Customs duty per head	£ s. d. 1 15 10	£ s. d. 2 12 8	£ s. d. 2 12 8	£ s. d. 4 4 6	£ s. d. 6 5 1c	£ s. d. 0 10 8

(a) Excluding war tax, £6,445,742. (b) Unmanufactured tobacco is admitted to Canada free of duty.
(c) Exclusive of Maoris, and residents of Cook and other Pacific Islands. (d) Tobacco is admitted free
of Customs duty from the Philippine Islands. e Excluding Primage, £573,792.

The figures given for the year ended 30th June, 1906, represent the results of the last full year of operation of the tariff of 1902.

From the results given in the above table, it will be seen that the scheme of taxation, by means of import duties, varies materially between the countries named. In Australia and Canada, taxation is spread more widely over imported commodities than in New Zealand or the United States of America. In the latter country, 70.84 per cent. of all imports are free of duty, whereas in the Commonwealth, about 37 per cent. only of the total imports were exempt from taxation during the year 1919-20. A considerable restriction of the free list in this country was necessary to raise the revenue required by the exigencies of the war, though even prior to the war (in 1913) free goods represented only 42.30 per cent. of the total imports, while in New Zealand they comprised 52 per cent. and in the United States of America, 60 per cent.

The comparatively large percentage of free goods in the imports of 1913 was not entirely the effect of Tariff changes, but was in some measure due to the inclusion in the free imports of that year of warships to the value of £2,495,000 and of mercantile ships to the value of £1,500,000. Imports of ships to such a value in any one year are, of course, unusual.

The relatively low average *ad valorem* rate of duty collected in the Commonwealth in 1919-20 was due to higher prices of goods subject to specific rates. For instance, in 1913 a duty of 14s. per gallon represented an *ad valorem* equivalent of 215 per cent. on a gallon of bulk whisky valued at 6s. 6d. per gallon, whereas in 1919-20 the higher duty of 25s. per gallon represented only 93 per cent. on a cost of 26s. 10d. per gallon.

VALUE OF GOODS (EXCLUDING BULLION AND SPECIE) ENTERED FOR CONSUMPTION IN THE COMMONWEALTH, AND DUTY COLLECTED THEREON, 1919-20.

Classification of Imports.	Value Entered for Consumption.			Duty Collected, less Refunds.	Equivalent <i>ad valorem</i> Rate per cent. on—

(a) Includes Sugar valued at £4,280,000 imported by the Commonwealth Government.

SECTION XVI.

SHIPPING.

§ 1. General.

NOTE.—Owing to the general disorganization of shipping in consequence of the war, the figures relating to the war period given in the following tables are of little comparative significance.

1. Record of Shipping before Federation.—Prior to Federation it was customary for each State to regard the matter of shipping purely from the State standpoint, and vessels arriving from or departing to countries beyond Australia, *via* other Australian States, were recorded as if direct from or to the oversea country. Thus, a mail steamer from the United Kingdom, which made Fremantle her first port of call in Australia, would be recorded not only there, but again in Adelaide, Melbourne, and Sydney, as an arrival from the United Kingdom. Consequently, any aggregation of the shipping records of the different States would repeatedly include a large proportion of the shipping visiting Australia. In earlier years, when many vessels sailed from the various State ports direct for their destination, the error of repeated inclusion was less serious, but as the commerce of Australia developed, more and more ports of call were included in the voyage of each vessel, and the mere aggregation of State records hence became correspondingly misleading. Failure to recognise this was at times responsible for erroneous deductions from the statistical records as then compiled.

2. Shipping since Federation.—With the inauguration of the Commonwealth, the statistics of its shipping, especially of its oversea shipping, became of greater intrinsic importance. As an index of the position of Australia amongst the trading countries of the world, such statistics had a constitutional importance commensurate with Commonwealth interests, and correspondingly greater than those of individual States, and the nationality of the shipping trading with Australia became also a matter of greater moment.

3. Difficulties of Comparisons of Total Shipping.—From what is said in sub-section 1 above, it is obviously impossible to obtain results for Australia for pre-federal years not subject to the defect of repeated inclusions of the same vessels. Unfortunately, the statistical records of the first three years of Federal history are also subject to the same defect, and do not admit of direct comparison with those now kept. A careful estimate of the extent and effect of repeated inclusion has, however, been made and applied to the records of the earlier years, so as to extend the comparative results to those years. The error of such estimation will be negligible for comparative purposes.

4. Present System of Record.—The present system of record treats Australia as a unit, and counts, therefore, only one entry and one clearance for each visit to the Commonwealth. Repeated voyages of any vessel are, of course, included.

On arrival of every vessel at a port in the Commonwealth, whether from an oversea country or from another port within the Commonwealth, the master is required to deliver to the Customs officer a form giving all particulars necessary for statistical purposes in regard to the ship, passengers, and crew. Similarly, on departure from a port, a form

containing corresponding information is lodged. These forms, which provide a complete record of the movements of every vessel in Commonwealth waters, are at the end of each month forwarded by the Customs officer at each port to the Commonwealth Bureau of Statistics, and furnish the material for the compilation of the Shipping and Migration Returns.

Under the system previously in force it was found that the estimates of population, in so far as they were based on seaward movement, were very unsatisfactory, and it is believed that the method referred to above gives decidedly better results.

From the 1st July, 1914, the statistical year for the record of Trade and Shipping of the Commonwealth was altered from the calendar year to agree with the fiscal year.

In all instances the tonnage quoted is the net tonnage.

§ 2. Oversea Shipping.

1. **Total Oversea Shipping.**—In order to extend, as indicated, the comparison of the oversea shipping to the earliest years for which any records are available, an estimate of its probable amount has been made. This estimate is based on a comparison of the results obtained by merely aggregating State statistics, with the defect of multiple records, and the results obtained under the present system, which avoids the multiple record. From the nature of the case it is obvious that the ratio of repeated inclusion to the total traffic has been continually advancing, and this fact has been duly taken into account in deducing the results in the following table:—

TOTAL OVERSEA SHIPPING ENTERED AND CLEARED THE COMMONWEALTH, 1822 TO 1919-20 (MULTIPLE RECORD EXCLUDED BY ESTIMATION PRIOR TO 1904).

Year.	Vessels.	Tons.	Year.	Vessels.	Tons.	Year.	Vessels.	Tons.

1853 ..	3,364	1,490,422	1886 ..	3,793	3,853,246	1919-20	2,981	8,086,507
1854 ..	3,781	1,744,251	1887 ..	3,454	3,764,430			

It must be borne in mind that while the above figures in themselves have no absolute significance, nevertheless, on the assumption that the element of duplication has been in fairly constant ratio, they furnish the best available indication of the growth of Australian oversea shipping.

2. **Comparison with other Countries.**—The place of Australia among various countries in regard to oversea shipping is indicated in the following table, both absolutely and in respect of tonnage per head of population.

OVERSEA SHIPPING OF VARIOUS COUNTRIES.

Country.	Year.	Tonnage Entered and Cleared.	
		Total.	Per Inhabitant.
Argentine Republic	1918	6,788,000	0.8
Belgium	1919	9,077,616	1.2
Canada	1919	25,261,393a	2.8
Commonwealth	1919-20	8,086,507	1.5
Denmark	1919	6,708,027	2.2
France	1919	45,668,000	1.2
Germany	1912	51,065,940	0.8
Italy	1919	48,237,126	1.3
Japan	1919	45,943,777	0.6
New Zealand	1920	4,038,625	3.4
Norway	1919	6,095,612	2.3
Sweden	1918	16,006,630	2.7
Union of South Africa	1919-20	7,233,000	1.2
United Kingdom	1920	73,108,000b	1.7
United States	1919	74,086,573a	0.7

(a) Exclusive of vessels trading on lakes and rivers between Canada and the United States.
(b) With cargoes only.

3. **Shipping Communication with various Countries.**—In previous issues of this Year Book tables were published shewing the number and tonnage of ships recorded as arriving from and departing to particular countries. At the same time it was shewn that such records were of no significance, for the reason that the tonnage of a vessel can be recorded against one country only, notwithstanding that the same vessel may carry cargo or passengers to or from Australia for several countries on the same voyage. For instance, a mail steamer on a voyage from Europe to Australia, through the Suez Canal, may call at Antwerp, Bremerhaven, London, Marseilles, Genoa, Port Said, Aden and Colombo, yet can be credited only to one of these ports, to the exclusion of all the other ports from the records. Perhaps a more striking example of the ineffectiveness of the records referred to is afforded by the recorded statistics of the shipping between South Africa and Australia. The advertised sailings from Australia to the United Kingdom via South African ports for the month of October, 1921, represent a net tonnage of 40,145, yet the statistical records will shew none of this tonnage as to South Africa, but all will be shewn as to the United Kingdom. In view of this defect it has been decided to discontinue the publication of the figures purporting to shew the shipping communication with particular countries, and to restrict the statistics relating to the direction of the shipping to and from Australia to the following tables in which countries situated on the main trade routes are grouped together.

4. **General Trend of Shipping.**—A grouping of countries into larger geographical divisions, as in the following tables, shews more readily the general direction of Australian shipping, and, to some extent, avoids the limitations of the records in relation to particular countries, by covering more closely the main trade routes. The figures relating to Africa, however, are still subject to the limitations referred to in the previous paragraph.

5. **Nationality of Oversea Shipping.**—As will be seen from the following table, the greater part of the shipping visiting the Commonwealth is of British nationality. The proportion which British shipping represented of the total tonnage which entered and cleared the Commonwealth has risen, mainly by reason of the withdrawal of German ships, from 73.53 per cent. during the years 1909–13 to 77.93 per cent. in 1919–20, though the actual amount of British tonnage engaged fell by 12.03 per cent. during the same period. On the other hand Japanese tonnage increased from 160,580 tons to 613,536 tons (282 per cent.), and United States tonnage from 83,892 tons to 376,530 (349 per cent.). From the table given on page 541 it will be seen that the Japanese and American tonnage was, during 1919–20, engaged for the most part between its home ports and the Commonwealth.

During the years 1904-8 the Australian tonnage engaged in the oversea trade represented 7.70 per cent. of the total tonnage which entered and cleared the Commonwealth. In the following quinquennial period the proportion of Australian tonnage was 8.32 per cent. and in 1918-19, by reason of the diversion to the oversea trade of Australian ships usually engaged in the coastal trade, it rose to 13.85 per cent., but declined to 9.79 per cent. in 1920.

The relative proportion of British and foreign tonnage which entered and cleared the Commonwealth during the last fifteen years, apart from tonnage in ballast, is given below. From these figures, which may be considered to indicate more closely the proportion of the actual carrying trade done than does the total tonnage, it will be seen that the proportion of foreign tonnage declined materially in the earlier years of the war owing to the complete withdrawal of ships under the German and Austrian flags and to the greatly reduced tonnage of French and Norwegian ships which were precluded from following their usual employment. During the year 1917-18 the proportion of foreign shipping, in consequence of the activities of Japanese and United States ship-owners, almost attained its pre-war dimensions, but during the last two years under review the proportion of British ships to the total tonnage carrying cargo was greater than in the pre-war years.

PROPORTION OF TONNAGE OF BRITISH AND FOREIGN NATIONALITY ENTERED AND CLEARED THE COMMONWEALTH WITH CARGO, 1904 TO 1919-20.

Nationality.	Annual Average.		1915-16.	1916-17.	1917-18.	1918-19.	1919-20.
	1904-8.	1909-13.

Total	100.00	100.00	100.00	100.00	100.00	100.00	100.00

It is of interest to observe that, as already pointed out in connexion with American and Japanese shipping, most of the foreign tonnage which enters the Commonwealth is employed between its home ports or the colonies of its own country and the Commonwealth, *e.g.*, French shipping is engaged chiefly between the Commonwealth, France and New Caledonia, while Dutch ships are employed almost entirely between the Commonwealth and the Dutch East Indies. Norwegian shipping is an exception to this rule. The greater part of Norwegian tonnage engaged in trade with Australia is composed of vessels operating under charters. Of the 39,760 tons of Norwegian shipping which entered the Commonwealth during 1919-20, 26,570 tons (66.82 per cent.) were in ballast, and 54,910 tons (58.42 per cent.) arrived from the United States of America.

The following table shews the direction of the activities of the principal foreign countries engaged in the oversea carrying trade of the Commonwealth. It will be noticed that the greater part of the Japanese and French tonnage which entered the Commonwealth during 1919-20 was in ballast. In the case of French vessels the tonnage in ballast represented as much as 66 per cent. A similar analysis with regard to German ships will be found in previous issues.

(a) Annual average.

PROPORTION OF TOTAL BRITISH AND FOREIGN TONNAGE WHICH ENTERED AND CLEARED IN BALLAST, 1904 TO 1919-20.

Year.	Entered.			Cleared.		
	British.	Foreign.	Total.	British.	Foreign.	Total.
	Per cent.	Per cent.	Per cent.	Per cent.	Per cent.	Per cent.
1904-8(a) ..	26.51	41.08	30.36	2.86	6.05	3.71
1909-13(a) ..	17.67	30.50	21.06	2.36	4.93	3.03
1914-15 ..	12.88	17.36	13.68	6.51	14.12	7.84
1915-16 ..	17.02	6.38	15.10	5.63	21.95	8.64
1916-17 ..	22.95	21.25	22.64	3.32	12.75	5.05
1917-18 ..	17.65	21.23	18.56	3.49	3.11	3.40
1918-19 ..	34.55	19.68	31.46	4.05	3.65	3.97
1919-20 ..	35.57	36.49	35.82	1.97	2.78	2.17

(a) Annual average.

The tonnage which entered each State of the Commonwealth in ballast, during 1919-20, was as follows:—

TONNAGE OF OVERSEA VESSELS IN BALLAST WHICH ENTERED EACH STATE AND THE NORTHERN TERRITORY DURING 1919-20.

State.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N. Ter.	C'wealth.
Tonnage ..	391,418	138,503	21,507	276,619	611,664	..	7,872	1,447,583
Percentage on total ..	27.04	9.57	1.49	19.11	42.25	..	0.54	100.00

In normal times the large exports of coal from New South Wales afford special inducements to vessels in search of freights. The tonnage in ballast into New South Wales is mainly for coal cargo, into Victoria for wheat, into South Australia for wheat and ore, and into Western Australia for timber and wheat.

§ 3. Shipping of Ports.

1. **Shipping of Ports.**—Appended is an abstract of the total shipping tonnage—oversea and coastwise—which entered the more important ports of Australia during the year 1919–20, together with similar information in regard to some of the ports of New Zealand for the year 1920 and of the United Kingdom for the year 1918:—

SHIPPING OF PORTS, AUSTRALIA, NEW ZEALAND, AND THE UNITED KINGDOM.

Port.	Tonnage Entered.	Port.	Tonnage Entered.

2. **Vessels Built.**—The following tables shew the number and tonnage of vessels built in the Commonwealth during each of the years 1901–1920, so far as such information can be ascertained from the Shipping Registers of the various States. The Merchant Shipping Act, under which vessels are registered in Australia, however, does not make it compulsory to register vessels under 15 tons burthen if engaged in river or coastal trade. Larger vessels are also exempt from registration if not engaged in trade. Yachts and small trading vessels may be, and frequently are, registered at the request of the owners. As the Shipping Registers have been, and are, the source of information, it follows that the figures given below will be subject to additions in the future, inasmuch as vessels already built may be added to the register at some future date.

VESSELS BUILT IN THE COMMONWEALTH, 1901 TO 1920.

§ 5. Interstate Shipping.

1. Total Vessels and Tonnage.—In the following tables are shewn the number and tonnage of vessels recorded as having entered each State of the Commonwealth from any other State therein, and similarly, the number and tonnage cleared from each State to other Commonwealth States. The table gives results from 1901 to 1919–20. The shipping on the Murray River, between the States of New South Wales, Victoria, and South Australia, is not included.

Total ..	14,252,233	17,730,052	23,167,747	13,824,887	13,954,296	16,666,660

(a) Included with South Australia.

The figures presented in the above table include overseas vessels—largely mail boats—passing from one State to another. This renders the results somewhat unsatisfactory.

In the earlier part of this chapter attention was drawn to the custom in vogue prior to Federation of recording vessels from or to "oversea countries *via* other Commonwealth States" as *direct* from or to the oversea country. At each port in Australia these vessels were, on the inward voyage (to Australia), entered as from the oversea

country, and cleared to the next Australian port as "interstate"; on the return journey—the outward voyage—they were entered as "interstate," and cleared as for the oversea country. In order to preserve the continuity of the records of the shipping communication of the several States with oversea countries this method has been followed in continuation of the pre-existing practice, excepting that vessels arriving or departing *via* other Commonwealth States are now so recorded instead of as "direct."

From the above it will be seen that while certain movements of the vessels referred to are included in the interstate shipping, other movements of the same vessels, between the same ports, are not so included.

To ascertain the aggregate movement of shipping between the States during the year 1919-20, including the total interstate movements of oversea vessels, the figures in the following table must be added to those in the table preceding:—

**SHIPPING ENTERED AND CLEARED FROM AND TO OVERSEA COUNTRIES VIA
OTHER COMMONWEALTH STATES, 1919-20.**

State.	Entered.		Cleared.		Total.		
	Vessels.	Tonnage.	Vessels.	Tonnage.	Vessels.	Tonnage.	
New South Wales ..	383	1,597,063	367	1,460,168	750	3,057,231	
Victoria ..	355	1,462,719	318	1,209,702	673	2,672,421	
Queensland ..	88	479,272	107	568,741	195	1,048,013	
South Australia ..	181	819,854	212	815,932	393	1,635,786	
Western Australia ..	6	19,264	3	9,876	9	29,140	
Tasmania ..	42	140,145	42	154,301	84	294,446	
Northern Territory	1	4,223	1	4,223	
Total	1919-20	1,055	4,518,317	1,050	4,222,943	2,105	8,741,260
	1909 ..	1,205	4,166,470	1,158	4,038,388	2,363	8,204,858

2. **Vessels Engaged Solely in Interstate Trade.**—The elimination of the element of oversea vessels, included in the interstate shipping returns, cannot be accurately effected; nevertheless, a close approximation is furnished if it be assumed that vessels *entered* in the several States as from "oversea countries *via* other Commonwealth States" have really been *cleared* from other States as "interstate," and further, that the vessels *cleared* to "oversea countries *via* other Commonwealth States" have likewise been *entered* as "interstate." Applying this suggestion, and so eliminating all interstate movements of oversea vessels, the number and tonnage movement of vessels engaged solely in the interstate trade for the Commonwealth as a whole during the years 1911 to 1919-20 were as follows:—

**NUMBER AND TONNAGE OF VESSELS ENGAGED SOLELY IN INTERSTATE
TRADE, 1911 TO 1919-20.**

Year.	Entered.		Cleared.	
	No.	Tons.	No.	Tons.
1911	4,794	6,548,069	4,811	6,570,019
1912	5,000	6,809,428	4,990	6,809,426
1913	5,174	8,080,267	5,187	8,105,988
1914-15	5,143	8,140,155	5,142	8,112,005
1915-16	5,121	7,175,175	5,112	7,139,451
1916-17	4,303	6,093,634	4,311	6,127,726
1917-18	4,171	4,856,751	4,152	4,765,957
1918-19	4,093	4,357,115	4,074	4,377,666
1919-20	3,482	3,939,055	3,510	3,986,345

Similar information cannot be given for the States singly, as the records do not disclose the relationship of the movements of the vessels to the States concerned.

3. **Total Interstate Movement of Shipping.**—From the foregoing it is apparent that the interstate movement of shipping includes two very different elements, viz. :—
 (i) Oversea ships moving from State to State, and (ii) the movement of ships engaged solely in the interstate carrying trade. These two elements are approximately as follows :—

TOTAL INWARD INTERSTATE MOVEMENT OF SHIPPING, 1912 TO 1919-20.

Vessels.	1912.	1913.	1914-15.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.
Oversea vessels moving inter-state ..	10,711,434	11,472,490	8,737,804	8,017,916	7,062,129	4,202,179	5,219,515	8,741,260
Vessels solely inter-state	6,809,428	8,080,267	8,140,155	7,175,175	6,093,634	4,856,751	4,357,115	3,939,055
Total ..	17,520,862	19,552,757	16,877,959	15,193,093	13,155,763	9,058,930	9,576,630	12,680,315

The following table shews the number and tonnage of vessels which entered and cleared each State during 1919-20, including the coastal movements of oversea vessels :—

INTERSTATE SHIPPING OF EACH STATE, 1919-20.

State.	Entered.		Cleared.		Total.		
	Vessels.	Tonnage.	Vessels.	Tonnage.	Vessels.	Tonnage.	
New South Wales ..	1,609	4,048,707	1,567	3,821,242	3,176	7,869,949	
Victoria	1,624	3,480,517	1,685	3,638,030	3,309	7,118,547

4. *Interstate and Coastal Services.*—The foundation of the coastal steamship services in Australia dates back to the year 1851, when a regular trade was established between Melbourne and Geelong by the small screw steamer *Express*. Early in the fifties a company was formed in Tasmania with a capital of £40,000 for the purpose of purchasing steamboats, and employing them in the carriage of passengers and goods between Hobart and Melbourne. This service was commenced in 1852, and was thus the first regular interstate service in Australia. About this time, the great influx of population, and the increase in commerce caused chiefly by the gold discoveries, emphasised the desirability of establishing more regular and quicker means of communication between the principal ports of Australia, and in 1862 the regular interstate service between New South Wales and Victoria was inaugurated by the s.s. *You Yangs*, which was put into commission in regular service between Melbourne, Sydney, and Newcastle. In 1875 a company was formed in Adelaide for the purpose of supplying suitable steamers for the requirements of the trade between Adelaide and Melbourne. The first two steamers of the company were named the *South Australian* and the *Victorian*, and were small vessels of only 400 tons burthen. From the start, success attended these enterprises, and the services thus initiated were rapidly extended and their operations broadened. Numerous other companies were formed to cope with the increasing trade between ports in the Commonwealth, and the companies engaged from time to time added to their fleets of steamers by the acquisition of more modern and faster vessels, until at the end of the year 1915 the total net tonnage owned by the 23 companies from whom returns have been received amounted to over 205,000 tons. Owing to the war this tonnage has been temporarily reduced by the withdrawal of vessels from the coastal trade for transport and other deep-sea services. A summary of the various mail services carried on during the year 1919 is given in Section XVIII. of this work.

The subjoined table gives particulars, so far as they are available, of all steamships engaged in regular interstate or coastal services at the end of each of the years 1901 and 1915 to 1920. The figures for 1915 and subsequent years include particulars relating to a number of smaller companies which did not supply returns for 1901, though they were, for the most part, carrying on business in that year.

PARTICULARS OF STEAMSHIPS ENGAGED IN REGULAR INTERSTATE AND
COASTAL SERVICES IN THE COMMONWEALTH, 1901 AND 1915 TO 1920.

	Total ..	13	163	6	1,237	19	1,400	80	38

(a) In some cases the vessels included in the above return were subsequently recovered.

(b) Not including two dredges, particulars of tonnage of which are not available.

§ 7. Commonwealth Government Shipping Activities.

1. Local Building Programme.—The original programme of the Commonwealth Government for building ships in Australia provided for the construction of 48 vessels 24 of which were to be steel cargo steamers and the remaining 24 were to be wooden

sailing vessels with auxiliary power. The contracts for the wooden vessels were cancelled, with the exception of two five-masted schooners under construction by Messrs. Kidman and Mayoh, of Sydney.

With other alterations the local building programme became as follows :—

Locality.	No.	Builders.	Type.
Williamstown, Vic. ..	8	Commonwealth Ship Construction Branch	Steel cargo vessels
Walsh Island, N.S.W. ..	6	N.S.W. Government
Cockatoo Island, N.S.W.	4	Commonwealth Navy Department	..
Maryborough, Q. ..	2	Walkers Ltd.
Adelaide, S.A. ..	3	Poole and Steel

The first part of this programme, consisting of the *Delungra*, *Dinoga*, *Dilga* (built at Walsh Island), *Dromana* and *Dumosa* (built at Williamstown), and *Dundula* (built at Cockatoo Island) has been completed, and the ships put into commission. These vessels have each a deadweight capacity of approximately 5,600 tons. Three other vessels of similar dimensions, but of the shelter deck type, having a deadweight capacity of a out 6,000 tons are, also, in commission. These are the *Emila* (built at Williamstown), and the *Eurelia* and *Enoggera* (built at Walsh Island), while the *Eromanga* (built at Walsh Island) has been handed over to the owners, and the *Eudunda* (built at Cockatoo Island) and the *Erriba* (built at Williamstown) will be handed over immediately. The programme includes nine other sister ships to the "E" class ships referred to above. Of these the *Eurimbla* (under construction at the yards of Messrs. Poole and Steel, at Adelaide) was launched on the 20th April, 1921, and the *Echuca* (by Walkers Ltd., Maryborough, Queensland) was launched in May, 1921. Construction of the hulls of the *Euroa* (Williamstown), the *Echunga* (Walkers Ltd.), and the *Eucwarra* (Poole and Steel) is well advanced. The material for the remaining four vessels of this type has almost all been delivered. The two remaining vessels of the programme will be built at Cockatoo Island. These will be of a much larger type than any vessels hitherto built in Australia. They will be 520 feet in length, with a deadweight capacity of 12,800 tons, and 250,000 cubic feet of insulated space; their speed at sea will be 13 knots. These vessels will be built by the Commonwealth Navy Department, at Cockatoo Island.

2. Vessels Built and Building in Great Britain.—In addition to the foregoing local building programme contracts were made for the building of five steel steamers in Great Britain; three by Vickers Ltd. and two by Beardmore and Co. These vessels will have a length of 520 feet by 68 feet beam, with a deadweight capacity of 12,000 tons, with a capacity of 900,000 cubic feet, of which 370,000 cubic feet are to be insulated. They will be fitted to burn oil or coal as required, and will have a speed of fifteen knots. It is expected that the first of these ships (the *Moreton Bay*) will be ready to leave England on her first voyage to Australia at the end of November or early in December, 1921, and it is hoped that the other four vessels will be completed in time to leave at monthly intervals.

3. Commonwealth Government Line of Steamers.—The number and cargo carrying capacity of the fleet operated by the management of the Commonwealth Government Line of Steamers as at the end of September, 1921, was as follows :—

	Number.	Deadweight Capacity.	Refrigerated Space.
		Tons.	Cub. Feet.
Vessels owned by Commonwealth Government ..	21	134,985	—
Enemy vessels operated	17	124,487	390,016
Total ...	38	259,472	390,016

SECTION XVII.

ROADS AND RAILWAYS.

§ 1. Roads and Bridges.

1. Introduction.—In Year Books No. 1 (pages 541 to 551) and No. 2 (pages 675 to 685), a brief historical account was given of the construction and development of roads in Australia. It is not proposed to repeat that account in the present issue of the Year Book.

In the publication "Local Government in Australia," issued by the Commonwealth Statistician in 1919, the subject of roads is also fully discussed.

2. Expenditure on Roads and Bridges.—Figures shewing the total expenditure on roads and bridges in the States are not available. The subjoined statement, however, gives the amounts of total loan expenditures by the State Governments up to the 30th June, 1920 :—

ROADS AND BRIDGES.—TOTAL GOVERNMENT LOAN EXPENDITURE TO THE 30th JUNE, 1920.

State.	N.S.W. ^a	Victoria.	Q'land. ^b	S. Aust.	W. Aust.	Tasmania.	All States.
	£	£	£	£	£	£	£
Expenditure ..	1,841,220	2,566,032	931,775	1,809,743	380,431	3,575,775	11,104,976

(a) Including punts.
payable.

(b) Including amounts from surplus revenue on which no interest is payable.

The following table shews the annual expenditure from loans on roads and bridges by the central Governments in each State during the years 1915-16 to 1919-20 :—

ROADS AND BRIDGES.—LOAN EXPENDITURE BY STATE GOVERNMENTS, 1916 TO 1920.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	All States.
	£	£	£	£	£	£	£
1915-16 ..	421	495,062	..	102,226	18,450	..	616,159 ^a
1916-17 ..	5,428	252,836	..	54,939	5,878	..	319,081 ^a
1917-18 ..	22,374	241,892	..	43,693	2,601	..	310,560 ^a
1918-19 ..	13,089	360,524	..	22,008	4,310	90,101	490,032
1919-20 ..	6,674	623,570	..	66,393	14,720	81,940	793,297

(a) Exclusive of Tasmania.

The two tables given above shew only a small proportion of the actual expenditure upon roads and bridges in the different States, for the reason that (a) there have been large expenditures from revenue, both by the central Governments and by local authorities, and (b) the State Governments have in many cases voted grants and subsidies on the amount of rates collected, and have issued loans to local authorities either for the express purpose of the construction of roads and bridges or for the general purpose of public works construction. Returns of expenditure, where available, are given below for each

State. Although no revenue is now derived directly from roads and bridges, they are indirectly of great value to the community, forming, next to railways and public lands, the most considerable item of national property.

3. **New South Wales.**—The information contained in the following paragraphs and tables is the latest available as the details are collected triennially in this State, the year 1918 being the latest year of collection. The control of all roads, bridges, and ferries in New South Wales is now regulated by the Local Government Act No. 41, 1919, which came into force on the 1st January, 1920. Under the provisions of this Act, the eastern and central divisions of the State are divided into shires and municipalities for the general purposes of local government, for the endowment of which a sum of not less than £150,000 is payable annually out of the consolidated revenue on the basis of a percentage subsidy on the proceeds of the general rates received by the local governing bodies concerned. The control of all roads, bridges, and ferries (except those proclaimed "National" and those in the unincorporated areas of the Western Division) has been transferred from the Roads Department to the respective shires and municipal councils, who are now responsible for their construction and maintenance. Up to December, 1918, 58 miles of roads, 282 bridges, 55 wharves, 99 jetties, and 17 ferries have been proclaimed as "National" works. Power is given to construct new roads, to widen or close existing roads, to make by-laws for the regulation of traffic, etc.; and in the case of the acquisition of land for the purpose of constructing new roads or of widening existing roads, the provisions of the *Roads Act* 1902 are incorporated. The Minister for Works is empowered to pay subsidies to the local authorities to maintain the roads. The roads leading to and within areas of lands which are made available for closer settlement will be constructed by the Government prior to transfer to the shires, as also will roads required mainly for tourists in districts not likely to produce revenue in rates to the local authorities.

(i) **Principal Main Roads.** The four principal main roads in New South Wales run in the same direction as, and are roughly contiguous to, the four State-owned main railway lines. (a) *The Southern Road*, 385 miles in length, runs from Sydney to Albury, and before the days of railway construction formed part of the highway over which the interstate traffic between Melbourne and Sydney used to flow. (b) *The South Coast Road*, 250 miles long, runs from Campbelltown along the top of the coast range and across the Illawarra district as far as Bega, from which place it extends as a minor road to the southern limits of the State. (c) *The Western Road*, 513 miles long, runs through Bathurst, Orange, and many other important towns as far as Bourke, on the Darling River. (d) *The Northern Road*, 405 miles in length, runs from Morpeth, near Maitland, as far as Maryland, on the Queensland border.

(ii) **Length and Classification of Roads and Bridges.** The length of roads in the State (exclusive of 58 miles proclaimed as "National" works) in 1918 was approximately 99,481 miles, of which 10,214 miles were controlled by municipalities, 83,309 by shires, and 5,958 miles were in the unincorporated areas of the Western Division. The following table gives particulars for the year 1918 of roads classified according to whether metalled, etc., formed only, cleared only, or natural surface:—

NEW SOUTH WALES.—APPROXIMATE LENGTH OF ROADS, 1918.

Classification.	Metalled, Ballasted, Gravelled, etc.	Formed only.	Cleared only.	Natural surface.	Total.
	Miles.	Miles.	Miles.	Miles.	Miles.
Metropolitan	1,428	417	168	171	2,184
Country municipalities	2,834	1,514	1,952	1,730	8,030
Shires	15,427	11,049	25,522	30,411	83,309
Western Division (unincorporated)	176	117	2,999	2,666	5,958
Total	19,865	13,997	30,641	34,978	99,481

(iii) *Bridges, Culverts, and Ferries.* The more important bridges have been proclaimed under the provisions of the Local Government Act as "National" works (see above), and these, together with the bridges, etc., in the Western Division, remain under the control of, and are maintained by the Public Works Department. Particulars of bridges, culverts, and ferries in the State in 1918, are given in the following table:—

NEW SOUTH WALES.—BRIDGES, CULVERTS, AND FERRIES, 1918.

Particulars.	Bridges.		Culverts.		Ferries.
	No.	Length.	No.	Length.	No.
		Feet.		Feet.	
"National" works	282	108,034	17
Metropolitan	86	5,549	818	40,939	1
Country municipalities	643	34,212	3,549	90,532	11
Shires	3,567	219,643	34,557	314,079	98
Western Division (unincorporated) ..	97	13,166	209	2,035	..
Total	4,675	380,604	39,133	447,585	127

(iv) *Expenditure on Roads and Bridges.* Since the year 1857 the total expenditure by the Roads Department and Road Trusts on roads and bridges is £25,449,714. In this expenditure is included the cost of administering the Department, services for other Departments, and payments on account of punt approaches and similar works incidental to the road traffic of the country. The amount expended from 1857 to the 30th June, 1914, and for each succeeding financial year up to 1919, is given below. Until recent years, the expenditure on these works increased at a much faster rate than the population.

NEW SOUTH WALES.—EXPENDITURE BY ROADS DEPARTMENT AND ROAD TRUSTS, 1857 TO 1919.

Period.	Expenditure by Roads Department.	Expenditure by Trustees.	Total.
	£	£	£
1857 to 30th June, 1914 ..	23,765,192	1,288,691	25,053,883
1914-15	92,729	..	92,729
1915-16	65,928	..	65,928
1916-17	74,124	..	74,124
1917-18	74,459	..	74,459
1918-19	88,591	..	88,591
Total	24,161,023	1,288,691	25,449,714

The expenditure by the Department is now limited to the construction of roads in closer settlement areas and to the construction and maintenance of national bridges and ferries, and of works in the unincorporated areas of the Western Division.

4. *Victoria.*—Under the Local Government Act 1915, the control, construction, and maintenance of all roads, streets, and bridges are in the hands of municipal councils, which are empowered to open new roads, and to close, divert, or increase the width of any existing street or road, provided that no new road less than one chain in width may be opened without the consent of the Minister.

(i) *Country Roads Board.* With the object of improving the main roads of the State, an Act (No. 2415) was passed on 23rd December, 1912, which empowers the Governor in Council to appoint a board, to consist of three members.

The duties of the board are to ascertain by survey and investigation what roads are main roads; the nature and extent of the resources of Victoria in metals, minerals, and materials suitable for the purposes of road-making and maintenance, and the most effective and economical methods for dealing with the same, and for supplying and utilizing the material in any part of Victoria; the most effective methods of road construction and maintenance; what deviations (if any) in existing roads or what new roads should be made so as to facilitate communication and improve the conditions of traffic; and to record, publish, and make available for general information the results of all such surveys and investigations. The duty of furnishing information that may be required is imposed on the municipal authorities.

The construction of permanent works and the maintenance of main roads are likewise to be carried out by the municipalities to the satisfaction of the board. The total cost of the works, in the first instance, is to be paid by the Treasury, but subsequently one-half of the amount expended on permanent works and maintenance is to be refunded by the municipalities affected.

For the construction of developmental or feeder roads to the main road system the Developmental Roads Act (No. 2944) was passed in 1918. Under the authority of this Act the Country Roads Board is empowered to spend a sum of £500,000 over a period of five years on some of the more important roads in the less developed and neglected parts of the State. This sum was subsequently increased to £2,000,000 (Act No. 2985). The amount expended during the year 1918-19 under this Act was £47,562.

For the purpose of making permanent works, power is given to the Governor in Council to issue stock or debentures to the amount of £400,000 a year for five years, and the principal and interest are a charge upon the Consolidated Revenue of the State. The money so raised is to be placed to the credit of an account to be called "the Country Roads Loan Account," which will be debited with all payments made by the Treasurer towards the cost of permanent works. A sinking fund of 1 per cent. per annum on half the amount borrowed is authorised to be paid out of the Consolidated Revenue until half of the amount borrowed is redeemed. An annual payment to the Treasurer of 6 per cent. on the amount due by each municipality in respect of permanent works is provided for, and the cost of maintenance allocated to each municipality must be paid before the 1st July in each year. A special rate, not to exceed 6d. in the £1 on the net annual value of ratable property, to meet the cost of permanent works, may be levied in any ward or riding of a municipality as the council may direct. In the event of default of payment by a municipality, the board may levy a rate to meet the amount owing. All fees and fines paid under the Motor Car Act, all moneys standing to the credit of the Municipal Fees and Fines Trust Fund, all fees paid on the registration or renewal of the registration of traction engines, and all fees received by the Crown after the 30th June, 1912, under the Unused Roads and Water Frontages Act 1903 (which has been incorporated in the Local Government Act 1915), are to be credited to the Country Roads Board Fund.

Up to the 30th June, 1918, there were 6,500 miles of declared main roads, agreed to by the councils, and gazetted. The total amount expended during 1918-19 for permanent works was £284,734, and for maintenance work £179,133, a total of £463,867. The net receipts for the year were £261,655, of which amount the chief items were motor registration and license fees, £67,666, unused roads and water frontages license fees, £22,374, contributions by municipalities for permanent works, £29,841; ditto for maintenance works, £82,453; and appropriation for maintenance under the Main Roads Act No. 2986, £50,000.

(ii) *General and Local Government Expenditure.* The gross amount expended directly by the State Government of Victoria on roads and bridges up to the end of June, 1919 was £8,806,565. The annual expenditure from ordinary revenue by municipalities is not returned separately, but is included in Public Works Construction and Maintenance

(see Section XXVI., *Local Government*). The subjoined table shews the cost from general revenue of municipalities of private streets, roads, etc., and the amounts of municipal loan expenditure in 1901 and from 1916 to 1920 :—

VICTORIA.—EXPENDITURE ON ROADS AND BRIDGES, 1901 AND 1916 TO 1920.

Financial Year.(a)	Expenditure by State Government.	Municipal Loan Expenditure.		Formation of Private Roads, Streets, Lanes, etc.(b)	
		Cities, Towns, and Boroughs.	Shires.	Cities, Towns, and Boroughs.	Shires.
	£	£	£	£	£
1901	72,890	16,844	12,928	18,829	4,521
1916	25,651	92,198	44,945	64,481	3,543
1917	16,514	41,686	7,279	60,277	3,222
1918	19,782	22,037	19,007	72,506	2,968
1919	20,591	31,864	13,194	103,493	7,632
1920	7,832	(c)	(c)	(c)	(c)

(a) The financial years of Melbourne and Geelong end on the 31st December and the 31st August respectively; those of all other municipalities on the 30th September.

(b) Including the cost of flagging, asphaltating footpaths, etc., but exclusive of loan expenditure.

(c) Not available.

5. Queensland.—In Queensland the construction and maintenance of public roads are controlled under a system of local self-government, for the purposes of which the whole State is divided into (a) cities, (b) towns, and (c) shires. The duties, rights, and responsibilities of the local authorities with regard to roads, streets, and bridges are regulated by the Local Authorities Act of 1902 and subsequent amendments. The councils are invested with full powers to open, close, divert, or widen streets, roads, and bridges, and to make by-laws for the regulation of traffic, etc. The rates which the councils are empowered to levy are supplemented by Government grants. Separate returns as to the expenditure by towns and shires on roads and bridges are not available, the amounts being included in the returns of expenditure on public works, particulars as to which expenditure may be found in Section XXVI., *Local Government*, hereinafter. Under the Main Roads Act of 1920, a main roads board is appointed to take over main roads and construct new ones. The cost is defrayed from moneys appropriated by Parliament, taxes on motor vehicles and traction engines, wheel tax, fees for unused roads, etc. Half the amount expended is to be recovered from local authorities within 30 years with interest.

6. South Australia.—Figures are not available in this State for a later date than 1919. Of the several Australian States, South Australia has by far the largest unincorporated area, no less than 88 per cent. of the whole area of the State being in this condition. This area is, however, very sparsely populated and much of it is entirely unoccupied. The remainder of the State is for purposes of local government under the control of municipal corporations and district councils. Under the provisions of the District Councils Acts 1914, 1917, and 1918, the Municipal Corporations Acts 1890 to 1918, and of the Roads Acts 1884 to 1915, the councils are invested with full powers as to the opening and making of new streets and roads, and the diverting, altering, or increasing the width of existing roads; as to raising, lowering, or altering the ground or soil of any street or road; and as to the construction, purchase, and management of bridges, culverts, ferries, and jetties.

(i) *Main Roads and District Roads.* All the roads in each district are classified either as main roads or as district roads. Both classes of roads are under the direct control either of Municipal Corporations or of District Councils, but in the case of main roads the expenditure on construction and maintenance is chiefly provided for by Government grants, which are paid into a Government grants account, while the expenditure on district roads is paid for out of general rates, and out of subsidies on the

amount of such rates granted by the central Government. Under the Roads Amendment Act 1915, a number of roads were declared to be main roads. The Main Roads Fund Act 1920 provides for the raising of £150,000 for the purpose of reconstructing main roads and bridges, and acquiring and working quarries.

The total estimated length of streets and roads in the incorporated area in South Australia up to the 30th June, 1919, was as follows :—

SOUTH AUSTRALIA.—ESTIMATED LENGTH OF ROADS AND STREETS IN THE INCORPORATED AREA, 1919.

Particulars.	Woodblocked.	Macadamised.	Other.	Total.
Miles	10	10,529	32,855	43,394

(ii) *Expenditure by Corporations on Main and District Roads.* The following table shews the expenditure by municipal corporations on both main and district roads for each year from 1915 to 1919 inclusive :—

SOUTH AUSTRALIA.—EXPENDITURE BY CORPORATIONS ON STREETS, ROADS AND BRIDGES, 1915 TO 1919.

Year ended 30th November—	District Roads.		Main Roads Fund.			
	Expenditure.		Receipts.		Expenditure.

1916	25,483	73,118	9,669	12,098	88	13,679
1917	15,952	80,106	14,299	15,787	619	13,073
1918	13,983	89,657	10,490	13,033	1,990	12,524
1919	14,535	99,567	12,466	14,734	..	15,263

(iii) *Expenditure by District Councils on Main and District Roads.* The following table gives similar information with respect to main and district roads under the control of district councils :—

SOUTH AUSTRALIA.—EXPENDITURE BY DISTRICT COUNCILS ON STREETS, ROADS, AND BRIDGES, 1915 TO 1919.

Year ended 30th June—	District Roads.		Main Roads Fund.			
	Expenditure.		Receipts.		Expenditure.	
	Con- struction.	Main- tenance.	From Main Road Grants.	Total.	Con- struction.	Main- tenance.
	£	£	£	£	£	£
1915	51,625	85,119	114,722	114,781	15,571	102,679
1916	41,283	79,515	83,264	84,738	12,493	61,172
1917	47,337	79,377	109,044	111,567	18,809	72,644
1918	62,280	103,219	126,682	126,865	41,319	103,312
1919	67,194	108,862	120,635	120,790	28,481	97,991

7. **Western Australia.**—In Western Australia the construction, maintenance, and management of roads and bridges throughout the State are under the control of municipalities constituted by the Municipal Corporations Acts 1906-1919, and district road boards constituted by the Road Districts Act 1919.

(i) *District Roads and Bridges.* Under the provisions of the Road Districts Act any part of the State, not within a municipality, may be constituted by the Governor in Council into a road district, under the control of a board of not less than five nor more than thirteen members elected by the ratepayers. The board is invested with full powers for controlling and managing all roads and bridges within the district. A district road board may not, however, construct any road or street less than sixty-six feet wide without the consent of the Minister. The construction of the more important bridges and culverts is generally carried out by the Government, the work, after completion, being handed over to the road board for maintenance. In case of land being required for the purpose of constructing a new street or road, or for widening an existing street or road, the provisions of the Public Works Act of 1902 are incorporated in the Road Districts Act.

(ii) *Municipal Streets, Roads, and Bridges.* As regards roads, streets, and bridges within municipalities, these are under the control of local authorities elected under the provisions of the Municipal Corporations Acts 1906-19. The municipal councils are invested with full powers for making, maintaining, and managing all streets, roads, and bridges within the municipal area, and may request the Governor to declare any such land reserved, used, or by purchase or exchange acquired for a street or way, to be a public highway, and on such request the Governor may, by notice in the *Gazette*, proclaim such highway absolutely dedicated to the public.

(iii) *Length of Roads, Number of Bridges, and Expenditure on Roads and Bridges.* The following table gives particulars of the operations of the Road Boards for the years 1916 to 1920 :—

WESTERN AUSTRALIA.—PARTICULARS OF ROADS UNDER CONTROL OF DISTRICT ROAD BOARDS, 1916 TO 1920.

Year ended 30th June.	Road Districts.	Revenue.				Expenditure.	Length of Cleared Roads.(d)				No. of Bridges and Culverts.

(a) Approximate only.

8. *Tasmania.*—(i) *Construction.* In Tasmania the cost of construction of roads, tracks, and bridges (and in earlier days of streets) has been borne almost entirely by the central Government.

Up to the 30th June, 1920, the loan expenditure on these works has been £3,575,775. In addition, half the proceeds of the sale of land has formed a Crown Lands Fund for the construction of roads to new holdings. Under this provision £645,674 has been expended. This fund has in recent years more than met the demands on it, and expenditure therefrom since 1918 has been limited to £10,000 annually, the balance being used for redemption of debt.

ROADS, STREETS, TRACKS, AND BRIDGES—EXPENDITURE ON CONSTRUCTION.

Period.	Expenditure.		New-road Mileage.		New Bridges.
	Loans.	Crown Lands Fund.	Cleared.	Metalled.	
	£	£	Miles.	Miles.	No.
Total up to 31st December, 1902 ..	1,932,919	332,845
Yearly average—					
1903-7	30,611	26,845	103	26	11
1907-11	92,416	21,946	205	105	13
1911-15	160,730	18,233	234	208	50
1915-19	105,097	6,186	94	113	49
Year 1919-20 ..	81,940	6,563	67	68	17
Total to 30th June, 1920 ..	3,575,775	645,674

The total length of roads at the end of 1920 may be taken as approximately 12,000 miles, of which about half is metalled or gravelled.

(ii) *Maintenance.* The maintenance of roads and bridges is undertaken by the municipalities with some assistance from the central Government, chiefly by way of subsidy. Under the Aid to Road Rates Act, £11,000 are distributed annually among the municipalities, in proportion as the cost of maintenance falls on their resources. Under the Main Roads Maintenance Act 1918 a further sum of £5,000 was provided out of Consolidated Revenue, which, with the addition of the Motor Tax, less 5 per cent., and a contribution from municipalities, is expended on the upkeep of main roads. In 1920 the amount available for 1,011 miles of main road was £21,545. The work is carried out in most cases by municipalities, under the general direction of an Advisory Board, on which the Government, the municipalities, and the motorists are all represented. Further, the Repairs to Roads Act 1920 provides for loans for 15 years to municipalities for the purpose of re-making roads—half the loan is repaid in instalments by the local body and the remainder by the State Government. The Government also provides for the repair of the more important bridges and for emergency work.

The municipal expenditure on roads (excluding Hobart and Launceston streets) is practically supplied by the road rate, which must by law be between sixpence and eighteen pence in the pound of annual value. The average road rate actually collected has slightly increased from 10.7 pence in the pound in 1908 (the first year of the present municipalities) to 11.6 pence in the pound in 1918.

**EXPENDITURE ON MAINTENANCE OF ROADS AND BRIDGES IN MUNICIPALITIES
(EXCLUDING HOBART AND LAUNCESTON), 1908 TO 1920.**

§ 2. Railways.

(A) General.

1. **Introduction.**—In the issues of the Commonwealth Year Book, Nos. 1 to 7, the statistics of all Government railway systems were treated under the head of *Government Railways*. In the following issues, Nos. 8 to 13, the greater part of those statistics relating to State-owned lines was dealt with separately from those under the control of the Commonwealth Government. This arrangement is continued in the present issue. The State railways are referred to throughout as "State" and the Commonwealth railways as "Federal" railways. There is, however, a summary of the working of the Federal and States' railways in part (E) of the present section.

2. **Railway Statistics.**—In some of the earlier issues of the Year Book will be found a condensation of the report issued in 1909 by the Commonwealth Statistician to the Minister for Home Affairs on the subject of *The Desirability of Improved Statistics of Government Railways in Australia* (see Year Book No. 7, page 598).

3. **Railway Communication in the Commonwealth.**—An account of the progress of railway construction in Australia since the opening of the first line in 1854 will be found in Year Book No. 6, p. 681. In the eastern, south-eastern, and southern parts of Australia there now exists a considerable network of railway lines converging from the various agricultural, pastoral and mining districts towards the principal ports, which are themselves connected by systems of lines running approximately parallel to the coast. In the east, lines radiating from Cairns, Townsville, Rockhampton, Brisbane, and Sydney extend inland in various directions for distances ranging up to over 600 miles, in the south-east there are numerous lines, those in Victoria converging towards Melbourne, while others in New South Wales have their terminus in Sydney; in the south there are four main lines, with numerous branches, running from Melbourne, while from Adelaide one main line, with several branches to the coastal towns, runs inland in a northerly direction for a distance of nearly 700 miles, and another line runs in a south-easterly direction to various ports, meeting the main line from Melbourne on the border of South Australia and Victoria near Serviceton. The South Australian and Victorian railway systems also meet on the border at two other points, one near Pinnaroo, and the other at Rennick near Mount Gambier. By the opening, in 1917, of the Trans-Australian railway from Port Augusta to Kalgoorlie, through communication by rail was established between the eastern States and the Western Australian railway system. The main interstate line, which permits of direct communication between the five capital cities—Brisbane, Sydney, Melbourne, Adelaide, and Perth—covers a distance from end to end of 3,474.65 miles or 3,479.67 miles via Newcastle. The scheduled time for the journey from Brisbane to Perth is five days twenty-two hours forty-five minutes, and from Perth to Brisbane five days twenty hours forty minutes, the time in each case being taken over all.

In the following tables particulars are given of the gauges of lines, changing stations and duration of stops thereat, arrival and departure times, distances and average speeds on the journey from Brisbane to Perth, and vice versa :—

BRISBANE TO PERTH.

(a) The days here given are for the purposes of time table interpretation. They are not the only days on which the service is provided. (b) Exclusive of stops between changing stations. (c) Runs via Newcastle. (d) 11.53 a.m. on Mondays.

The time allowed for the journey from Port Augusta to Kalgoorlie, 35 hours 43 minutes (actual), gives an average speed of 29.43 miles per hour throughout, inclusive of stoppages. Exclusive of stoppages, which aggregate slightly under three hours, the average speed is about 32.15 miles per hour. In the opposite direction the gross time is 38 hours 45 minutes (actual), which gives an average speed of 27.13 miles per hour. Exclusive of stoppages, which aggregate about 3 hours 10 minutes, the average speed is about 29.55 miles per hour.

The average speed inclusive of all stops on the journey from Brisbane to Perth is 24.38 miles per hour, and from Perth to Brisbane 24.74 miles per hour.

The longest railway journey which can be undertaken in Australia, on one continuous line of railway, is from Longreach in Queensland to Meekatharra in Western Australia, a total distance of 4,760.16 miles.

In Northern Australia there is a connected system of main or trunk lines between the ports of the State and the agricultural, pastoral, and mining districts, while there are also two short lines, one on the north-west, the other on the south coast, which are unconnected with the main system. In the northern parts of Queensland and in the Northern Territory there are also several disconnected lines running inland from the more important ports. In Tasmania the principal towns are connected by a system of lines, and there are also, more especially in the western districts, several lines which have been constructed for the purpose of opening up mining districts.

4. Standard Times in Australia.—In Year Book No. 12, p. 630, particulars are given in regard to standard times now in use in the Australian States, and an explanation is made as to the mode in which the difference of time between Adelaide and Perth is dealt with on the Trans-Australian Railway. Owing to limits of space it is not possible to repeat this information in the present volume.

5. Non-conformity of Gauge.—With but few exceptions, all the railway lines in the Commonwealth open for general traffic are now owned and managed by the respective States in whose territory they run, or by the Commonwealth Government; but, unfortunately for the purpose of interstate traffic, the construction of the various systems in different parts of Australia has proceeded without uniformity of gauge. In 1846 Mr. Gladstone, then Colonial Secretary, recommended in a despatch to the Governor of New South Wales that the 4-ft. 8½-in. gauge should be adopted. In 1850, however, the engineer to the Sydney Railroad and Tramway Company strongly advocated the adoption of the 5-ft. 3-in. gauge, and in 1852 an Act was passed making it compulsory that all railways in New South Wales should be constructed to the wider gauge, the Governors of Victoria and South Australia being duly advised of the step that had been taken. In 1852, however, the company mentioned having changed its engineer, also changed its views as to the gauge question, and in the following year succeeded in obtaining the repeal of the Act of 1852 and in securing the passing of another, under the provisions of which the narrower gauge was made imperative. This step was taken without the concurrence of the other States concerned, and a considerable amount of ill-feeling arose, especially in Victoria, where two private companies had already placed large orders for rolling stock to be constructed to the broad gauge originally chosen. The result was that it was decided in Victoria to adhere to the 5-ft. 3-in. gauge as the standard gauge for the State, while the Sydney Railroad and Tramway Company proceeded with the construction of its lines to the 4-ft. 8½-in. gauge, and these two gauges have since been adhered to as the standard gauges of the respective States. The Queensland Government had, at the outset, adopted a gauge of 3-ft. 6-in. as being best suited to the requirements of the colony, and has since adhered to that gauge throughout the State, so that all goods requiring conveyance into New South Wales or vice versa have to be transhipped at the boundary between the two States. In June, 1914, however, the Queensland Government purchased two short lengths of line laid on a 2-ft. gauge. In South Australia the 5-ft. 3-in. gauge was adopted, but in 1870, on the grounds of economy, the 3-ft. 6-in. gauge was introduced, and many of the lines in South Australia have been constructed with that gauge. The interstate line between Adelaide and Melbourne was opened as a through route in January, 1887, and is of the 5-ft. 3-in. gauge throughout. At the 30th June, 1920, of the 2,333.19 miles of State Government railways in South Australia 1,209.59 miles were of 3-ft. 6-in. gauge, exclusive of 477.96 miles of the same gauge from Port Augusta to Oodnadatta belonging to the Federal Government. In the Northern Territory the line from Darwin to Emungalen (Katherine River), 198.68 miles in length, is of 3-ft. 6-in. gauge. In Western Australia the 3-ft. 6-in. gauge was also adopted. In Tasmania the first line made had a gauge of 5-ft. 3-in., but it was converted in 1887 to 3-ft. 6-in., which, with the exception of three short lines with a 2-ft. gauge, is the present gauge of the Government and most of the privately-owned lines. It was recognised in both these States that the construction of railways was essential to their proper development, but as their financial resources would not bear a heavy initial expenditure in connexion with the establishment of railway lines, it was decided to adopt the narrow gauge. In Victoria, short lengths of light railways have been constructed to a gauge of 2-ft. 6-in. of an aggregate length of 121.90 miles.

6. Interstate Communication.—Until the railway systems of the eastern States were connected at the common boundaries, the inconvenience of non-conformity of gauge was not felt. Since then, however, the necessary transshipments of both passengers and goods have been a source of increasing trouble, delay, and expense. On the 14th June, 1883, a railway bridge over the River Murray at Wodonga was opened for traffic, and railway communication was then established between Melbourne and Sydney. On the 19th January, 1887, the last section of the Victorian line to Serviceton, on the South Australian border, was completed, and a junction was thus effected with the South Australian line to Adelaide. On the 16th January, 1888, a junction was effected between the New South Wales and Queensland lines at Wallangarra, but there was still a break in the line from Sydney at the Hawkesbury River, thirty-six miles from Sydney. This last

link was, however, completed on the 1st May, 1889, by the opening of the Hawkesbury River bridge, 2,900 feet in length, and railway communication was thus established between the four capital cities, Brisbane, Sydney, Melbourne, and Adelaide.

By the opening of the Trans-Australian railway, to which reference has already been made, Western Australia is now linked to the other States, and an unbroken line of communication established from one side of the continent to the other. The construction, moreover, of lines decided upon, and in some cases already made, connecting Victoria with the Riverina district in New South Wales and with the wheat-growing districts of South Australia, will undoubtedly facilitate interstate exchange and will allow the produce of inland areas to find its natural outlet at the nearest port.

7. Unification of Gauge.—The development of the railway systems of the Commonwealth has shewn that the adoption of different gauges on the main lines in the several States was a serious error. As already mentioned, the extra cost, delay, and inconvenience incurred by the necessity of transferring through-passengers and goods at places where there are breaks of gauge are becoming more serious as the volume of business increases. As an indication of the extra cost thus involved, the junction charges on interstate traffic between New South Wales and Victoria range from 1s. 2d. to 2s. 11d. per ton.

Although the cost of alteration to a uniform gauge would be great, many propositions have from time to time been put forward with the object of securing such a gauge, and attention has been drawn to the importance of the unification of gauges before further expenditure on railway construction is incurred by the States. The problem is, however, one which is by no means easy of solution, and the difficulties are increased by the introduction of what may be called questions of local or State policy.

The first question that naturally arises in considering the problem is as to which gauge should be adopted as the universal gauge of the Commonwealth. As regards State Government railways, the 4-ft. 8½-in. gauge has a mileage of 4,975.81, all in New South Wales; Victoria and South Australia have a combined mileage of 5,215.70 of 5-ft. 3-in. gauge; while New South Wales, Queensland, South Australia, and Western Australia have together 10,442.17 miles of 3-ft. 6-in. gauge. In addition, the Commonwealth Government has (i) 4.94 miles in the Federal Territory, 597.36 miles in South Australia, and 453.94 miles in Western Australia of 4-ft. 8½-in. gauge, and (ii) 477.96 miles in South Australia, and 198.68 miles in the Northern Territory of 3-ft. 6-in. gauge. By far the greater part of the mileage of private railways open for general traffic has also been constructed to the 3-ft. 6-in. gauge. The mere question of preponderance of mileage, therefore, indicates the 3-ft. 6-in. gauge for adoption. But this question is obviously subordinate to those involving engineering and economic considerations. Thus, the relative efficiency from the widest point of view, the relative costs of alterations of the permanent way and rolling stock, of carrying capacity and speed, that is to say, questions of a technical nature about which figures are not available, enter into the grounds for decision.

Many conferences on the subject of the unification of gauge have taken place from time to time both between the Railways Commissioners and between the Premiers of the States concerned, and references to these conferences have been made in previous issues of the Year Book (see No. 11, pp. 657-8). A conference between the engineers of the Commonwealth and States railways was held in Melbourne in August, 1918. Much consideration was given to the devices to deal with the break-of-gauge question, which had been submitted to the conference, but all of them failed to meet the requirements of the conditions laid down by the conference in order to ensure both safety and celerity of action in train working.

In June, 1920, a conference took place at Sydney between the Commonwealth and State railway engineers. Four proposals were dealt with, of which the third was considered the most satisfactory compromise for the present conditions of traffic. This proposal favored the conversion of existing lines between the capitals and the construction of such new lines as are advisable to the 4-ft. 8½-in. gauge, the cost of which was estimated at £26,581,000, of which £8,154,000 would be for new line construction.

In July, 1920, a conference took place at Melbourne between the Commonwealth and State representatives of three Governments, and a decision was arrived at under which a committee, consisting of two experts from abroad and an Australian representative not connected with the railways, was to consider the whole question of gauge unification and report to the various Governments concerned as to the best course to be adopted.

On 8th February, 1921, the Governor-General appointed a Royal Commission consisting of two railway engineers—one civil and one mechanical—together with an independent commissioner to inquire into and report on the question of the unification of gauges. The Commission was constituted as follows:—Chairman, Mr. John James Garvan; Civil Engineer, Mr. Rustat Blake; Mechanical Engineer, Mr. Frederick Methven Whyte; with Mr. E. Simms as Secretary. (See also Appendix.)

8. Rolling Stock Gauges.—Allied to the question of the gauges of the railways of Australia is that of the rolling stock gauges which are in use, the rolling stock gauge being the maximum transverse dimensions to which the rolling stock may be constructed. In the following table will be found particulars of the rolling stock gauges, together with maximum length and weights of vehicles, at present in use on the Government railways, State and Federal:—

STATE AND FEDERAL GOVERNMENT RAILWAYS.—ROLLING STOCK GAUGES IN USE, 1920.

PASSENGER ROLLING STOCK.

Tasmania	3 6	8 6	11 0	40 10	12 5 0	30 0 0
"	2 0	6 0	6 6	27 0	5 15 2	20 0 0
Federal—						
Trans-Australian	4 8½	10 6	14 6	47 6½	15 0 0	40 0 0
Northern Territory	3 6	9 4	12 9	34 6	9 11 0	12 0 0
Oodnadatta	3 6	10 2	12 4	18 0	5 0 0	5 0 0

In the above tables the transverse dimensions given are not necessarily those of one particular vehicle, but are the greatest employed on any vehicle.

It will be observed that the dimensions adopted by the Federal Government for the Trans-Australian Railway are in excess of those at present in use on the 5-ft. 3-in. gauge lines of Victoria and South Australia, and the 4-ft. 8½-in. gauge lines of New South Wales. It is, however, the intention of the latter State to adopt the Federal standard as soon as possible, and with that end in view a commencement has been made in the Sydney suburban area in the enlargement of bridges, tunnels, buildings and platforms to enable the larger rolling stock to be employed. The question of standard couplings on the New South Wales lines is also receiving attention.

9. *Mileage Open for Traffic.*—In all the States of the Commonwealth the principle that the control, construction, and maintenance of the railways should be in the hands of the Government has long been adhered to, excepting in cases presenting unusual circumstances. In various parts of the Commonwealth, lines have been constructed and managed by private companies, but at the present time nearly the whole of the railway traffic in the Commonwealth is in the hands of the various State Governments or of the Commonwealth Government. A large proportion of the private lines which are at present running have been laid down for the purpose of opening up forest lands, mining districts, or sugar areas, and are not generally used for the conveyance of passengers or the public conveyance of goods. (See (F) *Private Railways*, hereinafter.)

Mileage of Government and Private Lines, 1855 to 1920. The subjoined table shows the mileage of Commonwealth Government, State Government, and private lines open for traffic (exclusive of sidings and cross-overs) in each State at different periods since the inauguration of railways in Australia in 1854 up to the year 1920. The railway mileage given for each State includes both Commonwealth and State Government railways in that State, and in this table and in those on the following page, is estimated from the geographic point of view and not from that of ownership. The figures from 1855 to 1881 are given to the end of the calendar year; the later figures are to the end of the financial year ended on the 30th June, unless otherwise stated, excepting the mileages for private lines, which are in most cases taken for the calendar year :—

GOVERNMENT AND PRIVATE RAILWAYS.—MILEAGE OPEN, 1855 TO 1920.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Federal Territory	Nor. Ter.	C'wealth.

1890-1	2,263	2,763	2,205	1,666	656 ^b	425 ^b	..	145	10,123
1900-1	2,926	3,238	2,904	1,736	1,984	618 ^c	..	145	13,551
1910-11	4,027	3,574	4,390	1,993	3,208	675	..	145	18,012
1914-15	4,439	3,936½	5,449½	2,955	4,553	779½	5	146	22,263½
1915-16	4,491½	4,152½	6,452½	3,060½	4,707½	758½	5	146	23,773½
1916-17	4,781½	4,176½	6,702½	3,241½	4,878½	783½	5	199½	24,769
1917-18	5,025	4,222½	6,769½	3,356½	4,904½	781½	5	199½	25,264½
1918-19	5,170	4,260½	6,841½	3,404	4,965½	811	5	199½	25,657
1919-20	5,377	4,284½	6,946½	3,458½	4,846	840½	5	198½	25,956½

(a) The line between Goolwa and Port Elliot was opened in 1854 as a horse tramway, but now forms part of the railway system. (b) To the 31st December, 1891. (c) To the 31st December, 1901.

It will be seen from the above table that the rate of construction up to the year 1871 was very slow, the average annual length of lines opened from 1861 to 1871 being only 80 miles for the whole Commonwealth. By the middle of the following decade, however, the principal mountain ranges had been crossed, and the work of construction could be proceeded with at a greater rate, and at a less cost per mile. A great period of activity was from 1881 to 1891, when the average annual length opened for traffic was 593 miles for the whole Commonwealth; the corresponding figures for the periods from June, 1891, to June, 1901, and from June, 1901, to June, 1911, were 343 and 446 miles respectively. Since June, 1911, the average annual length opened for traffic has been 79½ miles.

The reduction in the mileage in Western Australia is due to the fact that certain private railways have been dismantled. There was no change in the mileage of the Government railways during the year.

10. **Comparative Mileage of Government and Private Lines, 1920.**—The subjoined table shews for each State (a) the length of lines owned by the State Government, and by the Commonwealth Government in that State, all of which lines are open for general use by the public, (b) the length of private lines available for general use by the public, and (c) the length not so available. The mileages specified in the case of Government lines are to the 30th June, 1920; those given for private lines are as nearly as possible to the 31st December, 1919 :—

GOVERNMENT AND PRIVATE RAILWAYS.—MILEAGE OF GOVERNMENT LINES, OF PRIVATE LINES AVAILABLE FOR GENERAL TRAFFIC, AND OF PRIVATE LINES NOT SO AVAILABLE, 1919-20.

State or Territory.	Government Lines—		Private Lines available for General Traffic.	Total Open for General Traffic.	Private Lines used for Special Purposes only.	Grand Total.

Commonwealth ..	5,299,734	2,974,581	4.55	8.11

12. **Classification of Lines according to Gauge, 1919-20.**—The subjoined table gives a classification, according to gauge, of the total mileage, exclusive of sidings and cross-overs, of (i) Commonwealth Government railways, given in the State or Territory in which situated; (ii) State Government railways; (iii) Private railways open to the

public for general traffic; and (iv) Private lines open for special purposes. Particulars of Government railways are up to the 30th June, 1920, of private railways open for general traffic to the 31st December, 1919, and of private railways open for special purposes to the 31st December, 1919, as nearly as possible.

(B) Federal Railways.

1. **General.**—On the 1st January, 1911, the Commonwealth Government took over the Northern Territory from the South Australian Government, and at the same time the railways from Darwin to Pine Creek in the Northern Territory, and from Port Augusta to Oodnadatta in South Australia, came under its control. Subsequently, the construction of a transcontinental line from Port Augusta in South Australia, to Kalgoorlie in Western Australia, was undertaken by the Commonwealth Government, while a line has been constructed in the Federal Territory, connecting Canberra with the New South Wales railway system at Queanbeyan. In 1917 an Act was passed by which all the Federal railways are vested in a Commonwealth Railway Commissioner.

2. **Trans-Australian Railway (Kalgoorlie to Port Augusta).**—A Federal Act passed in 1907 provided for the expenditure of a sum of £20,000 for a preliminary survey of a railway line connecting Western Australia with the eastern States. This survey was commenced in 1908, and completed in March, 1909. The route via Tarcoola was, for several reasons, chosen in preference to that via Gawler Range and Fowler's Bay. The estimated cost of construction and equipment of the line on the basis of a 4-ft. 8½-in. gauge, from Port Augusta in South Australia to Kalgoorlie in the Western Australian goldfields, a distance of 1,063 miles, was £4,045,000. In September, 1911, a Bill was introduced into the Commonwealth Parliament to authorise the construction of the line, and it became law in December following. In South Australia an Act was passed enabling the Commonwealth to acquire lands for the railway in South Australia not exceeding one-eighth of a mile wide on either side of the line, but no town lands are to be included at any time. In Western Australia, an Act was also passed by which all necessary lands are to be granted to the Commonwealth for railway purposes. A Railway Construction Department was created by the Federal Government to carry out the work, which was commenced at Port Augusta in September, 1912. On 12th September the ceremony of cutting the first sod was performed at Port Augusta by the Governor-General, Lord Denman, in the presence of a representative gathering, and on the 12th February, 1913, a like ceremony was performed at Kalgoorlie by the Prime Minister of the Commonwealth (the Right Hon. Andrew Fisher), and the line was thus commenced at both ends.

On the 17th October, 1917, the eastern and western divisions met at 621 miles 58 chains ex Kalgoorlie, and railway communication between Western Australia and the eastern States was established.

In the issue of the Year Book for 1918 (No. 11, pp. 663 to 666 and p. 1213) a short description was given of the country through which the line passes between Kalgoorlie and Port Augusta, together with particulars of the rate of construction, permanent way, water supply, rolling stock, etc.

On the 22nd October, 1917, the first through train left Port Augusta with an official party on board for Kalgoorlie. It should be mentioned that owing to deviations from the original route, the length of this line was reduced from 1,063.39 miles to 1,051.30 miles, a saving of 12.09 miles.

3. **Oodnadatta Railway.**—This line was taken over by the Commonwealth Government from 1st January, 1911, but was held under lease by the South Australian Government until 31st December, 1913. From the 1st January, 1914, the line has been worked by the South Australian Government for and on behalf of the Commonwealth. It is provided in the Northern Territory Acceptance Act that the Commonwealth shall annually reimburse the State with the interest payable on the amount of loans raised by the State for the purpose of constructing the railway, and the agreement for working the line prescribes that the Commonwealth is responsible to the State for any financial loss incurred by the State in the working and management of the railway, but is entitled to receive from the State any profit made in such working and management.

4. **Federal Territory Railway—Queanbeyan-Canberra.**—This line was built by the Railway Construction Branch of the Public Works Department, New South Wales, and was completed and taken over by the Chief Commissioner of Railways for that State, who has since worked the line for and on behalf of the Commonwealth Government. The line was opened for departmental goods traffic on 25th May, 1914. It connects with the New South Wales railway system at Queanbeyan, is 4.94 miles in length, and has sidings of an aggregate length of 2.00 miles.

5. **Northern Territory Railway (Darwin to Katherine).**—On the 1st January, 1911, the line from Darwin to Pine Creek came under the jurisdiction of the then Department of External Affairs, and was worked under the Administrator of the Northern Territory. As mentioned above, the management of this railway is now vested in the Commonwealth Railway Commissioner.

In the Northern Territory Acceptance Act, the construction of a transcontinental line from South Australia is provided for. The extension of the line from Pine Creek to Katherine River has been completed, and the first train ran through to Emungalen (Katherine River) on 13th May, 1917.

6. **Summary of Federal Railways.**—The following table shows the railway lines open for traffic under the control of the Commonwealth Government at 30th June, 1920, together with the lines which have been or are being surveyed :—

FEDERAL GOVERNMENT RAILWAYS, 30th JUNE, 1920.

Terminals.	Miles.
OPEN FOR TRAFFIC.	
Trans-Australian—Port Augusta to Kalgoorlie	1,051.30
Port Augusta to Oodnadatta (South Australia)	477.96
Canberra to Queanbeyan (Federal Territory)	4.94
Darwin to Emungalen, Katherine River (Northern Territory)	198.68
Total opened for traffic	1,732.88

SURVEYED, OR BEING SURVEYED.

Katherine River to Mataranka (Northern Territory)	65.44
Mataranka to Daly Waters (Northern Territory)	95.00
Kingoonya to Boorthanna (South Australia)	176.44
Canberra to Jervis Bay (Federal Territory)	140.22
Canberra (Federal Territory) to Federal Territory Border in the direction of Yass (New South Wales)	11.67
Daly Waters (Northern Territory) to Oodnadatta (South Australia)	851.50
Port Augusta to Crystal Brook (South Australia)	69.25
Total surveyed or being surveyed	1,409.52

7. **Mileage open for traffic, Average miles worked and Train miles run.**—The following table shows the length of the Federal railways open for traffic, average miles worked, and the train miles run in the years 1916 to 1920 :—

FEDERAL RAILWAYS.—MILEAGE OPEN FOR TRAFFIC, AVERAGE MILES WORKED AND TRAIN MILES RUN, 1916 TO 1920.

(a) Exclusive of Rolling Stock the property of South Australian Government Railways.

(b) Exclusive of Rolling Stock the property of New South Wales Government Railways.

9. Gross Revenue.—(i) *Total, per average mile worked, and per train mile run.* The following table shows the total revenue from all sources, the revenue per average mile worked and the revenue per train mile run for each of the undermentioned railways for the financial years from 1916 to 1920 inclusive :—

GRAPHS SHEWING THE FINANCIAL POSITION OF THE GOVERNMENT RAILWAYS OF THE COMMONWEALTH, 1860 TO 1920.

(See page 584.)

EXPLANATION OF GRAPHS.—In the above diagram the base of each small square represents throughout one year. The significance of the vertical height of each square varies, however, according to the nature of the several curves.

In the heavy curve denoting the total capital cost of the railways of the Commonwealth, the vertical side of each square denotes £3,000,000.

In the three lighter curves, representing (i) gross revenue, (ii) working expenses, and (iii) net revenue, the vertical height of each small square denotes £400,000. For the curve of average cost per mile open, the vertical side of the small square denotes £2,000. The mileage open is shown by a dotted curve, the vertical side of each square representing 300 miles.

For the curves shewing the percentage of working expenses to gross revenue, and the percentage of net revenue to capital cost, see graphs on pages 573 and 574 respectively.

GRAPHS SHEWING PERCENTAGES OF WORKING EXPENSES TO GROSS REVENUE OF GOVERNMENT RAILWAYS FOR STATES AND COMMONWEALTH, 1855 TO 1920.

(See page 591.)

EXPLANATION OF GRAPHS.—In the above diagram the base of each small square represents throughout one year. The vertical side of a small square denotes throughout 10 per cent., the heavy zero lines being different for each State and the Commonwealth, with, however, one exception, viz., that the zero line for South Australia and Western Australia is identical.

The curve for New South Wales commences in 1855; that for Victoria commences in 1859; that for Queensland in 1865; that for Tasmania in 1872; and that for Western Australia in 1879, these being the years in which the Government railway systems of the several States were inaugurated.

GRAPHS SHEWING PERCENTAGES OF NET REVENUE TO CAPITAL COST OF GOVERNMENT
RAILWAYS OF STATES AND COMMONWEALTH, 1855 TO 1920.

(See page 593.)

EXPLANATION OF GRAPHS.—In the above diagram the base of each small square represents throughout one year. The vertical side of a small square denotes 1 per cent., the thick zero lines, however, for each State and for the Commonwealth being different. This is necessary to avoid confusion of the curves.

Where the curve for any State falls below that State's zero line, loss is indicated, the working expenses having exceeded the gross revenue.

The curve for New South Wales commences in 1855; that for Victoria commences in 1859; that for Queensland in 1865; that for Tasmania in 1872; and that for Western Australia in 1879, these being the years in which the Government railway systems of the several States were inaugurated.

**FEDERAL RAILWAYS.—GROSS REVENUE, TOTAL, PER AVERAGE MILE WORKED
AND PER TRAIN MILE RUN, 1916 TO 1920.**

1920	127.49	68.25	137.04	107.73	104.39

(ii) *Coaching, Goods, and Miscellaneous Receipts, and Percentages on total Revenue.*
The gross revenue is composed of (a) receipts from coaching traffic, including the carriage of mails, horses, parcels, etc., by passenger trains; (b) receipts from the carriage of goods and live stock and (c) rents and miscellaneous items. The subjoined table shows the gross revenue for 1916 to 1920 classified according to the three chief sources of receipts, together with their percentages on the total revenue. The respective totals of the three items have already been given in the preceding paragraph.

15. **Passenger Fares, Goods Rates, and Parcel Rates.**—(i) *Passenger Fares.* In the following table the fares for certain specified distances on the Trans-Australian, Oodnadatta, and Northern Territory Railways are set out :—

FEDERAL RAILWAYS.—ORDINARY PASSENGER MILEAGE RATES, 1920.

Single Fare for a Journey of—	Trans-Australian Railway.					Oodnadatta Railway.					Northern Territory Railway.				
	First Class.			Second Class.		First Class.		Second Class.			First Class.		Second Class.		
	Fare.	Average per Passenger Mile.	Fare.	Average per Passenger Mile.	Fare.	Average per Passenger Mile.	Fare.	Average per Passenger Mile.	Fare.	Average per Passenger Mile.	Fare.	Average per Passenger Mile.	Fare.	Average per Passenger Mile.	Fare.
Miles.	s. d.	d.	s. d.	d.	s. d.	d.	s. d.	d.	s. d.	d.	s. d.	d.	s. d.	d.	s. d.
50	8 4	2.00	5 7	1.34	9 9	2.34	6 6	1.56	10 5	2.50	7 0	1.68	20 10	2.50	13 10
100	16 8	2.00	11 1	1.33	19 6	2.34	13 0	1.56	41 8	2.50	27 10	1.67	41 8	2.50	27 10
200	33 4	2.00	22 3	1.34	39 0	2.34	26 0	1.56
300	50 0	2.00	33 4	1.33	58 6	2.34	39 0	1.56
400	64 7	1.94	43 1	1.29	77 9	2.33	52 0	1.56
500	77 1	1.85	51 5	1.23
600	89 7	1.79	59 9	1.20
700	102 1	1.75	68 1	1.17
800	110 5	1.66	73 8	1.11
900	117 9	1.57	78 6	1.05
1,000	122 11	1.48	81 11	0.98
1,051	125 0	1.43	83 4	0.95

In the case of the Trans-Australian railway, through passengers have to pay for sleeping berths and meals in addition to the ordinary fares. For the first class sleeping berths the charge is twelve shillings and sixpence for a night or part of a night, the corresponding charge for the second class being eight shillings. There is a fixed scale of charges made in respect of the meals served to other than through passengers between Port Augusta and Kalgoorlie. It will be observed that both the first and second class fares on the Trans-Australian railway have a constant rate for distances up to 300 miles and then have a tapering character beyond that distance; while those for the Oodnadatta and the Northern Territory railways are practically uniform for all distances.

(ii) *Goods Rates.* The rates for agricultural produce and ordinary goods on the Trans-Australian and Northern Territory railways are set out in the following tables :—

FEDERAL RAILWAYS.—RATES FOR AGRICULTURAL PRODUCE IN TRUCK LOADS, 1920.

For a haul of—	Northern Territory Railway.			Trans-Australian Railway.			For a haul of—	Trans-Australian Railway, <i>contd.</i>		
	Rate per Ton in Truck Loads.	Average per Ton Mile.	Rate per Ton in Truck Loads.	Average per Ton Mile.	Rate per Ton in Truck Loads.	Average per Ton Mile.		Rate per Ton in Truck Loads.	Average per Ton Mile.	Rate per Ton in Truck Loads.

Miles.	<i>s.</i>	<i>d.</i>	<i>d.</i>	<i>s.</i>	<i>d.</i>	<i>d.</i>	<i>s.</i>	<i>d.</i>	<i>d.</i>	<i>s.</i>	<i>d.</i>	<i>d.</i>	Miles.	<i>s.</i>	<i>d.</i>	<i>d.</i>	<i>s.</i>	<i>d.</i>	<i>d.</i>
50	39	5	9.46	6	9	1.62	31	6	7.56	5	5	1.30	600	223	9	4.48	38	4	0.77
100	71	11	8.63	10	11	1.31	57	6	6.90	8	9	1.05	700	239	5	4.10	42	6	0.73
200	133	2	7.99	19	3	1.16	106	6	6.39	15	5	0.93	800	255	0	3.83	46	8	0.70
300	143	0	5.72	21	8	0.87	900	269	1	3.59	50	5	0.67
400	172	2	5.17	27	6	0.83	1,000	281	7	3.38	53	9	0.65
500	201	4	4.83	33	4	0.80	1,051	287	6	3.28	55	0	0.63

In the above tables it will be seen that the average rates per ton-mile are of a tapering character.

(iii) *Parcel Rates.* On the Trans-Australian railway, parcels weighing between 85 and 112 lbs. are taken by passenger train 500 miles for thirteen shillings and threepence.

(C) State Railways.

1. *Mileage Open, 1916 to 1920.*—The following table shows the length of State railways open for traffic on the 30th June in the years 1916 to 1920 :—

STATE RAILWAYS.—MILEAGE OPEN FOR TRAFFIC, 1916 TO 1920.

Year ended 30th June.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	All States.
	Miles.	Miles.	Miles.	Miles.	Miles.	Miles.	Miles.
1916	4,188	4,100	4,967	2,187	3,332	562	19,336
1917	4,437	4,123	5,214	2,221	3,425	581	20,001
1918	4,678	4,152	5,295	2,242	3,491	588	20,446
1919	4,825	4,190	5,469	2,290	3,538	601	20,913
1920	5,015	4,214	5,685	2,333	3,538	629	21,414

The following statement shows the actual mileage opened for traffic in the year 1919-20, and also the annual average increase in mileage opened since 1910 in each State :—

STATE RAILWAYS.—MILEAGE OPENED ANNUALLY.

Mileage.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Total all States.
Mileage opened during 1919-20	190.66	24.48	215.65	43.21	..	27.16	501.16
Average annual mileage increase in 10 years to 30th June, 1920 ..	125.81	69.05	181.72	87.57	116.27	15.84	596.26

(i) *New South Wales.* During the year ended 30th June, 1920, the following lines were opened for traffic :—Kempsey to Macksville (29.94 miles); Picton-Mittagong Deviation (27.65 miles); Menindie to Broken Hill (73.65 miles); Craboon to Coolah (23.75 miles); Henty to Rand (32.81 miles); Penrith to Weatherboard (3.03 miles); Picton to Mittagong (0.41 miles). These, less reduction of 0.58 miles on Broken Hill; Tarrawangee lines, make a total of 190.66 miles.

(ii) *Victoria*. The following lines were opened for traffic during 1919-20:—Piangil to Tank (15.87 miles); and Mittyack to Kulwin (8.61 miles); a total of 24.48 miles.

(iii) *Queensland*. The increase of 215.65 miles in the mileage opened for traffic in 1919-20 was due to the opening of the following lines:—Samsonvale to Kobbie (2.82 miles); Cotton Vale to Amiens (12.31 miles); Orallo to Injune (32.69 miles); Bambaroo to Toobanna (10.73 miles); Toobanna to Ingham (4.92 miles); North Coast Junction to Innisfail Junction (0.91 miles); Moolaba to Daradgee (8.95 miles); a total of 73.33 miles; and to the acquisition of the line from Almaden to Forsyth (Etheridge Railway), 142.32 miles.

(iv) *South Australia*. During the year 1919-20 the line from Monarto to Sedan (43.21 miles) on the 5 ft. 3 in. gauge was opened for traffic.

(v) *Western Australia*. There were no additional new lines opened during the year 1919-20.

(vi) *Tasmania*. During the year 1919-20 the line from Stanley to Trowutta (26.54 miles) was opened for traffic, and the extension from Abattoirs to Zinc Works (0.62 miles) was completed and taken over.

2. Average Mileage Worked, Train Miles Run, Number of Passenger Journeys, and Tonnage of Goods and Live Stock Carried on State Government Railways.—The table on page 580 gives the total mileage open for traffic at the end of each financial year, but, in considering the returns relating to revenue and expenditure, and other matters, it is desirable to know the average number of miles actually worked during each year. The next table shews the average number of miles worked, the total number of train miles run, the number of passenger journeys, and the tonnage of goods and live stock carried by the Government railways of each State during the years 1916 to 1920 inclusive:—

STATE RAILWAYS.—AVERAGE MILEAGE WORKED, TRAIN MILES RUN, NUMBER OF PASSENGER JOURNEYS, AND TONNAGE OF GOODS AND LIVE STOCK CARRIED, 1916 TO 1920.

Year ended 30th June.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania. (a)	All States.
AVERAGE MILEAGE WORKED.							
1916	4,169	3,955	4,939	2,185	3,332	552	19,132
1917	4,313	4,104	5,067	2,193	3,370	577	19,624
1918	4,551	4,139	5,281	2,235	3,463	591	20,260
1919	4,737	4,159	5,324	2,285	3,507	599	20,611
1920	4,966	4,194	5,635	2,516	3,538	635	21,284
TRAIN MILES RUN.							
1916	21,556,034	13,826,538	11,571,746	5,630,984	5,149,289	1,051,511	58,786,102

1919	19,035,202	13,031,655	9,942,744	5,412,924	4,256,627	1,107,800	53,687,042
1920	22,834,889	15,022,465	10,443,619	5,192,038	4,851,446	1,266,625	59,611,082
NUMBER OF PASSENGER JOURNEYS.							
1916	92,850,838	115,771,238	24,438,905	20,512,753	18,884,541	2,078,228	274,536,503
1917	96,709,846	108,341,540	24,837,714	18,107,015	17,466,744	1,971,888	267,434,747
1918	94,304,516	105,753,073	25,682,368	18,936,104	16,081,695	1,874,029	262,621,785
1919	98,568,768	111,904,786	26,414,817	20,176,544	17,325,424	1,889,102	276,279,441
1920	114,654,660	134,012,162	28,177,817	22,852,116	18,411,231	2,267,856	320,375,842
TONNAGE OF GOODS AND LIVE STOCK CARRIED.							
1916	11,915,500	5,829,835	4,570,883	2,396,938	2,554,858	388,782	27,656,796
1917	11,732,864	5,962,602	4,035,379	2,822,401	2,400,246	401,076	27,354,568
1918	11,293,060	6,281,603	4,154,441	2,767,734	2,259,070	407,405	27,112,803
1919	12,714,012	6,515,470	3,783,334	2,618,510	2,379,403	472,926	28,483,655
1920	13,293,528	7,770,694	3,790,881	2,578,909	2,613,606	575,169	30,622,786

(a) The average mileage worked in some cases is greater than the actual mileage open, owing to the fact that the Government railways have running powers over certain private lines.

3. Length and Gauge of Railway Systems in each State.—A map shewing the various Commonwealth and State owned railway lines, is given on page 571. In all the States the Government railways are grouped, for the convenience of administration and management, into several divisions or systems. A summary shewing concisely the gauge and length of the main and branch lines included in each division or system of the different States of the Commonwealth for the year ended the 30th June, 1918, was given in Year Book No. 12, pp. 646 and 651 to 653. Owing to limitations of space this information for the year ended 30th June, 1920, is not included in the present volume, but may be found in Transportation Bulletin No. 12 to be issued by this Bureau.

4. Administration and Control of State Railways.—In each State of the Commonwealth the policy has been established that the railways should be under the control of the Government. This policy, as has been shewn, was adopted early in the railway history of Australia, and, excepting in cases presenting unusual circumstances, may be regarded as the settled policy of the country. In earlier issues of the Year Book (see No. 6, p. 693) will be found a description of the methods adopted by the various State Governments in the control and management of their railways.

5. Lines under Construction, and Lines Authorised, 1920.—The following statement gives particulars up to the 30th June, 1920, of the mileage of State railways (a) under construction, and (b) authorised for construction but not commenced :—

**STATE RAILWAYS.—MILEAGE UNDER CONSTRUCTION AND AUTHORISED,
30th JUNE, 1920.**

Particulars.	N.S.W.	Vic.	Q'land.	S.A.	W.A.	Tas.	All States.
Mileage under construction	627.13	92.45	590.00	77.63	113.25	33.37	1,533.83
Mileage authorised but not commenced	100.02	20.00	1,429.00	264.75	92.50	..	1,906.27

(a) Exclusive of 182.53 miles on which work was suspended.

(b) Exclusive of 97.00 miles on which work has been suspended.

(i) *Lines under Construction.* In spite of the great extension of State railways which has taken place since the year 1875 throughout the Commonwealth, there are still, in some of the States, tracts of country of immense area which are as yet practically undeveloped, and in which little in the nature of permanent settlement has been accomplished. The general policy of the States is to extend the existing lines inland, in the form of light railways, as settlement increases, and although it is true that lines which were not likely to be commercially successful in the immediate future have been constructed from time to time for the purpose of encouraging settlement, the general principle that the railways should be self-supporting is kept in view.

(a) In *New South Wales* the lines under construction consist of 312 miles of "pioneer lines" built to afford railway communication over level country suitable for settlement by returned soldiers. In addition there are 200 miles of a more expensive character passing through mountainous districts. The line from Coff's Harbour to Glenreagh (26.40 miles) will form part of the North Coast Railway, which will eventually be connected with Brisbane. The line from Molong to Dubbo (79.94 miles) will assist in the development of the Western system. Other lines under construction are Humula to Tumberumba (28.01 miles); Nimmitabel to Bombala (37.85 miles); Binnaway to Werris Creek (90.88

miles); Coonabarabran to Burren Junction (95.37 miles); Griffith to Hillston (62.18 miles); Barmedman to Rankin's Springs (70.90 miles); Yanco to Griffith (33.00 miles); Gilmore to Batlow (22.00 miles); Canowindra to Eugowra (26.70 miles); Westmead to Dural (1.50 miles); Glenreagh to Dorrigo (44.25 miles); Regent's Park to Cabramatta and Enfield (8.15 miles).

The following lines have been partly constructed, but further work is at present suspended:—Trida to Menindee (155.70 miles); Macksville to Raleigh (20.68 miles); Sydenham to Botany (6.20 miles); a total distance of 182.58 miles.

(b) *Victoria.* In this State the following lines were under construction by the Board of Land and Works on the 30th June, 1920:—5-ft. 3-in. gauge: Beetomba to Cudgewa (9.91 miles); Cavendish to Balmoral (25.29 miles); Koo-wee-rup to McDonald's Track (30.75 miles); Manangatang to Bryden's Tank (14.25 miles); and Alberton to Won Wron (12.25 miles), making in all 92.45 miles.

(c) *Queensland.* In December, 1910, the North Coast Railway Act was passed. Under this Act a series of lines, when constructed, will link up a number of existing lines in such a way that a through line will be obtained from Rockhampton to Cairns, via Mackay and Townsville, a total distance of 630 miles. By the completion of this line it will be possible to travel from Cairns to the southern border of the State at Wallangarra, a total distance of about 1,250 miles. At the same time the Great Western Railway Act was passed. Under this Act provision is made for the extension in a westerly or south-westerly direction of the lines already constructed to Quilpie, Yaraka, Winton, and Dajarra, in such a manner that they will form junctions with a line to be made running north-westerly from Eromanga to Camooweal. These extensions, together with the north-westerly line, will make an aggregate distance of 990 miles to be constructed. With the completion of both these schemes, the railways of this State will be brought into direct communication with each other on both their east and west boundaries. On the 30th June, 1920, the following lines, of an aggregate length of 590 miles, were under construction:—Southern Division—Samsonvale to Dayboro (7 miles); Goondoon to Kalliwa (31 miles); Murgon to Proston (26 miles); Cotton Vale to Soldiers' Settlement (12 miles); Oralla to Injune (33 miles). Central Division—Longreach to Winton (109 miles); Styx to St. Lawrence (19 miles); Yaraka to Powell's Creek (27 miles). Northern Division—Merinda to Bowen Coal Fields (50 miles); Tarzali to Millaa Millaa (8 miles); Mount Molloy Extension (7 miles); Koumala to St. Lawrence (58 miles); Farleigh to Proserpine (68 miles); Bambaroo to Cardwell (48 miles); Moolaba to Tully River (46 miles); Dajarra to Moonah Creek (41 miles). The following lines were under construction during the year, but work was suspended:—Kalbar to Mount Edwards (10 miles); Tara to Surat (50 miles); and Winton to 37-Mile (37 miles); a total of 97 miles.

(d) *South Australia.* In this State the lines under construction on the 30th June, 1920, were as follow:—Clare to Spalding (23.63 miles), and Wandana to Penong (54.00 miles), an aggregate distance of 77.63 miles.

(e) In *Western Australia* the following lines were in course of construction by the Public Works Department on the 30th June, 1920:—Esperance northward (60 miles), and Narembeen to Merredin (53.25 miles), a total distance of 113.25 miles.

(f) *Tasmania.* At 30th June, 1920, the following lines were under construction:—Myalla to Stanley (27.14 miles); Irishtown to Smithton (5.61 miles); and Ulverstone to Ulverstone Wharf (0.62 mile); a total of 33.37 miles.

(ii) *Lines Authorised for Construction.* (a) *New South Wales.* At the 30th June, 1920, the following lines had been authorised for construction but not commenced:—Gilgandra to Collie (21.51 miles); Roslyn to Taralga (15.82 miles); Grafton to South Grafton with bridge over Clarence River (2.34 miles); Tarana to Oberon (16.00 miles); Rock to Pulletop (25.00 miles); Ballina to Buyong (12.50 miles); Richmond to Kurrajong (6.85 miles); a total distance of 100.02 miles.

(b) In *Victoria* the following lines were authorised, but their construction had not been commenced up to the end of June, 1920:—5-ft. 3-in. gauge: Merbein to Yelta (10 miles), and Bittern to Red Hill (10 miles), a total of 20.00 miles.

(c) *Queensland*. In addition to the new lines upon which work has been commenced, Parliament has also authorised the construction of the following parts of the Great Western Railway: Section A, from Quilpie to Eromanga (120 miles); Section B, from Powell's Creek (224 miles); Section C, from 37 miles to Springvale (324 miles); and Section D, from Moonah Creek (217 miles); and on the North Coast Railway, Section E, from Tully River southwards to Cardwell (24 miles). The following lines were also authorised for construction: Branch to Windera (12 miles); Inglewood to Texas and Silverspur (44 miles); Mount Edwards to Maryvale (28 miles); Lanefield to Rosevale (17 miles); Gatton to Mount Sylvia (11 miles); Juandah to Taroom (42 miles); Dirranbandi extension (52 miles); Mundubbera to the Northern Burnett (32 miles); Yarraman to Nanango (16 miles); Brooloo to Kenilworth (10 miles); Many Peaks to northern end of approved line from Mundubbera to Northern Burnett (79 miles); Monte and Rannes to open up Callide Valley and Prairie Land (110 miles); Gargett to Owens Creek (6 miles); Dobbyn to Myally Creek (50 miles); Pearamon towards Boonjee (11 miles); a total of 1,429 miles.

(d) In *South Australia*, Parliament has authorised the construction of lines on the 5-ft. 3-in. gauge (i) from Paringa to Renmark, a distance of 2.50 miles, and (ii) from Long Plains to Red Hill, a distance of 61 miles, and on the 3-ft. 6-in. gauge from Kielpa to Mangalo Hall (26.25 miles). The latter line, however, cannot be proceeded with except by resolution of both Houses of Parliament. The conversion of certain 3-ft. 6-in. gauge lines in the north-west of the State to 5-ft. 3-in. gauge has also been authorised. About 175 miles of line are involved in this scheme.

(e) In *Western Australia* the following lines were authorised for construction up to the 30th June, 1920:—Busselton-Margaret River (37.75 miles), Dwarda-Narrogin (33 miles), and Nyabing-Pingerup (21.75 miles), a distance of 92.50 miles.

(f) In *Tasmania* there were no lines authorised for construction which were not being proceeded with at the 30th June, 1920.

6. **Cost of Construction and Equipment of State Railways.**—The total cost of construction and equipment of the State railways of Australia at the 30th June, 1920, amounted to £220,020,822, or to an average cost of £10,275 per mile open for traffic. Particulars as to the capital expenditure incurred in each State on lines open for traffic are given in the following table:—

STATE RAILWAYS.—MILEAGE AND COST TO 30th JUNE, 1920.

State.	Length of Line Open (Route).	Total Cost of Construction and Equipment.	Average Cost per Mile Open.	Cost per Head of Population.	Mileage per 1,000 of Population.
	Miles.	£	£	£	Miles.
New South Wales (a) ..	5,015.32	79,318,917	15,815	39.09	2.47
Victoria ..	4,214.00	(b) 58,287,897	(b) 13,832	38.75	2.80
Queensland ..	5,685.10	40,005,868	7,037	54.27	7.71
South Australia (a) ..	2,333.19	(c) 19,105,510	(c) 8,188	40.44	4.94
Western Australia (a) ..	3,538.23	18,062,354	5,105	54.05	10.59
Tasmania ..	628.70	5,240,276	8,344	24.19	2.90
All States ..	21,414.54	220,020,822	10,275	41.56	4.04

(a) Exclusive of Federal railways.

(b) Exclusive of cost of line from Murrayville to South Australian border (12.53 miles).

(c) Exclusive of cost of line from Mount Gambier to Victorian border (11.79 miles).

It will be seen that the lowest average cost per mile open, £5,105, is in Western Australia, which is slightly less than one-third of the highest average cost, namely, £15,815 in New South Wales, compared with an average of £10,275 for all the State Government railways. In Western Australia there have been comparatively few engineering difficulties to contend with; moreover, the system was adopted in several instances in that State of giving contractors the right to carry traffic during the period of their contracts, with the result that, at least in all goldfields railway contracts, the cost of construction was considerably lessened.

In the above table the figures relating to cost of construction and equipment do not include the discounts and flotation charges on loans allocated to the railways. This will explain the reason for the differences between the amounts shewn above for Queensland and South Australia and those shewn in the railway reports for these States.

(i) *Reduction of Cost per Mile in Recent Years.* The average cost per mile of the lines constructed lately in the Commonwealth is very much less than the figure given in the above table, in consequence of the construction of light "pioneer" lines, which have already been referred to, and which it was originally considered in New South Wales could be laid down at a cost of £1,750 per mile (exclusive of stations and bridges). It should also be remembered that in the early days of railway construction there were considerable engineering difficulties to overcome, and that labour was scarce and dear. Since 1892 many hundreds of miles of "pioneer" lines have been opened in New South Wales, the average cost ranging from about £2,000 to £7,500 per mile, according to the difficulties met in the country traversed. The lowest cost per mile for any line previously constructed had been that of the line from Nyngan to Cobar and the Peak, the average cost of which, to the end of June, 1919, was £3,786. In Victoria also the cost of construction has been greatly reduced in recent years. The total cost to the 30th June, 1920, of the narrow gauge (2 ft. 6 in.) lines, having a length of one hundred and twenty-two miles, was only £342,142, which gives an average cost per mile of only £2,807. In the other States the cost of construction per mile has been similarly reduced by building light railways as cheaply as possible. Fairly substantial permanent way is laid down with reduced ballast, and, as settlement progresses and traffic increases, the road is strengthened, and the stations and siding accommodation enlarged. The subjoined table gives examples of some of the more expensive lines, most of which were built in the early days of railway construction in Australia:—

STATE RAILWAYS.—EXAMPLES OF LINES CONSTRUCTED AT LARGE CAPITAL EXPENDITURE PER MILE OPEN.

Line.	Gauge.	Length.			Total Cost.	Average Cost per Mile.	Date of Opening.
		Double Lines and over.	Single Line.	Total.			
	ft. in.	Miles.	Miles.	Miles.	£	£	
NEW SOUTH WALES—							
Penrith to Bathurst ..	4 8½	88.50	22.55	111.05	4,133,414	37,221	1876
Sydney to Nowra ..	4 8½	39.90	57.79	97.69	4,467,087	45,727	1887
Homebush to Waratah ..	4 8½	95.71	..	95.71	3,559,024	37,185	1889
VICTORIA—							
Melbourne to Bendigo ..	5 3	100.89	..	100.89	4,952,521	49,088	1862
North Geelong to Ballarat ..	5 3	41.45	11.98	53.43	1,960,540	36,694	1862

The next table gives instances of lines which have been constructed in more recent years at a comparatively small cost per mile.

The average cost per mile of the 458.77 miles comprised in the above table was £41,573, whereas the average cost of the 351.24 miles referred to in the next table was £1,916.

STATE RAILWAYS.—EXAMPLES OF LINES CONSTRUCTED AT SMALL CAPITAL EXPENDITURE PER MILE OPEN.

Line.	Gauge.	Length.	Total Cost.	Average Cost per Mile.	Date of Opening.
	ft. in.	Miles.	£	£	
NEW SOUTH WALES—					
Parkes to Condobolin ..	4 8½	62.75	132,917	2,118	1898
Burren Junction to Pokataroo ..	4 8½	42.55	104,509	2,455	1906
VICTORIA—					
Wangaratta to Whitfield ..	2 6	30.49	40,135	1,316	1899
Wycheproof to Sea Lake ..	5 3	47.89	85,532	1,786	1895
Ultima to Chillingollah ..	5 3	20.14	34,402	1,708	1909
QUEENSLAND—					
Dalby to Bell ..	3 6	23.50	38,567	1,641	1906
Mahar to Jandowae ..	3 6	28.24	61,307	2,171	1914
SOUTH AUSTRALIA—					
Wandilo to Glencoe ..	3 6	9.13	11,740	1,287	1904
Tailem Bend to Pinnaroo ..	5 3	86.55	164,027	1,895	1906

The comparisons afforded in the two preceding tables are subject to certain limitations, inasmuch as the cost is naturally greater in the case of the older lines. Further, the figures given represent the cost of construction only (*i.e.*, exclusive of cost of equipment), and cannot therefore be directly compared with the average cost per mile open given in the table on page 584.

(ii) *Capital Cost of Construction and Equipment, Total and per Mile Open.* The increase in the total capital cost of construction and equipment of Government railways in each State for each year from 1916 to 1920 is shewn in the following table :—

STATE RAILWAYS.—CAPITAL COST OF CONSTRUCTION AND EQUIPMENT, 1916 TO 1920.

Year ended 30th June.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	All States.
TOTAL COST OF LINES OPEN.							
1916	£ 68,825,592	£ 54,428,148	£ 34,787,623	£ 17,236,543	£ 17,118,195	£ 4,798,646	£ 197,194,747
1917	72,006,621	55,652,275	36,476,000	17,687,344	17,466,302	4,913,395	204,202,437
1918	75,050,450	56,535,414	37,301,889	17,974,348	17,760,566	4,979,399	(a, b) 209,602,066

8. **Coaching, Goods, and Miscellaneous Receipts.**—The gross revenue is composed of (a) receipts from coaching traffic, including the carriage of mails, horses, parcels, etc., by passenger trains; (b) receipts from the carriage of goods and live stock; and (c) rents and miscellaneous items. The subjoined table shows the gross revenue for 1916 to 1920, classified according to the three chief sources of receipts. The total of the three items specified has already been given in the preceding paragraph.

**STATE RAILWAYS.—COACHING, GOODS, AND MISCELLANEOUS RECEIPTS.
1916 TO 1920.**

Year ended 30th June.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	All States.
COACHING TRAFFIC RECEIPTS.

(a) Including Refreshment Rooms, 1917, £102,375; 1918, £274,699; 1919, £289,810; and 1920, £426,323. (b) Including Refreshment Rooms, 1920, £105,619.

(i) *New South Wales.* The total earnings for the year 1919-20 amounted to £13,083,847, an increase of £3,125,674 as compared with the previous year. Increases of £1,735,951, £1,223,810, and £165,913 took place in the coaching traffic, goods and live stock traffic, and miscellaneous respectively.

(ii) *Victoria.* In Victoria, traffic receipts shewed increases as compared with previous year of £964,226, £763,333, and £65,136 in coaching traffic, goods and live stock traffic, and miscellaneous respectively.

(iii) *Queensland.* In Queensland, there were increases in 1919-20 of £440,873, £517,131, and £17,549 in respect of coaching traffic, goods and live stock traffic, and miscellaneous respectively.

(iv) *South Australia.* In this State there were increases of £322,912 and £20,015 in coaching traffic and goods and live stock receipts respectively, and a decrease of £7,796 in miscellaneous receipts, the net increase for the year 1919-20 being £335,131 in advance of the receipts for the previous year.

(v) *Western Australia.* In this State the earnings in 1919-20 shewed an increase of £418,979 as compared with 1918-19. There were increases of £127,021, £267,369, and £24,589 in the coaching traffic, goods and live stock traffic, and miscellaneous receipts respectively.

(vi) *Tasmania*. The gross revenue in 1919-20 showed an increase of £104,813 as compared with the previous year. In the coaching traffic and goods and live stock traffic receipts there were increases of £48,434 and £58,245 respectively, and a decrease of £1,866 in the miscellaneous receipts.

The following table shows for the two years 1918-19 and 1919-20 the percentage which each class of receipts bears to the total gross revenue :—

**STATE RAILWAYS.—PERCENTAGE OF REVENUES FROM VARIOUS SOURCES
ON TOTAL REVENUE, 1919 and 1920.**

9. **Coaching Traffic Receipts per Average Mile Worked, and per Passenger-train Mile.**—The subjoined table shows the receipts from coaching traffic per average mile of line worked, and per passenger-train mile, in each State and for all States for the year ended the 30th June, 1920 :—

**STATE RAILWAYS.—COACHING TRAFFIC RECEIPTS PER MILE WORKED,
AND PER PASSENGER-TRAIN MILE, 1919-20.**

State.	Number of Passenger- Train Miles.(a)	Coaching Traffic Receipts.		
		Gross.	Per Average Mile Worked.	Per Passenger- Train Mile.
	No.	£	£	d.
New South Wales	11,136,399	5,714,131	1,150	123.14
Victoria	7,946,315	4,205,420	1,003	127.01
Queensland	3,588,375	1,833,349	325	122.61
South Australia	2,576,017	1,130,659	488	104.11
Western Australia	1,978,379	764,872	216	92.78
Tasmania	472,158	236,763	372	120.34
Total	27,697,643	13,885,194	652	120.31

(a) The returns include the undermentioned mixed-train mileage, which has been divided between passenger-train miles and goods-train miles in the proportion of one-third and two-thirds respectively in the case of the following States :—

New South Wales ..	1,615,909	Western Australia ..	1,026,294
Victoria	2,528,802	Tasmania	709,830

The preceding table shews that, amongst the States, there is a considerable difference in the amount of the average receipts per average mile worked. In this respect New South Wales shews the maximum of £1,150, while Western Australia has a minimum of £216, the average for all States being £652. In the case of the receipts per passenger-train mile the maximum occurs in Victoria with 127.01 pence, and the minimum in Western Australia, 92.78 pence, the average for all States being 120.31 pence.

With regard to the number of passenger journeys in the various States, it will be seen from the table on page 581 *ante* that there has been a preponderance in favour of Victoria for years past, though it was a declining one during the years 1915 to 1918. In the year 1919-20, however, there was an increase over the two previous years.

This preponderance in Victoria is accounted for, to a great extent, by the large number of metropolitan suburban passengers in that State. Of the total number of passengers carried in Victoria in 1919-20, 123,748,299 were metropolitan suburban passengers, i.e., were carried between stations within twenty miles of Melbourne, while in New South Wales the number of suburban passenger journeys between stations within thirty-four miles of Sydney, including the Richmond line, and of Newcastle, including Greta, was 104,311,991. In Sydney a large proportion of the metropolitan suburban traffic is carried on the electric and steam tramways, the number of passenger journeys during the year 1919-20 being 269,255,935. In Melbourne, on the other hand, the number of passengers carried on the two cable tramway systems during the same period was 135,817,199; and the number carried on the St. Kilda-Brighton, Sandringham-Black Rock, Prahran-Malvern, Melbourne-Brunswick-Coburg, Hawthorn, and the North Melbourne tramways, 66,546,841, making a total of 202,364,040. This matter is referred to hereinafter. (See sub-section 14.)

10. Goods and Live-Stock Traffic Receipts per Mile Worked, per Goods-train Mile, and per Ton Carried.—The following table shews the gross receipts from goods and live-stock traffic per mile worked, per goods-train mile, and per ton carried, for the year ended the 30th June, 1920 :—

STATE RAILWAYS.—GOODS AND LIVE-STOCK TRAFFIC RECEIPTS PER MILE WORKED, PER GOODS-TRAIN MILE, AND PER TON CARRIED, 1919-20.

State.	Number of Goods-Train Miles. (a)	Goods and Live-Stock Tonnage.	Goods and Live-Stock Traffic Receipts.			
			Gross.	Per Average Mile Worked.	Per Goods-Train Mile.	Per Ton Carried.
	No.	Tons.	£	£	d.	d.
New South Wales ..	11,698,490	13,293,528	6,807,792	1,371	139.66	122.91
Victoria ..	7,076,150	7,770,694	3,721,122	887	126.21	114.92
Queensland ..	6,855,244	3,790,881	3,000,829	533	147.65	189.98
South Australia ..	2,616,021	2,578,908	1,556,224	672	142.77	144.81
Western Australia ..	2,873,067	2,613,606	1,394,908	394	116.52	128.09
Tasmania ..	794,467	575,169	261,657	412	79.04	109.18
Total ..	31,913,439	30,622,786	16,742,532	787	120.65	131.22

a) The returns include the undermentioned mixed-train mileage, which has been divided between passenger-train miles and goods-train miles in the proportion of one-third and two-thirds respectively in the case of the following States :—

New South Wales ..	1,615,909	Western Australia ..	1,026,294
Victoria ..	2,528,802	Tasmania ..	799,830

From the preceding table it will be seen that the average cost of freight per ton ranges from 109.18 pence in Tasmania to 189.98 pence in Queensland, the average for all States being 131.22 pence.

11. Working Expenses.—In order to make an adequate comparison of the working expenses of the Government railways in the several States, allowance should be made for the variation of gauges and of physical and traffic conditions, not only on the railways of the different States, but also on different portions of the same system. Where traffic is light, the percentage of working expenses is naturally greater than where traffic is heavy; and this is especially true in Australia, where ton-mile rates are in many cases based on a tapering principle—i.e., a lower rate per ton-mile is charged upon merchandise from remote interior districts—and where on many of the lines there is but little back-loading. Further, though efforts have been made from time to time to obtain a uniform system of accounts in the several States, the annual reports of the Commissioners do not yet comprise fully comparable data of railway expenditure.

The following table shows the total annual expenditure, comprising expenses on (a) maintenance of way, works, and buildings; (b) locomotive power—repairs and renewals; (c) carriages and wagons—repairs and renewals; (d) traffic expenses; (e) compensation; and (f) general and miscellaneous charges; and the percentage of the total of these expenses upon the corresponding gross revenues in each State for each year 1916 to 1920:—

STATE RAILWAYS.—TOTAL WORKING EXPENSES, AND PERCENTAGE OF WORKING EXPENSES ON GROSS REVENUE, 1916 TO 1920.

Year ended 30th June.	N.S.W.	Victoria. (a)	Q'land.	S. Aust.	W. Aust.	Tasmania.	All States.
TOTAL WORKING EXPENSES.							
1916	£ 5,661,168	£ 3,997,412	£ 2,745,061	£ 1,545,489	£ 1,511,655	£ 248,651	£ 15,709,436

PERCENTAGE OF WORKING EXPENSES ON GROSS REVENUE.							
1916	% 70.71	% 70.07	% 73.29	% 78.63	% 72.39	% 71.45	% 71.87
1917	70.59	69.78	78.14	75.89	77.15	84.93	72.95
1918	66.34	67.83	84.75	74.93	79.90	77.92	71.85
1919	69.33	66.53	92.62	76.51	83.70	80.87	74.26
1920	73.15	73.66	87.16	73.62	87.29	77.08	76.59

(a) Including amounts paid for special and abnormal charges.

(i) *New South Wales.* In this State the total working expenses in 1919–20 amounted to £9,570,983, an increase of £2,666,533 as compared with the previous year. Part of this amount is due to the increase of 14.54 per cent. in the train mileage over that of the previous year (2,899,687 miles). There were several increases of wages to the staff under awards of the Court of Industrial Arbitration and also large increases in the prices paid for coal and other materials, all of which accounted for a sum of £1,427,446.

(ii) *Victoria.* In Victoria there was an increase of £1,779,249 in working expenses. This was partly due to increases in wages made by the Railway Classification Board, repayment to capital account in respect of sidings provided for the Victorian Wheat Commission and increased prices paid for coal, all of which accounted for a sum of £883,276.

(iii) *Queensland.* In this State the working expenses increased by £632,947, from £3,690,445 in 1918-19 to £4,323,392 in 1919-20. There were substantial increases to staff due to a new award (£290,861) and automatic increases (£32,500), as well as increases in the cost of fuel and other materials; but the main factor was the cost of working the Locomotive Branch, which was responsible for £350,638, or 55 per cent. of the total. The sum of £180,084 represented the excess over last year of repairs and renewals (including wages) to engines, carriages, and wagons. These repairs were long overdue, and had conditions been normal this expenditure would have been spread over a number of years commencing shortly after the outbreak of war.

(iv) *South Australia.* In South Australia the working expenses in 1919-20 shewed an increase of £177,727 over 1918-19, viz., from £1,829,634 to £2,007,361. This increase was due to the higher prices of stores used in maintenance, and for traffic purposes (£70,000), together with increased payment for wages under the Government Workers Tribunal award and the general application of the minimum wage.

(v) *Western Australia.* In this case the expenditure in 1919-20 was £432,882 greater than in the previous year. The train mileage run was 594,819 more than in the previous year, and the locomotive and rolling stock charges, maintenance, and traffic expenses were greater, mainly owing to the higher cost of stores.

(vi) *Tasmania.* In 1919-20 the working expenses were £65,596 higher than in the previous year. This was mainly owing to the increased salaries and wages paid, higher cost of material of all descriptions, and increase in train mileage of 158,735.

In the preceding table it will be observed that the percentages of the total working expenses to the total gross earnings of the State railways have varied but slightly during the period 1915 to 1920, the last year shewing the maximum rate, 76.59 per cent.

(vii) *Working Expenses per Average Mile Worked and per Train-mile Run.* The following table shews the working expenses per average mile worked and per train-mile run in each State for the years 1916 to 1920 :—

STATE RAILWAYS.—WORKING EXPENSES PER AVERAGE MILE WORKED AND PER TRAIN-MILE RUN, 1916 TO 1920.

Year ended 30th June.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	All States.

14. **Traffic Conditions.**—Reference has already been made to the difference in the traffic conditions on many of the lines of the Commonwealth (see sub-sections 9, 10, and 11 hereof). These conditions differ not only in the several States, but also on different lines in the same State, and apply to both passenger and goods traffic. By far the greater part of the population of Australia is confined to a fringe of country near the coast, more especially in the eastern and southern districts. A large proportion of the railway traffic between the chief centres of population is therefore carried over lines in the neighbourhood of the coast, and is thus, in some cases, open to sea-borne competition. On most of the lines extending into the more remote interior districts traffic is light; the density of population diminishes rapidly as the coastal regions are left behind; and there is a corresponding diminution in the volume of traffic, while, in comparison with other more settled countries, there is but little back-loading.

As an indication of the different traffic conditions prevailing in the several States, the following table is given shewing the numbers of passenger journeys and the tons of goods carried per 100 of mean population and per average mile worked in each State during the financial year 1919-20:—

STATE RAILWAYS.—PASSENGER JOURNEYS AND TONNAGE OF GOODS AND LIVE STOCK, 1919-20.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	All States.
--------------	--------	-----------	---------	----------	----------	------	-------------

PER 100 OF MEAN POPULATION.

Passenger journeys	No.	5,651	8,907	3,837	4,835	5,512	1,042	6,054
Goods and live stock	Tons	655	516	516	546	782	264	579

PER AVERAGE MILE OF LINE WORKED.

Passenger journeys	No.	23,087	31,953	5,003	9,867	5,203	3,570	15,052
Goods and live stock	Tons	2,676	1,852	672	1,113	738	905	1,438

Particulars of the actual numbers of passengers and tons of goods and live stock carried have already been given (see sub-section 2 hereof).

(i) *Metropolitan and Country Passenger Traffic.* A further indication of the difference in passenger traffic conditions might be obtained from a comparison of the volume of metropolitan, suburban, and country traffic in each State. Particulars are, however, available only for the States of New South Wales and Victoria. The subjoined table shows the number of metropolitan and country passengers carried in each of the States mentioned and the revenue derived therefrom during the year 1919-20 :—

STATE RAILWAYS.—METROPOLITAN, SUBURBAN, AND COUNTRY PASSENGER TRAFFIC, 1919-20.

Particulars.	Number of Passenger Journeys.			Revenue.		
	Metropolitan.	Country.	Total.	Metropolitan.	Country.	Total.
				£	£	£
N.S.W. ..	1,104,311,991	10,342,669	114,654,660	1,690,621	3,446,626	5,137,247
Victoria ..	1,612,748,299	10,263,863	134,012,162	1,584,363	2,195,888	3,780,251

(a) Within 34 miles of Sydney and Newcastle, including the Richmond line.

(b) Within 20 miles of Melbourne.

From this table it will be seen that the number of passenger journeys in country districts in Victoria was less than the corresponding number in New South Wales, while the number of metropolitan passenger journeys in Victoria was greater than in New South Wales, although in the latter State both Sydney and Newcastle are included. In Sydney a larger proportion of the suburban traffic is carried by the tramway systems than in Melbourne. The Sydney ferries also carry a large number of suburban passengers (see § 3. Tramways).

In previous issues of this work reference has been made to the scheme for the electrification of the suburban lines running out of Melbourne. Part of this scheme was brought into operation on the lines between Sandringham and Essendon, via Melbourne, on the 28th May, 1919, followed by the St. Kilda line on the 31st August, and the Port Melbourne line on the 26th October. It may be mentioned that the Melbourne suburban lines have a total length of 195.78 route miles, of which approximately 42 miles have been electrified. In Sydney, a Metropolitan Railway Construction Branch of the Railway Department has been created to deal specially with electrical transport in the city area. The Minister has approved of the construction of an underground city railway, and plans have been prepared and a commencement made with the preliminary works. The preliminary work in the location of a system of electric railways for the eastern, western, and northern suburbs has also been in hand, and good progress has been made with the remodelling of the tracks and the alteration to platform walls and lifting of floors of station buildings on the section between Sydney and Loftus.

The following lines have been converted and opened for traffic on dates as shewn, viz. :—Williamstown, 29th August, 1920 ; Coburg, 2nd December, 1920 ; Reservoir, 15th June, 1921 ; Heidelberg, 31st July, 1921 ; and the Essendon line extended to Broadmeadows on 4th September, 1921. It is expected that the lines to Dandenong and Frankston will be opened in 1922, whilst the Ringwood line and branches should be converted about the middle of 1923, when the scheme will be complete.

(ii) *Goods Traffic.* The differing conditions of the traffic in each State might also, to some extent, be analysed by an examination of the tonnage of various classes of commodities carried, and of the revenue derived therefrom. Comparative particulars regarding the quantities of some of the leading classes of commodities carried on the Government railways are available for all the States ; corresponding information regarding the revenue derived from each class of commodity is not, however, generally available in a comparable form. In this connexion it may be stated that the following resolution was passed at the Interstate Conference of Railway Commissioners held in Melbourne in May, 1909 :—"That in view of the variations in the character and classification of the goods traffic in the different States, the subdivisions of tonnage carried and revenue in each State shall be those which best suit local conditions."

The following table shows the number of tons of various representative commodities carried, and the percentage of each class on the total tonnage carried during the financial year 1919-20 :—

STATE RAILWAYS.—CLASSIFICATION OF COMMODITIES CARRIED, 1919-20.

(a) Exclusive of 283,364 tons of coal on which only shunting and haulage were collected. (b) Coal, stone, gravel, and sand. (c) Up journey only (to coast). (d) Flour only. (e) Included in all other commodities. (f) Sugar-cane.

15. *Passenger-Mileage and Ton-Mileage.*—In earlier issues of the Year Book reference has been made to the resolution on the subject of passenger-mileage and ton-mileage statistics passed at the Interstate Conference of Railway Commissioners held in Melbourne in May, 1909; and to the Report [Cd. 4697] on the same subject by a Committee appointed by the President of the Board of Trade in the United Kingdom (see Year Book No. 10, p. 654).

In the Commonwealth, information regarding "passenger-miles" and "ton-miles" is available, either wholly or in part, for four of the States only, viz., New South Wales, South Australia, Western Australia, and Tasmania, but is not available at all for either Victoria or Queensland. Of the States which give particulars of the nature indicated, New South Wales furnishes the information in a classified form according to class of passengers and nature of commodities carried. South Australia supplies particulars for all classes of passengers and of goods together, and Tasmania supplies particulars for all classes of passengers together and a classification of nature of commodities carried. Western Australia furnished particulars as to ton-miles for the years 1907 to 1912, but no records were furnished for the period 1913 to 1917.

(i) *Passenger-Miles.* Particulars for the whole of the Commonwealth period regarding total "passenger-miles" are available for one State only, namely, Tasmania. For New South Wales, to the end of 1909-10, particulars are available for suburban and extended suburban traffic only—i.e., for all stations within 34 miles of Sydney (including the Richmond line), and of Newcastle (including Greta), but since that date all passenger traffic is included. For South Australia particulars are available for each year since 1904. No particulars are available for other States. In the tables given below

the average number of passengers carried per "train" is obtained by dividing the number of "passenger-miles" by the number of "passenger-train-miles." Similarly, the "density of traffic" is obtained by dividing the number of "passenger-miles" by the "average miles worked."

STATE RAILWAYS.—SUMMARY OF "PASSENGER-MILES," 1916 TO 1920.

Year ended 30th June—	Passenger Train Mileage.	Number of Passenger Journeys.	Total Passenger-miles.	Amount Received from Passengers.	Average Number of Passengers carried per Train. (ii) *Ton-miles.* Particulars regarding total "ton-miles" are available for each year since 1901 for the States of New South Wales, South Australia, and Tasmania. Corresponding particulars for Western Australia are available for the years 1907 to 1912, and for the years 1919 and 1920, but not for the intervening years. The average freight-paying load carried per "train" is obtained by dividing the total "ton-miles" in the fourth column by the "goods-train mileage" in the second column. In New South Wales the tonnage carried is exclusive of coal on which only shunting and haulage charges are collected, and the amount of earnings specified excludes terminals. In South Australia and Tasmania terminals are included.

STATE RAILWAYS.—SUMMARY OF "TON-MILES," 1916 TO 1920.

Year ended the 30th June—	Goods Train Mileage.	Total Tons Carried.	Total "Ton-miles."	Earnings.	Average Freight-paying Load carried per "Train."	Average Miles per Ton.	Earnings per "Ton-mile."	Density of Traffic per Average Mile Worked.

(a) Exclusive of tonnage on which only shunting and haulage charges are collected.

(b) Exclusive of live stock.

(iii) *Classification of Commodity Ton-mileage.* As previously mentioned, New South Wales and Tasmania are the only States for which particulars specifying the ton-mileage and the earnings per ton-mile for various classes of commodities are available.

The subjoined statement gives particulars for the last financial year in respect of New South Wales. Miscellaneous traffic consists of timber, bark, bricks, drain-pipes in six-ton lots, and cement in full truck loads, agricultural and vegetable seeds in five-ton lots, and traffic of a similar nature. A and B classes consist of lime, vegetables, tobacco leaf, caustic soda and potash, copper ingots, fat and tallow, water and mining plant in six-ton lots, leather in one and three-ton lots, agricultural implements in five-ton lots, and other traffic of a similar nature. The table does not include 283,364 tons of coal on which only shunting and haulage charges were collected, nor does it include £117,158 for haulage, tonnage dues, etc.
